American Railroad Journal.

Saturday, May 25, 1861.

Share and Money Market.

The Share Market the past week has been steady, with some advance in Illinois Central, and a few other stocks. There is but little Central stock in the market, which has been largely oversold. Considerable quantities went abroad at the recent low prices. The traffic of the road is fair and is not likely to be lessened by the war. All Western Railroads are now suffering severely from a deranged currency issued by the Free Banking System of several of the Western States. A large portion of the paper money afloat is at from 30 to 50 per cent. discount. This currency constitutes the almost only medium of circulation in the West, and the unwillingness to take, or part with it at the present low prices, is a great check upon all kinds of business and is a serious draw-back upon sending produce to market. A very large number of these banks will probably be wound up. The embarrassments created by this currency has seriously reduced the earnings of all Western roads.

Money continues abundant, there is but little call for it except for the expenses of Government, and these have had no perceptable influence thus far, in putting up rates.

Cleveland and Pittsburg Railroad.

This company gives notice that the time for funding the unsecured indebtedness of the Cleveland and Pittsburg Railroad Company, according to the proposition contained in the last report of the Company, is limited to July 1, 1861. The holders of the River Line Bonds, Income Bonds, Dividend Bonds, and Bills Payable of said Company, are notified to present them to be exchanged for the new bonds of the Company, of the denomination of $500, now ready for delivery, at the office of the Company, in Cleveland, or to H. C. Kingsley, at No. 25 William st., New York.

New York Central Railroad.

The freight business of this road was never so large as at present—since the Canal opened. The company find a material increase of trade from the Southern difficulty. This trade is light however, compared with that from west to east. During the month of May, so far, an average of 150 cars of freight have been sent each day from Buffalo. As many more cars are laden at Suspension Bridge and the way stations on the Central, making perhaps 300 cars per day that go to Albany and Troy. The company are doing all that can be done in freight. All freight cars are in requisition, and more might be profitably employed.

The passenger trade is fair, though not unusually large for the season. The tracks and bridges of this road, throughout its entire line, are in excellent order, and the same may be said of its cars and engines. A favorable winter has left the locomotives in good condition, and the trains make first rate time.—*Rochester Union.*

Oils for Lubricating Purposes.

We copy the following extract from the "Oil Circular" of F. S. Pease, of 61 Main st., Buffalo:

Natural oils for lubricating purposes are on the decline, these oils, when first used, seem to work very well, but as soon as they take hold of the iron they are almost certain to destroy it, to heat and cut badly. They contain but a small proportion of heavy oil. The theory which we have always advanced in regard to oils for lubricating holds good in every case. No volatile oil, or any oil made by destructive distillation will answer. An oil that will cut the gum (as they say) is the worst recommendation that can be given it, and this is claimed by all advocates of natural or coal oils. Oils that decompose at a low heat, will not answer for machinery, it makes no difference whether the heat is occasioned by long and continued use, as in heavy bearings, the effect on the oil is the same in the end. Oil to lubricate must hold the bearings and form a body between the two bubbing surfaces, and not be affected or changed by a very great degree of heat, even of melted lead.

Petersburg, Va., Railroad.

The annual report of this company for the year 1860, shows a falling off of nearly $17,000 in gross receipts as compared with the previous year, three-fourths of which is in the passenger department, caused by the interruption of travel arising out of the disturbed condition of the country during the latter part of the year. The aggregate debt of the company has been reduced to $99,266.

Northern, N. H., Railroad.

The gross receipts of this road for the year ending March 31, were $364,397 64. Total net earnings $156,615 62. Two dividends have been paid during the year. The outstanding Bonds are as follows: Due April 1, 1864, $43,700. April 1, 1874, $192,100.

The Contingent Fund now consists of cash and cash assets, which are regarded as good and available beyond question, and amounts to $50,491 44.

The stocks of fuel and material are large, though less than last year. From a comparison of the cost of fuel used the last two years with previous years, it appears that no disadvantage has accrued to the Company from having a full supply on hand in suitable sheds.

The business of the road has fallen off considerably during the last quarter of the past year, and it will probably continue depressed during the coming year, under the present state of business throughout the country.

Pacific Mail Steamship Company.

The following is the annual report of the President of the Pacific Mail Steamship Company:

OFFICE PACIFIC MAIL S. S. Co.,
New York, May 14th, 1861.

In conformity with custom, I beg leave respectfully, on behalf of the Board of Directors, to submit for your intelligent consideration, a full statement of the affairs of the Company on the 1st of May, 1861.

The surplus on the 1st November was		$757,932 14
Deduct dividend paid November 15th		400,000 00
Balance remaining		$357,932 14
The earnings of the Company during the past six months, deducting ordinary running expenses and repairs, amount to within a fraction of 12 per cent. on the capital, or	$479,973 70	
From this is to be deducted extraordinary expenses—*i. e.* the dispatch of the St. Louis to the Pacific.	$44,000 00	
The payment to Mr. C. Vanderbilt of the final instalments for the purchase of his steamers & good-will on the Pacific.	105,050 67	
	149,050 67	
Net earnings of the Company for the past six months 8¼ per cent., or		330,923 03
Balance remaining		$688,855 17
Of this amount there has been passed to profit and loss (and for reasons which will be explained immediately)		487,572 00
Final balance remaining May 1, 1861, as per balance-sheet hereto attached, which does not include the earnings on the Pacific for the month of April, or the charters of the Atlantic and Baltic		$201,283 17

Independent of the mail subsidy, the route from San Francisco, via Oregon, to Puget's Sound, had been for many years occupied by the company at a loss, yet Congress, utterly disregarding the obligations of ordinary good faith, and against the protest of the Postmaster-General Holt, passed an act, June 21, 1860, requiring the Post Office Department to withdraw the Oregon and Puget's Sound mails from the ocean route, so soon as certain interior stage lines should be established. This was done November, 1860, though our contract for the conveyance of said mails had nearly a year longer to run. At some future time the company will, no doubt, receive the balance of its mail money, amounting to $90,000, with damages.

Upon losing the mail compensation the company withdrew from this unprofitable route. It is true that the business was improving, and might have been made to pay, if controlled by ourselves alone, and with new steamers; but competitors, with superior steamers to our own, had obtained a strong foot hold on it, and expected at least to share the trade.

We did not consider that, in any event, a profitable business for both lines could be created; and, therefore, offered to sell to the other our good-will and steamers—Panama, Columbia, Cortez, Sierra Nevada, Republic, and Fremont—for the sum of $250,000. The offer was rejected, and we at once entered into a vigorous opposition, with the aim of compelling the other line to accept it, or to retire from the route, which we had been the first to occupy and build up a business on at considerable pecuniary sacrifice. While this opposition was in progress, certain other responsible parties (Messrs. Holladay and Flint) offered to purchase the steamers, etc., upon the terms just named, and the transfer of property was made in March. Our interests in the future use of the steamers sold have been in all respects protected.

These steamers stood on the Company's books at a valuation in the aggregate, of $561,572
Wherefore, having been sold, as explained, for 250,000

There remained a deficit of $311,572

which was made good from the cash balance on hand. The steamer J. L. Stephens broke down at sea last Fall, and was towed to San Francisco and condemned. Her valuation on the books was $191,000, which has been reduced to what she will break up for, $35,000. This left a deficit of $156,000, which, together with $20,000 for depreciation of the Washington, also condemned, was made good from the cash balance on hand. We have then deducted from the surplus—

Deficit resulting from sale of the six steamers named	$311,572
Deficit resulting from condemnation of J. L. Stephens	156,000
Deficit resulting from condemnation of Washington	20,000
Total	$487,572

which explains and corresponds to the statement in the first page of this Report.

The wisdom of the Company's policy in thus preserving its capital sound, and exchanging unavailable assets for the reverse, must recommend itself to every stockholder whose interest is held as an investment.

The table below will show the course of our business for the last six months, as compared with the previous:

From May, 1860, *to November*, 1860.	
Passengers outward	7,068
" inward	4,750
Treasure inward	$20,272,423 36
Freight outward, tons	4,609
" inward, "	350
From November, 1860, *to May*, 1861.	
Passengers outward	6,629
" inward	4,356
Treasure inward	$20,930,562 09
Freight outward, tons	4,885½
" inward, tons	600

There is no question but that the commercial derangement consequent upon the condition of the country will diminish our receipts. Apprehension of seizures by privateers will produce a similar effect, and may also lessen travel.

I feel satisfied, however that this apprehension will be only temporary; the efficient blockade of ports in seceded States in contemplation; the activity of our cruisers; the measures adopted, and in course of adoption, by the Government, for the protection of our line by the stationing of war vessels at San Francisco, Acapulco, Panama and Aspinwall, and in and about the West India Islands; together with the precautions against, and preparations for, attack, on our part; and, finally, above all, the speed and armament of our steamers and reliability of our officers will soon remove it, by removing its cause.

The company's contract with the Government for the carriage of the mails will expire on the 1st of July next. Congress, at its last session, authorized the service to be thereafter contracted for with the Overland Company, but the Government, it is believed, will find that the public interest will require a continuance of mail facilities via the Ocean route as well as the other.

The North Atlantic Steamship Company, in which the Company is interested in the ratio of four-ninths, sold the Adriatic in February last. Our proportion of the sale amounted to $178,333 35, which sum appears in our cash assets. The remaining steamers (Baltic and Atlantic) have lately been profitably employed in the service of the Government; their speed and strength will doubtless secure their continued use, and perhaps sale.

In pursuance of the policy heretofore indicated, of improving our fleet, the Company contracted, last Fall, for a first-class steamer; we have already paid $175,620 on account of her cost, and have now under consideration the expediency of building a second.

The Board has this day declared a dividend of 5 per cent. for the past six months, to be paid out of the earnings of the Company, payable to the stockholders on the 22d inst.; and it is further recommended that, hereafter, if practicable, quarterly instead of semi-annual dividends be made.

ALLAN MCLANE, President.

Statement of the Pacific Mail Steamship Company.

Atlantic and Great Western Railway.

REPORT FROM T. W. KENNARD, ESQ., C. E.

NEW YORK, *March 9th*, 1861.

MY DEAR SIR:—You will expect to hear from me, and in addressing you it gives me great pleasure to be able to present the position and prospects of our enterprise in a favorable light. I have delayed writing till I am in a position to do so fully, and now, after inspecting the entire line, after having seen the Directors of each corporation, and making a thorough investigation of all books and papers, I beg to lay before you the result. In the first place, I found the works of our road which is open for traffic between Jamestown and Salamanca in very good order, proved by the fact that our trains fully keep time, and that there has not been a single instance of an engine or carriage wheel leaving the track. The road, with the exception of about 200 yards which has slightly sufferred by the late severe floods, is perfectly consolidated, and we are in a position to run at any speed over it. I have ordered the short length referred to to be raised eighteen inches with ballast, which will be done during the present week; the floods this year have been higher than ever known, and I consider all our works have stood the test remarkably well. The works on the section of our road between Jamestown and Columbus are to all intents and purposes completed, with the exception of track, which I propose to lay down immediately. It is much to be regretted that considerable delay has occurred here—owing to a mistake in invoicing, a portion of our rails have been detained in the Customs, but these, by giving security, might have been removed, and my first care will be to accomplish this object. With the rails in question the line can be put in operation in twenty days, when we shall at once secure a large amount of traffic. I consider we are losing £80 per day by this delay. The traffic we seek in this enterprise is a through traffic of the West, and this of course we cannot obtain till we make connection with the Western roads. I do not from this wish you to infer that we shall not get any return for the money expended till such western connections are made. On the contrary, I am of

opinion that we shall obtain a net income of £400 weekly the moment we reach Columbus, which will more than pay interest upon all bonds issued. The contract for works being completed, with the exception of a few trifles, I have arranged with our contractors all claims for extras, which will not exceed £800, but as I have deducted a larger amount than necessary for completion, the works will pass into the hands of the company rather under than over the contract price. So much for the present; now as to the future.

Before investing money in a railway, there are three points embracing the whole question of profit and loss, which cannot be too clearly investigated; and as it is my desire and wish to lay everything in this enterprise clearly before you, I propose to treat the following points separately and in detail.

Firstly, The Cost of Works.
Secondly, Revenue.
Thirdly, Administration.

First: assuming we complete the line to Akron, we have the construction of 126 miles of railway before us, for which I send you in a separate sheet —an estimate in detail; the estimate is based on the actual cost of sixty miles completed, the cost of which I also send you in detail. You cannot possibly have better evidence before you. A fact is better than all argument; and I have always considered the construction of this first section a matter of the greatest importance, as it would give the clearest possible proof as to this first and very important point.

Second: on the completion of the works contemplated, Akron and Cleveland will be our Western termini, and New York *via* Salamanca and New York and Erie Railway our Eastern Depot. The comparative distances between these great points.

The present traffic from Akron is not less 3,000 tons per week, see books and papers enclosed, and from Cleveland vastly more. With an advantage of fifty-five miles in our favor it is but reasonable to assume that we shall obtain by far the largest share of Akron business, especially as there will be no change of gauge. At Cleveland we shall stand on an equal footing with the Lake Shore Railway as far as distance is considered, but vastly superior to them in other respects. Our line being broad gauge nine-tenths of all cattle will take our road. Our line being in direct communication with the port of New York by the Long Dock, grain in bulk, will as a matter of course be sent on our line. In addition to this the new discovery of oil must not be overlooked, if we could only believe what we see, and only a tenth part of what we hear, this traffic alone would pay the whole of cost of our road in three years. In Pennsylvania they are now raising at least 2,000 barrels per day, and at Warren, two miles from our line, about 300 barrels per day. And for every well now in operation they are sinking ten, all of which will be at work in three months, and as the supply seems never to fail, it is very possible this traffic may realize a fabulous amount. I do not however wish to consider this in any other light than an extra, I prefer to base our traffic upon what is above ground, that we can all see, and that what our greatest opponents cannot deny. Our traffic from Akron and Cleveland can be proved to a certainty. We shall be a continuation of the Erie Railway with, in my opinion, an equal traffic per mile; the traffic on that line is at the present time about £65 per mile per week, one-fourth of this would more than pay the interest on our whole bonded debt.

Third: we have the administration of the road to consider both during construction, and, ultimately, when the whole shall be in operation. During construction, the whole power is concentrated in the engineer, and being myself that individual, I need only say I shall do my duty. The monthly statements I shall forward (see form enclosed) will show the exact state of the work, money spent, and the per centage of work done for the same. It is my intention to make Greenville my head-quarters, and to visit the entire works at least once in each fortnight. It is also my intention to complete the telegraph through the entire line at once, so that I shall receive every day a report on the entire line from my assistant engineer.

Upon the completion of the railway under the new transfer of contract, our English friends will have a clear majority of stock, consequently it will be their own fault if it is not properly administered.

Yours faithfully,
T. W. KENNARD,
Eng'r-in-Chief of the Atl. & G't Western R'way.
W. EVANS, ESQ., *Director of the Atl. & G't West'n R'way Co., resident in London.*

Pittsburg, Fort Wayne and Chicago R. R.

LAW OF PENNSYLVANIA IN REFERENCE TO RE ORGANIZATION OF THE COMPANY.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania, in General Assembly met, and it is hereby enacted by the authority of the same,* That, in case the Railroad of the Pittsburg, Fort Wayne and Chicago Railroad Company, or any part thereof, shall be sold by virtue of any mortgage or mortgages, or deed or deeds of trust, either by foreclosure or other proceedings in law, or in equity, or by advertisement, in pursuance of a power or authority in such mortgage or mortgages, or deed or deeds of trust contained, the persons for or on account of whom the purchase or purchases, at any such sale or sales shall have been made, or the survivors of them, shall be, and they are hereby constituted a body politic and corporate, in deed and in law; and they shall meet in the city of Pittsburg, within thirty days after the conveyance or conveyances shall have been delivered to such purchasers, and elect Directors; notice of such meeting and election, signed by purchasers at said sale or sales, or the survivors of them, and published in two daily papers in said city, for five days previous to the said meeting, having been given; at which first election, all the persons for or on account of whom the said purchase or purchases shall have been made, shall be entitled to vote, in the proportion of one vote to each one hundred dollars of par value which they may have contributed in bonds entitled to distributive shares, in the proceeds of such sale or sales, or in cash, towards the said purchase or purchases; and all persons holding bonds secured by any mortgage or trust deed, prior in lien to those by virtue of which such sale or sales shall have been made, shall also be entitled to one vote for every one hundred dollars of the par value of the said bonds by them respectively held; and the said election may be made by such of the aforesaid persons as may attend the same, or be represented thereat by proxy; and the said meeting may adopt such regulations and by-laws as they may deem proper for the organization of the said corporation; and the number of directors may be then fixed, subject to be afterwards altered at any annual meeting of the stockholders; and the directors so elected, shall continue such until the next annual meeting, the time for which may also be fixed as aforesaid; and at least three-fourths of the directors of the said company shall be residents of the States within which said road is located; and it shall be the duty of such corporation, within thirty days after its organization, to make a certificate thereof, under its common seal, attested by its President and Secretary, specifying the date of such organization, and the names of its directors, and to transmit the said certificate to the Secretary of the Commonwealth, at Harrisburg, to be filed in his office, and a certified copy thereof shall be evidence of the existence of the said corporation, and of its formation pursuant to this Act.

SEC. 2. The said corporation, formed pursuant to this Act, shall have power to acquire, by purchase or otherwise, and to hold, use and enjoy the Pittsburg, Fort Wayne and Chicago Railroad, and each and every part thereof, whether situate within or without this Commonwealth, and all equipment, machinery, tools and materials, all lands, property, franchises, rights, and things connected therewith, or necessary or convenient to the use thereof; together with the tolls, income, rents, issues and profits of the same, and shall have power to maintain and operate the same, as fully as might have been done by the Pittsburg, Fort Wayne and Chicago Railroad Company, and to erect new depots, stations and other buildings, and connect the same with the said railroad, and to acquire and hold lands for the said, and other needful purposes; and the said corporation shall also possess all the faculties, powers, authorities, immunities, privileges and franchises, at any time held by the said Pittsburg, Fort Wayne and Chicago Railroad Company, or by any of the corporations heretofore consolidated into the said company, or conferred on the said company, or the said corporations, or either of them, by any act or law of this Commonwealth, or of the States of Ohio, Indiana or Illinois, and shall have power and capacity to hold and exercise within each and every of the said States, all the said faculties, powers, authorities, privileges and franchises, and all others which may hereafter be conferred upon it, by or under any law of this Commonwealth; and to hold meetings of stockholders and directors, and do all corporate acts, and all things within any of the aforesaid States, as validly as it might do the same within this Commonwealth; and the said corporation, formed pursuant to this Act, shall also have power to create and issue capital stock in shares of one hundred dollars each, and to such aggregate amount as it shall deem necessary to carry out the objects of this Act, and may establish preferences in respect to dividends, in favor of one or more classes of the said stock, in such order and manner, and to such extent, as it may deem expedient, and may confer on holders of any bonds which it may issue, or assume to pay, such rights to vote at all meetings of stockholders, not exceeding one vote for every one hundred dollars of the par amount of the said bonds, as may by it be deemed advisable; which rights, when once fixed, shall attach to and pass with such bonds, under such regulations as the by-laws may prescribe, to the successive holders thereof; but shall not subject any holder to any assessment by the said company, or to any liability for its debts, or entitle any holder to dividends; and the said corporation may make and issue its bonds of not less denomination than one hundred dollars each, payable at such times and places, and bearing such rates of interest, as it may deem expedient, and may hypothecate or sell such bonds within or without this Commonwealth, at such prices as it may deem proper; *Provided, nevertheless,* That, except within six months after the organization of the said company, no bonds shall be created, nor shall any debt be contracted exceeding in the aggregate at any one time, five per cent. on the par amount of the capital stock of the said company, unless the same shall have been previously authorized by a vote of two-thirds in interest of the stock and bondholders, at a meeting duly held; and the said corporation may secure the payment of any bonds which it may make, issue, or assume to pay, by a mortgage or mortgages, or deed or deeds of trust, of its railroad, or of any part or parts thereof, or any of its real estate, and may include in any such mortgage or mortgages, or deed or deeds of trust, any locomotives, cars, and other rolling stock or equipments, and all machinery, whether then held or thereafter to be acquired, for the constructing, operating, repairing or replacing of the said railroad, or any part thereof, or any of its equipments or appurtenances; all of which property and things so included, and all fixures or appurtenances, whether then possessed or thereafter to be acquired, shall be subject to the lien and operations of every such mortgage or deed of trust, and may also include all franchises held by the said corporation, and connected with or relating to the said railroad, and all corporate franchises of the said company, which said franchises are hereby declared in case of sale, by virtue of any such mortgage or mortgages, or deed or deeds of trust, to pass to the purchasers, so as to enable them to form a cor-

poration in the manner herein prescribed, and to vest in such corporation all the faculties, powers, authorities, immunities, privileges and franchises, conferred by this Act; and the said corporation may do all things which may be necessary or convenient to carry into full effect the powers hereby granted, and the powers hereby conferred, may be exercised by the directors thereof.

SEC. 3. That the said corporation, formed pursuant to this Act, shall within six months after its organization, likewise have power to assume such debts, liabilities and claims against the said Pittsburg, Fort Wayne and Chicago Railroad Company, and make such settlements or adjustments with any of the stockholders, or other parties interested therein, as it may deem proper and for the said purposes to use such portion of the stock or bonds hereby authorized to be created, and in such manner as it may deem necessary.

SEC. 4. That full authority is hereby given to the corporate authorities of the several county, township, city, village, or other municipal corporations, owning or holders of stock in the said company, and to all persons holding the same in any fiduciary capacity, to accept and receive under the re-organization, such portion of the new stock as may be apportioned to the stock so owned and held.

Approved March 31, 1860.

Journal of Railroad Law.

STOCK OF THE OHIO AND MISSISSIPPI RAILROAD COMPANY: LIMITATION OF CALLS UPON: NOTICE REQUIRED BY CHARTER: REPRESENTATIONS OF COMPANY'S AGENT.

A suit was brought by the Ohio and Mississippi Railroad Company against one Andrews for two instalments of a stock subscription. The defence was that the charter required the place of payment and the amount or per cent. to be designated in the call; which had not been done; that the notice requiring the payment was published but once, instead of being published continuously for six weeks; and that false representations were made by the company to the defendant by which he was induced to make the subscription.

At the trial a verdict and a judgment was rendered for the plaintiffs, from which an appeal was taken to the Supreme Court of Indiana. The appellate tribunal affirmed the judgment rendered below, and delivered in substance the following opinion.

HANNA, J.—It is said that in the action of the Board, on call, no time, no place, or per cent. of payment was fixed. To this it is answered by the opposite party, that the charter limited the amount that could be demanded *per annum* to fifteen per cent., of which ten had already been called; that *in the notice*, and not the call, it is required, by the charter, that the amount, time, and place of payment should be specified. We think, under the circumstances the call was sufficiently explicit.

The company, in order to prove notice of the calls, introduced copies of them verified by the affidavit of one styling himself a clerk or bookkeeper in the office of the newspaper in which the publication was stated to have been made. Two objections were then made, which we will notice. First, that the charter authorized calls by giving sixty days notice in some newspaper; and that this notice was inserted but a single time whereas it should have been continuously. And second, that, if the publication was proper, the proof of it was insufficient, because it could not be made by affidavit.

As to the latter objection, the statute (2 R. S. p. 94) provides as to the proof of advertisements in certain cases, and the case of Underthank *vs.* The Henry etc. Turnpike Company seems to recognize this same mode of proof as sufficient in giving notice of calls of instalments.

As to the former objection, the charter requires sixty days' notice and not sixty successive days' notice by publication. We are of opinion that the notice was sufficiently proved. The notice was not required to be published in different numbers or issues of a newspaper. The notice began to operate from the time it was given. It was not by the statute required to be renewed as in some other instances. Other objections were made as to the introduction of evidence which make it necessary to notice the issue.

The complaint embodied the subscription and averred that calls had been made, notices given, and a failure to pay. The defendant set up in his answer: first, a general denial; second, payment; and third, that the subscription was obtained by fraud in the agent of the company who he alleged represented that the road would be constructed, under a contract then made with responsible and solvent contractors, for nine millon dollars; that Ripley and Jennings counties had each subscribed fifty thousand dollars, which representations he averred were false.

On the trial the defendant offered to prove that the soliciting agent of the company represented to the defendant that the persons having the contract to construct and equip the road were able to complete the same, without any advance from the road, out of their own resources, and that such representations were false. This evidence was, properly, rejected. It did not directly fall within the issue, and if it had, would, perhaps, have been immaterial. We cannot see how either the truth or falsity of such a statement should have influenced the action of the defendant in subscribing.

A witness, in anwer to a question directed to that point, was permitted to state that from his knowledge of the country the road could be built cheaper upon one route surveyed than another. He was not an engineer; and it insisted that this is the expression of an opinion, by one not an expert. Whether it was such an expression or not, we need not stop to decide, for two reasons: first, if such an expression, it was in such a vague form as to have had no influence with the jury; and, second, it was a statement upon a matter that was not legitimately involved in the issues being then tried.

It was proved by the answers to interrogatories, that the defendant had paid $140; and to show the application of these payments the plaintiffs were permitted to give in evidence certain calls other than those sued on, although those calls were made, and were for instalments due, before the subscription in this case; and was also permitted in the same connection, and for the same purpose to examine one of the counsel for the defendant, as to the contents of receipts given for the payments made. Notice was given during the trial to the attorney to produce the receipts, which he refused to do; and objected to testifying as to the contents, on the ground that any and all information he had in relation thereto was derived from the receipts placed in his hands as attorney in the cases. The circumstances connected with the payments, were proper evidence to go to the jury upon the question of the application or intention to apply the money so paid. The amount of the instalments called for, and the amount paid, were proper items of evidence to go to the jury upon that question. The notice to the attorney was sufficient, he having stated that he had the receipts then in his possession. As to whether he could be compelled to testify as to the contents, we are of opinion that he could. The party, himself, might have been compelled under the statute, to produce the receipts on trial. He could not defeat the production of that evidence by passing it into the hands of his attorney, He could still have been compelled to produce it. The attorney stood in no more secure position.

Voluminous instructions were given and refused. We have carefully examined them and come to the conclusion that the rulings of the court in reference thereto were, taken all together, correct. The judgment is affirmed with five per cent. damages and costs.

Georgia Railroad.

The annual meeting of this company was held at Augusta, Ga., on the 8th inst. The old board were re-elected, viz: *President*—JOHN P. KING. *Directors*—John Bones, J. S. Hamilton, W. M. D'Antignac, Asbury Hull, G. T. Jackson, Richard Peters, Samuel Barnett, J. Cunningham, G. W. Evans, W. D. Conyers, J. W. Davies, E. E. Jones, A. Poullain, B. H. Warren, M. P. Stovall, E. R. Ware. The report of the President shows a reduction of net profits for the year, from all sources, of $133,076 66.

Illinois Central Railroad.

The annual meeting of the shareholders of this company for the election of Directors and the transaction of any other business will be held at the office of the Company, in Chicago, on the 29th instant.

Chicago and Northwestern Railroad.

The annual meeting of the bondholders and stockholders of this Company will be held at the office of the Company in Chicago on the 6th of June, for the election of Directors for the year ensuing, and for the transaction of any other business that may come before them.

Elmira and Williamsport Railroad.

At the annual meeting of this company held in Philadelphia on the 6th inst., the following officers and managers were elected for the ensuing year: President—Thomas Kimber, Jr. Secretary and Treasurer—Wm. C. Longstreth. Managers—Ellis Lewis, Sam'l V. Merrick, Wm. D. Lewis, Robert J. Mercer, John Tucker, Alexander S. Diven.

Hannibal and St. Joseph and North Missouri Railroads.

We learn that these roads have consummated a contract by which their business with each other can be done on friendly terms for the future.

Persons going West, either from or by the way of St. Louis, can purchase through tickets over the North Missouri Railroad to any point on the Hannibal and St. Joseph road, or to St. Joseph, and to all points West of it, including Kansas, Fort Leavenworth, Weston, Atchison, Liberty, Omaha, Pike's Peak, Council Bluffs, Fort Kearny, or any other point to which tickets are sold, at as low rates as by any other route; and persons coming East can purchase tickets over the North Missouri road to all points in the United States reached by railroad on the like favorable terms.

Passengers from St. Louis to St. Joseph can reach that point over the North Missouri Railroad *thirteen* hours quicker than by any other route. *St. Louis Republican.*

Railroads of New York.

A tabular statement of the railroads in operation, their capital and cost, length, earnings and expenses, dividends, etc., for the year ending 30th September, 1860.

(Compiled from the Annual Reports to the State Engineer.)

Plan for Recovering the Vessels Sunk at the Gosport Navy Yard.

Colonel Haupt, the distinguished engineer and contractor for building the Hoosac Tunnel, has made proposals to the War Department for raising the sunken vessels at the Gosport Navy yard. He proposes to furnish competent men to perform the task at a reasonable compensation, and to superintend and give direction to the engineering department in person free of charge. All beyond this that he stipulates is that the Government shall furnish a sufficient force to protect the men in their operations. He informs us that the work can be done in sixty days. The general plan of the operation is by means of divers, who are to cover the holes with canvas, and where the portions are burnt to insert timbers to support the canvas, and to eject the water by means of pumps worked by common locomotives.

Colonel Haupt also proposes another plan, by way of suggestion to the Government. This is to place powerful locomotive engines in the bottom of sailing ships for the purpose of propulsion, and, by the process which he proposes, an additional speed of five miles will be gained, the whole machinery to be arranged so as to leave no part exposed. The principle is, by means of pumps, to force a body of water from the bows of the ship to the sterr. A conjunctive advantage will be, in case shot take effect under the water-line, the first valves may be closed, and the water which comes in through the shot-holes can be ejected, thus converting the means of destruction into that of service. We think the plan highly feasible.—*Boston Commercial Bulletin.*

The Southern Steamship Company.

The Southern Steamship Company, we understand, are desirous of keeping in operation as long as it can be done safely, their line of vessels to Texas. The seizure of three of their steamers—the Texas, Hewes and Tennessee—by order of the Governor of this State, has, no doubt, materially interfered with the regular working of the line, so far at least as those two fine vessels, the Texas and Hewes, are concerned. * * The company still have at their disposition the steamships Charles Morgan, Mexico, Matagorda, Galveston, Orizaba, Suwanee, Arizona, or Austin, Gen. Rusk, and perhaps one or two others, which, we should think, will suffice to keep up the regular steam communication with Sabine Pass, Galveston, Matagorda Bay, and Brownsville, via Brazos Santiago.—*N. O. Picayune.*

To Iron and Steel Manufacturers.

THE NEW YORK CAST STEEL WORKS, on Second Aveune, 46th to 47th Streets, are offered for sale or to let on very favorable terms, presenting an opportunity to enter a business that under the new tariff will be one of the most profitable in the country. The Steel made at these Works has proved equal to the best imported. They can now turn out a ton of hammered steel per day, and with the addition of rolls and a moderate expenditure, can be made to produce five tons daily at a cost that will yield a liberal profit. They are located in the best market for steel in the country. For further particulars apply to S. H. ADEE, New York, on the premises.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, May 1, 1861.

THE ANNUAL MEETING of the Shareholders of the ILLINOIS CENTRAL RAILROAD COMPANY, for the election of Directors and the transaction of any other business, will be held at the office of the Company, in the City of Chicago, on WEDNESDAY, May 29, 1861, at 10½ o'clock a. m.

The Transfer Books will be closed on the 21st of May, and re-opened on the 1st of June.

W. M. PHILLIPS, Secretary.

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, June 1, 1861.

Cincinnati, Wilmington & Zanesville R. R.

The gross earnings of this road during the years 1859-'60 and 1860-'61 were:

	1859-'60.	1860-'61.
From passengers	$69,118 11	$63,371 60
" freight	97,343 04	123,864 40
" mails, express, etc.	14,705 42	16,456 36
Total	$181,166 57	$203,692 36

The working expenses for 1860-'61 were:

Transportation expenses	$56,185 91	
Car expenses	15,031 19	
Locomotive expenses	14,791 09	
Road expenses	37,961 75	
General expenses	5,798 74	
Loss and damage	196 70	
Repairs to buildings	1,805 43	
		131,770 81
Net earnings, 64⅔ per cent.		$71,921 55

Disbursed as follows:

Taxes	$2,713 27	
Extraordinary expenses	27,862 38	
Construction and capital	4,833 02	
Corporate expenses	922 74	
		36,331 41
Balance		$35,590 14

Compared with the previous year the gross earnings show an increase of $22,525 79, with an increase in expenditures of $12,681 19.

The receiver's assets and liabilities May 1, 1861, were as follows:

ASSETS.

Materials in shop	$6,683 15
Fuel on hand	1,800 82
Bills receivable	383 54
Due from Post Office Department	3,325 00
Due from agents	4,057 49
Due from other roads	2,425 70
Due from individuals	23 85
Cash in hand of receivers	38,708 80
Total	$57,413 35

LIABILITIES.

Due to other roads	$1,426 76	
Due to individuals, including April pay roll	11,617 06	
		13,043 82
Balance		$44,369 53

As this road is 132 miles in length the net receipts have been about $270 per mile of road, which is equal to 6 per cent. interest on $4,500 per mile. The increase of the net receipts of the past year over those of the preceding one, which is nearly 130 per cent. of the net revenue of that year, joined to the fact that new sources of business are springing up on the line of this road, however, warrants the supposition that there may be yet a considerable increase in the revenue of the road. The following is the statement of passenger traffic for the past two years:

PASSENGER TRAFFIC.

Number of local passengers carried in 1859 60	57,744
Income from same	$50,394 41
Number of local passengers carried in 1860-61	59,802
Income from same	$45,676 23
Number of through passengers carried in 1859-60	11,172
Income from same	$18,723 70
Number of through passengers carried in 1860-61	11,253
Income from same	$17,695 35

It is very evident from the above that the local business of this road is all that can be relied upon. This might have been anticipated from the fact that neither of the roads with which it connects care to divert travel from their own lines The operating expenses of the road although much reduced from those of the previous year, may probably be still further reduced in the future.

Cotton and the Cotton Manufacture.

The growth of cotton manufactures is the most remarkable fact of this age, if not the most extraordinary one in the history of civilization. Though the word *cotton* is of Arabic origin, the manufacture of cotton was first known in India, where the virtues of *cotton in the loom* were celebrated in song, more than fifteen centuries before the Christian era. It was cotemporary with the linen manufacture of Egypt, which according to the Hebrew Bible had reached considerable perfection 1715 before the birth of Christ.

In the time Herodotus it was the common dress of India, and centuries before the Christian era there were manufactures of cotton tissues in Arabia and Egypt. They do not appear to have been known to the Greeks or Romans.

The Chinese cotton manufactures were introduced by the Tartars in the 13th century. India and China were the chief seats of cotton manufactures till within the last hundred years, though known in Spain and Southern Europe since their introduction by the Arabs in the 10th century.

The Flemings introduced cotton into England from Portugal, in 1298, for the making of candle-wicks, and in 1328 settled at Manchester and laid the foundation of the woollen manufactures which were called *Manchester cotton.* In 1560, cotton was imported from the Levant, but in 1730 the entire import of cotton wool was 1,545,472 lbs.

From 1738 to 1760, the inventions of machinery had gradually increased the production of cotton goods, and with the great improvements of Hargreaves and Arkwright opened up the factory system of Lancashire. Arkwright's first mill was erected in 1769 and was the source of a fortune, though his success excited the cupidity of his rivals, and entailed on him constant litigation. Later than this, in 1779, came Crompton's mule jenny which was an advance on all previous methods of spinning. From this period we date the cotton manufacture of England.

In 1781 the importation of raw cotton into England was 5,198,778 lbs.

The cultivation of cotton was introduced into the United States by Mr. Francis Levett, a native of Smyrna, Asia Minor, who came on to Florida, for the purpose of introducing the culture of figs. It was first raised on the island of Sapello, some sixty miles south of Savannah, to which place it was brought in cask, and shipped to Liverpool.

In 1785 the entire product was 5 bags, in 1786, 6, in 1787, 108, and in 1788, 282 bags.

Cotton was admitted into England, free of duty till 1798, when a duty was first imposed, favoring East India cotton.

In 1819, a duty favoring the production of the West Indies was passed. Various modifications took place in the same direction, till in 1845 the duty on cotton was finally repealed.

The following table shows the quantity of raw cotton introduced into the United Kingdom from 1781 to 1859.

1781	5,198,778	1821	132,536,620
1782	11,828,039	1822	142,887,628
1783	9,735,663	1823	191,402,503
1784	11,482,083	1824	149,380,122
1785	18,400,384	1825	228,005,291
1786	19,475,020	1826	177,607,401
1787	23,250,268	1827	272,448,909
1788	20,467,436	1828	227,760,642
1789	32,576,023	1829	222,767,411
1790	31,447,605	1830	263,961,452
1791	28,706,675	1831	288,674,853
1792	34,907,497	1832	286,832,525
1793	19,040,929	1833	303,656,837
1794	24,358,567	1834	326,875,425
1795	26,401,340	1835	363,702,963
1796	32,126,357	1836	406,959,057
1797	23,354,371	1837	407,286,783
1798	31,880,641	1838	507,850,577
1799	43,879,278	1839	389,396,559
1800	56,010,732	1840	592,488,010
1801	56,064,305	1841	487,992,355
1802	60,345,600	1842	537,750,086
1803	53,812,284	1843	673,193,116
1804	61,867,329	1844	642,111,304
1805	59,682,406	1845	721,979,953
1806	58,176,283	1846	467,856,274
1807	74,925,306	1847	474,707,615
1808	43,605,982	1848	713,020,161
1809	92,812,282	1849	765,469,012
1810	132,488,935	1850	663,576,861
1811	91,576,535	1851	767,379,749
1812	63,025,936	1852	929,782,448
1813	*	1853	895,278,749
1814	60,060,239	1854	887,333,149
1815	100,709,146	1855	891,751,952
1816	95,280,965	1856	1,023,886,304
1817	126,303,689	1857	969,318,896
1818	178,745,577	1858	1,034,342,176
1819	151,153,154	1859	1,225,989,072
1820	151,672,655		

* Record destroyed by fire.

The official tables are probably below the true quantity, for in 1859 the United States shipped to England 2,019,252 bales of cotton averaging 447 lbs. per bale or 902,605,644 lbs. of cotton, nearly three-fourths of her reported supplies for that year. Some confusion also arises from the fact that the English tables are made up for the calendar year ending January 1, while the annual cotton tables of the United States end with the 1st of September annually. Another source of embarrassment is the want of uniformity in the weight of the bales. In the United States the bale is larger than in other countries and has increased from 425 lbs. in 1850, to 445 lbs. in 1858, 447 lbs. in 1859, and 464 lbs. in 1860. In England, the average weight of a bale of cotton was 392 lbs. in 1850, 420 lbs. in 1858, and 421 lbs. in 1859.

In 1860, we exported to England 2,669,432 bales of cotton, which at 464 lbs. to the bale, according to the statement of the *New Orleans Delta*, would give an export of 1,238,616,448 lbs. The importation of cotton into England in 1860 is stated at 5,260,000 bales which, at 421 lbs. per bale, would make the import 2,204,460,000 lbs., a most extraordinary advance on previous years.

There is other evidence, however, of a vast increase in the consumption of cotton in England, from the rapid increase of her cotton looms.

England and Wales had, in 1850, 1,753 cotton factories; 223,626 looms; 19,173,969 spindles. In 1856, 2,046 factories; 295,590 looms; 25,818,516 spindles. In 1858, there were in Lancashire alone, 1,480 factories; 360,000 looms; 28,000,000 spindles; employing 400,000 persons. And in England and Wales, 3,046 factories; 700,000 looms; 56,000,000 spindles, employing 800,000 operatives. In Scotland, the cotton manufacture is of more recent introduction, but its manufactures are of unrivalled beauty and fineness. The number of cotton factories in 1837, was 177. In 1850, there were 168 cotton factories; 1,683,078 spindles; 28,564 power looms; 36,325 operatives. In 1857, there were 152 cotton factories; 2,041,129 spindles; 21,624 power looms, driven by 9,961 horse power, of which 7,641 was steam, employing 34,698 hands, of whom 7,609 were males, and 27,089 females.

We have no returns of late date, but it is asserted in the cotton circular of recent date that the cotton manufacture employs 1,500,000 operatives, and supports 6,000,000 persons. The value of manufactured goods was $660,000,000, in 1860, about one-half of which was exported to foreign countries.

The capital invested in the cotton manufacture in 1858, was stated at $525,000,000; 1860, rising $600,000,000.

The following table shows the average wages in the Manchester District in 1839, when the hours of work were 11½ hours per day, with the present 10 hour system in 1859:

COTTON SPINNING—WEEKLY WAGES.

	1839.	1859.
Hours per week	69	60
Occupations.		
Engine tender	$5 81	$7 26
Warehouse boys	1 69	1 94
Warehouse men	4 36	5 32
Scutchers	1 69	1 94
Skippers	2 66	3 39
Cardminders	1 45	1 70
Driving frame tenders.	1 57	1 94
Spinners on self-acting mules	3 87 to 4 36	4 84 to 5 32
Piercers	1 94	2 42
Doublers, (women,)	1 69	2 18
Doffers, (girls,)	97	1 21
Jobbers	2 42	3 15
Overlookers	5 81	6 87

Of the whole number of operatives, 19 per cent. are men, 50.2 per cent. women, 6.6 per cent. boys, 24.2 per cent. girls.

This increase in the price of labor in England has taken place within the last ten years. For the twenty-five years from 1825 to 1850, there was a steady decline in the price of labor; and by the aid of machinery and mechanical skill every manufactured article declined also in price, from the close of the European war, in 1815, till the new supply of gold and the increased production, within the last ten years, gave a new impulse to the manufacturing industry of Great Britain.

The most striking fact of all is, that the Cotton Manufactures of England have increased in a greater ratio than those of the United States for the last 10 years.

In 1849-50 the United States consumed 613,498 bales of cotton, or 260,736,650 lbs., estimating the bales at 425 lbs., of which quantity, 476,486 bales were consumed in States North of Virginia. In 1859-60 the quantity consumed was 978,043 bales, or 450,011,962 lbs., estimating the bales at 464 lbs., of which 792,521 bales were taken by the manufactures north of Virginia, an increase of 72 per cent. The increase of the import of cotton into England has been from 663,576,861 lbs. in 1850, to 1,225,989,072 in 1859, and 2,204,460,000 in 1860. The consumption of cotton in England after deducting the amount exported in the form of raw cotton, was in 1850, 588,200,000 lbs. in 1859, 976,600,000, The amount held over in 1860, is said to be only 400,000 bales, or less than one twelfth of the importation of the last year.

The following table shows the amount of cotton goods imported into the United States:

1853	$26,412,243
1854	32,477,106
1855	15,742,923
1856	24,337,504
1857	28,114,924
1858	17,574,142
1859	26,026,140

In 1800, the cotton crop of the United States was 35,000 bales; in 1820, 509,158; in 1825, 569,240; in 1830, 996,845; in 1835, 1,254,328; in 1840, 2,177,855; and 1850, 2,096,706.

The following table shows the amount shipped from the southern ports of the United States, and the consumption in the United States, north of Virginia:

	Cotton shipped.	Consumed in U. S.
1850	2,096,706 bales.	613,498 bales.
1851	2,255,257 "	485,614 "
1852	3,015,029 "	699,603 "
1853	3,262,882 "	803,725 "
1854	2,930,027 "	73,7236 "
1855	2,847,339 "	706,452 "
1856	3,527,845 "	770,739 "
1857	2,939,519 "	819,936 "
1858	3,113,962 "	595,562 "
1859	3,851,481 "	927,651 "
1860	4,675,770 "	978,043 "

Cotton exported in 1860, to	
Great Britain	2,669,432 "
France	589,587 "
North of Europe	295,072 "
Other foreign ports	220,082 "
	3,774,073 "

The production of cotton in each State, as shown by the census of 1850, was as follows:

Alabama	564,429 bales.
Georgia	499,091 "
Mississippi	494,774 "
South Carolina	300,901 "
Tennessee	192,635 "
Louisiana	163,034 "
North Carolina	98,028 "
Arkansas	64,987 "
Texas	57,945 "
Florida	45,078 "
Virginia	3,945 "
Kentucky	1,669 "
Illinois	8 "
Indiana	5 "
	2,484,531 "

According to the census of 1850, the number of cotton manufactures established in the United

States, was 1,074; capital employed, $76,032,578; cost of material, $37,778,064—employing 25,295 male, and 62,661 female lahorers; or a total of 97,956 persons; cost of labor, $17,267,112; value of product, $65,501,687.

The value of cotton manufactures as given in the United States Census in each State in 1850, was as follows:

	Value.	Hands employed. Mail.	Female.
Massachusetts...	$21,394,401	9,592	20,844
New Hampshire..	8,861,749	2,915	5,235
Rhode Island ...	6,495,972	4,847	5,901
Pennsylvania ...	5,812,126	4,283	4,374
New York	5,019,323	3,379	5,499
Connecticut	4,122,952	2,665	3,313
Maine.....	2,630,616	849	3,072
Maryland	2,021,396	1,212	2,035
Virginia	1,446,109	1,151	1,578
Georgia.....	1,398,056	826	1,291
New Jersey	1,289,648	739	1,299
North Carolina...	985,411	492	1,382
South Carolina ..	842,440	436	676
Ohio	594,204	268	434
Delaware.....	538,439	413	425
Tennessee.....	508,481	316	592
Kentucky.....	445,639	210	316
Alabama	498,585	349	397
Vermont	280,300	123	207
Missouri.....	142,900	75	80
Dt. of Columbia .	100,000	41	103
Indiana	86,660	66	79
Florida.....	49,920	28	67
Mississippi	22,000	16	14
Arkansas	17,000	14	18
	$65,501,687	35,895	65,661

The exports of cotton goods, the products of our own manufactories, have been as follows:

1847	$10,351,364
1848	12,774,480
1849	11,249,877
1850	15,196,451
1851	20,136,967
1852	18,862,931
1853	22,599,930
1854	26,849,411
1855	28,833,299
1856	20,907,992
1857	30,805,126
1858	27,641,208
1859	31,579,008
1860	35,455,644

(To be continued.)

Repudiation in Arkansas.

The Memphis *Avalanche* publishes the following ordinance, which was passed by the recent State Convention:

An Ordinance in regard to Foreign Indebtedness in the State of Arkansas, and with regard to Other Objects:

SECTION 1. Be it ordained by the people of Arkansas in Convention assembled, that all the debts of whatever kind due or to become due hereafter, whether the same be evidenced by record, bond, note, bill of exchange, or by other proof; and whether such indebtedness is dischargeable or to become dischargeable by money, property, or in other choses of action where the duty of payment is due or is to become due upon resident citizens of the State of Arkansas, and is due or is to become due to a resident or citizen of the State of Maine, the State of Rhode Island, the State of Massachusetts, the State of Vermont, the State of New Hampshire, the State of Connecticut, the State of New York, the State of New Jersey, the State of Pennsylvania, the State of Ohio, the State of Indiana, the State of Illinois, the State of Michigan, the State of Iowa, the State of Wisconsin, the State of Minnesota, the State of California, the State of Oregon, or the State of Kansas, or to a resident or citizen of the Territory of Utah, Washington, Dacotah, Nevada, or Colorado, be and the same is hereby distrained and appropriated to and for the use and benefit of the State of Arkansas, and payments thereof are hereafter to be made to the State of Arkansas, in such manner as shall be provided by ordinance of this Convention, or by enactment of the Legislature of the State, and all other payments are hereby prohibited, and declared null and void, and the party making the same shall be responsible to the State for the full value of such payment of money, or of delivery of property or chose in action.

SEC. 2. *Be it further ordained*, That all money, property and choses in action that are now in possession, or that may hereafter come to the possession of any attorney, marshal, sheriff or agent, or other person in this State, for the use or benefit of any citizen or resident in any of the aforesaid States and Territories, be, and the same is hereby distrained and appropriated to and for the use and benefit of the State of Arkansas, and that all payments or delivery thereof, otherwise than such as may be hereafter provided by ordinance of the Arkansas State Convention, or enactment of the Legislature, shall be null and void, and the party making such payment, or delivering such property or chose in action, contrary to the true intent thereof, shall be liable to the full value thereof.

SEC. 3. *Be it further ordained*, That all land or real estate of whatever kind the title or ownership whereof is in a citizen or citizens, resident or residents of any of the aforesaid States or Territories, be forfeited and revert to the State of Arkansas for the use and benefit of said State, and that the title to such lands shall be disposed of as the Convention or Legislature may hereafter direct.

SEC. 4. *Be it further ordained*, That all sales of property under legal process for collection of such debts as are described in the first section of this ordinance, the use and benefit whereof is going to citizens or residents of any of the States or Territories aforementioned, be and the same is hereby prohibited, until otherwise ordered by the Convention or enactment of the Legislature.

Trade of the West.

In answer to the chairman (Hon. W. H. Merritt) of a select committee of the Legislative Council of Canada, appointed to enquire into the causes which have diverted the Trade of the West through the United States by way of the Hudson and Port of New York, and the mode of regaining it, the Hon. John Young, of Montreal, wrote the following letter:—

MONTREAL, 23rd April, 1861.

SIR:—I am in receipt of your letter of yesterday, requesting me to answer the question in reference to the trade and commerce of the St. Lawrence, which I shall do as briefly as possible.

First—To what cause are we to attribute the diversion of the *Trade of the West* (from the St. Lawrence) through the United States, to the Port of New York, and what, in your opinion, is the best means of regaining it through its original and natural channel?

Answer.—The rivalry between Canada and the State of New York for the trade of the West, commenced on the opening of the St. Lawrence Canals in 1849. Up to 1847, the trade of Western Canada was forced down the St. Lawrence by a protective duty in England on all agricultural products from Canada. American Wheat was then largely imported and manufactured into flour, which was also shipped as Canadian; previous to 1849 there was *no* exportation of Canadian cereals to the United States. In that year the bonding system of the United States was inaugurated, by which Western Canada could import and export in bond. All discriminating duties in favor of Canadian produce were at that time abolished. The Navigation Laws in the same year were repealed, and for the first time the trade of Western Canada and the Western States was left free to find the cheapest and best route either to England or the Eastern States. An additional impulse was given to the trade by the Reciprocity Treaty, under which Canadian cereals were admitted into the United States free of duty. The export of cereals from Western Canada in 1849 to the United States at points above the St. Lawrence Canals was equal, in bushels, to 124,000. In 1852 it had increased to 2,334,270 bushels. In 1854 to 3,812,875 bushels. In 1860 the cereals exported to the United States from Western Canada, exceeded 8,337,064 bushels, while the total receipts at Montreal from all the Western States and Canada was only equal to 6,558,255 bushels.

The Erie Canal from Buffalo and Oswego to Albany has, since 1849, been greatly enlarged and deepened, so that boats of 130 tons are now employed instead of 75 tons a few years ago. The Eastern States do not produce cereals to any extent, but take what they want for consumption either from the Western States or from Western Canada. The supplying of this demand for consumption in the Eastern States exceeds in the average of years, the amonnt exported to England and other countries. Hence the importance of being able to reach these States through the St. Lawrence.

It was to obtain a share of this trade between the West and the East that the Canals of the St. Lawrence were built. Before their completion in 1849, I predicted that unless Lake Champlain was connected with the St. Lawrence, by the most advantageous levels, that Canada would be powerless in trying to attract any considerable share of Western States and Western Canadian trade.

The Trade and Navigation returns for 1860 show that the whole exports of Canada in that year amounted to $33,361,460. Of this $18,427,968, was exported to the United States. Not only is this the fact, but of this $18,427,968, there was exported from Western Canada direct to the United States ports, above all the St. Lawrence canals, no less a sum than $13,141,000. I have made these calculations hurriedly, but I believe the figures will be found in the main correct, and they show how small a share of the trade of Western Canada with the United States is now attracted to the Lower St. Lawrence.

Since 1849 and now, the cheapest route from Western Canada and the Western States to New York, and the Eastern States generally, has been through the State of New York, and *because it is the cheapest*, trade, as we see, flows in that direction, and not down the St. Lawrence.

The deepening of Lake St. Peter, the establishment of Ocean Steamers, the cheapening of Insurance by the construction of Light Houses, have done much to enable the Canadian Merchants to compete successfully for the Export trade; but to give Canada that superiority which ought to belong to the St. Lawrence route for the sea exports and imports, it is of the highest importance to secure for the St. Lawrence the downward trade to the Eastern States. The route which has this downward trade, will from the low price of back freights, secure a large portion of the up freight. Until a Canal to connect Lake Champlain with the St. Lawrence is constructed, I believe it to be impossible for Canada to share in the carrying trade passing between the Eastern States on the one hand and the Western States and Western Canada on the other, through the route of the St. Lawrence. Nor can this object be fully secured as regards the trade of the Western States, until the Welland Canal is enlarged and the Locks on the St. Lawrence Canals lengthened. With these works completed and the natural advantages of Montreal and Quebec fully developed, for receiving and shiping interior produce; I have not now and never had any doubt, that the St. Lawrence route, either for export by sea or for supplying the Eastern States can be made the *cheapest, quickest and best.*

The State of New York is now collecting a very large amount in tolls on Canadian property, passing through her Canals which could be made to pass through the St. Lawrence Canals to the same point. The abolition of tolls on the St. Lawrence Canals is wholly inadequate to overcome the cheapness of the Erie Canal route, and in my

opinion there has not been one ton thereby attracted to the St. Lawrence.

The locks of the St. Lawrence Canals are 45 and 55 feet wide, but the size of vessels in the trade from the West is controlled by the 26 feet locks of the Welland Canal, so that the advantages of the St. Lawrence navigation, can never be fully ascertained until the same class of vessels which now trade to Buffalo, can pass through to Montreal, Quebec, or Lake Champlain without breaking bulk.

Second. Whether equal facilities exist for importing goods from sea by the way of Quebec, which are intended for consumption in the United States, as exists for importations at the Port of New York, which are intended for consumption in Canada?

Answer. There is no hinderance or obstacle existing to importing goods from sea *via* Quebec, intended for the United States, and as lines of Ocean Steamers ply to the St. Lawrence as well as to New York, the facilities for importing to either place seem to be equal. The navigation of the St. Lawrence opens in April and closes in December. Between December and April the Erie Canal and St. Lawrence are both closed by ice, but the facilities afforded by Ocean Steamers coming to Portland, and the connection from thence by railway to all parts of the interior are equal to the facilities at New York during this period for the import of goods.

Madras Railway.

The annual meeting was held in London on the 10th ult. The following is an abstract of the report of the directors:

The work of construction has proceeded actively on the different lines since the last report. The first section of the Bellary is open for traffic. The company has now about 257 miles open and at work, as against 137 miles at date of last report. The traffic during the last half-year unavoidably suffered from prevalence of cholera, and comparative failure of the crops from drought. The shipments of material, plant, fuel, and stores during the year 1860 were to the extent of 38,348 tons to Madras and Beypoor. On 1st February last, a further length of 70 miles of the main or south west line was opened to Salem, making a continuous line of 207 miles from Madras. On 12th March the first section of the western end of the line was opened from Beypoor to Tiroor, 18 miles in length; and a further opening of 14 miles in the same direction to the Thoota river was to have taken place about the middle of last month. By the end of June it was expected that a further opening to Coimbatore would make the length open from Beypoor 104 miles. There would then remain only the intermediate space, 80 miles, between Coimbatore and Salem, to complete the main line from Madras on the east coast to Beypoor on the west coast, a total distance of 405 miles, which the chief engineer thought might be opened throughout for traffic towards the latter part of the present year. The open portion of the line was reported to be in good order. The renewals of sleepers, keys, and trenails had further increased, being at the rate of 22 per per cent. as against 17 per cent. in the previous half-year. At this rate of decay the entire replacement of the original country wood sleepers would in no long time be effected, and the cost of maintaining the line would then only be reduced to a normal level. The chief engineer was of opinion that the greatest advantage was to be expected from the use of iron sleepers. The excess in first cost of the iron sleeper road was unimportant, compared with its eventual economy in maintenance. The board continued to supply iron sleepers as well for original construction as for replacing decayed wooden sleepers where required. The first section of the Bangalore branch was expected to be ready for the permanent way in six months. The main difficulty on this line was the cutting in the Saidanoor Pass, where the unhealthiness of the locality and scantiness of the population presented serious obstacles to obtaining the requisite labor. On the Salt-Cotaur branch the earthwork had been completed from the junction with the main line to the station ground, and also that of the entire branch line to the salt platform. The first section of the northwest line, 18 miles from the Arconum junction to Naggery, was opened for traffic on the 12th of March. Beyond this station the works in this district were expected to be completed by July next. The passenger traffic on the 137 miles for the half-year amounted to £549 for first-class passengers, to £752 for second class; and to £15,810 for third-class passengers—total, £17,111, against £14,357 for the corresponding half of 1859. The entire number of passengers carried during the past year was 887,452, of which 875,506, or 98¾ per cent. nearly, were of the third class, at a fare of one farthing a mile. The goods traffic for the half-year amounted to £13,189, against £9,569 for the corresponding half-year of 1859. Notwithstanding the increased tonnage passing over the line, a large traffic still went by the common road, which the directors state must eventually fall to the railway. The total receipts for the half-year ending 31st December, 1860, amounted on the 137 miles for coaching to £19,040, for goods and materials to £17,786, and for rents and telegraph to £130—total, £36,956. The expenses amounted to £29,223, including £10,087 for maintenance of way, leaving the net receipts £7,034. For the corresponding half of 1859 the total receipts on 96 miles amounted to £31,837, the total expenses to £17,399, including £5,232 for maintenance, leaving a net balance of £14,438. The receipts for carriage of railway materials formed 12¼ per cent. of the gross receipts for the half-year. The receipts per train mile during the past half-year amounted to 3s. 10d., and the cost to 8s. ½d. The receipt per passenger carried was 9¾d, and per ton of goods 6s. 4¼d. The capital account to 30th June, 1860, in India, and 31st December last in England, showed that £4,305,115 had been expended on the southwest and north west lines.

Pittsburg, Columbus and Cincinnati R. R.

The earnings of this road for the year 1860, were as follows:

From passengers	$125,206 70
" freight	169,337 92
" express	12,148 17
" mail	8,940 00
" car mileage	4,192 33
Total earnings	$319,825 12

And the expenses were:

Conducting transportations	$75,193 13	
Motive power	75,656 66	
Maintenance of cars	19,860 83	
Maintenance of war	76,499 97	
Construction & equipment,	6,841 90	
		254,052 49
Net earnings		$65,772 63

Boston, Concord and Montreal Railroad.

The gross earnings of this road for the year ending March 31, were $252,724 52. Expenses, $131,051 55. Net earnings, $121,672 97. The report says:

The pecuniary condition of the corporation is more than $90,000 better than at the close of the last year.

The liabilities of the corporation are the balance of the notes given by the committee in settlement of the debts, as stated in their report in May, 1859, amounting at this time to $9,300 payable in S. F. Bonds, and which all mature in June of the present year; also, Gilmore & Clapp's claim, amounting now to $22,200 40, which, with the interest, constitutes the floating debt of the corporation, and which will soon be paid.

There has been paid the Trustees of the Sinking Fund the sum of $51,500, which, with the interest thereon, duly invested, amounts to more than $63,000.

In accordance with a vote of the Directors, passed Oct. 31, 1859, providing for a yearly reduction to the amount of $10,000 of the Bonds due in 1860, we have to report that the corporation now have that amount of Bonds on hand, and that the conditions of the vote will be strictly fulfilled.

The road and rolling stock are in good repair, and in better condition than at the same time last year.

Galena and Chicago Railroad.

This company have issued the following circular to its stockholders:

GALENA AND CHICAGO UNION RAILROAD CO., CHICAGO, May 16, 1861.

SIR: By a resolution of the Board of Directors, adopted at their State meeting to day, I am directed to inform you that the following resolution will be submitted to the stockholders of this company, for their action at the annual meeting, to be held at this office on the 5th day of June next.

Full explanations for asking this action on the part of the stockholders will be made at the meeting.

"*Resolved*, That the restrictions imposed by the stockholders of this company upon its Directors by a resolution adopted June 2, 1858, is hereby removed, so far as relates to any contract they may legally make with the Chicago, Iowa and Nebraska Railroad Company, the Cedar Rapids and Missouri River Railroad Company, and the Albany Railroad Bridge Company."

The resolution of the stockholders of June 2, 1858, above referred to, is as follows:

"*Resolved*, That any contract to lease any other railroad, or to allow or grant any commissions, or draw back to any connecting road, for the business furnished by it, that shall extend beyond three years, or any contract to lend the money or credit of this company to any other railroad company, beyond $20,000, or to make any branch or extension of this road, shall not be obligatory upon this company until it has been approved by a majority in interest of the stockholders present, or represented at any annual meeting, or at a meeting to be called for that purpose, on at least sixty days notice, and the object of such meeting shall be expressed in the call, and the approval thereof may be made without calling a meeting, provided the material points of the case be presented in the circular, and the answer thereto given by letter."

Northern, Conn., Railroad.

The Northern (formerly New London, Willimantic and Palmer) railroad company are about to make large improvements at New London. A new wharf 600 feet long, and 150 deep is to be built at the foot of Water street, and a new station-house erected 300 feet by 60. The estimated cost is $80,000, and the object is to form a connection with the Norwich and Worcester Railroad Company's line of steamers, with which a contract for ten years from July 1st has been made.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, June 1, 1861.

Share and Money Market.

The week has passed without any considerable fluctuation in the Share Market. Political questions now dominate all others, and the aspects of these have not materially changed, for two or three weeks past. Southern State stocks, with the exception of Missouri are weaker. We are now within a month of the time at which the semi-annual interest on them will fall due. The prospect of its payment on the bonds of Virginia, Tennessee and North Carolina appears to be very faint. These are largely held in this market. The probabilities seem to be in favor of the payment of interest on Missouri bonds, these are still selling at about 41. The prices of both Government and State stocks are depressed from the prospect of very large new issues. Nearly every Northern State have created considerable loans, amounting in the aggregate to a large sum, while the United States must make provision, largely by loans, for the support of an army of at least 200,000 men, besides a very large naval force.

Money continues easy, owing to an absence of demand for commercial purposes. Trade is almost entirely suspended. Southern trade is absolutely nothing, while Western has been greatly injured by the condition of Western Banks. This evil is being gradually cured by winding them up. The freight traffic on Northern and Western railroads continues good, with very favorable prospects for the growing crops.

New York and Harlem Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:—Allan Campbell, William C. Wetmore, Cornelius Vanderbilt, Daniel Drew, Francis W. Edmonds, Charles W. Sandford, Horace F. Clark, John Alstyne, Horace Brooks, Albert Smith, Albert J. Akin, John Harper, A. B. Baylis.

New York and New Haven Railroad.

The income of this company for the year ending March 31, 1861, was:

From passengers		$716,422 33
" freight		147,609 01
" mails, expresses, extra baggage and interest on dividend funds invested		61,044 42
Total		$925,075 76
And the expenses were:		
Transportation expenses	$243,657 73	
Repairs of roadway, &c.	116,799 12	
" equipment	129,984 67	
Fuel, oil and waste	84,034 33	
Haulage by horse-power.	25,026 35	
		599,502 20
Leaving as net earnings		$325,573 56

The resources of the year have been disposed of as follows:

Cash on hand April 1st, 1860, as per last report		$281,111 27
Mort. bonds, (used towards retiring bonds Dec. 1, 1860		25,000 00
Reduction, since April 1, 1860, of materials on hand		12,491 14
Increase of accounts payable, over the amount of April 1st, 1860		80,766 08
Net earnings for the year		325,573 56
		$724,942 05
Paid bonds due Dec. 1st, 1860, and Jan. 1st, 1861		$325,000 00
Paid coupons for bond interest		140,782 80
" loss in operating canal road		27,754 63
" on road and equipment		7,477 88
Cash on hand and invested dividend funds		223,926 74
		$724,942 05

The report says:

Important additions have been made to the equipment of the road during the past year. Two first-class coal-burning locomotives have been purchased, and are now in use on the road; in addition to which, two more of the same class have been contracted for, and will be ready for active service during the month of June. The four locomotives, complete, will involve an expenditure of about $36,000, but will greatly diminish the cost of repairs, thereby making the investment conducive to economy, and, at the same time, placing our equipment on such a first-class footing as the business of the road demands.

The roadway, tracks, bridges, culverts, embankments, station-houses, and general property of the company, have received close supervision, and are in good order. During the past year six hundred tons of new iron have been purchased, and it is now being laid when required; and more than 2,700 bars of old iron have been repaired, at our shops in Norwalk, during the same period, and mostly relaid. Eight thousand approved wrought iron chairs have also been purchased, and, as has been the practice of this company for the past four years, they will be used in place of the old cast iron ones formerly in use on the road. Upward of thirty-five thousand new ties have been purchased, which have been laid, or will be, as occasion requires.

The new passenger depot at Bridgeport has been completed, and, on the first day of January last, our trains commenced receiving and leaving passengers at that station. The building has been constructed in a satisfactory manner, and, while it is ornamental, affords all the accommodations required by our important connections at that point. The entire cost to the company, embracing the shifting of tracks and all the other important facilities acquired, has been $18,000. Portions of the building not required for the business or accommodation of the company, have been rented so as to produce the annual sum of $1,700; and more rooms remain that can and will be rented when suitable tenants can be found.

By reference to our last annual report it will be perceived the (so called) "Omnibus suit" was brought to trial before Judge Ingraham, at the March (1860) term of the Supreme Court. The findings of the Court were finally settled at the November term of the same, by which, the division of the bad from the good stock was passed upon, and the true stockholders of this company were defined. It is a matter for much congratulation that this important question of the separation of the good from the over-issued stock, complicated as it was, and requiring so much patient and close attention, has, at last, been so fully and so satisfactorily settled. Consequent upon the settlement of the judgment in the above case, our counsel made a motion, before Judge Barnard of the Supreme Court, for the removal of the injunction restraining the directors from paying dividends to stockholders. Judge Barnard removed the injunction on the 17th of April; whereupon the Board of Directors, by a resolution passed on the 19th of the same month, ordered the books of the company to be opened for transfers, and a dividend of three dollars per share to be paid to the stockholders, on demand.

On the first day of December last, there became due and payable $311,000 of the seven per cent. bonds of this company; and on the first of January, following, $14,000 of six per cent. bonds; making a total of $325,000—all of which have been retired, and have since been cancelled by the Comptroller of the State of Connecticut. Two hundred and eighty thousand dollars in cash was paid out of the earnings, and $45,000 of mortgage bonds on hand, exchanged, to liquidate the above bonds—leaving the actual bonded debt of the company, at the close of the business year and at this time; $1,890,000 as against $2,219,000 at the date of our report of last year.

In conclusion, it is with much pleasure that we are again able to report the gratifying truth that notwithstanding the great number, nearly 1,100,000 of passengers carried over the road during the past year, there has been no accident involving the loss of life or limb to any one passenger so carried.

CONDENSED BALANCE SHEET.

Railroad, including grading, masonry, superstructure, iron, machinery, &c.		$4,640,607 56
Equipments, viz: locomotives, tenders, cars, &c.		675,264 35
Real estate, including leases, in cities of New York and N. Haven.		65,505 66
Materials, viz: lumber, iron, fuel, oil, &c		111,319 00
Cash and cash assets		223,926 74
		$5,717,623 31
Capital stock, 30,000 shares	$3,000,000 00	
Bonds, due Dec. 1st, 1866, with 7 per cent. coupons, payable on first days of June and Dec. each year.	912,000 00	
Bonds, secured by mortgage, due Oct. 1st, 1875, with 6 per cent. coupons, payable on the first days of April and Oct., in each year.	978,000 00	
Profit and loss, being the total surplus earnings not paid out in dividends	719,585 12	
Accounts payable, viz:		
March pay roll	$58,824 28	
Coupons due April 1st '61	29,340 00	
Balance of petty accounts	9,873 91	108,038 19
		$5,717,623 31

Equipment service for year ending March 31, 1861.

Number of passengers	1,091,292
" tons of freight	64,638
" passenger trains	5,938
" cars per train, average	6
" freight trains	1,204
" cars per train, average	11
Average weight of passenger trains, loaded, in tons	135
Average weight of freight trains, loaded, in tons	170
Speed of express trains, including stops, per hour	30 miles.
Speed of way tr'ns, incl'g stops, per hour.	24 "
" freight " " " "	12 "
Aver. receipts per mile, per passen'r.	2.32-100 cts.
" " " " commut'r.	90-100 "
" " " " both.	2.08-100 "
" " " " ton freight.	4.54-100 "
Total number of locomotives	31
" " passenger cars	74
" " bagg'e, mail and express cars.	19
" " freight cars	349

The cost of running the trains upon this road, for the year, has been, for fuel, about 15.10-100 cents per mile; being a reduction on that of the year preceding of about 8⅝ per cent. The following facts are obtained by a comparison of wood-burners with coal-burners, viz:

Passenger train, wood-burners, averaging 5¼ cars, cost 20.02-100 cents.

Passenger train, coal-burners, averaging 5½ cars, cost 11.10-100 cents.

Freight train, wood-burners, averaging 7 cars, cost 17.85-100 cents.

Freight train, coal-burners, averaging 13½ cars, cost 13.53-100 cents.

Bringing together the expenses per mile, of both trains, shows the following result, for coal-burners as against wood-burners:

	Wood-burners.	Coal-burners.
Passenger train.	20.02-100 cents.	11.10-100 cents.
Freight train	17.35-100 "	13.53-100 "
Both trains.	37.87-100 "	24.63-100 "

the coal-burnings drawing an average of 6½ cars, and the wood-burners but 5½ cars.

Journal of Railroad Law.

POWER OF A RAILROAD CORPORATION TO RECEIVE AND ASSIGN NOTES: ABANDONMENT OF A ROAD, NOT A GOOD DEFENCE TO AN ACTION BROUGHT BY THE COMPANY FOR A DEBT.

The powers with which corporations are cloth ed, as distinguished from the rights of individuals, are special. Corporations are not natural persons; they are fictitious identities empowered by special legislation with certain privileges and duties. Hence we must look to the acts under which they are incorporated to find out what they are, and what they are not privileged to do. The special powers therein conferred upon them, together with those rights incidental to, and necessary to the enjoyment of the rights distinctly conferred measure the rights and the obligation of the company.

Thus if a company has the power conferred upon it, to receive the notes of parties, in the transaction of its legitimate business; the incidental right of transferring the notes so received to others in discharge of its obligations is a necessary consequence of the right to receive them: for otherwise the value of the notes as property would be greatly impaired. So too as a company after it has abandoned the objects for which it is incorporated, given up its road, and is winding up its affairs, may be made liable for the just debts it has already contracted, it may itself sue its debtors and compel payment to them notwithstanding such abandonment; for as the company is obliged to pay its debts, so its debtors must in turn pay them. Both of these points are considered in the case of *Hardy vs. Merriweather* just decided by the Supreme Court of Indiana.

The suit was brought on notes executed by *Hardy* to the *Fort Wayne and Southern Railroad Company.* On the 16th of February, 1859, they were assigned by the Company to the plaintiff; the assignment being executed by *Eli McCauley*, the Company's treasurer. The defendant denied the power of the company to assign the notes; and also alleged that the company had abandoned the construction of the road. The plaintiff had judgment in the court below, and an appeal was taken to the Supreme Court. These two points in the answer were held to constitute no defence to the action by the court below on demurrer; and the following is the decision of the appellate tribunal on these two points.

PERKINS, J.—We now proceed to examine the answers held bad in demurrer; and, first, of the denial of the power of the company to assign the notes.

The company had power to take the notes They originated in a transaction and were to secure an indebtedness, within the scope of the corporate undertaking. And as a general proposition a corporation has power to assign a note that it has power to take. The assignment in fact being set out in the complaint and not denied by answer under oath was admitted.

And, second, as to the abandonment of the road itself.

The abandonment of the construction of the road does not, of itself, constitute a defence to a suit to recover debts due the company chartered to accomplish such construction. Abandonment of the prosecution of the undertaking does not release the company from debts contracted while its prosecution was continued; and while the corporate organization remains, dues to the corporation may be collected in the corporate name for the payment of debts. After the corporate existence has ceased, creditors may still pursue its assets by proceeding against its debtors and stockholders. In this case the general denial was answered, and that answer admitted the corporate capacity of the plaintiff to sue. Judgment affirmed for the plaintiff.

Italy—Its Railway System.

The kingdom of Italy, on adoption of certain ministerial measures, by which it is intended to consolidate the various railway interests in the country, will be in possession of 1,779 kilometres of railway in operation (the kilometre computed two-thirds of an English mile), 1,704 kilometres in progress of construction, and 2,650 to be given out for private speculation. By adding to this amount the lines either in operation or in progress of construction in the Venetian and Roman provinces, the whole of the Italian system will rise to 6,800 kilometres.

Of these the old State of Sardinia has already 850 kilometres in operation, and 882 in progress of construction; Lombardy, 247 in operation, and 209 in progress; the Æmilia, the Marches, and Umbria, 145 in operation, and 561 in construction; with plans for 313 kilometres open for competition; Tuscany has lines in work to the amount of 375 kilometres, and is at work for 436 more, besides 39 kilometres in contemplation. At Naples the lines in work are only 142 kilometres, those in progress 96, and the projects 1,900. The lines projected for Sicily, where as yet none exist, amount to 400 kilometres.

The first 4½ miles in Piedmont were opened in August, 1848, at which period Lombardy and Tuscany boasted considerable achievements, and even Naples had its royal line from the capital to Castellamare. There is, therefore, good reason to congratulate the Subalpine people on the good

uses to which they were able to put the twelve years' freedom they had the good fortune to enjoy, and to anticipate no less splendid results for the future in behalf of their kindred of the east and south. The works under immediate contemplation will give as a result the opening of 550 kilometres within the present year, and 1,500 more within another year, altogether 2,000 kilometres within the space of two years, leaving 4,300 for completion of the contemplated lines. The shortest line between Turin and Rome, along shore by Genoa, Leghorn, and Civita Vecchia, would be 666 kilometres; a journey of eighteen or twenty hours. Between Turin and Naples the shortest route is through Bologna and Ancona, across the Abruzzi, a distance of about 800 kilometres, to be achieved in about twenty-four hours' journey. From Turin to Brindisi the line would extend to 900 kilometres; to Taranto, 863; to Otranto, 972; to Reggio, the extreme point of the peninsula, about 1,300 kilometres; to which may be added the 50 kilometres between Susa and Turin, already long since in operation. The shortest lines, however, will not in every instance be the first brought to a termination, owing to natural difficulties, which must needs retard their construction. The line from Turin to Naples, through Bologna, Ancona, Foggio, and Bari, will be about 950 kilometres in length, exceeding by 50 kilometres the other line, which is to go through the Abruzzi: but with the exception of the hills surrounding Ancona and the pass of the Apennines, it runs along shore, and mostly on level ground, so that it will be greatly advanced within the present year, and brought to a full termination within 1863.

In the same manner the road to Rome through Genoa and Leghorn will meet serious obstacles on the Riviera of Genoa, while the other, somewhat longer (715 kilometres), through Bologna, Pistoia, Florence, Chiusi, and Orte (the junction with the line between Rome and Ancona), will be finished first. The Apennine pass of La Porretta, between Bologna and Florence, will be ready within two years, and so will the whole line, which is rapidly progressing throughout, with the exception of the trunk between Orte and Rome (150 kilometres), for which Italy must await the Pope's good pleasure.

Most of these lines are of the greatest importance, not only for the Italians and strangers traveling in Italy, but also as a means of rapid communication between distant countries. From London to Alexandria in Egypt, the distance now, either through Marseilles or Genoa, is 188 hours' journey. It will be redued to 155 hours, with an economy of 30 hours' time as soon as the line to Ancona is opened, as it will be before the end of the present year. This advantage will be greatly increased when the lines shall be extended as far as Brindisi and Otranto, as it can easily be done within two years.

In a recent sitting of the Chamber of Deputies at Turin, the Minister of Public Works gave a satisfactory account of the state of the operations for cutting a tunnel through Mont Cenis. He stated that the machines employed on the Italian side of the mountain cut out in the space of twenty-four hours rather more than 8 feet of rock in a width of nearly 10 feet. The machines to be employed on the Savoy side have not yet been brought to work, but are soon to commence. When the machines shall be more complete, and the workmen more experienced, it will be possible, he said, to cut through nearly 10 feet per day on each side. Hopes are entertained that the tunnel may be completed in six years.

Pittsburg, Fort Wayne and Chicago R. R.

LAW OF ILLINOIS IN REFERENCE TO RE-ORGANIZATION OF THE COMPANY.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly*, That in case the Railroad of the Pittsburg, Fort Wayne and Chicago Railroad Company, or any part thereof, shall be sold by virtue of any mortgage or mortgages, or deed or deeds of trust, either by foreclosure, or other proceedings in law or equity, or in pursuance of a power in such mortgage or mortgages, or deed or deeds of trust contained, or by the joint exercise of the said authorities, the purchaser or purchasers of the same, or their survivors or survivor, or they, or their, or he and his associates, or their, or his assigns may form a corporation, by filing in the office of the Secretary of State, under their or his signature, specifying the name of such corporation, the number of directors, the names of the first directors, the period of their services, not exceeding one year, the amount of the original capital, and the number of shares into which such capital is to be divided; and thereupon the persons who shall have signed such certificate and their successors, shall be a body politic and corporate, by the name stated in such certificate, and a copy of such certificate, attested by the signature of the Secretary of State, or his Deputy, shall, in all Courts and places, be evidence of the due formation and existence of the said corporation, and of the facts in the certificate stated.

SEC. 2. The said corporation, formed pursuant to this Act, shall have power to acquire by purchase or otherwise, and to hold, use and enjoy, the Pittsburg, Fort Wayne and Chicago Railroad, and each and every part thereof, whether situate within or without this State, and all equipments, machinery, tools and materials, all lands, property, franchises, rights and things connected therewith, or necessary, or convenient to the use thereof, together with the tolls, income, rents, issues, and profits of the same, and shall have power to maintain and operate the same, as fully as might have been done by the Pittsburg, Fort Wayne and Chicago Railroad Company, and to erect new depots, stations, and other buildings, and connect the same with the said railroad, and to acquire and to hold lands for the said, and other needful purposes; and the said corporation shall also possess all the faculties, powers, authorities, immunities, privileges and franchises, at any time held by the said Pittsburg, Fort Wayne and Chicago Railroad Company, or by any of the corporations heretofore consolidated into the said company, or conferred on the said company, the said corporations, or either of them, by any act or law of this State, or either of the States of Ohio, Indiana or Pennsylvania, and shall have power and capacity to hold and exercise within each and every of the said States, and so far as it may deem necessary to the general objects of its business, within any other of the United States, all the said faculties, powers, authorities, privileges and franchises, and all others which may hereafter be conferred upon it, by or under any law of this State, or of any of the aforesaid States, and to hold meetings of stockholders and directors, and do all corporate acts, and all things within any of the aforesaid States, as validly as it might do the same within this State, and may consolidate with any corporations of such other States authorized to hold, maintain, and operate the aforesaid railroad; and the said corporation, formed pursuant to this Act, shall also have power to create and issue capital stock in shares of one hundred dollars each, and to such aggregate amount as it shall deem necessary to carry out the objects of this Act; and may establish preferences in respect to dividends, in favor of one or more classes of the said stock in such order and manner, and to such extent, and with such securities as it may deem expedient, and may confer on holders of any bonds which it may issue or assume to pay, such rights to vote at all meetings of stockholders, not exceeding one vote for every one hundred dollars of the par amount of said bonds, as may by it be deemed advisable, which rights, when once fixed, shall attach to any pass, with such bonds under such regulations as the by-laws may prescribe, to the successive holders thereof, but shall not subject any holder to assessment by the said company, or to any liability for its debts, or entitle any holder to dividends; and the said corporation may make and issue its bonds, of not less denomination than one hundred dollars each, payable at such times and places, and bearing such rates of interest as it may deem expedient, and may hypothecate or sell such bonds, within or without this State, at such prices as it may deem proper; *Provided, nevertheless*, That, except within six months after the organization of said company, no bond shall be created, nor shall any debt be contracted, exceeding in the aggregate at any one time five per cent. on the par amount of the capital stock of the said company, unless the same shall have been previously authorized by vote of two-thirds in interest of the stock and bondholders, at a meeting duly held; and the said corporation may secure the payments of any bonds which it may make, issue, or assume to pay, by a mortgage or mortgages, or deed or deeds of trust, of its railroad, or of any part or parts thereof, or of any other of its property, real or personal, and may include in any such mortgage or mortgages, or deed or deeds of trust, any locomotives, cars, and other rolling stock or equipments, and any machinery, tools, implements, fuel and materials, or other real or personal estates, whether then held, or thereafter to be acquired, for the constructing, operating, repairing or replacing of the said railroad, or any part thereof, or of any of its equipments or appurtenances; all of which property and things so included, whether then possessed, or thereafter to be acquired, shall be subject to the lien and operation of every such mortgage or deed of trust, in the same manner and with the like effect, as if all such property and things constituted a part of the said railroad; and may also include all franchises held by the said corporation, and connected with or relating to the said railroad, and all corporate franchises which are hereby declared in case of sale, by virtue of any such mortgage or mortgages, or deed or deeds of trust, to pass to the purchaser or purchasers, so as to enable him or them to form a corporation, in the manner herein described; and to vest in such corporation all the faculties, powers, authorities, immunities, privileges and franchises, conferred by this Act. And the said corporation may do all things which may be necessary or convenient, to carry into full effect the powers hereby granted; and the powers hereby conferred, may be exercised by the directors thereof.

SEC. 3. That the said corporation, formed pursuant to this Act, shall, within six months after its organization, likewise have power to assume such debts, liabilities and claims, against the said Pittsburg, Fort Wayne and Chicago Railroad Company, and make such settlements or adjustments with any of the stockholders, or other parties interested therein, as it may deem proper; and for the said purposes, to use such portion of the stock or bonds hereby authorized to be created, and in such manner as it may deem necessary.

SEC. 4. That in case the said Pittsburg, Fort Wayne and Chicago Railroad, or any part thereof, shall be decreed by any Court having jurisdiction in any State, or part of a State composing a judicial district, within which a part of said railroad is situated, to be sold by virtue of any mortgage or mortgages, or deed or deeds of trust upon the same, containing a power of sale to the trustee or trustees, it shall be lawful for the said trustee or trustees, to unite with the proper office in making such sale, or under the order of the Court, to make such sale at the time and place appointed

by the Court, and with such notices as may be ordered by the Court; and to execute a conveyance of the said railroad, or the part thereof which may be so sold, and such sale and conveyance shall be a valid and effectual execution of the powers of sale and conveyance contained in the said mortgage, mortgages, or deed or deeds of trust, and shall operate to invest the purchasers with the title to the railroad property, and things sold as aforesaid, free and discharged from all rights and equity of redemption by the mortgagor or junior incumbrancer, or any other party whatsoever.

SEC. 5. That full authority is hereby given to the corporate authorities of the several counties, townships, cities, villages, or other municipal corporations, owning or holding stock in the said company, and to all persons holding the same in any fiduciary capacity, to transfer, assign or surrender the same, and to accept and receive under the re-organization, such portion of the new stock as may be apportioned to the stock so owned and held.

SEC. 6. That this Act shall be a public Act, and shall take effect from and after its passage.

Approved February 8, 1861.

Dayton and Michigan Railroad.

The receipts of this road for the year ending April 1, 1861, were as follows:

From passengers	$146,554 24
" freight	201,001 03
" mails and express	27,447 32
	$375,002 59
Operating expenses, taxes, etc.	162,895 12
Net earnings	$212,107 47

—or about 56 per cent. of the gross receipts.

The financial condition of the Company, March 31, 1861, was as follows:

ASSETS.

Construction	$4,560,544 28
Telegraph	1,247 26
Lima shops and equipments	28,688 55
Webster street depot	9,935 04
Troy freight house	2,582 48
Toledo depot grounds	2,011 00
Right of way	92,791 61
Rolling stock	112,643 92
Stock interest account	261,438 69
Real estate, trustee expenses, and Telford and Wayne account	77,306 92
Enginery property	1,025 00
D., X. & B. Railroad	4,800 00
Time bonds	
Bills receivable	12,000 30
In hand of agents	30,412 63
Due from individuals	19,385 71
Due from other roads	11,142 83
Due from Post Office Department	5,587 59
Cash and cash items	2,170 06
	$5,241,812 58

LIABILITIES.

Capital stock issued	$2,176,666 97
Capial paid in not issued	18,895 66
Mortgage bonds sold	2,512,000 00
Income bonds sold	9,700 00
Bills receivable, viz:—secured by real estate in mortgage	15,055 15
From cars and construction debt	292,267 29
Supplies, interest, etc.	27,097 69
Bills discounted	16,404 17
Due on pay rolls	19,890 62
Due individuals	36,804 01
Due other roads	619 86
Due agents	201 00
Surplus earnings	114,310 46
	$5,241,812 58

The report of the President says:

The efforts of the company and individuals connected therewith to complete and equip the road, without being able to make sale of any bonds, and before the means necessary for the undertaking were secured, added largely to the temporary debts of the company, and rendered necessary, to secure the debts, the hypothecation of a large amount of the company's mortgage bonds. To prevent sacrifices of the securities thus pledged, it became necessary to allow the January interest on the 300 first mortgage bonds to go unpaid. The interest on the general mortgage bonds of the company has also, by agreement with a large majority of the owners of said bonds, been postponed until the debts secured by hypothecation of bonds shall be paid, when the back interest, as far as bonds available will go, will be paid on bonds thus deemed.

Owing to the continued depression of business consequent upon the troubled state of the country, the company will not be able to pay the interest on the first mortgage bonds as the same become due. The interest has, by the aid of the second mortgage bond owners, always been paid, until in January last, when, from causes above alluded to, the Company were unable to pay that interest. The second mortgage bond owners say that owing to circumstances of the case $300,000 of the first mortgage bonds having been issued out of an authorized issue of one million, that some arrangement, in justice to all parties, should be made with the owners of the $300,000 first mortgage bonds sold, to fund say six of their coupons, or to surrender these alternate half-yearly coupons upon the conditions that the other three are promptly paid.

Railroads in Ohio.

AN ACT.

Further to amend "An act to provide for the creation and regulation of incorporated companies in the State of Ohio," passed May 1, 1852, and to regulate railroad companies.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That it shall not be lawful for any railroad company within this State, whose road forms part of any line of railways between points common to any other line, to contract or agree with any person, or with any other railroad company or companies having a road or line of roads, or forming a part of a line of roads between the same points, not to carry freight or passengers to or from such common points, nor shall it be lawful for such company to refuse to receive or carry any freight or passengers brought to it or them to be so carried.

SEC. 2. When the railroad of any company being a trunk road, shall, at or near the same place, connect with or be intersected by two or more other railroads, which are competing lines for the business to or from such trunk railroad, the company operating such trunk road shall carry passengers and freight, and shall charge and receive only the same, and no more, for transporting passengers or freight, going to or coming from each one of one such connecting or tributary roads or line of roads, for like service rendered, as for another.

SEC. 3. Each and every railroad company in this State shall ship all freights that may come within its control by the railroad or railroads over which the same may have been ordered to be conveyed by the shipper thereof; and any railroad company whose agent or agents shall knowingly divert, or permit to be diverted, any freights that may come under his or their control, from the railroad or railroads over which the same may have been ordered to be conveyed as aforesaid, shall forfeit and pay to the railroad company or companies from which said freights have been so diverted, three times the amount received for transporting such freights, and such agent or agents shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be fined not more than one hundred dollars, or imprisoned in the county jail not more than thirty days, or both, at the discretion of the court: Provided that the provisions of this act shall in no way interfere with any lawful obligations heretofore entered into by any railroad company.

SEC. 4. On complaint of the violation of any of the provisions of this act, by petition as in other actions, the observance of the same may be enforced by injunction, and the party so violating said provisions, or any of them, shall be liable in damages to the person or company injured, for the injury sustained in consequence thereof.

SEC. 5. This act to take effect and be in force from and after its passage.

Passed April 11, 1861.

The Census of 1860.

We have obtained from the Census Bureau the following interesting table, giving the number of white males between the ages of eighteen and forty-five inclusive, in the States and Territories, as shown by the census of 1860:

FREE STATES.

California	76,000
Connecticut	92,000
Illinois	342,000
Indiana	270,000
Iowa	135,000
Kansas	21,000
Maine	125,000
Massachusetts	246,000
Michigan	150,000
Minnesota	32,000
New Hampshire	65,000
New Jersey	134,000
New York	778,000
Ohio	468,000
Oregon	10,000
Pennsylvania	581,000
Rhode Island	35,000
Vermont	63,000
Wisconsin	155,000
	3,778,000

BORDER SLAVE STATES.

Arkansas	65,000
Delaware	22,000
Kentucky	186,000
Maryland	120,000
Missouri	211,000
North Carolina	132,000
Tennessee	167,000
Virginia	231,000
	1,124,000

SECEDED STATES.

Alabama	105,000
Florida	16,000
Georgia	119,000
Louisiana	75,000
Mississippi	71,000
South Carolina	60,000
Texas	84,000
	531,000

TERRITORIES.

Colorado	6,000
Dacotah	1,000
Nebraska	6,000
Nevada	1,000
New Mexico	13,000
Utah	8,000
District of Columbia	14,000
	51,000

RECAPITULATION.

Free States	3,778,000
Border Slave States	1,124,000
Seceded States	531,000
Territories	51,000
Aggregate	5,484,000

Scinde (India) Railway.

This road was opened throughout on the 8th of April, being the first completed line in India.

Grand Russian Railway.

The section between Kowno and Dunaborg was opened for traffic on the 23d of April.

Ohio Canal Tolls.

The following is a statement of tolls, etc., received on the Ohio Canals for two quarters ending May 15, 1860 and 1861:

OHIO CANAL.

	1860.	1861.
Cleveland	$3,122 89	$4,459 45
Akron	2,829 45	4,872 84
Massillon	1,077 52	1,729 97
Dover	904 06	1,183 82
Roscoe	462 39	1,091 44
Dresden	1,191 97	553 23
Newark	628 79	1,480 00
Carroll	888 95	3,169 82
Columbus	1,215 50	1,237 41
Circleville	2,046 43	1,714 68
Chillicothe	3,652 68	4,009 56
Waverly	.....	2,831 65
Portsmouth	2,644 38	3,077 04
	$20,664 90	$31,110 71

MIAMI AND ERIE CANAL.

	1860.	1861.
Cincinnati	$11,950 36	$12,880 69
Hamilton	2,359 44	1,516 42
Middletown	2,697 01	4,850 38
Dayton	3,356 24	4,016 07
Piqua	5,935 07	8,422 86
St. Mary's	2,858 62	3,125 94
*Delphos	334 22	.....
*Defiance	1,480 94	.....
Maumee	2,033 10	1,573 52
Toledo	3,435 94	4,142 92
Junction	4,973 18	5,243 18
	$41,414 12	$45,771 95

* Office discontinued.

MUSKINGUM IMPROVEMENT.

	1860.	1861.
Dresden	$146 63	$282 59
Zanesville	2,472 18	6,031 23
McConnelsville	2,034 22	1,531 46
Marmar	2,400 54	2,822 50
	$7,053 57	$7,667 78

HOCKING CANAL.

	1860.	1861.
Carroll	$619 61	$886 65
Logan	4,194 42	5,137 01
	$4,814 03	$6,023 66

Hocking Canal	4,814 03	6,023 66
	$74,425 94	$91,213 55
		14,425 94
Increase in 1861 over 1860		$16,787 61

Grain Trade of Buffalo.

The receipts of grain at Buffalo, for eleven years past, have been as follows:

Year.	Grain alone. Bushels.	Grain, including flour. Bushels.
1850	6,618,004	12,059,459
1851	11,449,661	17,740,781
1852	13,902,937	20,390,504
1853	11,078,741	15,956,526
1854	18,553,455	22,252,235
1855	19,788,473	24,472,278
1856	20,123,667	25,758,907
1857	15,348,930	19,578,695
1858	20,002,444	27,812,980
1859	14,229,060	21,530,722
1860	31,441,440	37,053,115
Total	185,529,812	244,460,202

Effect of War on Railroads.

In estimating the effect of war upon the railroads of the country, we should divide the country into four divisions, viz: 1. The country east of Maryland; 2. The country west of Maryland and north of the Ohio to the Mississippi; 3. The country south of the Ohio; 4. The country west of the Mississippi. Now, it is quite obvious to us that the roads in the first and last division, east of Maryland and west of the Mississippi, will scarcely be affected at all by the operation of the internal war going on. The railroads of New England, for example, are entirely engaged in local traffic, with the exception of the transportation of western produce, which is wholly carried on the Western road, or through New York. Neither of these will be sensibly affected by any warlike movements. The same is true of the roads of New York, New Jersey and Pennsylvania. The same holds true of the roads west of the Mississippi, which are engaged either in carrying produce to the ports of the Mississippi, or emigrants to the new States. They cannot be affected at all, except in the comparatively slight movement of troops. The same is true of Michigan and Wisconsin. In fact, when we come to look into the matter carefully, the effect of the present unfortunate war on the greater part of railroads will not be very great; and that effect will be chiefly confined to eight or ten States. To estimate what the real results must be in the second and third divisions mentioned above, we must ask, first, what changes in commerce are really made by the new state of things? The railroads are only affected by the changes of commerce. All the changes in the lines of commerce which can be made are confined to two classes: 1. To interruption in the ordinary lines of transportation by war movements. Here we can refer to a striking example, the Baltimore and Ohio Railroad. If the line of that road is to be occupied for a hundred miles (as it has been the last two weeks) by Virginia troops, making an unpleasant and inconvenient surveillance over its traffic, it must, of course, loose traffic largely; for commerce will seek safe routes, and passengers will not go where they are to be watched and questioned. The same is true of the Wilmington and Philadelphia, and the Harrisburg roads; and indeed of all which lie on the borders of Maryland, Virginia and Pennsylvania. Commerce is both timid and cautious, and will not go where it is to be subjected to any sort of danger or inconvenience.

2. The next change is that produced by turning, diverting the transportation of products from one direction to another. Here comes in a very great effect, to be produced by the blockade of southern ports. Heretofore a very large part of southern commerce, in fact, nearly the whole, has been carried on by vessels from New Orleans, Savannah, Charleston and Wilmington. No matter whether the cotton was shipped direct to Europe or to New York, it mostly went in vessels by sea. The railroads of Georgia, South Carolina, Alabama, Mississippi and Louisiana, derived the largest part of their profits from the transportation of cotton to seaports. So also the merchandise brought in from Europe and the North came in through the same ports. Thus, the railroads of the Cotton States derived a large part of their receipts from shipments to and from the seaports. It is true, that at the present time the greatest part of the cotton cropp has been shipped, and as to that article, it will be several months before the effect will be severely felt. On all other articles it will be felt at once. It can scarcely be possible, that the railroads of those States should not suffer severely the present year. If the blockade continues (and we presume it will while the war lasts), it is very evident that in all the States south of Tennessee, a twofold effect will be produced: 1st, to cut off and reduce commerce; and 2d, to divert it, if possible, into other channels. Where can it go? So long as the interior commerce of the country can be carried on through its natural channels, there is still an opportunity left for the transportation of whatever products are necessary to go forward from the South, or merchandise to them. Neither cotton or merchandise are contraband of war, and, we presume, would not be interrupted on any of the interior lines through Tennessee, Kentucky, or Virginia, or the Mississippi river. Hence, we think, there must of necessity be a great diversion of trade from the Southern Atlantic coast through the interior. If so, there are four great outlets for all articles not contraband of war, viz: 1. The Mississippi river, direct from New Orleans; 2. The Ohio and Mobile road, to the Mississippi and Cairo; 3. The Nashville and Louisville line; 4. The Virginia and Tennessee Valley line. These are wholly interior routes, and by them the northern cities may be reached through Kentucky, Ohio and Virginia. Here we may remark, however, that if Virginia is to keep armed troops on the outlet of her roads, the easy transportation in that direction will be much interrupted, and it will derive little advantage from the diversion of commerce. On the other hand, if Kentucky preserves a peaceful attitude, her roads must receive great benefit from this change; but since Ohio is the great doorway or outlet of all the western and southern channels of commerce this side the Alleghanies, it is hardly probable that the Ohio roads should not derive positive benefits from the present state of things.

Our conclusion from this review is, that the railroads in the cotton States, and in Maryland and Virginia, will be injured by the state of internal war; that those of Ohio and New York, Kentucky, and probably Tennessee will be benefited; while all the remainder, comprising a majority of the whole, will be but little affected. This is founded on an examination of the commercial changes actually to be produced by the existing state of things. What changes may hereafer be produced, we know not. War, from whatever cause, is a terrible evil, and very unfavorable to the pursuits of commerce. We should pray that peace and harmony be restored. —*Railroad Record.*

Smyrna and Aidin (Ottoman) Railway.

The directors have issued a supplemental report, descriptive of the present position of the undertaking and of the progress which has been made. The line is open for 27 miles from Smyrna, and trains are running regularly. It is intended to open an additional distance of four miles in the first week in May, and eight miles more in July, which will intercept the whole traffic of Aidin and of the Meander Valley. The original estimates, which showed a net profit of 12 per cent., irrespective of any passenger traffic, "have been confirmed by the highest mercantile authorities on the spot since the line was opened." The passenger traffic on the line of 27 miles now in operation has been unexpectedly favorable. The capabilities of the country for producing wheat and cotton are highly spoken of. With regard to the latter point we have received a copy of a pamphlet just published at Constantinople, entitled "Cotton in Turkey," and comprising two papers—one, "On Cotton Growing in Turkey and Syria," by Mr. William Sandgord; and the second on "Railways, Cotton, and Provincial Exhibitions in Asia Minor," by Mr. Hyde Clarke. The latter proves satisfactorily the vast superiority of railway over all other modes of communication and its peculiar suitability to this region.—*London Railway Times.*

St. Louis, Alton and Chicago Railroad.

This road and the property of every description thereto attached, was sold (under the provisions of the new organization authorized by act of the Illinois Legislature) on the 21st ult., at Springfield, Illinois, by James Robb, Esq., special Master in Chancery, under the authority of a decree of the Circuit Court of Macoupin County. The property was sold subject to incumbrances to the amount of about $6,000,000, and was purchased by the trustees of the several mortgage bondholders, for the nominal sum of $500.

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending May 17, 1861:

Passengers	$16,767 61
Freight and live stock	18.252 89
Mails and sundries	1,433 95
Total	$36,454 45
Corresponding week of last year	34,695 87
Increase	$1,758 58

The traffic receipts of the Northern Railway of Canada for the week ending May 18, were $8,724 89, an increase of $79 26 over the corresponding week of 1860.

The receipts of the Grand Trunk Railway of Canada for the week ending May 11th, 1861, were $61,982 15
Corresponding week, 1860 55,609 47
Increase $6,372 67
Tot. traffic from July 1, 1860, to date, $3,011,341 37
Corresponding period, 1859 2,512,075 64
Increase $499,265 73

Switzerland and Italy.

The treaty between these countries for carrying a railway over the Luckmanier has been concluded. Switzerland is to contribute 48,000,000f. towards the cost of construction. The treaty also stipulates that when 25,000,000f. of this amount shall have been guarantied, and 5,000,000f. actually spent on construction, the kingdom of Italy will, within four years, contribute 20,000,000f., which will not, however, bear interest. It has been further stipulated that the cost of laying the railway over that portion of the Alps between Dissents and Olivone, shall be defrayed by the kingdom of Italy. The Canton of St. Gall has already voted 5,000,000 towards the expenses.

Great Western (Ca.) Railway.

The adjourned half-yearly meeting of the shareholders in the Great Western Railway, for the half-year to 31st July, 1860, was held at the company's office, in Hamilton, on the 17th inst. The following gentlemen were unanimously elected directors:—Robert Gill, Thomas Allen, Alexander Hoyes, Frank S. Head, Thomas Faulkner, C. J. Brydges, T. Reynolds, J. Young, R. Juson, F. W. Gates, and H. C. R. Becher. A resolution was passed, declaring a dividend of three per cent. per annum for the past half-year. A resolution was also passed, confirming the present position of the loan of the Detroit and Milwaukee Railway.—*Hamilton Spectator.*

Hoosac Tunnel Shaft.

Operations are being vigorously carried forward at these works, at the present writing, the arrangements for removing the debris from the bowels of the mountain being admirably arranged, and in such a manner, that the labor is carried on with great rapidity. An "iron bucket," holding some 150 gallons, is hoisted and let down into the big hole by steam-power, and as the shaft is now completed an iron pump is being placed within it to take out the surface water, which accumulates at the rate of 15 feet in depth per day, at the bottom. The work of tunneling at the bottom of the shaft, commenced a number of days since, on the two rock faces obtained by sinking this shaft, and a number of feet progress has been made in the two headings, the one leading into the mountain, and the other towards the valley.—*Hoosac Valley Transcript.*

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

Shamokin Valley and Pottsville Railroad.

This company was incorporated March 25, 1858, and is successor to the Philadelphia and Sunbury Railroad Company, chartered under the title of Danville and Pottsville Railroad Company in 1826. The construction of the western portion of the road, from Sunbury to Shamokin, 19 miles, was commenced in 1830, and completed within two or three years from that time. It was used for several years for the transportation of coal; but being an imperfectly constructed work, was abandoned. The eastern portion, from Pottsville, over the Broad Mountain, in the Mahanoy Coal Field, 11 miles, was also commenced in 1830, and completed in 1832. This was also abandoned, after being in use a short time. Towards construction, the State guarantied the interest on $300,000 of the Company's 5 per cent. bonds. In 1850, an act was passed authorizing the sale of the road; and a new company was organized, under the title of Philadelphia and Sunbury Railroad Company, by which the western portion of the road was re-constructed, and an extension built to Mt. Carmel. In 1858, the property and franchise of the company were transferred to the present owners. The capital stock authorized is $1,500,000; of which $864,450 has been paid—an increase since the last report of $1,650. The funded debt amounts to $822,117 50—an increase of $270. The funded debt consists of: $700,000 1st mortgage 7 per cent. bonds, payable in 1872; $89,970 6 per cent. bonds, convertible at pleasure; and $32,147 6 per cent. bonds (funded coupons) payable in 1863—the interest upon all the bonds is payable semi-annually in Philadelphia. The length of the main line, from Sunbury to Mt. Carmel, is 28.03 miles; length of branch to the Lancaster Colliery, 1.12 miles; siding, turn-outs, etc., about 2 miles. From the report of this company for the past year we have obtained the following:

The tonnage of the road for the year ending March 31, 1861, has been of coal	222,036 tons.	
Of other articles	10,162 "	
Total	232,198 tons.	
The gross earnings for the year have been		$114,126 60
All expenses, including drawbacks		52,278 38
Net profits		$61,848 22

—showing a ratio of expenses to earnings of 45.8 per cent.

The rents from colliery were	$7,337 17	
Expenses, including taxes and insurance	3,057 10	
		4,280 07
Total profits		$66,128 29
The interest on 1st mort. bonds is	$49,000 00	
The interest on funded coupons	2,250 04	
General interest and exchange account	506 89	
		51,756 93
Showing an excess of		$14,371 36

The Board has had reason to be satisfied with the steady growth of business upon their road until the present crisis in political affairs.

The increase in amount of convertible loan ($270) is owing to the holder of $1,500, of second mortgage loan of Philadelphia and Sunbury Railroad Company, having paid in 18 per cent. of face of the bonds as was done by the other bondholders before the organization of this Company. The capital stock is increased correspondingly by 33 shares issued to the holder of these bonds in conformity with the resolutions passed April 3rd, 1858, at the stockholders' meeting.

The Board also ask authority of the stockholders to issue one hundred shares of capital stock in order to complete arrangements which they have made to compromise with judgment creditors of the old Philadelphia and Sunbury Railroad Company, and obtain possession of that part of our road which lies in Schuylkill county.

It is important to mention in this connection that the Board have had under consideration the expediency of completing our road through to Pottsville, and that the subject still engages their attention.

The Mine Hill Railroad Company in October last completed the extension of their road to Locust Gap, thus forming a connection with us at that point. The Board anticipate a considerable through business and local trade with Schuylkill county over this route as soon as arrangements can be perfected with other companies.

The road and mines are in good condition for the business of the present year.

BALANCE SHEET, April 2, 1861.

	Dr.
Railroad	$1,241,486 65
Locomotives	29,102 64
Freight, coal and passenger cars	66,782 78
Uncollected tolls	8,428 53
Coal lands	301,400 00
Coal breaker and miner's houses	60,000 00
Real state	1,604 50
Cash	7,734 51
Bills receivable	2,401 57
Eastern division of road	2,076 22
Coupon account	2,467 50
Coal rents due	742 49
Total	$1,724,227 39

	Cr.
Capital stock	$864,450 00
Mortgage bonds	700,000 00
Convertible loan	89,970 00
Interest on do.	16,148 38
Funded coupons	32,147 50
Interest on do.	194 08
Coupons on bonds	1,260 00
Bills payable	8,328 87
Check rolls for March, since paid	2,741 58
Profit and loss	8,986 98
Total	$1,724,227 39

The office of the company is in Philadelphia. The officers are:

President—JAMES S. BIDDLE.

Treasurer—JOHN L. GODDARD.

Superintendent—A. R. FISKE, Shamokin, Pa.

☞ The New York Central Railroad continues to bring down heavy supplies of cattle—nearly 3,800 head during the past week.

Vergnes' Voltaic Battery.

Professor Vergnes has invented a Voltaic Battery of extraordinary power, intensity and economy. For telegraphic purposes, where those three qualities are desirable, it surpasses any other known to science. It is a late invention, but it has been several months in use on one of the most important lines in this country where its results have been very satisfactory. Hitherto Groves' Battery has been considered the best; but it has now been demonstrated by scientific tests, as well as by its practical working, in the hands of men whose knowledge and experience qualify them to determine it, that this Battery is superior to Groves' in many respects.

First, in intensity. It is found that two of his cells will produce a current as intense as three of Groves'.

Secondly, in quantative power. Two of his cells will produce as great a quantity of magnetic power as three of Groves'.

Thirdly, in economy. The quantity of nitric acid required for a given number of his cells is only one-third of that required in Groves'.

Fourthly, in saving time. This battery can remain at least a week in constant action without interrupting the current even when refreshing the cells. Groves' battery must be taken down, changed, and put up again every day.

Fifthly, in comfort and safety while using it. The disagreeable fumes arising from all other acid batteries, so obnoxious to employees and so destructive to health, are not perceptible in his battery.

Sixthly, in the steadiness of the current; owing to the confinement of his extreme elements in an inner jar the current is steady, equal, and constant in stormy weather, while that of Groves' is jerking and uncertain. Electricians can appreciate the value of this quality.

More recently the Professor has discovered new elements to be used instead of obnoxious acids, and made other improvements in his battery which make it more powerful and render its use much more economical than while it was being subjected to the scientific tests and working for telegraphic purposes.

In electro-plating, electrotyping, and wherever *Electricity* is to be made available for the uses of man, this Battery must inevitably supersede all others known to science. It is, as philosophers say, a step onwards.

Having discovered some hitherto unknown laws of electricity, and thereupon seeing the want of the proper instruments for making those laws available, he has invented a new mode for making the helix or coil of wire to produce a more powerful magnet. His discoveries have enabled him to increase its power threefold. By means of this new helix his extraordinary battery is now profitably applied to locomotives to increase their adhesive power. Of course, it is well known that there are two powers operating upon an engine in moving a train of cars—one is the *adhesive* power caused by the dead weight on its driving wheels, the other its *propelling* power produced by its steam apparatus. The former is increased or diminished by changing the quantity of dead weight, the latter by the change in the construction of its machinery. Almost all locomotives have more steam power than adhesive power, some have 20 to 40 per cent. more; no one is made with less, generally the calculations are made for a dry level rail where the adhesive power is the greatest. Hitherto the adhesive power has been increased to some extent in emergencies by the use of sand on the rails, and for this purpose an expensive apparatus is attached to the locomotive, and the sand must be of a particular kind and considerable pains taken in its preparation.

The dead weight of the engine, with the assistance which the sand will afford, determines the quantity of freight which can be moved, having reference to the condition of the rails, whether wet by rains, dews or fogs, or made slippery by frost, or snow, and always, of course, to the grades to be overcome. Great weight and sand are both required to transport any considerable load on almost all the railways that have been made, but both are very destructive. It is not the weight of the freight or passenger cars which destroys the rails, cross-ties, embankments and bridges, but the weight of the locomotives. When the rails are in bad condition, the driving wheels are deprived of much of their adhesive power, often fifty per cent., consequently a portion of the train must be left on the way, it must run behind time, and a proportionate quantity of steam power is rendered useless. The use of sand on such occasions, while it increases the adhesive power, is more destructive than even the dead weight. It needs no argument to prove the importance of obtaining an adhesive power equal to the steam power, no matter what may be the condition of the track, without resorting to dead weight or to sand. This desirable object, *this great economy* is now obtained by the use of Professor Vergnes' Battery and Helix. Hereafter, no more weight need be employed than is required for strength, and the use of sand can be wholly dispensed with. A light locomotive can do the work of a heavy one.

It is believed that locomotives can be constructed of steel or of Howell's homogenous metal with sufficient strength, but with only about one-half of the present weight. Who can estimate the value of such an improvement to the railroad investments in this country to say nothing of other countries?

This apparatus can be applied to almost all of the existing locomotives whereby they can be made as efficient when the rails are in a bad condition as when dry; in other words, the adhesive power may now be made equal to the propelling power under all circumstances. No alteration need be made. Herein is one of its advantages. The cost of the apparatus is but trifling compared with it is value, and it can be affixed without inconvenience, while the locomotive is being cleaned, or is undergoing some slight repairs. It is supposed that by means of this improvement the efficiency of the existing locomotives may be increased at least fifty per cent., that is, two locomotives may be enabled to perform the task of three—all the difficulties and breakages arising from the extraordinary slipping of the wheels in bad weather as well as in good, are by this improvement avoided, and the facilities for overcoming heavy grades are greatly increased. It is estimated that the ordinary slipping of the wheels in the due course of business is twenty per cent. which is so much waste of power. But the extensive breaking of the locomotives and the loss of time in the running of trains, occasioned by the extraordinary slipping are what constitute so great an item to be deducted annually from the profits of the stockholders of railways. The moment the wheels begin to slip, the steam must be shut off instantly by the engine-man, or the crank-pin or parallel rod, the connecting rod or the cross-head will break, and often the axles give way, so that the wheels come off. The repairs that follow these accidents usually cost from $300 to $500. It often happens that one-third of the locomotives are in the shops at one time undergoing repairs, from this cause alone.

Now all these difficulties can be obviated by affixing this apparatus to each locomotive. Besides it renders the train much more safe and less liable to run off the track as the magnetic force tends to keep the locomotive on the rails.

The battery is composed of several cells, each in a portable form with the liquid secured by well adjusted stoppers, is placed in a small box on the front of the engine over the cow-catcher quite out of the way of anything else. The helices are placed in iron boxes which are supported by the frame work of the locomotive about three inches above the rail and around the periphery of each driving wheel without touching them. The wheels revolve within. Wires connect the battery with the helices. The whole apparatus when thus annexed is painted and guilded like the locomotive and is ornamental rather than otherwise. It is estimated that the cost of using the battery does not exceed the cost of the sand heretofore required. The improvement is yet in its infancy, but enough has already been seen of its working to warrant the assertion that another great economy has been discovered for the benefit of stockholders in railroads. *

Massachusetts Manufacturing Dividends.

We extract the following interesting business items from the Boston *Commercial Bulletin* of the 18th ult.:—

The Lowell Machine Shop has declared an annual dividend of eight per cent., payable 27th inst. Commenced in 1855—make cotton machinery, locomotives, &c.—capital of $600,000, all paid in—liabilities, March 21st, $223,686.

The James Steam Mills, Newburyport, have declared a semi-annual dividend of five per cent., payable 20th inst. Commenced in 1842—sheetings and shirtings—capital $250,000.

The Globe Steam Mills, Newburyport, have declared a semi-annual dividend of three per cent., payable from 13th inst. Commenced in 1844—make jeans, flannels, printing cloths, &c.—capital, $200,000. At the annual meeting of the stockholders of the corporation, 13th inst., Mr. Alexander D. Brown was elected treasurer in the place of John Porter, Esq., who resigned after a service of 17 years. He leaves a good successor in Mr. Brown, who has been employed at the Bartlett and Globe Mills for 22 years.

The Fibrilia Felting Company, organized under the general laws, have issued their legal notice, from which we condense the following:—This corporation is formed to carry on the business of manufacturing flax, hemp, jute, China grass, silk, wool, cotton, and like fibrous substances in the various forms of manufacture necessary for yarns, cloth and felt as well as the bleaching and coloring the same. The capital stock is $10,000, which has been paid in and has been expended in the purchase of machinery, patent rights, &c., for carrying on the business. The par value of each share is $100, and the business is carried on in

Winchester, Middlesex county. Stephen M. Allen is President, Geo. L. Fall is Treasurer; and they, with S. P. White, are the directors.

The Suffolk Lead Works, South Boston, commenced in 1844—make sugar of lead, chemicals, &c. Their capital is $100,000 paid in, and their total liabilities on 30th ult. were $61,310.

Cotton and the Cotton Manufacture.

(Continued from p. 411.)

The following table shows the quantity of raw cotton exported from the United States since 1791, and the price per pound in cents:

	Quantity. lbs.	Price in cents.	Total value.
1791....	189,316	.....	.....
1792....	138,328	.....	.....

1860....	1,752,087,000	10.85	191,806,558

The following table gives the place of export of cotton, and the quantities and values, for the year ending June 30, 1860:

	Export of cotton in pounds.	Value.
Passamaquoddy.....	575	$47
Boston.....	3,102,755	384,940
Genessee.....	3,130	300
Oswego	11,855	1,435
Niagara	163,900	16,220
Detroit.....	1,201,204	120,120
New York.....	97,746,662	12,439,983
Philadelphia.....	145,993	17,034
Baltimore	100,910	11,944
Richmond.....	345,691	41,483
Norfolk	126,000	14,483
Petersburg.....	757,840	82,007
Charleston	157,348,683	19,663,295
Savannah.....	153,864,457	17,809,127
Mobile	351,540,748	38,533,042
Pensacola.....	9,000	1,064
Key West.....	2,338,800	401,919
Apalachicola.....	2,427,570	271,937
New Orleans.....	922,748,082	96,166,118
Texas.....	56,255,306	5,744,981
Salmier	847,773	84,776
Total	1,752,087,640	$191,806,558

Average price per pound 10.85 cents.

The following table shows the official value of cotton goods and yarns exported from the United Kingdom since 1785. Prior to 1800, the table applies only to Great Britain; after that, to all the British Isles:

1785.....	£864,710	1822.....	£26,911,041
1786.....	915,046	1823.....	26,544,770
1787.....	1,101,457	1824.....	30,155,901
1788.....	1,252,240	1825.....	29,495,281
1789.....	1,231,537	1826.....	25,194.270
1790.....	1,662,369	1827.....	33,182,898
1791.....	1,875,046	1828.....	33,467,417
1792.....	2,024,368	1829.....	37,269,482
1793.....	1,733,807	1830.....	41,307,429
1794.....	2,376,077	1831.....	39,577,866

1821.....	23,541,615	1858.....	182,221,181

* Records destroyed by fire.

This *official value* is determined by government rules, established many years since, giving a uniform valuation from year to year at certain fixed rates. This valuation runs ordinarily much above the true market value, but shows with entire accuracy the progress of the cotton manufacture in the British Isles.

The *declared value*, a term often used in the English papers, is the export price returned by the exporter.

In 1850, the import of raw cotton into England was 663,576,861 lbs. valued at £20,239,094. Home consumption, 588,100,020 lbs. valued at £17,937,100. The quantity exported after manufacturing was 401,070,112 lbs., valued at £28,257,401; the home trade took 187,029,888 lbs. valued at £17,569,591—showing a total valuation of £45,826,992 sterling as the amount of the British cotton manufacture in 1850.

In 1859, the gross importation in the official tables is put down at 1,225,989,072 lbs. valued at £34,559,636. The home manufacture took 976,643,000 lbs. valued at £27,530,774. The quantity exported in the form of manufactures was 717,916,867 lbs. valued at £18,208,444 sterling. The home consumption in manufactures was 258,726,133 lbs. valued at £23,164,770 sterling—showing a total valuation of £71,373,214 sterling or $345,446,355 as the products of the cotton manufacture in 1859.

The *official* value of the cotton exports in 1850 is put down at £113,775,380 against £28,257,401 as the computed or invoice valuation. In 1859, the official value is £215,020,993 against £48,208,444 as the declared or invoice price. The discrepancies are explained by the singular methods of valuation still retained in the Custom House system of England.

From the foregoing figures it is fair to infer, that the export price, as given in the invoice of the exporting merchant is rather a fictitious than a true valuation. The 258,726,133 lbs. of cotton goods consumed at home are valued at £23,164,770 or 43.51 cents per lb. The export price of the 717,916,867 lbs. of cotton sent to foreign countries, as appears from the foregoing figures, was only 32.63 cents per lb.

If we analyse more closely the tables and figures above given, we shall be able to arrive at some interesting comparisons as to the advancement of the cotton manufacture in the United States and in the British Isles.

From the above figures it is shown that the price of raw cotton exported from the United States was 12.12 cents per lb. in 1859, and 10.85 cents in 1860. In 1859, its price in England was 13.64 cents, or 1.52 cents per lb. higher than in the United States. Its entire value in the shape of manufactures in 1859 was 35.29 cents. per lb. The cost of manufacture is 21.65 cents per lb. above the market value in England or 23.17 cents per lb. above its cost in the United States. Or in other words, to the cost of cotton in the United States, the English manufacturer adds 23.17 cents to every pound, before it goes into market; or 198 per cent. is added in the form of labor, to its original value.

The cotton consumed, in the British Isles, in 1859, was enhanced by the manufacture from 13.64 cents per lb. to 43.51 cents per lb., or there was added by labor 29.87 cents in value to each pound of cotton, above the cost of the raw material, of their exported cottons. The relative values of the cotton and labor were as 13.64 cents for the cost of cotton to 18.99 per lb. for the labor bestowed in its manufacture.

This would also show, that the average value, or price, of the cotton employed in the manufacture of cotton goods, consumed in the British Isles is 22 per cent. greater than that in those consumed abroad—the proportion being as 61 to 39.

In the United States, the material is more than half the value of the goods when manufactured. In 1850, the cotton manufactures in the United States were valued at $65,501,687. Of this amount $37,778,064 was the cost of cotton, $27,723,623 the value of the labor added. Or stated in relative proportions, 57 per cent. of the value of our cotton goods was, in 1850, raw material, and 43 per cent. the value of the labor bestowed on its manufacture.

These figures show, that English cottons are worth per lb., when manufactured, 212 per cent. more than those produced in the United States, in 1850.

We have no returns of the census of 1860, but we have shown, heretofore, that the quantity of cotton consumed in 1860, was 72 per cent. greater than in 1850, and there cannot have been any considerable advance in the quality of the goods produced in the United States within the last ten years.

The consumption of cotton manufactures in the United States, in 1850, was equal to $2.83 to each inhabitant, including slaves. This is shown by adding to the home production of 1850 .. $65,601,687
Cotton importation 16,409,802

$81,911,489
Deduct cottons exported 15,196,451

Population—23,196,876×$2.83 ..... $66,715,038

The consumption of cotton goods in 1860 is increased to $3.49 to each person as follows:

Production in 1850 ..... $65,501,687
Add 72 per cent. for increase 47,061,214

$112,562,901
Importations in 1860 32,559,644

$145,121,024
Deduct exports in 1860 35,455,644

Pop. in 1860—31,429,896×$3.49 .... $109,666,281

In 1859, the consumption of cotton goods in British Isles was equal to $4.00 to each person estimating the population at 28,150,000 persons as is shown by the foregoing figures. Consumption 258,726,133 lbs.; value $112,580,782 equal to $4.00 each to the population.

(To be continued.)

Illinois Central Railroad.

An election of four directors of the Illinois Central Railroad Company was held at Chicago, on the 31st ult., at which the following gentlemen were chosen: Leroy M. Riley, New York; Franklin Haven, Boston; N. P. Banks, Chicago; John M. Douglas, Chicago. Mr. Douglas is the only new man in the Board.

New York Canals.

The quantity of flour, wheat, corn and barley left at tide water by our State Canals from the commencement of navigation to the 29th of May inclusive, during the years 1860 and 1861, is as follows:

	1861.	1860.	Decrease.
Flour, bbls.	80,600	159,000	73,400
Wheat, bush...	3,043,100	877,200	*2,165,900
Corn, bush.	2,000,200	2,415,000	414,800
Barley, bush. .	84,400	74,400	10,000

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a gain of 354,780 bbls. of flour.

American Steel Cannon.

The vital qualities necessary in cannon metals are *strength* to resist the explosion of the charge, and *hardness* to endure the bounding of the projectile along the bore, and in case of the rifle bore, to resist the excessive wear of the projectile in the grooves. All the metals employed have their defects. Cast iron is quite tenacious, if a sufficient weight is employed, and tolerably hard, but its comparative elasticity, (an important element of strength) is so small that its tenacity is invariably destroyed after a certain number of applications of the straining force. The difficulty of obtaining sound castings, by reason of the unequal shrinkage of the metal, is unfavorable—so much so that the strongest "high" iron, by its superior contraction, does not, as a rule, make so strong a *gun* as a metal in itself weaker. The great weight of cast-iron, for a given strength, has confined its use generally to heavy cannon for siege and sea-coast purposes. Bronze—a more tenacious compound—is prepared for portable guns, and this, in turn, has its serious defects. Its density (an element of strength in cannon metals) and tenacity are considerable, but its softness unfits it, for reasons already stated, for long service, particularly when rifled. And its cost is considerably greater than that of cast or wrought iron, or semi-steel—that is, steel made directly from the pig iron. Wrought iron has a tensile strength double that of the best cast iron, and is much more elastic, but somewhat softer. Authorities generally unite in stating that it was, when most in use, an improvement on cast iron, but the difficulty of producing large masses sound and homogeneous, has prevented its extensive introduction. The celebrated Armstrong gun, and other modern "built-up" cannon are, perhaps, more durable, and certainly stronger than any solid piece can be made, owing to the difficulty of forging or casting large masses of uniform strength, in the present state of the art; but it is generally conceded that the same expense devoted to a large number of cheaper guns will be more effective in the long run.

Steel possesses, in a higher degree than any other compound, the leading qualities required for cannon. It is tenacious, elastic, and hard, in a much greater degree than either of the other materials. There are two principal kinds of steel adapted to making cannon, which indeed vary in value, with reference to the sizes and uses required. Cast-steel is practically homogeneous in small masses, and for this reason is superior for cutlery, the fire-plates of boilers, etc. In the latter case, not strength to resist pressure, but soundness to resist blistering are required. But it can be more soundly worked in very large masses than steel made directly from the pig iron in the puddling furnace, and called semi or puddling steel, while its tensile strength and hardness are little if at all greater. Semi-steel, then, is probably as good a material for guns as cast-steel, instrinsically, while its cost is very much less—about that of wrought iron, and less than that of bronze. In the present state of the art, it is not probable that the largest classes of cannon can be well made *solid* from steel, by reason of the difficulty before mentioned, of making such masses sound. This defect, however, does not apply to light artillery and howitzers. Forgings for such pieces can be made sound enough for all practical purposes. Indeed, the Albany Iron Works'* semi-steel has been invariably proved sound enough in such large forgings as locomotive tyres. The experience with it, under this peculiarly severe test, shows it to wear twice as long as iron, and to wear evenly, and not to fracture under its severe hammering over bad roads, like iron—while the smaller masses, such as boiler-plate, are not so uniformly homogeneous. There seems to be greater facility in making moderately heavy forgings in steel than in wrought iron. Tools for working heavy masses, also, have been greatly improved during the last year or two, and it is probable that all sorts of wrought cannon made by them would be far superior to those made under the light hammers and rolls of the last decade.

The public is aware that this semi or puddled steel, is being made into light guns, in England and Germany; and the question is generally asked, "Why are we not importing such guns?" The question should be: Why are we not developing our own greater resources, and preparing to turn out any quantity of better guns at home, rather than depending for a limited supply from an unfriendly Power?

The Albany Iron Works' steel is, in the first place, made chiefly from Salisbury iron, a more tenacious material than England can produce, as their own authorities concede. The steel, by Government tests, has stood a strain of 107,000 pounds to the square inch, and averages between 90,000 and 100,000, which is higher than the average of the best European puddled steel. The highest test of cast iron, by the way, is 45,000 pounds, and its average is about 25,000; the highest test of wrought iron is about 72,000 pounds, and the highest of bronze, 60,000 pounds. The Albany Iron Works' steel has not only proved more successful here than the English there, but it can be furnished in any quantity, in the shape of guns, to our Government, at a less cost, all things considered, than that of foreign steel. If therefore, there is any virtue in steel cannon, there is every reason why they should be furnished at home. We learn that this steel, already tested and approved by Government for other purposes, will be offered to our military authorities for thorough trial in this department of service. We have no fear as to the result, only let our manufacturers have the chance—the guarantee that their work, if good, will be bought in preference to English work, and we shall be able to cope with any trans-Atlantic Power in the arts of peace, and in the arts of war, if it comes to that. Already the best rifled shells and shot known are produced at home. Artillery, to be effective, must be light; cast-iron is too heavy, bronze is too expensive, and not durable; while steel, at the cost of iron, seems to be the only material upon which we can depend to throw these shells and shot of ours. By all means, let this question be tested at once. The necessity for plenty of artillery is rendered no less imperative by the present aspect of trans-Atlantic matters. Everything may depend on being ready. —*N. Y. Times.*

The Suez Canal.

Letters from Paris state that M. Lesseps, the director of the grand enterprise of opening a ship canal across the Isthmus of Suez, has returned from Egypt to raise additional funds for the prosecution of his great work. According to latest accounts, $4,000,000 have been already expended without adequate results, as a very important dyke, on the Mediterranean side, has been washed away by the action of the waves.

Population of Canada.

The population of Canada in January, 1861, by the new census, as reported in the Quebec *Chronicle*, is as follows:

Lower Canada 1,103,911
Upper Canada 1,369,733
2,473,644

In 1851, the census gave—
Lower Canada 890,261
Upper Cahada 952,004
1,842,265

Increase in 10 years 631,379

Of this increase, 213,650 is in Lower Canada, and 417,729 in Upper Canada. Lower Canada gained at the rate of 22 per cent.; Upper Canada at the rate of 43 per cent. United Canada has gained at the rate of 34 per cent., from 1851 to 1861. This is less than the increase in the United States for the last 10 years, where the ratio of increase from 1850 to 1860 was at the rate of 36.7 per cent., or two per cent. greater than that of Canada.

American Railroad Journal.

Saturday, June 8, 1861.

Money and Business.

The London correspondent of the N. Y. *Commercial Advertiser* "SPECTATOR," well known as one of the Editors of the London *Times*, in his letter of May 18th, says:

"All that can be said is, that of the phenomenon of a country importing bullion at the rate of four or five million dollars a week, while civil war is raging from one end of it to the other, is to continue permanent, stock speculators in every land now at peace will become advocates for an immediate commencement of hostilities, no matter in what quarter, so long as it is likely to produce such an agreeable result. To ordinary minds, even after making every allowance for the abundance of your supplies of grain and the need of Europe in that respect, the magnitude of our gold exports to New York within the past few days appears so anomalous that great surprise will be felt if it be not followed by a reaction.

The fact above stated, of the constant import of gold from England, to the United States, is the best comment we can make on the favorable condition of our business relations with foreign countries. Notwithstanding the war, our nation is growing, in wealth and power.

The war it is true, changes the direction of business, and prostrates commercial credit for the time, but it destroys nothing in the shape of wealth, except to the extent of the actual destruction of existing property. It exposes most fully the evils of our commercial system, founded too largely on credit. The system we borrowed from England, and the war will prove a blessing if it only absolves us from the errors contracted by our too great intimacy with British credit. The policy of England is to buy raw materials, cheap for cash, convert these materials into manufactures, and sell these manufactures, on credit, all over the world. The manufacturers of the British Isles pay from 2 to 3 per cent. per annum for the use of capital; those of the United States, under our system of currency, pay on an average more than four times the price of money in England. Her cheap capital goes all over the world, seizing hold of all the more valuable products, mines and raw materials of every land, which are transported to England in a crude state, and turned into the home workshops. Hence they re-issue, vastly enhanced in value, to absorb the wealth of other nations. The cotton of India is taken up by British capitalists, transported half the circumference of the globe to the mills of Glasgow or Manchester, converted into fabrics, re-shipped to their place of export, and sold to the lords of the soil, cheaper than these last can produce them with their own rude machinery, and the price of labor merely nominal. In the same way are take up the cotton of the Southern States, the wool of Brazil, and raw silks of China and Hindostan, and returned, wrought into every variety of fabric and costume. These goods are exchanged for raw materials, or sold on credit and the slightest disturbance of trade causes at once a flow of specie to London, as the centre of the commercial system of the world, unless there is a demand for food or raw materials, to meet this indebtedness, as in the present year, from the short bread crops of 1860.

Fortunately for us, for the first time in our history, we are able to continue to pay for a series of years, without a resort to the export of specie The surprise of the London correspondent above quoted is real and not feigned. For the year ending June 30, 1860, the United States exported $56,946,851 in specie and bullion, making with other domestic produce $373,189,274 of exports and $26,933,022 of foreign merchandise re-exported or $400,122,296 of gross exports against $356,789,462 in the previous year. The total imports in 1859 were $338,768,130, and $362,163,941 in 1860.

The import entries of foreign merchandise from July 1, 1860, to 30th April, 1861, into New York amounted to $171,600.000
Add three weeks in May 8,153,802

Total to date $179,753,802
Against same time, 1860 208,259,567

Decrease since 1st July $28,505,765

The export clearances of domestic produce and miscellaneous goods (including foreign articles re-exported,) from 1st July, 1860, to 30th April, 1861 ..... $102,561,000
Add three weeks in May 6,813,571

Total to date $109,374,571
Against same time, 1860 69,245,166

Increase to date $40,139,405

The exports of specie from New York from 1st July, 1860, to the present date, are ..$23,487,000
Against same time, 1860 47,852,000

Decrease to date $24,365,000

The receipts of gold from California, Europe, and the West Indies from 1st July, 1860, to May 21, are as follows:

From California $31,708,000
Foreign gold direct 25,134,000
Foreign gold via Boston 5,334,000

Total since 1st July $62,176,000

Exchange on London is now as low as 105 to 105½ in New York, or 4 per cent. below par. In New Orleans on the 28th ult. sterling bills on

London were selling at 98 to 99. The gold continues to arrive here by each successive steamer.

Railroad securities maintain their prices better than any other. Property in railways is now regarded as the safest in the market.

On the 29th of May the United States Government had $5,312,692 on deposit, of which $3,017,931 were subject to draft.

Vergnes' Voltaic Battery.

We invite attention to the interesting paper in to-day's issue, on Vergnes' Voltaic Battery, furnished us for publication by an intelligent correspondent. The propositions so well stated by the writer are worthy the attention of all parties interested in Railways.

Journal of Railroad Law.

THE GRANT TO THE DES MOINES NAVIGATION AND RAILROAD COMPANY: CONFLICT AS TO TITLE: THE COMPANY NOT TAXABLE FOR, IN THE YEARS 1857 AND 1858.

By an act of Congress of the 8th of August, 1856, certain lands were granted by the United States to the State of Iowa, to be by the State conveyed to the Des Moines Navigation and Railroad Company, for the purpose of improving the navigation of the Des Moines river. This act contained provisions limiting and directing the times and proportions of the conveyance of the lands to the company; making this dependent upon the previous outlay of money, upon the works of improvement. The General Assembly of Iowa accepted the grant on the 9th of January, 1847; and the contract between the State and the Company was entered into on the 7th of June, 1854. The Register of the Des Moines River Improvement on the 14th of May, 1855, and the 6th of May, 1856, certified the land in question, which is situated in Pike County, to the Company. The Governor, however, refused to execute a patent for the land until the 3d of May, 1858; a patent was then executed and recorded on the 16th of the following June. The taxes for the County of Polk were by law to be completed by the second Monday in April in each year, thus the assessment of taxes for 1858 was completed the month previous to the execution of the patent for the land by the Governor of the State.

The question to be determined was, whether the company were liable to be taxed for the land during the years 1857 and 1858. The County of Polk, the defendants, contended that the title to the lands passed to the Company by operation of the Register's certificate executed in 1855; and also that the contract between the State and the County was a sale of the land on credit, which was subject, by statute, to taxation. The Company, on the contrary maintained that the title to the property did not pass to the Company, but was vested by Congress in the State, where it remained until the issuing of the patent by the Governor. Consequently, the County had no power to tax them for these two years, and they institute these proceedings to enjoin the County of Polk from collecting the taxes they had levied. The District Court rendered judgment in favor of the defendants, and the plaintiffs then appealed. The following is the opinion of the Supreme Court reversing the decision of the court below.

WOODWARD, J.—The question presented is, whether the lands in question, conveyed to the complainants by the State, in June, 1858, were taxable for the usual State and County purposes, prior to the date of the conveyance.

The provision of the code exempts from taxation "the property of the United States, and that of this State." It then becomes a question as to whether the lands were the property of the State, or of the petitioners. The complainants contend that these lands so appropriated, and commonly called "The River Lands" were the property of the United States or of the State, until the delivery of the patent by the State to the Company, in June, 1858, and therefore, were exempt. On the other hand the respondents urge the second clause of section 456, which declares that lands and town lots, including lands brought from the United States and from this State; and whether bought on credit or otherwise are subject to taxation. And they argue that the contract between the State and the Company of June, 1854, was a sale on credit within the above section; and second, that the certificate of the Register of May, 1855, and May, 1856, operated as a conveyance. As emphasis is undoubtedly laid upon the language of these papers, it is given in substance. That of the first date runs thus: "I certify that the following lands were sold by me on this 14th of May, 1855, to the Des Moines N. & R. R. Co., in pursuance of the contracts and agreements with said company for the construction of the Des Moines Improvement"; which is signed by the State Register of that work. The second is as follows: "This certifies that the following land being a part of the land appropriated, etc." "have this day been transferred, and are hereby conveyed to" the said company in consideration of $144,657 71 expended in pursuance of the contracts, etc., between the State and the said company.

We are well satisfied that the lands were not the property of the Company so as to render them subject to taxation at the times in question. This was not a purchase on credit, in the sense of section 456, above cited. This provision was enacted some time before this contract was made and therefore could have no intended reference to it. Its material allusion is to those cases which may properly be termed purchases of lands bought on time from either the State or the General Government. Purchases under the pre-emption laws, giving time for payment, and those of the school lands of this State, are plain subjects of this provision. In these cases the party enters into possession and has the use and enjoyment of the lands prior to payment, and this it is which constitutes the justice of the enactment.

The words implying a sale or conveyance in these papers can have no such force. The Register had no authority for this; it was not within his power. By the terms of the act of Congress granting the lands for the express purpose, the Company was first to expend money upon the work, and these lands to a certain relative amount were to be conveyed to them, and so, from time to time, as the work progressed. And in no case was the Register empowered to convey. He only certified to the amount expended by the Company, and the quantity of the land to which this entitled them, and the deed of patent was by law of the State to be signed by the Governor.

But i is contended that the restrictive and directory provisions of the granting act were in effect released by an act of Congress of the 3rd of August, 1854, which enacts that "where lands have been or shall be granted to a State by law of Congress, and such law does not convey the fee simple, or require the patents to be issued therefor, the lists thereof, certified by the Commissioner of the General Land Office, under his seal of office, shall be regarded as conveying the fee simple of the lands peoperly included in such lists." We are unable to see how this act should affect the terms, conditions, or objects upon and for which the grant might have been made. It goes no further than to affect the mode by which the title may pass, dispensing in some instances with the patent, but in no sense releasing from conditions or trusts annexed to the grant. Therefore, though the State might acquire her mere title by such a list, still the object of the gift and the mode of dispensing it in detail, as the work progressed would remain.

Did the company buy these lands of the State upon a credit? In view of the position of both parties, let us look at the entire transaction. Here is a great public improvement to be made, and here are supposed to be something like a million of acres of land appropriated for that purpose. The State makes a contract with a company to carry on the improvement and take lands as a remuneration. But the act of Congress has anticipated the contingency of the whole passing into their hands, and the work being thon neglected, and has provided that it shall be meted out only in proportion to the progress of the improvement. This intention, this policy would be entirely defeated, and the specific direction disobeyed, if the lands could be held to pass to the company by either of the modes above contended for. The idea that the lands pass by virtue of the contract, is met in the outset by the difficulty that they are not yet ascertained either in quantity or in specific description.

The contract is not, properly one of sale. To the State the main object was to obtain a certain large internal improvement. The other party is to perform this work and take his compensation in lands, receiving them in proportion as it progresses. This contract is so similar to the prior one with another company (Bangs, Bros. & Co.) that if this can be construed as conveying the title, so must that, and the result would be that they belong to that former contractor, unless the State has taken some measure to divest them.

In the act of 25th of January, 1855, we find a distinct provision by what means the title shall be conveyed. "No patents or conveyances of Des Moines Improvement land shall issue, except upon the written requisitions of the commissioners thereof," and all patents were to issue from the State Land Office, and were to be signed by the Governor and to be recorded by the Register. This provision indicates the object of the certificates in question, and limits their expression and intent although the officer may have thought that he was possessing the very title.

Finally, the legislation of the State has uniformly recognized as the fact, that the lands remained in it until a regular conveyance of them; and that no right in them, save an *inchoate* one, was transferred by the contract. We conclude that the State had no right to tax these lands,

as property of the Company, until she had conveyed them.

One question, however, remains. It is whether the lands whose title was acquired in June, 1858, should be placed in the assessment of that year. We are of the opinion that the true sense of the law is, that if one acquires his title from the government after the close of the assessment, the land is passed for that year. It cannot be brought up as omitted property, and if it can be held subject for any reason, it may be brought into the list, though obtained in however short a time before the next list is begun. Such a course would involve an inequality and injustice. This land not having been obtained from the State until June in 1858, was not subject to taxation for that year. The judgment of the District Court is reversed.

The Yorkshire Iron Works.

I cannot probably give a more intelligible account of the iron manufacture of this district by describing the Bowling Works, than by dealing in generalities. In nearly all respects they are a counterpart of other works in this small district. Here are six blast furnaces, having stacks forty-six feet high, both boshes nine and eleven feet diameter. The blast is not heated, which issues a much better quality of metal, though a much less yield is obtained. About seventy-five tons from each furnace is the weekly product. For fuel, all coke is used, which is prepared near the furnaces, one half in closed kilns and the other in exposed beds, the coal yielding approximately sixty-six per cent. There is rather more loss by exposing the coking process, but a purer product is obtained. To reduce the calcined ore, thirty hundred weight of coke are required for a ton of iron. The ore yields, as ascertained by the consumption for a long series of days, in its raw state, 30.95 per cent. of iron; in its calcined, 42.9 per cent., which is quite equal to the best of our argillaceous carbonates, and considerably exceeds the greater part of the "clay bands" of Great Britain, some of which yield as low as 20 per cent., but such are not used alone. The burning of the ore, which is generally done in heaps elsewhere, is here more thoroughly effected in kilns. The kilns are about twenty feet in height, and in rows, with a tramway running over and between them, so that the ore and fuel are discharged from the cars without re-handling, as they arrive from the mines. The lower openings from the ore and the coke kilns are on a level with the tunnel heads of the furnaces; as are also the beds of coke prepared in the open air.

About forty-nine pits are kept in working order to supply these six furnances and the refining, puddling and reheating fires; and these are connected to the works by over forty miles of railway, on which locomotives are used for draught. The worked seam of ore averages about thirty inches in thickness, but contains more or less shale, and yields on an average three thousand five hundred tons per acre. The coal seams average about twenty-four inches.

With this description the working of the furnaces may be understood, and we will pass to a description of the refining processes.

We here start with pig iron already much superior in purity to those varieties we have described before in this series of letters. It is not only made from a purer ore and coal, but with a cold blast, that does not impart to the iron certain impurities, the nature of which has not been ascertained to our entire satisfaction, but is probably owing to a proportion of sulphur, and possibly silica. This pig metal, however, is run through refining fires—which consists in melting the pigs with coke, and running the metal into open cast iron moulds, and when the whole casting is out it is chilled yet further by a stream of water. Of these refining fires there are five, of unusually large size, in which forty hundred weight are melted at a time during the day, and fifty hundred at the last heat. It is here broken by the men with heavy sledge-hammers, then weighed into parcels for puddling, and wheeled to the furnaces.

Small iron trimmings are thrown into furnaces to facilitate the balling process, as it also serves to retain a larger proportion of carbon in the iron, and gives it somowhat of the nature of steel. Blooms or balls are made, weighing very little if any more than one hundred pounds each, and are well compressed before leaving the furnace. Vertical steel hammers are used for shingling, of which there are three for this purpose. The balls are more carefully and thoroughly cleaned than I have seen in any other district in Great Britain, beginning with light, and finishing with rapid and heavy blows, and compressing the blooms into thin slabs—about one and a half to two inches in thickness—and nearly square. These slabs are allowed to get cold, and are then broken into six pieces of nearly uniform size. An upright fall, worked by power, is used for breaking, the operation being done quite rapidly, only one machine being used in the works. After this the fragments, which are nearly square, are piled with covers for reheating, and when heated properly are rolled into bars for refining again, which is successively done from four to six times. Other qualities of pig will not bear this succession of refining without causing more loss; and when refined will yet have more or less of the original properties of the pig metal. Even when red shortness is rectified to a considerable extent by union with cold short iron, the product has not the tenacity of a metal which is originally free from those curious properties. At these works, the locomotive tyres have a fracture showing a crystalization very similar to steel, though it is not called such; and its strength is fully equal to the best puddled steel, while in uniform homogeneity it far excels.

When puddled steel shall be made from the purest of pig iron, and will allow of being refined by successive re-rolling without losing its nature in part or whole, and admit of uniform results through this series of refining, *then* we shall have puddled steel which will be what many men are now supposed to believe it to be—reliable. It seems probable that for some purposes the puddled steel will answer the best of purposes, but where there is a liability to an irregular expansion and contraction, as of sheets, it is a question whether flaws and fractures will not develop weakness which iron could not be likely to show. I hope to enter into this subject more fully under the head of steel manufacture, and if I am wrong in my judgment of this and other new processes, no doubt practical men will be able to show me the evidences of my error.

These animadversions are properly introduced in this place, because they serve to illustrate my earnest impressions, if not the fact that neither good iron nor steel can by any possibly means be made from ores that are originally good—that have neither red nor cold short giving qualities; and further, from ores that do not possess those elements which serve to thoroughly flux the iron in its successive purifications. What these elements are we cannot always determine. As for other essential provisions in producing reliable steel in the puddling furnace, they may be discussed in an other connection.

We return to the description of the Bowling Works. Twenty-eight puddling furnaces are used, each yielding about twenty-nine hundred weight of iron to the turn. In rolling, the forms were not reduced so rapidly as I have usually seen. In the heating of the piles of iron, it appeared to me that more than usual care was taken in the use of welding loam. For boiler plates the slabs are dressed by helved hammers. For tyres, axles and special work, six steam hammers are used, one of which is seven tons in weight, the same as the large one at the Reading Forge, Pennsylvania. Bars and rods that are rolled to medium and small sizes have an exceedingly fine fibrous texture; and they admit of twisting into knots and other various close bendings while the iron is cold, without fracture. Products of the mills of this district return an average of £25 sterling per ton, or more than double the average yield of mills producing ordinary "best" refined bars and rods. Boiler plates thirty-four feet in length, have been rolled for government use. Connected with these works are various shops, for forging, casting, and machine and boiler making.

At Bowling I was shown some specimens of iron ore from the north of Ireland. One is a brown hematite, similar in structure to the "pipe stem" ore of the Juniata district, Pennsylvania. It is supposed to be very pure, and likely to produce a quality of iron like that of Juniata. A furnace is about to be put upon smelting this variety, the ore to be imported from Ireland. Another specimen from the same vicinity is a magnetic variety which shows its transition character, evidently having been brown hematite at some former period. It is analogous to an ore found near Christiansburg, Montgomery county, Virginia.

Lest silence respecting the best qualities of iron made in the United States should be construed into a disposition to ignore their prediction, or to cast an inflection that the elements are not in existence, I would simply say at this time, that we certainly have the elements, probably in a greater variety than any other country on the face of the globe; that we have all the talent that is essential for management and manipulation, and that the market is almost unlimited in extent, if looked after with reasonable tact. As our mechanical and civil engineers become better acquainted with the diverse and special qualities of iron, will they allow much better prices for that which they particularly need. Present expediency, and as well, also, indifference, have made iron masters disregard the special valuable properties that belong to the best of that they are able to make. In this respect rolling mill managers are as much at fault as blast furnace proprietors. The interesting features of American iron, that correspond in part or whole to the Yorkshire cold blast product, would require a letter by itself.—*Correspondence of the N. Y. Evening Post.*

Results of Trials of Varieties of Iron Permanent Way.

Among the proceedings of the London Institution of Civil Engineers, was the following paper prepared and read by Mr. F. Fox, C. E. It was printed in Newton's *London Journal* of March, 1861:

The author stated, that he did not wish to be thought an advocate for the superiority of either of the systems tried over other plans, or of iron over timber for permanent way, under any and all circumstances; his object being merely to record results of actual trials, and the conclusions to which they led.

In 1853, an experimental length of a quarter of a mile (double line) of iron way, on the principle of Mr. I. J. Macdonnell (M. Inst. C. E.) was laid on the Bristol and Exeter Railway. In consisted of a continuous rolled iron rail bearer, weighing, on an average, 83 1-2 lbs. per lineal yard, and 11 inches in width. The bearers were united by joint or saddle plates 30 inches in length, weighing 50 1-2 lbs. each. The bearers had a rise in the centre of 9 16ths of an inch, and a rib or tongue was rolled on the upper side, which fitted approximately into the hollow of the bridge rail. The rails originally laid weighed only 53 3-4 lbs. per yard. Between the rail and the bearer, a thin packing of pine wood was placed, the grain being in the direction of the length of the rail. The rails, the bearers, and the joint plates, were bolted together, the distances between the intermediate bolts being so arranged as to admit of a rail being readily turned by unscrewing the nuts, or of a new rail being put in, without "opening out" the ballast. Transoms, or cross ties of angle iron were placed at average intervals of 12 feet between the two lines. This system differed from the Barlow way, in having the rail or wearing surface separate and esily removable from the bearing surface; but, on the other hand, it considerably exceeded the Barlow rail in weight. After a wear of more than seven years, this length of iron way was in

good condition, and bid fair to continue so for some time to come. About one-third of the rails proved defective within the first two years and had been replaced by rails weighing 60 lbs. to the yard. The ballast, which was very indifferent, being a loamy gravel, had been well drained, and thicker packing, laid with the grain traversely to the direction of the rail, had been introduced. The bearers and joint plates, transoms, and rails, were supplied at £7 per ton delivered, and the cost per single mile of this arrangement, exclusive of the cost of matching and laying, was £1,936. The cost of a single mile of the longitudinal timber way, at the same period, taking the rails at the same weight and price, was estimated at £1,850. It should be mentioned that iron was then low in price, whilst timber was high. Owing to the undue lightness of the rail, both of these calculations were below the cost of a well constructed permanent way.

As this experiment appeared on the whole to have been successful, it was determined to extend the trial, by laying one mile of double line on this system, at a further distance from a station, so that all trains should pass over it at full speed. Some modifications were, however, made. The width of the bearer was increased to 12 inches, and its thickness was reduced to 9-16ths of an inch, so that its weight was 75 lbs. per lineal yard. At the same time the curvature was slightly increased. The pine packing (creosoted) was thicker, and at the rail joints pieces of hard wood, laid with grain lengthwise, were substituted. The rails weighed 68 lbs. per yard. The contract for the bearers, joint plates, and transoms was taken at £9 10s. per ton,—the cost of rails being £9 8s. 8d. per ton. This length was laid in July, 1857, where the line had not long before been re-ballasted with hard clinker ballast. The cost of a single mile, exclusive of laying, amounted to £2,511. One mile of timber way, laid with the same section of rail at the same time, cost about £2,254.

As these trials appeared to give a reasonable expectation of the greater durability and diminished cost of maintenance of the iron way, the author felt justified in recommending a further trial, on a more extended scale, and on different districts of the railway. As the rolling and straightening of the curved section of bearer was alleged to be difficult, it was decided to adopt a flat section. The bearing surface was increased to 13 inches, the centre rib was rolled 1-2 an inch deeper, and the weight was thus brought up to 48 lbs. per yard. Rail joint plates of a similar section to the bearer joint plates were bolted underneath the bearer at every rail joint. Although this addition had been found advantageous, the way was still weaker at the rail joints than at any other part. Additional intermediate bolts were used, so that the upper and lower sections of the way were held together as a girder. The contract for the bearers, joints, and transoms, was taken at £9 12s. per ton, and the rails being £8 13s. 1d. per ton, the cost per single mile was £2,571.

In order to test the comparative strength of the different sections of bearer, of rail and bearer combined as laid, and of the rail and bearer joint plates, a series of experiments were made, the results of which were given in tabular form. The distance between the points of support was 5 feet. Of the three sections of bearer only, that of 1853 (the first) showed the least, and the flat section of 1829 the greatest, deflection, under a load of about 5 tons; but in each case the ultimate strength did not exceed 7 tons. Of the three sections of iron way complete, that of 1858, with a rail weighing 68 lbs. per yard, rather the strongest. The ultimate strength was reached under laps varying from 19 to 21 tons. An experiment with the flat bearer showed, as was expected, the increase stiffness gained by placing the centre rib downwards, thus practically deepening the girder. The ultimate strength of the timber way was ascertained to be 28 1-2 tons, or 50 per cent. higher than the iron way. It was, therefore, determined still further to increase the section of the iron bearer. In this case the width of the bearer was 12 inches, and it was stiffened by a web underneath, 3 inches deep and 3-4 of an inch thick (a plan which was claimed by Mr. W. Bridges Adams). The weight was reduced to 75 lbs. per yard, and the contract for this section was taken at £9 per ton. To stiffen the rail joints (which had no plates underneath), and to secure the ends of the rails, an iron plate, having a tongue rolled on it, was used. This section of way has been laid too short a time to warrant any decided expression of opinion of it, as compared with the other sections; but as a length of between 4 and 5 single miles was under trial, it would soon be seen if it possessed any advantages. It was perceptibly stiffer to travel over, and the middle web gave it a firmer hold in the ballast than either of the other sections. The cost of a single mile was £2,385. This section was the fourth modification of rolled iron bearer under trial, the entire length being 14 1-4 single miles.

The partial failure of the Macdonnell way on the Bridport railway was then referred to; and it was asserted that it arose from the rails and bearers being too weak, and from a disregard of those appliances which the character of the gradients, curves, ballast, and subsoil rendered more than ordinarily necessary.

In May, 1858, a trial length, of a single half mile, of the cast iron sleeper way of Mr. De Bergue, was laid in immediate continuation of the Macdonnell way, and on the same kind of clinker ballast. Whilst still preferring a continuous rolled iron to any cast iron way, the author felt bound to state that not a single sleeper had been broken, the nuts of the bolts did not work loose, the rails wore very well, and with the exception of a little depression at the fished rail joints, the line kept as good a "top" as could be desired, and was as easily maintained, but it was more rigid. The cost of this arrangement per single mile was £2,103, or £300 per mile less than the Macdonnell way of the same period.

The merits and defects of the continous rolled iron permanent way were thus stated. The defects, or supposed defects, appeared to be: 1. The great cost, at present prices, almost precluding its adoption on a railway of limited capital. 2. The difficulty of getting the bearers rolled. 3. The possible increased wear of the rails. 4. The greater "wash" of all but very good ballast, inseparable from all iron ways, resting on or near the surface. And, 5. The difficulty of laying on sharp curves, and of keeping in place when laid. Its presumed merits were: 1. Greater economy in the long run, owing to increased durability. It was estimated that the cost of renewal of the longitudinal timber was £45, and of the iron way only £21, per single mile per annum, or less than half, without reckoning the considerable item of labor in the replacement of the timbers. 2. Saving in maintenance, and facility for packing, owing to no "opening out" being required. 3. The safety of the iron way, especially as contrasted with a timber way which had been long laid. 4. The facility of exchanging worn rails. 5. The preservation of correct gauge. 6. The lowness of the crown of the rail above the bearing surface. 7. Saving in the depth of ballast in the case of a new line. And, 8. The equableness of the motion, rendering it probable that less injury would be sustained by the rolling stock.

Lease of the Ohio Canals.

Pursuant to notice of the Governor, Auditor and Treasurer of State, the Ohio Canals were offered for lease at public auction, at the rotunda of the State House, on the 29th ult. Bidders were required to deposit with the Auditor of State $20,000, in bonds or money, as a forfeit, in case they refused to enter into an indentiture of lease. There were three bids for the lease. The first was $20,000; the second $20,050, and the third $20,075. The lease was strack off at the last named sum to Thomas Dugan of Portsmouth, who, we understand, represented a company of Kent Jarvis, Arnold Medbury, Thomas Brown, Thomas Moore, W. J. Jackson, and Thmas Cooper. The lease is for ten years, the annual rent to be paid semi-annually in advance. The lease and bond must be executed within five days from the day of letting, and the time will date from the approval of the bond. So the canals are out of the hands of the State for the next ten years.—*Columbus Journal.*

Interest and Dividends.

The Treasurer of the State of Illinois will, on and after the first Monday of July, 1861, until the 31st day of said month, be ready at the American Exchange Bank, New York, to pay the interest maturing on the first Monday of July, 1861, on the Public Debt of the State of Illinois. The interest then due and not called for prior to the 31st day of July will thereafter be paid only at the office of the Treasurer of the State of Illinois, in the city of Springfield, Illinois.

Holders of Illinois and Michigan Canal Bonds, where coupons are exhausted, are required to present the bonds.

The Jeffersonville Railroad Company will redeem, on the 1st day of July next, at the United States Trust Company, New York City, at the lowest offer below par, a part of its first mortgage bonds, agreeable to the provisions of a contract made between the company and the holders of the bonds, bearing date April 14, 1859. Offers for the sale of said bonds should be addressed, under seal, to the United States Trust Company, and indorsed, "Offer of the first mortgage bond, or bonds, of the Jeffersonville Railroad to the sinking fund;" which offers or bids will be received until noon of the 1st day of July.

The directors of the Buffalo, New York and Erie Railroad Company regret to be obliged to state that the available funds of the company are not sufficient to pay the half year's interest on the first mortgage bonds due on the 1st June, and that the company is obliged to avail itself of the three months' grace provided for by the mortgage, within which period they confidently believe that sufficient funds will be derived from the earnings of the road to pay the interest, of which due notice will be given.

Holders of the first and second mortgage bonds of the Ohio and Pennsylvania Railroad; first and second mortgage bonds of the Ohio and Indiana Railroad; first mortgage bonds of the Fort Wayne and Chicago Railroad, and of the construction bonds of the Pittsburg, Fort Wayne and Chicago Railroad, are requested to sign the contract for re-organization in the hands of John Ferguson, No. 35 Pine st. Holders of these bonds desiring to avail themselves of the benefits of the proposed re-organization, should call and sign the agreement without delay.

Messrs. Duncan, Sherman & Co., pay the coupons on the Albany City and Buffalo City bonds; also the coupons on the bonds of the Belvidere Delaware Railroad Company, due June 1. Also $13,000 Buffalo City 6 per cent. bonds, issued June 1, 1852; and $11,000 do., issued June 1, 1854.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of three per cent., payable on the 22d inst., at the office of the company in New York.

The Chemung Railroad Company has declared its sixteenth semi-annual dividend of 4 per cent., payable on demand, at No. 30 Dey Street, New York.

The Portland, Saco, and Portsmouth Railroad Company pay a semi-annual dividend of three per cent. June 10.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending May 23,

were	$60,699 05
Week ending May 5, 1860	56,099 13
Increase	$4,599 92
Total traffic from July 1st, 1860	$3,072,040 42
Corresponding period previous year	2,568,174 77
Increase	$503,865 65

The report of the receiver of the Cincinnati, Wilmington and Zanesville Railroad for April is as follows:

GROSS EARNINGS.

From passengers, through		$87 34
" " local		4,636 16
" mail		767 35
" express		350 20
		$5,841 05
" freight, through	$503 88	
" " local	9,534 74	
		10,038 62
Total gross earnings		$15,879 67

EXPENDITURES.

Ordinary and working	$10,538 96
Extraordinary	712 71
Capital account	1,611 64
Total expenditures	$12,863 31
On hand April 1	$30,611 39
Cash received during April	21,229 02
Balance May 1	$51,840 41

The following is the statement of the earnings of the New York Central Railroad, for the month of May, 1861, compared with its earnings for the corresponding month of the previous year:—

May, 1861	$678,595 24
" 1860	551,699 52
Increase	$126,895 72

This is the largest May business of the line, with a single exception, in the nine years' history of its consolidation. The road has the advantage, at present, of the heavy receipts at Buffalo of flour and other produce from the Northwest, and of the interruption of freight and travel from the Southwest over the Baltimore and Ohio line. The following are the comparative May earnings for nine years:

May.		May.	
1853	$419,287	1858	$510,197
1854	510,820	1859	409,627
1855	633,381	1860	551,699
1856	710,554	1861	678,595
1857	655,256		

The May increase over last season places the earnings of the line for eight months of its current fiscal year, at $619,864, as follows:

	1860-'61.	1859-'60.
October	$810,803	$709,671
November	780,591	637,792
December	522,918	520,396
January	489,665	387,128

March	631,290	561,078
April	690,646	595,140
May	678,595	551,699
Total eight months	$4,975,298	$4,355,434
Increase this season		$619,864

The earnings of the Buffalo, New York and Erie Railroad for May, 1861, were $54,717 03
May, 1860 46,005 25
Increase $8,711 78

The earnings of the Hudson River Railroad in

May, 1860, were	$156,281 09
May, 1861	150,807 63
Decrease	$5,573 46

The earnings in the month of May for the last four years were:

1858	$128,132 27
1859	141,268 92
1860	156,281 08
1861	150,807 63

The business of the Illinois Central Railroad for May of this and the preceding year was as follows:

	1860.	1861.
Traffic	$119,889 83	$217,517 75
Land sales	44,790 03	320,696 28
Cash collected	56,066 21	54,780 81

The following are the earnings of the Great Western Railway of Canada for the week ending May 31, 1861:

Passengers	$16,828 42
Freight and live stock	15,575 73
Mails and sundries	1,435 87
Total	$33,838 02
Corresponding week of last year	30,563 39
Increase	$3,274 63

North Missouri Railroad.

A writer in the St. Louis *Republican* approves the late action of the County Commissioners, in offering to release the North Missouri Railroad Company from the payment of interest that has accrued or that may accrue on the stock held by St. Louis county, amounting to $750,000, on condition that the State grant legislation designed to complete the road to the Iowa State line, and to build the Missouri Valley railroad. In the following remarks he gives the condition of the city's relations to the road, and proposes that it imitate the action of the county. He says:

The City of St. Louis holds $500,000 of stock in the North Missouri Railroad Company, subscribed at the time that it subscribed $500,000 to the St. Louis and Iron Mountain road. These subscriptions were made on condition that the Iron Mountain road should pay interest on the bonds of the city, issued to pay the subscription to it till it was completed to the Iron Mountain, and the North Missouri railroad until it was completed to Iowa. The Iron Mountain road has built only about eighty miles and is free from paying interest, whilst the North Missouri road has built twice this distance and is still paying interest. It has not been able to pay the interest for some time, and it is presumed that the city will follow the example of the county in holding out an inducement to the State to aid in completing the road to St. Joseph and to Iowa, by which its stock may be made of some value and the interests of the State at the same time promoted.

The County of St. Louis holds in the North Missouri road	$1,250,000
The City of St. Louis	500,000
Citizens of St. Louis about	100,000
Total held in County of St. Louis	$1,850,000

Outside of St. Louis, other counties, and individuals along the line of the road hold stock in said Company to the amount of about $600,000.

The State will not be disposed to sacrifice for her citizens this large sum of money if it can be avoided, and will doubtless pursue a liberal policy in regard to those whose enterprise has led them to make such large contributions to develop the resources of the State.

This road has cost the State far less per mile than any other road, and as it passes through one of the finest, and as yet only partially developed portions of the State, without rivers or anything else to compete with it for trade that naturally belongs to it, there can be little question of its ultimately paying.

The Hannibal and St. Joseph road, whilst not a competing road, save for a very small portion of the natural trade that belongs to the North Missouri road, and without injury to itself. Arrangements have recently been made with this road, which it is believed will be carried out by both parties in good faith, and which will remove all future trouble. At any rate, when the Missouri Valley road is built, there will be two lines leading to St. Joseph from St. Louis, and this will make all go well and pleasantly after that.

In view of the large interests involved, we are glad to see this move on the part of the city and county, and we trust it will be generously met on the part of the State, and that all will be done that can be done by the State, to save the roads from sale, and complete the road to Iowa, and the Missouri Valley road to St. Joseph.

Cumberland Coal.

The supplies of Cumberland Soft Coal are temporarily interrupted by the War difficulties at and near Harper's Ferry. The demand for this description of coal is rapidly increasing, and the interruption of supply will be seriously felt, unless made up from some other quarter. On this subject the *Evening Post*, of Saturday remarks.

"Fortunately this supply may be had. The Blosburg regions, and especially the Fallbrook Mines, in Western Pennsylvania, produce a coal quite equal in every respect to that procured at Cumberland, and can be furnished as cheaply. These mines are in Tioga County, and are connected directly with the Seneca Lake, in this State, where the general depot is situated. From this point it is shipped by canal West and East. The arrangements for mining are on the largest and most efficient scale."

Atlantic and Great Western Railway.

The opening of the Atlantic and Great Western to the Philadelphia and Erie Railroad—the completion of the first 27 miles of the track west of this place—was commemorated on Wednesday last (15th inst.) by an excursion thereon. A party of guests, including our first citizens, with the cornet band, representatives of the local press, and others, at the invitation of the Superintendent, filled the cars with a gay load of ladies and gentlemen on the afternoon of that day.

Mr. Wm. Reynolds, President of the road; Jos. Hill, jr., Superintendent, and several of the Directors and stockholders of the road, accompanied the party. The first train west from this place then, with four car loads of passengers, started off at about half past 2 o'clock. The first few miles of the track are smooth and steady, having been finished some time since; beyond, it is newer and less complete, and will receive some perfecting work before regular trains are put upon it. Considering the speed with which the work has been pushed forward, however, the track is remarkably smooth.

Leaving the village of Columbus three or four miles behind, the train reached the intersection of the two roads, distant 27 miles from this place, and 60 from the junction of the A. and G. W. with the New York and Erie at Salamanca, the eastern end of the road. The company found themselves in the woods—the west end of the road being much like the other end in that respect. The excursionists waited a short time for the down train from Erie, and when it arrived gave three rousing cheers for the "union" between the two roads, the band played its liveliest air, the Philadelphia and Erie shook hands with the Atlantic and Great Western, and the wedding was finished.

The name of the new station at the intersection is to be Wayne. From Jamestown west the stations are: Ashville, Brokenstraw, Bear Lake, Pine Valley, Columbus, Wayne.—*Jamestown (N. Y.) Journal*.

United States Mint.

The business of the United States Mint at Philadelphia in May was as follows:

	No. of pieces.	Amount.
Gold coinage	385,857	$5,104,415
Silver coinage	1,697.000	269,210
Copper coinage	1,100,000	11,000
Total	3,182,867	$5,384,625

Total coinage executed during the months of January, February, March, April and May, 1861 ..... $31,123,206

☞ Major C. N. Bodfish has been appointed Chief Engineer and Superintendent of the Chicago, Iowa and Nebraska Railroad, vice Milo Smith, Esq., resigned.

☞ Mr. Chas. G. Miller has been elected President of the Buffalo, New York and Erie Railroad Company, vice Mr. A. D. Patchin, resigned.

☞ The Tennessee and Mississippi Railroad Company, from Memphis to Grenada, has discharged its hands on account of its inability to pay.

Remarkable Locomotive Explosion.

The Chicago *Tribune* thus describes the recent explosion of a locomotive on the Michigan Southern Railroad:—

The train was due in this city at 8 P. M., and it consisted of two passenger cars and a baggage car drawn by the fine Manchester built engine, *Charles Butler*, No. 67. Conductor Curtis was in charge; George Nair, engineer. As the train was nearing Ainsworth station, the intersection with the Illinois Central Railroad, 11 miles from this city, the engineer sounded his whistle to break up, and the breaks were applied, when, just as the speed was checked, the boiler exploded with fearful violence, tearing away the "crown sheet" downward through the fire-box.

The effects of the explosion were terrific. The heavy machine, weighing 23 tons, by the downward and lifting force, leaped bodily from the track into the air, turned a summersault, and landed reversed and bottom side up a distance of 354 feet from where the accident took place.

This seems incredible, but is shown by actual measurement. The train was running at the time at about 15 miles an hour, but had been running at high speed. There were on the engine the engineer, Mr. Nair, his fireman, Charles Stelp, and the track foreman, named W. Anderson—the latter sitting on the cab seat. Mr. Nair was thrown into the air and to one side, landing near the fence senseless, but not dangerously though severely injured. None of his limbs were broken.

The other two men—Stelp and Anderson—were probably instantly killed, the former being frightfully scalded, his clothing being torn from his person. Both bodies were taken from the ruins of the tender and baggage car. No other person in the train was injured, though several were buried in the sudden shock and halt of the train. The track was torn up for a distance of several rods.

The track of the Pittsburg, Fort Wayne and Chicago, at this point, runs for some distance closely parallel to the Michigan Southern track; and on the former, a passenger train due here at the same hour was approaching the city. The passengers in each were watching the other, when suddenly the persons on the Pittsburg train saw the engine leap into the air, with the crash and ruin that followed. The suddenness and appearance of the disaster is described by one of the passengers as to have produced, at first, the impression that, by some fiendish malice, the train was blown up by powder placed beneath the track.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

NIAGARA STEAM FORGE,
COR. PERRY ST. AND OHIO BASIN SLIP.
T. D. PATCHIN, Lessee,
CHAS. D. DELANEY, Sup't. } Buffalo, N.Y.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,

W. H. BELL, Major of Ordnance.

ANALYTICAL AND

Manufacturing Chemistry,

No. 24 WILLIAM STREET, NEW YORK.

Rooms Nos. 28 & 29.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. The best modes furnished for manufacturing, purifying and deodorizing oils from coals, petroleum, and other bituminous substances. Coal Oils tested and purified. Superintendents and skilled workmen furnished to manage Coal Oil Works and Mines. The Kerosene patents from which originated the Coal Oil Business of the United States were granted to Dr. GESNER.

Cotton and the Cotton Manufacture.

(Continued from p. 428.)

The returns of British trade and navigation, for 1860, received since our last issue, give the following figures as to the cotton trade.

Imports of raw cotton in—

1858	9,235,198 cwts.
1859	10,946,331 "
1860	12,419,096 "

of which, the exports of raw cotton were in—

1858	1,335,820 cwts.
1859	1,563,779 "
1860	2,235,970 "

These figures show that 10,183,126 cwts. of cotton, or 1,140,510,112 lbs. were cousumed in 1860, or retained for consumption.

The cotton imported came from the countries following, viz.:

	1858. Cwts.	1859. Cwts.	1860. Cwts.
United States	7,439,623	8,586,672	9,963,309
Brit. East Indies	1,185,023	1,717,240	1,822,689
Egypt	345,360	336,313	392,447
Brazil	166,231	200,705	154,347
Other countries	102,961	105,401	86,304

The exports of English cotton goods for the years 1859 and 1860 were as follows:

1859	£48,202,225
1860	52,013,482

Of these £3,994,711 were exported to the United States in 1859, and £3,848,750 in 1860.

Of linen goods there were exported from the British Isles in—

1859	138,120,478 yards,	value £4,300,026
1860	143,557,449 "	" 4,432,823

Of these there were exported to the United States in—

1859	64,752,854 yards,	value £1,988,514
1860	59,988,003 "	" 1,893,327

The foregoing figures sufficiently show the importance to the British nation of American cotton; and the value of our market, to her manufacturers. Reducing the quantities to pounds weight, the relative supplies of cotton in 1859 and 1860 were:

	1859.	1860.
United States	961,707,266	1,115,890,608
East Indies	192,330,880	204,141,168
Egypt	38,106,096	43,954,054
Brazil	22,478,960	17,486,804
Other countries	11,365,872	9,066,048

In 1840 and in 1850, the quantities of cotton imported were relatively as follows:

	1840.	1850.
United States lbs.	487,856,504	493,153,112
East Indies	97,388,153	118,871,742
Egypt	8,324,973	18,931,414
Brazil	14,779,171	30,299,782
Other countries	4,515,559	2,319,612
Total	592,488,010	663,576,861

The following table shows the imports of raw cotton into the United Kingdom at the periods named:

1815 lbs.	100,309,146
1820	151,672,655
1830	263,961,452
1840	592,488,010
1850	663,576,861
1860	1,390,938,752

The future supply of cotton for England, allowlowing the United States cotton supply to be cut off, must be mainly from India. In a paper read before the Society of Arts in London, on the 17th of April last by John Crawford, Esq., F. R. S., and late Governor of Singapore, he says:

"The United States furnished us, in fact, with 78 parts in 100 of the quantity and 81 in 100 of the value of our whole supply. This palpable fact is conclusive of the superior capacity of the countries in question, since it leaves to all other countries but 22 parts in 100 of the quantity, and no more than 19 in 100 of the value of our supply.

The auspices under which the cultivation of cotton is carried on in the Southern States of America are sufficient to account for this wonderful production. Climate, soil, natural facilities of transport, but above all a skillful husbandry and an enterprising commerce are there all auspicious."

Then, speaking of our cotton region, Mr. Crawford said:

"The extent of land capable of growing cotton in the States in question, has been computed at better than thirty-nine millions of acres, or above 60,000 square miles, some 10,000 more than the area of England and Wales. Of this immense surface, the amount under cultivation in 1859 was computed to be only a sixth part, yet it yielded some 15,800,000 cwts. clean cotton. If there be any approach to correctness in this computation, that quantity can be augmented five-fold, and this without any increase of cost, since the unoccupied field is all virgin land. But even after every acre of the wild land thus computed to be fit for the growth of cotton has been occupied with it, an improved system of agriculture will long allow of the cultivation of the plant without any material increase of cost.

According to this view several ages must elapse before all the lands of America capable of growing cotton are occupied with this plant. In this case, the cotton manufacture of England, drawing its supplies from the Southern States of America in the same proportion as it does at present, might go on increasing to five times its existing magnitude."

Mr. Crawford next showed that American cotton, instead of having risen in price, has gradually fallen since its first cultivation in South Carolina and Georgia for export. This he attributed mainly to the improved cotton gin, and the pushing of the cultivation into the milder climate and more fertile soil of the Gulf States.

Mr. Crawford then explained the causes of the inferiority of Indian cotton. The soil and climate of India, said he, it may at once be conceded, are in no respect inferior to those of America. The system of production in the two countries is, however, widely different, and quite sufficient to account for the inferiority of Indian cotton, both as to quantity and value.

Mr. Crawford proceeded to contrast the two systems of production. He showed that the American cultivator is an educated, intelligent and enterprising capitalist, the owner of the land

he tills, and pays no tax to the imposition of which he has not himself been a party; "the Indian cultivator is an untaught peasant, the mere occupant of the land he tills, so long as he continues to pay the rent and taxes exacted of him. He is a farmer borrowing money from an usurer at 50 per cent. and mortgaging his future crop to pay the interest in kind." Then the infinite superiority of the American planters farming stock, implements, and agricultural processes, to those of the Indian cultivator were clearly and correctly set forth, the care and skill of the American planter in the culture of cotton was strongly contrasted with the carelessness and ignorance of the Indian cultivator. In the populous parts of India, where there is consequently great competition for land, rent makes it proportionally as costly to raise rice and cotton as in England to raise wheat and hemp. Mr. Crawford said:

"Our old provinces of the lower valley of the Ganges are the most fertile parts of India, and just as capable of growing cotton as the valley of the Mississippi. In fact, they do grow it largely, but they have a density of population ranging from three hundred inhabitants to a square mile, up to eight hundred. They not only, therefore, export no cotton, but, on the contrary, import it. * * * The fertile alluvial tract which lies between the Ganges and Jumna, was once a large exporting country of cotton, but now with a population ranging from three hundred and fifty to five hundred and fifty inhabitants to the square mile, it has in a great measure ceased to be so, consuming its own produce, independent of what it receives from ourselves in the shape of manufactures. * * * * * * *

The really cotton producing districts of India for exportation are all under-peopled, in this respect more resembling new colonies than old countries. * * * * All India may be said to produce cotton, but those parts that produce more than they themselves consume, although a large surface, form but a small fraction of the vast area of that great region. All the most improved and populous portions are, in fact, importers from the less cultivated and less populous ones. This import had been in progress long before our connection with the country. But besides the demand of the populous parts of India on the exporting districts, China becomes a competitor with them and ourselves in the Indian market, the quantity yearly exported to it being about one-fourth part of what is supplied to ourselves.

Following up his remarks on India as a source of supply, Mr. Crawford referred to the expectation that the opening of railways in India would be productive of great benefit. He had no doubt that they will increase the supply of cotton, and materially ameliorate its quality by bringing it in a cleaner state to market.

Skill, care and capital, Mr. Crawford said, are what is really wanted to insure the production of good cotton in India, and none but intelligent and enterprising Europeans will apply these. He then showed that the reason why cotton had not attracted the attention of such men in India was that they naturally turned to the production of more profitable articles, such as silk, sugar and indigo, which, though still chiefly cultivated by the natives, and according to the immemorial and barbarous rules of Hindoo husbandry, are improved by the application of European skill and care in the processes of manufacture.

Mr. Crawford then proceeded to consider the question of supply from other quarters, and commenced that branch on the subject by stating that the English importation of cotton from all other countries than India and the United States is very inconsiderable, not exceeding 7 parts in 100 of the whole supply. The largest importation is from Egypt, but it forms but a fraction of 1-32th part of the supply.

The cultivation of cotton in Egypt for exportation is a very recent affair, dating only from the year 1821, when Europeans introduced American seed and American husbandry. This improved cotton culture, then, has had a trial of forty years, and its produce has increased but in a small degree. In the nine years from 1850 to 1858, the increase in the production of Egyptian cotton was about 11 per cent.; in American it was about 45 per cent., or above four times as great. * *

If all Egypt watered by the Nile were under cotton culture, and no other part of the country is fit for it, its produce would be far from sufficient to meet our demands. That, however, is an impossible case, for the fertile land in Egypt is equally well fitted for the growth of other agricultural products as it is for cotton, a sufficient proof of which is that it not only feeds its own population, but furnishes ourselves with various corns to the yearly value of a million sterling.

Mr. Crawford then spoke of the supply from Brazil—the next largest. That country might furnish a large supply of good cotton, but does not.

In 1849 our import from it was 274,893 cwts., and has never reached that amount in the ten years which had elapsed to 1859, when the quantity was no more than 200,705 cwts. That the soil and climate of Brazil are favorable, and the agricultural skill considerable, is to be inferred from the fact that the average value of all Brazilian cotton is by 13 per cent. better than the average value of all American, and fully 60 per cent. better than that of all Indian cotton. * * The cultivation of cotton in Brazil, as in several other places, has been superseded by sugar in the plains and coffee in the hills. Brazil, in fact, could not compete with America in cotton, but it could easily beat America in sugar, and it naturally selected the latter as the principal object of its husbandry.

As to the supply from the West Indian colonies, Mr. Crawford stated that, although seventy years ago they furnished the chief supply, at present it is comparatively a very trifling one. In 1847, the quantitiy was between 11,000 and 12,000 cwts., and in 1859 it had fallen to less than one-half this quantity. "Sugar-cane being more congenial to the soil, climate and industry of those tropical colonies, has superseded cotton, and there seems no probability of the culture of the latter being revived." Moreover "of all the productions to which labor is there applied, the cotton plant is, perhaps, the most precarious."

Mr. Crawford then directed his attention to Africa, which has been indicated as a quarter from whence an ample supply of good cotton might be obtained. So far as mere soil and climate are concerned, said he, it is impossible that a region which, as far as the mere growth of this article is concerned, embraces 32 degrees on each side of the equator, should not possess many suitable localities.

It is grown in the colony of Natal, from which, on the average of the three years ending with 1859, we imported between 11,000 and 12,000 cwts., of the value of better than £32,000, of a quality, however, inferior to American by a pound sterling a hundred weight.

Mr. Crawford said that there are, as far as his information extends, but two countries that are likely to furnish England with a fair supply of good cotton, and this not in substitution of the cotton of America, but as considerable auxiliaries to it. These are the recently acquired territories on the Eastern side of the Bay of Bengal, and the lately formed colony of Queensland, in Australia. As to the former, extending from the 16th to the 20th degree of latitude, containing an area of 64,450 square miles, the greater portion of a rich alluvial plain, watered by one great river and three considerable ones, with numerous branches and affluents, and having four safe harbors on the coast, to which there is inland communication by water, Mr. Crawford said:

"I resided for some time in the country, and the impression which my acquaintance with it has left is, that it seems better adapted to the culture of the cotton plant than any other part of India. Experience alone, however, must be the only test of its practical adaptation."

As to Queensland, he said, far too little is yet known to enable any one to speak confidently of its capacity to produce cotton:

It is described, however, as having a fertile soil with sufficient moisture, and to possess some commodious harbors. It certainly lies within latitudes (that is from 30th degree south to the tropic) corresponding with those parts of Brazil which produce cotton superior to the average of American. Should Queensland be found adapted to the cultivation of cotton, the heat of the climate will necessitate Asiatic labor.

Having spoken of all the countries from which a supply of cotton is looked for, Mr. Crawford thus concludes his paper:

From the facts which I have adduced, I must come to the conclusion that there exists no reasonable ground for apprehending any serious deficiency in our supply of cotton, although in cotton, as in every other product of the soil, fluctuations must be expected which no care can obviate. Our chief reliance must long, in my opinion, be on America, which at present furnishes us with four-fifths of the value of all that we consume. This mere name, however, does not imply that we receive the whole from a single country, for no fewer than seven sovereign States, each as large as an European kingdom, contribute to our supply—all, too, competing with one another to make that supply as cheap, good and abundant as possible.

The integrity of the cotton manufacture is indispensable to our prosperity, but the cultivation of the plant is, if possible, of still more vital importance to the Southern States of America. We derive our chief supply from them, and we are by far their best customers. There exists between us, consequently, a mutual and profitable dependence, which promises a long duration. If other countries can supply us with better cotton than America, our market, the best in the world, is free to them, and no doubt they will furnish it, but it does not appear to me that we are called upon to make extraordinary or eccentric efforts to insure it.

Other English writers look with greater confidence to an early supply from India. The extent of cotton production in India is twice as great as in the United States, but the expenses and delay in bringing it to market, has kept it from the English manufacturers. The railways in our cotton growing States have been the chief means for the rapid increase of cotton production there, much more so than the vast influence of Whitney's cotton gin.

It is now confidently asserted that the completion of the railways of India will entirely change the course of the cotton trade. The India Railways were commenced in 1849. Since then 4,821 miles are in process of construction, 1,301 miles are in operation, and 864 miles more will be completed this year. The great line from Calcutta to Delhi Lahore, 1,338 miles, built by the East Indian Railway Company, will open a new fertile cotton

district for the English consumers. Heretofore the chief supply of cotton has been from Madras, and the Bombay Provinces, near the coast. The North-Western Provinces and the Punjaub, to be opened by the East Indian Railway, are supposed to contain abundance of good lands, suited to the culture of cotton. The present disturbance in the United States, is forcing forward the Railways of India, by the aid of English capital.

(To be continued.)

Cincinnati, Hamilton and Dayton Railroad.

The income of this company for the fiscal year ending March 31, 1861, was as follows:

From passengers	$275,463 70
" freight	322,776 12
" mails and express	26,093 08
" rents of track and machinery	13,036 75
" " real estate	2,530 55
" interest	4,061 24
" profit and loss	267 29
	$644,228 73

The expenses have been:

Repairs of road	$60,100 48	
" bridges	6,653 36	
" buildings	8,627 71	
Train expenses	202,353 32	
Station expenses	11,977 09	
Office expenses	15,007 35	
Miscellaneous	27,652 08	
		332,371 39
		$311,857 34
Deduct Little Miami and Columbus and Xenia Railroad Company's proportion of joint earnings		29,157 66
Balance		$282,699 68
For interest on bonds	$96,585 47	
" taxes	11,518 90	
		108,104 37
Net earnings for the year		$174,595 31
Out of which two dividends of 3½ per cent. have been declared, amounting to		150,906 00
Leaving a surplus of		$23,689 31

Compared with the previous year, the gross earnings show an increase of $82,547 21
With an increase in expenses of 42,052 16

Making the net increase $40,495 05

The number of passengers transported during the year was 479,937—an increase over the previous year of 122,228. The tons of freight carried amounted to 276,193—an increase of 38,557. The report says:

During the year 35 of the first mortgage bonds of this Company have been purchased and canceled, at a cost of $34,359 53. The Company have also purchased, in compliance with their contract, 34 of the Dayton and Michigan bonds, at a cost of $27,200.

The Company having no floating debt, the Directors, in compliance with the resolution of the stockholders, have, from their net earnings, in addition to the payment of dividends, retired and canceled about one-fifth of their first mortgage bonds, leaving 406 still outstanding. They have also purchased, within the past 18 months, and have now on hand, 50 of the Dayton and Michigan first mortgage bonds of $1,000 each. These bonds the Dayton and Michigan Company are obligated to commence repurchasing in 18 months from this time.

The road and equipment have been kept in good repair during the year. 461 tons of new and re-rolled rails have been laid in the track, besides that which has been repaired at four fires in the shops of the Company. 30,000 new cross-ties have been purchased and laid in the track. 27 freight cars have been built in our shops and four passenger cars rebuilt, with a view to keeping good the equipment account and balancing the general depreciation of machinery.

The usual amount of new side tracks and other conveniences to accommodate an increasing business, have been provided during the year. The Company have also erected an engine house, and put in a turn table at Glendale, with a view to the better accommodation of the commutation travel, with an early and late train between Cincinnati and that point.

The construction account having been closed for several years, the cost of furnishing additional facilities for business is charged to transportation expenses.

Under the management of our attentive and experienced Superintendent, the road has been run with great regularity and freedom from accident to persons and property. Since the road was opened in the year 1851, over four millions of persons have been carried in the passenger trains, and but one of that large number (a child) has been killed while in the cars. This fact is highly gratifying to the Directors, and reflects great credit on the operatives of the road.

The contract for a division of business and earnings, made between the Little Miami, Columbus and Xenia, and Cincinnati, Hamilton and Dayton Companies, continues to be satisfactory and advantageous to all parties in interest, and we believe the future will more fully demonstrate the wisdom of the measure. Inequalities in the division of business may arise, but in such case the corrective will doubtless be cheerfully applied.

The apprehensions expressed by a few, that the contract would lead to burdensome charges for transportation of freight, have proven not to have been well founded. More uniformity of rates, by the two Miami Companies, have been maintained, and in this consists one of the great advantages of the contract to the parties. The reckless competition, so ruinous to most of the railroads of the West, has been avoided by them, and moderately remunerative rates obtained.

The policy of our Company is to deal equally and fairly with its connecting roads—to furnish all equal facilities, and to pro-rate with each. No effort is made on the part of our Company with agents to give a preference to one connecting road over another. The managers of this Company appreciate the importance of sustaining, as far as is consistent and in their power, each one of their natural allies, in its legitimate business, and they need only refer to the pecuniary aid heretofore extended to many of them, to fully sustain this declaration. Situated as the C., H. and D. road is, being a trunk to six connecting roads who compete with each other for the business of Cincinnati, it is found difficult to give full satisfaction to all.

Since the last annual meeting of our stockholders, death has removed from among them John C. Wright, one of our most valued and useful Directors. Judge Wright was one of the corporators of the Company, and was chosen Director and Treasurer on its first organization in 1847. He remained a Director, until his death, and was seldom absent from the meetings of the Board. Few men have departed from among us more respected and loved than our late associate. The original corporators of our Company in Cincinnati were Hon. John McLean, Hon. Jacob Burnet, Hon. Geo. P. Torrence, Hon. John C. Wright, Josiah Lawrence, Jacob Strader, and Samuel Fosdick, the latter gentleman being the only survivor.

The company have 22 locomotives. The number of miles run by engines with passenger trains was 222,095; by freight trains, 147,797; by other trains, 13,095—total miles run, 382,987, at a cost for repairs of $21,106 09; consuming 10,558 cords of wood, costing $34,570 63. The cost of 3,523¼ gallons of oil used was $2,730 71; and of tallow, packing and waste, $2,613 81.

Buffalo and Lake Huron Railway.

The petition of this company to the Legislative Assembly of Canada was presented on 30th April, and has since been published. The document contains a concise history of the undertaking, and sets forth the various vicissitudes out of which it has all but successfully struggled. The shareholders of the existing company do not trespass on the confines of fiction when they aver that they have constructed a first-class line—

Unsurpassed in permanency and completeness of execution by any railway on the continent, with the necessary stations and buildings, extending from the city of Buffalo to the town of Goderich, on the waters of Lake Huron, a distance of 163 miles, stretching directly across the peninsula of Canada, running through the most important part of the western portion of the province, and opening a highway to trade and commerce from the east and south-east to the north-west and the British possessions on the shores of Lake Superior—forming, in fact, an integral portion of the Grand Trunk system of Canada.

After reference to the extra expenditure incurred on the works at Goderich harbor, as well as in furnishing steam communication on Lake Huron, between Goderich and the various ports on Lake Michigan, by which it is intended to attract through the province a large amount of the carrying business which has hitherto been diverted to the Lake Shore and other American routes, the document further avows:

That in their efforts your petitioners have exhausted every resource and expedient possible, and yet they find that they must have a temporary loan of £100,000 to carry out the objects and designs aforesaid, or all their exertions will prove abortive, and their railway undertaking a lamentable failure.

That while all other railways in Canada have, to a greater or less extent, received assistance and encouragement from the Legislature, your peti-

tioners have never received, either directly or indirectly, any aid from the government of this province; but alone and single-handed, with their own money have constructed and completed the said railway, which your petitioners submit is of very great advantage to Canada as a province, and entitled to the favorable consideration of your honorable House.

It is therefore submitted, with what result remains to be seen, that the Legislature of Canada should lend its aid, to some extent, to the Buffalo and Lake Huron in this its hour of trial and need. The prayer of the petition is to the effect that the Governor in Council should be authorized to grant a loan of £100,000 sterling, in bonds running from 20 to 30 years, at 6 per cent., Government taking in exchange an equal amount of the bonds of the company, upon such terms and under such limitations as may seem necessary for securing the province against loss.

Important Meeting of Railroad Officers.

At a meeting of officers of the several railroads of Pennsylvania, called by the Governor of the State, at Harrisburg, and held in the hall of the House of Representatives, on Tuesday, the 4th of June, the following roads were represented:—

Cumberland Valley Railroad, by Judge Watts, President.

Schuylkill and Susquehanna Railroad, by Mr. U. R. Tracy, Superintendent.

Pennsylvania Railroad, by Mr. Enoch Lewis, Superintendent.

Philadelphia and Reading Railroad, by Mr. G. A. Nicolls, Superintendent.

Pittsburg, Fort Wayne and Chicago Railroad, by Mr. George C. Hathaway, General Ticket Agent.

Delaware, Lackawanna and Western Railroad, by Mr. John Brisbin, Superintendent.

Belvidere Delaware Railroad, by Mr. A. Welch, Engineer and Superintendent.

Philadelphia and Trenton Railroad, by Mr. V. L. Bradford, President.

Lackawanna and Bloomsburg Railroad, by Mr. J. P. Ilsley, Superintendent.

Philadelphia and Erie Railroad, by Mr. E. F. Gay, V. P. and Superintendent.

North Pennsylvania Railroad, by Mr. S. W. Roberts, Engineer and Superintendent.

Northern Central Railroad, by Mr. J. C. Clarke, Superintendent.

Hanover Branch Railroad, by Mr. Githburghen, Superintendent.

Lake Shore Railroad, by Mr. H. Nottingham, Superintendent.

Gettysburg Railroad, by Mr. Willis, Secretary.

Lehigh Valley Railroad, by Mr. R. H. Sayre, Superintendent.

West Chester and Philadelphia Railroad, by Mr. M. B. Hickman, President.

Norristown and Germantown Railroad, by Mr. H. K. Smith, Superintendent.

East Pennsylvania Railroad, by Mr. E. M. Clymer, President.

Elmira and Williamsport Railroad, by Mr. Thomas Kimber, Jr., President.

Catawissa Railroad, by Mr. T. Haskins Du Puy, President.

Mr. John A. Wright, Aid to the Governor, in the Chair, called the meeting to order, when Mr. Du Puy, of the Catawissa Railroad, was appointed Secretary.

To the question propounded by the Chairman—"Is there any provision in the charter of your company making special rates of fare and freight for the transportation of troops and munitions of war, whenever called upon for the purpose of suppressing insurrections or to repel invasions?" the general opinion expressed was, with but few exceptions, that there was not.

The following resolution was then offered by Judge Watts, and adopted:—

Resolved, That in the settlement of all accounts for transportation and freight upon the railroads of Pennsylvania—to be settled with the State—the charges should be at a reduction of 33⅓ per cent. for transporting passengers, and that for freight the charges shall be according to their respective tariff of rates; *Provided*, That no company be required to reduce their charges for passengers below two cents per mile.

The vote on this resolution being as follows:—

Yeas—Messrs. Watts, Tracy, Nicolls, Hathaway, Bradford, Roberts, Githburghen, Nottingham, Willis, Sayre and Clymer—11.

Nays—Messrs. Lewis, Brisbin, Ilsley, Gay, Clarke, Hickman, Smith and Kimber—8.

Messrs. Welch and Du Puy not voting.

The resolution was then announced as carried, and sent to the Governor for approval.

☞ Asa Whitney, Esq., the popular President of the Reading Railroad Company has resigned his position, to take effect on the 15th of July, and Mr. Charles E. Smith has been elected to fill the vacancy. J. Dutton Steele, Esq., also tendered his resignation as Vice President, to take effect on the 1st of September, and was unanimously elected Chief Engineer. M. Whitney will continue in the board of direction, and thus the Company will secure his experience and valuable services.

Watertown and Rome Railroad.

At a meeting of the stockholders of this company held on the 5th inst., the following gentlemen were elected directors for the ensuing year:

Wm. C. Pierrepont, P. Manor; Philip Dater, Samuel F. Phelps, John P. Yelverton, Marcellus Massey, New York; H. Alexander, jr., Henry Gray, Springfield, Mass,; Calvert Comstock, Albany; David Ulley, Rome; Solon D. Hungerford, Adams; Wm. Lord, Brownsville; Talcott H. Camp, Willard Ives, Watertown.

At a subsequent meeting of the Board, Wm. C. Pierrepont was re-elected President, and R. E. Hungerford, Secretary.

Dayton and Western Railroad.

This company was in default for overdue bonds and the interest on the same. We understand that an arrangement has been entered into, whereby the bondholders upon signing the agreement shall receive the overdue interest by the 18th of July, next.

Bondholders forbear enforcing right on condition—

1. That the company pay arrears of interest by July 1, next.

2. That the company furnish new coupon sheets till March, 1880, for half yearly interest at seven per cent.

3, That on and after the 1st of September, 1862, the company pay $15,000 semi-annually for interest and sinking fund, instead of $10,500 half yearly interest only.

4. The difference between interest on outstanding bonds, and $15,000 yearly payment to be used for buying up and cancelling bonds. By this means, if bonds are bought at par, the debt will be paid by March, 1880, or earlier, in proportion as bonds can be had below par.

5. The cancelled bonds to be surrendered to the trustee—Geo. S. Coe, Esq.—within thirty days from maturity of each coupon on and after September 1, 1862, so that the interest is paid on the 1st of March and September of each year, and the cancelled bonds surrendered to the trustee on or before the 1st of April and the 1st of October following each interest instalment. On punctual fulfillment of this agreement the first mortgage bondholders forbear proceedings on their overdue bonds—$300,000. About $200,000 bonds have consented, and near $70,000 or more are known to be willing to sign the agreement. This will leave but, $30,000 of the overdue first mortgage bonds to be found. The agrement stipulates for all holders of bonds who will sign, and inasmuch as only a majority can foreclose, it becomes the interest of all holders to consent, two-thirds having already consented.

Grain Crops of Iowa.

The Agricultural Bureau of Iowa have issued a carefully prepared circular giving the crop prospects of that State. It appears the breadth of wheat sown in the State is about one fourth more, of corn nearly one fifth more, and of pork for market there will be at least one third more than in 1860. And of the crop of corn of 1860, there appears to be over one third, and of wheat over one fourth on hand. That the indications for a good crop of wheat were never better, and that the yield would fully equal that of last year, 16 bushels per acre as the average of the State; and that about one half of the corn was planted by the 11th of May. In addition to the above, preparations are making for a greater breadth of sorghum and imphee than in any previous year. Last year the yield of wheat was upward of 19,000,000 bushels, or an average of 16 bushels to the acre; add for the additional breadth of land sown last Fall and this Spring, at the same average per acre, at least 4,000,000 bushels, and we have the probable amount of 23,000,000 bushels for 1861—all of which can be spared out of the State, as there are about 5,000,000 bushels on hand for home consumption for a year. This, if sold at 50 cents per bushel, will give $11,500,000. The corn goes into beef and pork. The published estimate of last year was $7,000,000 worth for both these items. This sum is nearly equally divided between them. From the date obtained we have a pretty sure prospective increase of one-third for pork over 1860, and from extensive inquiry and the known average increase, one fourth may be safely put down as the probable increased product of beef cattle. This will give the aggregate value $9,375,000 for 1861, for beef and pork. The result of all the above is, that the present prospective product of Iowa for the year 1861, beyond home consumption, for wheat, hogs and beef, will be worth $19,500,000.

Chicago and North-Western Railroad.

At the annual meeting of the bondholders and stockholders of the Chicago and North-Western Railway Company, held at Chicago on the 6th inst., the following gentlemen were elected directors for the ensuing year:

W. B. Ogden, Geo. Smith, Chicago, Ill.; Wm. A. Booth, Henry H. Boody, Lowell Holbrooke, David Dows, C. S. Seyton, Arthur Baldwin, New York; Geo. M. Bartholomew, Hartford, Conn.; M. C. Darling, Fond du Lac, Wis.; P. H. Smith, Appleton, Wis.; J. J. R. Pease, Janesville, Wis.; A. L. Pritchard, Watertown, Wis.

At a meeting of the new Board, held upon the same day, the following officers were chosen:

W. B. Ogden, President; P. H. Smith, Vice-President; Geo. L. Dunlap, Superintendent; Geo. P. Lee, Treasurer; James R. Young, Secretary.

Henry H. Boody was appointed agent of the company in the City of New York.

Public Law of Tennessee.

An act to prevent the collection of debts owing by citizens of Tennessee to citizens of the non-slaveholding States during hostilities.

Section 1. Be it enacted by the General Assembly of the State of Tennessee, That no person in any non-slaveholding State, their agents or attorneys in this State, shall have power to sue or collect any moneys owing to or any property claimed by the citizens of any such State, in Tennessee, during hostilities between Tennessee and the Federal Government.

Sec. 2. Be it further enacted, That it may and shall be lawful for such debtors to pay such moneys into the Treasury of the State, which sums shall be receipted for by the Treasurer, and shall be funded with interest upon the cessation of hostilities.

Sec. 3. Be it further enacted, That this act take effect from and after its passage.

Passed May 8, 1861.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, June 15, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Money and Business.

The same torpor that has heretofore characterized the money market continues. Specie flows into the country, and money is abundant, from the absence of business demand. The civil strife begins to assume an imposing aspect, from the magnitude and vast scale of its operations, making a demand for every description of war material. Northern Railways and Northern State and City Bonds maintain good prices. The uncertainty as to the amount of money the United States Government may require, keeps down the price of its stocks.

Opinion is divided as to the financial policy of Mr. Secretary Chase. The feeling in financial circles in this city is, that the April loan should have all been issued, at 94 cents, the price offered. Mr. Chase's reputation as a financier depends on his appeal to Congress, soon to meet on the 4th proximo. A war tariff to continue during the war, yielding an annual revenue of $200,000,000, will at once raise our public funds, and enable the Government to raise at 6 per cent. per annum, all the money they may want.

In 1859 the British Government raised in revenue £12,462,303 sterling on spirits; £2,462,162 on wine; £6,852,458 on malt; £462,886 on hops; £19,787,642 sterling or over $95,000,000, on spirits, wine and malt liquors alone. A heavy excise duty on liquors of all sorts, and on Tobacco should be imposed, and a moderate duty on tea and coffee.

The subjoined table gives the leading items on which Custom duties are collected in the British Islands:

	1858. Duty collected.	1859. Duty collected.
Tea	£5,186,171	£5,408,924
Sugar	6,223,433	6,271,103
Tobacco	5,331,521	5,433,463
Spirits	2,245,607	2,462,112
Wine	1,827,087	1,928,302
Coffee	442,120	431,861

The subjoined table shows the sources of the English excise duty, in 1858–1859.

	1858.	1859.
Spirits	£9,188,842	£10,000,191
Malt	5,292,642	6,852,458
Hops	416,478	462,881
Paper	1,281,023	1,451,254
Hackney carriages	82,129	86,208
Stage carriages	125,016	127,673
Railways	339,596	359,212
Licenses	1,436,892	1,464,575
Game certificates	12,228	13,047
Race courses	5,771	6,233
Total	£18,480,572	£20,823,727

Of tea our consumption in 1860 was 25,223,322 lbs.; of coffee 180,903,555 lbs. A tax of 20 cents per lb. on tea, and 10 cents per lb. on coffee would give a revenue of $20,000,000, allowing for a falling off in the consumption.

As depressing as the existing troubles are to business generally, some branches of manufactures are stimulated thereby. We may instance the great locomotive builders M. W. Baldwin & Co., of Philadelphia, whose orders from the Pennsylvania Railroad Co., alone for the year 1861, will amount probably to over $200,000. In addition to which they are understood to have been offered a large amount of work for the U. S. Government.

The Pennsylvania Railroad Co. are operating the roads held by the Government, and hence their urgent and unusual demand for equipment.

The Northern machine shops are busy in rifling cannon for the Government, or building engines for the new war steamers.

The seven steam sloops-of-war authorized by the last Congress are to be named as follows: Those to be built at Portsmouth, N. H., the Kearsage and Ossippee; the two at Boston, Housatonic and Wachusett; the one at New York Adirondack, and those at Philadelphia, Juniata and Tuscarora.

Letters from well-informed parties in Missouri express the opinion that there is a fair probability that the State interest due in July will be met. The efforts of those who are endeavoring to bring about this desirable result do not, however, appear to extend beyond paying the coupons in St. Louis.

The St. Louis *Republican* says the Banks of St. Louis hold $700,000 of the State Bonds, and they will pay $500,000 on the 18th of June instant to protest the interest on that class of bonds.

The St. Louis *Democrat* says: "We are in receipt of letters from bondholders, inquiring about the payment of the July interest on the State debt; but without presuming to speak from authority, we say that from the best information we can gather, the interest will be paid. Our readers must understand, however, that this is only an opinion based upon such facts as come under our observation, in a daily diligent search after financial news; and after all, we may be in error, but we hope not. All good citizens of this State are deeply desirous of having the interest paid, and the credit and integrity of the State preserved intact."

The Merrimac Manufacturing Company, of Lowell, has declared a dividend of three per cent., payable on demand.

The Governor of Wisconsin offers to capitalists $100,000 in bonds of $1,000 each, of the State loan of $200,000 authorized by act of the Legislature. The law provides they shall not be sold at less than par, but "currency" may be taken for them.

The Banks of Maine took $600,000 of the $1,300,000 loan, authorized for the equipment of their soldiers, and advanced the amount at once. The State Treasurer of Maine advertises for $300,000 of this loan. It will be all taken at home and above par. The State Debt of Maine was only $700,000 before the creation of the recent war loan.

At a meeting of the Board of Underwriters on the 10th inst., the following rates were agreed upon: To and from ports in the West Indies, 3 per cent.; to ports in Mexico, 4; to East Coast of South America, 3; West Coast of Africa, 3; Europe, 2; China and India, 4; West Coast of America, 3.

The favorable news from Europe by the Adriatic will cause a decline in these rates.

The British Navigation and Trade returns for 1860, shows that the exports and imports of gold for 1859 and 1860 was as follows:

	1859.	1860.
Imports of gold	£37,070,156	£22,978,196
Exports of gold	35,685,803	25,544,768

The exports and imports from the United States are as follows:

	1858.	1869.
Imports	£9,672,281	£4,792,582
Exports	14,342	1,727,220

Since January 1, 1861, the exports of gold from England to the United States has been over $30,000,000.

The following table shows the importation of breadstuffs into England for the year 1860:

Corn.	Wheat	5,906,181 quarters.
	Barley	2,622,021 "
	Oats	2,308,284 "
	Peas	367,536 "
	Beans	460,865 "
	Indian corn	1,855,660 "
Wheat meal		5,139,253 cwts.
Indian meal		7,625 "

This is equal to 108,566,531 bushels.

The Pittsburg, Fort Wayne and Chicago, the Michigan Southern, and the Michigan Central Roads receive now for passage or freight charges nothing but specie funds.

The Boston and Worcester Railroad has declared a semi-annual dividend of 4 per cent., payable July 1, to holders of 15th inst.

The Mechanics' and Farmers' Bank of Albany has declared a semi-annual dividend of 5 per cent., payable on and after July 1st.

The Harrisburg *Telegraph* learns that Thos. A. Scott, Vice-President of the Pennsylvania Railroad, will have charge of all the Southern Railroads taken possession of during the prosecution of the war.

The Western Railroad (Massachussetts) is doing a large freight business. The traffic, however, is mostly one way, the trains going West being nearly empty. The large receipts, therefore, do not give a corresponding increase in net earnings. The Western Railroad shows an increase of receipts in May of $4,500 over May, 1860.

We are informed that the State of Virginia has remitted to England the funds for the payment of the coupons on her State debt due 1st July.

Since the closing of the Boston steamer mail of Wednesday, the market for bills is quiet; but if anything a fraction weaker. Merchants 103*a* 104¾; Bankers' 105¼*a*105¾. The Export movement of Domestic Produce from New York this week is as follows:

	1859.	1860.	1861.
Total for the week	$1,000,042	$1,871,727	$2.520.013
Prev. report'd.	27,515,455	36,038,879	52,391,477
Since Jan. 1.	$28,515,497	$38,910,606	$57,911,490

The Watertown and Rome Railroad Company have declared a dividend of 3 per cent., payable July 1.

Hanover Branch Railroad.

This company was chartered on the 16th of March, 1847. Construction was commenced on the 20th of March, 1851; and the road completed and opened for business on the 1st of August, 1852. The road is 12.20 miles in length, commencing at Hanover Junction, on the Northern Central Railroad, 46 miles north of Baltimore, and extending westwardly to Hanover, at which point a junction is formed with the Gettysburg road, 17 miles in length, and with the Littlestown road, 7¼ miles in length. Both of these roads are operated by the Hanover Branch Railroad Company—the former since the 1st of January, the latter during the year. We have received a copy of the 9th annual report of the directors, from which we learn that the gross earnings for the fiscal year ending March 31, 1861, were:

From freight, passengers, etc		$27,843 95
" working Gettysburg Railroad		1,200 00
" Littlestown Railroad		2,113 80
Total earnings		$31,157 75
The expenses were:		
Transportation	$3,564 12	
Motive power	4,794 50	
Fuel	3,689 16	
Repairs of road and cars	3,715 70	
Oil and waste	381 60	
Telegraph	106 00	
General expenses	1,279 06	
		17,530 34
Balance		$13,627 41

—about 43½ per cent. of the gross earnings.

The receipts from all sources during the year have been as follows:

Earnings, as above		$31,157 75
Sale of iron, wood, land, car hire, stock subscription, rent, etc.		1,212 06
Balance in treasury last year		1,647 45
		$34,017 26
The disbursements were:		
Working expenses as above.	$17,530 34	
Renewal expenses	8,689 85	
Extraordinary expenses	2,517 41	
Rolling stock	3,878 25	
Interest	2,100 00	
Old claims	57 13	
Dividends	116 00	
		34,888 98
Balance due treasurer		$871 72

The following is a statement of the passenger and freight receipts during the eight years' operation of the road:

	Passenger.	Freight.
1853	$7,925 10	$12,200 00
1854	8,910 43	14,584 83
1855	7,842 88	14,544 17
1856	8,486 02	22,617 24
1857	8,805 65	18,659 84
1858	8,877 66	16,354 18
1859	9,523 93	17,544 31
1860	8,657 77	18,368 84

The leading articles of freight transported during the past year were: iron ore 11,382,600 lbs.; grain, 11,571,581 lbs.; coal, 21,610,394 lbs.; lumber, 14,007,060 ft.; flour, 8,350 bbls.

The Gettysburg Railroad has been worked in connection with this road since the 1st of January last, this company having purchased the rolling stock at a cost of $8,000, to be paid one half in cash, or its equivalent, and the balance in working the road at $400 per month. But one round trip per day is made upon the Littlestown road. A contract has been made for the labor in the maintenance of the repairs of the road for one year from April 1st, at $2,840. It is thought that 50 tons of new rails, and 5,000 cross-ties will be ample for that purpose. The ballasting of the road has also been stipulated for. All the bridges and culverts, with one exception, have been rebuilt or repaired. There were carried over the road during the year 14,622 through and 5,099 way passengers. The report says:

With strict economy in the management of the road, it is hoped that the excellent credit which the company has heretofore enjoyed, can be maintained, and that the succeeding Board will at the maturity of the bonded debt, in February next, be enabled to obtain an extension from the holders of this mortgage, or such portion thereof, as may be beyond the means of the company to redeem.

The equipment of the road consists of 4 locomotives, 3 passenger, 24 freight, and 10 dumping and sand cars.

The resources and liabilities of the company are as follows:

Road, building, and fixtures	$176,683 38
Equipment	37,210 00
Real estate	785 39
Materials on hand	8,125 75
Bills and outstanding claims	960 00
Cash	81 49
	$223,846 01
Capital stock	$121,600 00
Mortgage bonds	35,000 00
Profits from earnings of road	61,370 96
Bills payable	285 00
Profit and loss	380 58
Dividends due	216 00
Notes given for equipment	1,321 75
Amount to be worked out for do.	2,800 00
" overdrawn on treasurer	871 72
	$223,846 01

A GUIDE TO INDIAN INVESTMENTS.—By a Manchester Man.—Trubner and Co., Paternosterrow, London.

This pamphlet treats of the nine principal railways in India, together with the Madras Irrigation Company, Oriental Inland Steam Company, and the Peninsular and Oriental Steam Company, their position, ability to pay, &c., &c., and comes to the conclusion that though railways may return fair dividends in India they will never pay like Irrigation and internal navigation. That may be, but some of the positions of the author are by no means tenable in respect of railways. He appears to have a strong bias in favor of irrigation and internal navigation as against railways. Thus he quotes as evidence from Dr. Lardner, "that goods generally cannot bear the cost of railway transit," a statement notoriously at variance with experience and upon a par with the Doctor's other assertion, that a steamer could never cross the Atlantic! No doubt there may be other enterprises in India as in any other country, which may pay better than railways for short periods, but we question if any in the long run will be as profitable and steady in their prosperity, if only ordinarily well managed, as railways. In his quotations of the returns of the nine Indian railways they all at present pay

above 5 per cent.—pretty well for so short a time; while his Madras Irrigation Company returns under 5 per cent. on the cost. It is true that his Oriental Steam Company pay above 11 per cent., but steam cannot go where railways go, and as he says it is under exceptional circumstances.—*Herapath.*

Catawissa Railroad Company.

EXTRACTS OF FIRST ANNUAL REPORT TO THE STOCKHOLDERS.

The 31st of December having been determined upon as the proper time to end the fiscal year of the corporation, your Board of Directors, in conformity with the requirements of the charter, submit to the shareholders a statement of the affairs of the company, during the months of September, October, November and December, of the year 1860, with detailed accounts of the operations of the road from the officers in charge.

The legal requirements, necessary to enable us to take possession of the property, late of the Catawissa, Williamsport and Erie Railroad Company, purchased on the 2nd day of July last, were, from various causes beyond our control, not consummated until the 1st of October, when occupation was had on the assumption by us of the September obligations of the Receiver of the former Company, and also of the various expenses incurred for the organization of this corporation, as per agreements made by the committee of Catawissa, Williamsport and Erie bondholders.

The capital of the company is represented:

By 44,000 shares prefe'd st'k at $50 each.	$2,200,000
" 23,000 " common " " " .	1,150,000
" chattle mortgage on engine No. 22, and 50 coal cars.	34,000
In all	$3,384,000

To which should be added the Catawissa, Williamsport and Erie Railroad Company chattle mortgage, due Patrick O'Reilly, for engine No. 21, and 26 flat cars, for $19,500, now in use by us, and for which we pay semi-annually, $975.

The amount of capital stock issued to 1st January, 1861, is as follows:

28,561 shares prefe'd stock at $50 each.	$1,428,050
10,623 " common " " " .	531,150
Chattle mortgage.	33,500
Amount	$1,992,700

Yet unissued, but ready for delivery as agreed:

15,439 shares preferred stock at $50 each.	$771,950
12,377 " common " " " .	618,850
Chattel mortgage.	500
Amount	$1,391,300

The earnings of the road have not come up to the expectations formed, while on the other hand the expenditures for its account have been extensive. The embarrassments entailed upon this enterprise, during years of trouble, resulting in the bad condition of the roadway and machinery, as received by your officers, will continue to demand large expenditures, which cannot be properly compared with the receipts from business transacted, until the whole property is placed in the good condition demanded by a wise economy.

The peculiar position of your road, commencing at a point in the woods, eight miles north of the town of Tamaqua, in Schuylkill county, with two-thirds of its whole length located upon unproductive mountain sides, crossing deep ravines upon high bridges, and ending at the town of Milton, on the West Branch of the Susquehanna river, has to some extent begotton an unjust feeling of distrust, and placed it, unnecessarily and unprofitably to all interests, almost wholly at the mercy of its terminal connecting roads, both of which have an alternative route to all our business points. These causes have forced your road in self-protection, and in an imperfect manner, to become a link, measurably beyond our own control, in the chain of roads leading from Philadelphia to Western New York and Buffalo, on the trade of which it has heretofore mainly relied. The close competition forced upon all railroads, by the depressed condition of industrial pursuits, driving them to the acceptance of unremunerative rates, has borne particularly hard upon your property. To each of these several conditions, thus briefly shadowed out to your notice, must be attributed, in a greater or less degree, the results submitted.

The engines and cars of your company are run over the following roads, under agreements and contracts, by which a certain portion of the receipts thereon and therefrom are paid for the privilege:

	Miles.
Sunbury and Erie Railroad	27
Little Schuylkill Railroad	28
Quakake Railroad	14
Beaver Meadow Railroad	13
Leased	82
Add Catawissa Railroad	64
Total miles operated by C. R. R. Co.	146

The receipts and expenditures during your ownership (four months) have been:

Receipts from road	$95,790 96
Expenses on road, machinery, &c	80,820 54
Net income	$14,970 42

Your company, having no repair nor machine shops, is obliged to depend upon the shops of the Little Schuylkill Railroad Company, at Tamaqua, and those of the Elmira and Williamsport Railroad Company, at Williamsport, for the repairs required by your machinery and cars.

The opening of the Mahanoy coal basin, by the completion of the tunnel on the East Mahanoy Railroad, will in all probability so increase the business of the Little Schuylkill Railroad, as to require the full use of their shops and machinery for their own repairs. The determination of the Sunbury and Erie Railroad Company, in regard to the perpetual contract, practically compelling us to end the run of our engines at Milton, makes Williamsport ineligible to us as a place for repairs.

The Board of Directors are therefore clearly of the opinion, that a reasonable expenditure should be made at an early day, in the erection of, and stocking with suitable machinery, repair and machine shops, at some proper point on the line of your own road, where repairs can be attended to, and a gradual increase of rolling stock can be made, under the directions and control of your own officers, at a marked saving over rates now paid. * * * * * * * *

T. Haskins Du Puy, *President.*

Philadelphia, March, 1861.

Philadelphia and Erie Railroad.

A special meeting of the stockholders of this company is to be held on the 27th inst., to consider a proposition for the leasing and completion of the road from Sunbury to Erie. The proposition, we learn, is to come from the Pennsylvania Railroad Company for a lease of the road for ninety-nine years. The ability of the Pennsylvania to complete the Philadelphia and Erie at this time is unquestioned, and they are the only parties, perhaps, that can do it under the present circumstances. Should the stockholders accept the proposition when made, it will be the means of completing, at an early day, the great route to Lake Erie, and the whole line from Philadelphia to Erie City will be under the management of the Pennsylvania Railroad Company—that corporation now having control of the Harrisburg and Lancaster Railroad and the Northern Central from Harrisburg to Sunbury.—*Phila. Commercial List.*

Chicago and Rock Island Railroad.

The Directors of this road for the current year are:—Harry Farnham, Theodore S. Faxton, Thomas C. Durant, Chas. W. Durant, John B. Jervis, Nathan Peck, Francis H. Tows, Robert A. Forsyth, Ebenezer Cook, David W. Dunham and Clark Durant.

Halifax and Quebec Railway.

The following memorandum has been published for circulation, in anticipation of the debates which are likely to take place in the House of Lords and the House of Commons with respect to this important Imperial undertaking:—

In 1838, on the establishment of Transatlantic steam navigation, Lord Melbourne's Administration directed Lord Durham to report upon the best mode of opening up a communication between Halifax and Quebec.

In 1839, Lord Durham, in his report on British North America, strongly urged the construction of a railway.

In 1843, a survey for a military road was made at the instance of the Home Government, but afterwards abandoned in favor of a railway.

In 1846, Mr. Gladstone, Secretary of State for the Colonies, organized a survey for a railway by Royal Engineers.

In 1848 that survey was completed; and the report thereon, by Major Robinson and Captain Henderson, was presented to Parliament in February, 1849.

Canada, New Brunswick, and Nova Scotia contributed 30,000*l.* to expenses of that survey.

In 1851, Lord John Russell's Administration, through Lord Grey, the Colonial Minister, in a despatch to the Governor General of British North America, dated the 14th of March of that year, pledged the Imperial guarantee, or to advance the money from the British Treasury, on an estimate that the line would cost 5,000,000*l.* sterling.

In 1852 that pledge was renewed by Lord Derby's Administration, but fell into abeyance on a question of route; but the pledge has never been withdrawn.

Canada has since that time made 2,000 miles of railway westward from Quebec, and also 114 miles of the line from Quebec towards Halifax; New Brunswick has also made 110 miles of the line, extending from Shediac to St. John; and Nova Scotia has made 60 miles of the line, extending from Halifax to Truro, and a branch line to Windsor of 38 miles.

The length of line remaining to be constructed is 350 miles, and which can be fully completed and equipped for 3,000,000*l.* sterling.

In the autumn of 1858, Canada, New Brunswick, and Nova Scotia made a joint application to the Imperial Government, expressing their inability to complete the undertaking without Imperial aid.

Canada, New Brunswick, and Nova Scotia have granted to her Majesty 60,000*l.* per annum, and all the ungranted lands within ten miles on either side of the line, and a free right of way through all private property, providing her Majesty's Government will, by themselves, or, through the instrumentality of a private company, complete the railway.

Her Majesty's Government are asked to give 60,000*l.* per annum for the carriage of the mails, military stores, and troops between Halifax and Quebec, and with that and the provincial grant guaranteed for a series of years by the Imperial Government, the necessary capital can be raised to complete the railway.

Against the foregoing sum of 60,000*l.*, the Governments of Canada, New Brunswick, and Nova Scotia estimate a saving to the Imperial Treasury of 70,000*l.* per annum, exclusive of the great saving the railway would effect in the Imperial military expenditure, which amounts at present to about 420,000*l.* a year.

Upwards of 20,000,000*l.* of British capital invested in Canadian railways is in great jeopardy, owing to the want of access to and from the Atlantic through British territory.

The Grand Trunk Railway was constructed on the distinct assurance that the line would be continued through New Brunswick and Nova Scotia to the Atlantic by the Imperial and Provincial Governments.

Canada during last session, and New Brunswick and Nova Scotia have, during the present session of their several Parliaments, unanimously passed joint addresses to her Majesty from both branches

of their several Legislatures, asking for such aid as will secure the immediate construction of this railway.

Particular attention is directed to the petitions which have just been presented to Parliament, and to copies of the addresses to her Majesty from Canada, New Brunswick and Nova Scotia.

We have already published the addresses. The petitions are presented from the bankers, merchants, manufacturers, &c., of London, Liverpool, Manchester, Glasgow, and Bristol.—*London Canadian News.*

Ohio and Mississippi Railroad.

The annual meeting of this company was held on the 4th inst. This was, however, merely a formal meeting, as all the stock is now in the hands of the trustees. The revenue for the year ending April 30, 1861, was as follows:

From passengers	$472,998 80
" freight	357,290 43
" express	22,328 50
" mail	46,200 00
	$898,817 73

And the expenses were:

Transportation expenses	$246,263 98	
Repairs of road	220,468 08	
" bridge	47,007 55	
" water station	2,432 20	
" depots	11,116 20	
" passenger cars	27,314 33	
" freight cars	16,356 86	
" locomotives	45,300 31	
" shops, tools, and machinery	4,354 92	
Oil, tallow, and waste	17,889 34	
Book printing and stationery	4,223 17	
Loss and damage to freight	13,976 77	
Loss passenger and bag'ge.	1,000 98	
Cattle killed	7,640 19	
Gratuities	1,170 33	
Interest and discount	16,274 33	
Fuel	62,359 41	
		745,148 96
Balance		$153,668 77

A comparison of the revenue of the past with that of the preceding year shows a falling off of $116,666 72, with an increase in expenses of $11,856 83. The following is a comparative statement of construction account for the years 1860 and 1861—showing a reduction of $63,296 48:

	1860.	1861.
Superstructure, for side tracks, &c.	$6,416 06	$2,155 69
Ballasting road bed	19,366 63	7,528 05
Building bridges	48,796 57	8,566 63
Depot	8,024 57	4,554 66
Fencing	1,385 46	505 77
Right of way settled	9,710 33	2,331 56
Water stations	239 22	.....
Total	$88,938 84	$25,642 36

The Banks of Illinois.

The Springfield (Ill.) correspondent of the Missouri *Democrat*, under date of the 1st of June, writes:

"The long protracted depreciation of Illinois currency has at last impressed the idea upon the Bank Commissioners that something ought to be done. Accordingly they act, and as it is a step that should have been taken some time since, it will be a matter of greater rejoicing now, as the need is more urgent. They have found by an examination in the office of the Auditor of Public Accounts, what every man, who has been handling currency, knew a long time ago, that the circulation of several of our wild cat banks exceeds the present value of their securities deposited with the State Treasurer. Therefore, they notify the officers of the said banks, that they are respectively required to deposit with the Auditor, by the 20th of August next, other securities to cover this deficiency, or surrender to that officer to be burned, such an amount of their bills as will reduce the circulation to the proportion of the present value of their securities, or, the aforesaid banks will be put in liquidation, and their securities sold for whatever they will bring.

Here follows a list of 49 banks so called upon, together with the amount of their circulation and deficit, May 24, 1861, the former amounting to $4,551,179, and the latter to $1,666,836. The writer continues:

By the quarterly statement of the Auditor, it appears that the aggregate circulation of these banks on the 1st of April last was $4,688,561. But on the 24th of May, the circulation of the same banks was but $4,551,179. Between these two dates, therefore, $137,382 was retired from circulation. What the bankers paid for this nobody knows—it may be twenty cents on the dollar, or less or more; it was used at the Auditor's office to reclaim bonds at the same rate at which those bonds were deposited. And while the Bank Commissioners have been more than a month ascertaining that there was anything wrong with the securities of these banks, all this while the people of the State have been losing by their depreciation.

The road is now made clear by this call, and all bill-holders may exchange their rags for bonds. The consequence will be that, in a few days at furthest, this worthless stuff which we have been accustomed to call money, will disappear from among us. There are now in all *sixty seven* banks under call, with a circulation of $6,242,437. More than half of the twelve millions which was in circulation on the first of January, is now discredited, and will soon be among the things that were.

Upon 44 banks the aggregate circulation of which was $4,067,911, no call of any kind was made.

The Shipment of Cotton.

The *Mobile* (Ala.) *Register* publishes the act passed by the Confederate Congress on the 21st of May, prohibiting the exportation of cotton except through the Southern seaports. It reads as follows:

AN ACT *to prohibit the exportation of Cotton from the Confederated States, except through the seaports of said States, and to punish persons offending therein.*

SECTION 1. The Congress of the Confederate States of America do enact that from and after the first day of June next, and during the existence of the blockade of any of the ports of the Confederate States of America by the Government of the United States, it shall not be lawful for any person to export any raw cotton or cotton yarn from the Confederate States of America, except through the seaports of the said Confederate States; and it shall be the duty of all the Marshals and revenue officers of the said Confederate States to prevent all violations of this act.

SEC. 2. If any person shall violate, or attempt to violate or evade, the provisions of the foregoing section, he shall forfeit the cotton or cotton yarn thus attempted to be illegally exported, for the use of the Confederate States; and in addition thereto, he shall be guilty of a misdemeanor, and on conviction thereof shall be fined in a sum not exceeding five thousand dollars, or else imprisoned in some public jail or penitentiary for a period not exceeding six months, at the discretion of the court, after a conviction upon trial by a court of competent jurisdiction.

SEC. 3. Any person informing as to a violation, or attempt to violate, the provisions of this act, shall be entitled to one half the proceeds of the article forfeited by reason of his information.

SEC. 4. Any Justice of the Peace, on information under oath from any person of a violation, or attempt to violate this act, may issue his warrant, and cause the cotton or cotton yarn specified in the affidavit to be seized and retained until an investigation can be had before the Court of the Confederate States.

SEC. 5. Every steamboat or railroad car which shall be used with the consent of the owner or person having the same in charge, for the purpose of violating this act, shall be forfeited in like manner to the use of the Confederate States. But nothing in this act shall be so construed as to prohibit the exportation to Mexico, through its coterminous frontier.

Congress C. S. A., May 21, 1861.

I, J. J. Hooper, Secretary of the Congress of the Confederate States of America, do hereby certify that the foregoing is a true and correct copy of an act "To prohibit the exportation of cotton from the Confederate States, except through the sea-

ports of said States, and to punish persons offending therein," which passed Congress, and was approved on the 21st day of May, 1861.

J. J. Hooper, Secretary.

Journal of Railroad Law.

CONTRACTS WITH CORPORATIONS: PARTIES ENTERING INTO ADMIT THE EXISTENCE OF THE CORPORATION: A GENERAL DENIAL ADMITS THE PLAINTIFF'S CAPACITY TO SUE.

It may be convenient to recognize the existence of a corporation when a party wishes to enter into a contract with it, beneficial to himself; and to deny its existence when the company sue him for a breach of the same contract; but we do not think it exactly honest. Nor is a party allowed to do so by the law of Indiana. The case of the Cincinnati Type Foundry Company against Jones decided by the Supreme Court of that State, has affirmed the proposition that to contract with a party as a corporation, will estop the party so contracting from denying the existence of the corporation at the time it was contracted with.

The suit was upon a promissory note made by the defendant by which he promised "to pay to the order of the *Cincinnati Type Foundry Company* two hundred and seventy-nine dollars." The defendant put in a general denial, and averred that the plaintiffs had no legal capacity to sue, because *not a corporation*. The note constituted all the evidence, and at the trial judgment was rendered for the plaintiffs. From this decision an appeal was taken to the Supreme Court which held that the promise "to pay to the order of *the Cincinnati Type Foundry Company*" was a recognition of the plaintiffs' incorporation which estopped the defendant from setting it up; and also that the general denial of the defendant admitted the plaintiffs' capacity to sue. The following is the substance of the opinion.

Perkins, J.—As a general proposition it is the law of this State that a contract with a party as a corporation, estops the party so contracting, to deny the existence of the corporation at the time it was contracted with as such. And it has been held in other States that where individuals are incorporated upon performance of certain acts, a person who contracts with them by their corporate name, cannot in an action against him on the contract, deny the performance by them of the acts necessary to give them a corporate existence. If the style by which a party is contracted with, is such as is usual in creating corporations, viz: naming an ideality, but disclosing that of no individual, as is usual in the cases of simple partnership, it has been treated as *prima facie*, at least, indicating a corporate existence. And there is no hardship in this. The party executing the note, owes the amount of it. The judgment upon it, in the suit, merges it, and the payment of judgment satisfies it, and bars any other action against the maker for the money.

But in this class of cases, it would seem, after all, that the courts have proceeded upon a rule of evidence, rather than upon a strict doctrine of estoppel. They have treated the contract with a party by a name implying a corporation, really as evidence of the existence of a corporation, more than as an estoppel to disprove such fact. The doctrine of conclusive estoppel seems more properly applied to cases involving the question of legality of organization, where the fact of an existing statute, authorizing in the given case such corporation is known to the court, either by judicial notice or actual evidence in the case. In such cases, where a party has contracted with a body as being organized as a corporation under the law, he will be estopped to dispute the legality of the organization.

The decision of this case will rest upon another ground. It is well settled law in this State, that the general denial by the defendant, of the cause of action stated in the complaint of the plaintiff, admits the capacity of the plaintiff to sue. A special plea or answer denying the competency of the plaintiff to sue, is in the nature of the plea in abatement—a dilatory answer. The order of pleading has always been, and is still, under the code, that pleas or answers to the jurisdiction, to the disabilities of the parties, etc., must precede those to the merits: and this because as says Mr Chitty, "each subsequent plea admits that there is no foundation for the former, and precludes the defendant from afterward availing himself of the matter."

Judgment was affirmed, with five per cent. costs and damages.

Railroad Earnings.

The earnings of the Milwaukee and Prairie du Chien Railroad, for May, 1861, were . $113,961 63
May, 1860 ..... 59,082 39

Traffic	$1,976,578.52	2,114,448.98	2,721,590.94
Working expens.	1,419,954.80	1,489,579.52	1,693,403.30
Balance	$556,623.72	624,869.46	1,028,187.64

The receipts of the Grand Trunk Railway of Canada for the week ending June 1st, 1861, were $65,987 64
Corresponding week, 1860 ..... 63,378 16

Increase $2,609 48

Tot. traffic from July 1, 1860, to date, $3,201,562 94
Corresponding period, 1859 ..... 2,688,398 21

Increase $513,164 78

The earnings of the Chicago and Northwestern Railroad in May, 1861, were:

From passengers		$21,778 11
" freight, etc.		61,065 58
Total		$83,843 69
May, 1860		62,127 96
Increase		$21,715 71

The following is a statement of the approximate earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of May, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$137,343 64	$98,492 22
" Passengers	62,597 84	72,697 11
" Express	2,700 00	2,700 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 33	7,083 33
" Miscellaneous	307 75	33 00
	$217,857 56	$188,830 66
Earnings January 1, to May 31	$1,172,672 30	$856,500 22
Increase		$316,172 08

The earnings of the Michigan Southern Railroad in May, 1861, were $36,050
May, 1860..... 30,445

Increase..... $5,605

The earnings of the Galena and Chicago Railroad for May, 1861, were $160,692 09
Same month, 1860..... 115,505 50

Increase..... $45,186 59

The earnings of the Chicago and Rock Island Railroad in May, 1861, were..... $97,595
May, 1860..... 101,974

Decrease in 1861..... $4,379

The earnings of the Watertown and Rome Rail road for May were:
May, 1861..... $32,079 27
May, 1860..... 31,453 78

Increase..... $625 49

The earnings of the Cleveland and Toledo Railroad in May, 1861, were..... $65,246
May, 1860..... 66,601

Decrease..... $1,355

The earnings of the Michigan Central Railroad in May, 1861, were..... $149,550 38
May, 1860..... 158,509 98

Decrease..... $8,950 60

New York Canals.

The quantity of flour, wheat, corn and barley left at tide-water during the first week in June, in the years 1860 and 1861, is as follows:

	1860.	1861.	Increase.
Flour, bbls.....	25,873	82,326	6,453
Wheat, bush.....	122,553	958,228	835,675
Corn, bush.....	521,708	763,908	*242,200
Barley, bush.....	300	4,525	4,225

The aggregate quantity of the same articles left at tide-water from the commencement of navigation to the 7th of June inclusive, during the years 1860 and 1861, is as follows:

	1860.	1861.	Decrease.
Flour, bbls.....	185,520	111,485	*74,034
Wheat, bush.....	1,008,084	3,985,497	2,977,413
Corn, bush.....	2,996,744	2,824,051	*172,693
Barley, bush..	73,013	99,645	26,632

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a gain of 521,448 bbls. of flour.

Fort Wayne and Southern Railroad.

The New Albany (Indiana) *Ledger* says that "the Supreme Court has decided that the Fort Wayne and Southern Railroad Company had no legal existence, and as a consequence, we presume, all its acts are void. If so, this relieves the City of Jeffersonville from the heavy debt contracted on behalf of that road, and gives back their property to those who subscribed farms and lands."

New York and Erie R. R.

PASSENGER TRAINS leave, via Pavonia Ferry and Long Island Dock, from foot of Chambers street:

DUNKIRK EXPRESS, at 7 A. M.

MAIL, at 8½ A. M. This Train remains over night at Elmira, and proceeds the next morning.

WAY, at 4 P. M., for Middletown, Newburg, and intermediate stations.

LAND AND SUBMARINE
BLASTING,
Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

ANALYTICAL AND
Manufacturing Chemistry,
No. 24 WILLIAM STREET,
Rooms Nos. 28 & 29. NEW YORK.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. Railroads in Texas.

About the last of January we gave the number of miles of railroad completed in the State, which was in the aggregate as follows: in operation 399, graded 177; increase in four months 45, graded 46. The amount now completed and graded is as follows, as near as we can learn:

	In operation.	Graded ahead.
Eastern Texas	24	20
Texas and New Orleans	108	..
Galveston and Houston	50	..
Brazoria	50	25
Buffalo, B. B. & C.	75	10
Houston & T. C.	82	18
Washington County	22	..
San Antonia & M. G.	25	..
Houston, T. & Tyler	..	2
Southern Pacific	27	20
Memphis, El. P. & P.	..	..
Total	464	145
Total 1st January	399	177
Increase	65	Decrease 32

Thus it will be seen that our railroad men have completed 65 miles in the last five months, by far the largest amount of railroad ever completed in the same length of time in this State. The whole amount completed since the 1st of September last is 110 miles.—*Houston, Texas, Telegraph.*

Chicago and Rock Island Railroad.

The following is the official list of the new Board of Directors of the Chicago and Rock Island Railroad: Henry Farnham, Chicago, Ill.; John F. Tracy, Chicago, Ill.; Theodore S. Faxton, Utica, N. Y.; John B. Jervis, Rome, N. Y.; Robert A. Forsyth, Newburg, N. Y.; Ebenezer Cook, Davenport, Ind.; Nathan Peck, New Haven, Conn.; Thos. C. Durant, New York; David Dows, New York; Francis H. Tows, New York; C. W. Durant, New York; Edward W. Dunham, New York; Clark Durant, New York.

Cotton and the Cotton Manufacture.

(Continued from p. 443.)

In 1860 raw cotton was shipped from the United States, to the countries following, viz.:

	Lbs.	Value.
Russia	21,698,054	$2,644,514
Sweden and Norway	11,662,859	1,306,071
Hamburg	12,081,532	1,289,645
Bremen	53,638,767	5,873,469
Other German Ports,	352,227	42,477
Holland	12,757,603	1,403,132
Belgium	14,800,474	1,590,806
England	1,215,104,929	129,496,795
Scotland	18,018.395	2,016,606
Ireland	31,013,458	3,415,379
Gibraltar	3,192,256	354,375
Canada	1,380,285	138,075
Other British N. A. Possessions	5,084	728
British West Indies	6,800	340
France on the Atlantic	281,281,093	31,788,763
France on the Mediterranean	2,686,241	264,956

The export of cotton, manufactured from the United States, to foreign countries, in 1860, was as follows, viz.:

Russia in Europe	$6,673
Russia in Asia	100
Swedish West Indies	2,328
Denmark	364
Danish West Indies	118,298
Hamburg	175,221
Holland	9,966
Dutch West Indies	30,645
Dutch Guiana	240
Dutch East Indies	115,971
Belgium	6,426
England	94,023
Scotland	24,169
Gibraltar	4,114
Malta	379
Canada	314,491
Other British North American Possessions	379,596
British West Indies	29,372
British Honduras	25,819
British Guiana	1,691
British Possessions in Africa	5,404
British Australia	57,750
British East Indies	496,376
France on the Atlantic	5,707
France on the Mediterranean	4,481
French North American Possessions	15,290
French West Indies	696
French Possessions in Africa	4,403
Spain on the Atlantic	178
Canary Islands	1,969
Phillippine Islands	166,390
Cuba	107,595
Porto Rico	8,510
Portugal	71
Cape de Verde Islands	3,664
Azores	9,883
Sardinia	4,143
Two Sicilies	1,656
Turkey in Europe	28,622
Turkey in Asia	102,930
Egypt	2,360
Other Ports in Africa	931,062
Hayti	227,717
San Domingo	3,342
Mexico	641,880
Central Republic	46,698
New Grenada	109,932
Venezuela	63,064
Brazil	651,467
Uruguay	141,301
Buenos Ayres	102,834
Chili	1,351,309
Peru	299,693
Ecuador	150
Sandwich Islands	64,899
Other Islands in the Pacific	3,732
Japan	124
China	3,897,360
Other Ports in Asia	17,688
Whale Fisheries	426
	$10,934,796

We imported in 1860 cotton manufactures from the several countries, viz:

Russia	$1,030
Danish West Indies	508
Hamburg	1,079,691
Bremen	2,288,942
Holland	4,712
Belgium	47,357
England	24,767,157
Scotland	1,786,114
Ireland	36,860
Canada	988
Other B. N. A. Possessions	12,226
British West Indies	294
British Australia	15,206
British East Indies	910
France on the Atlantic	2,364,136

Spain do. do.	33
Cuba	116
Azores	145
Tuscany	53
Hayti	60
Mexico	171,977
New Grenada	27,157
Venezuela	279
Chili	109
Islands in the Pacific	586
Japan	13
China	2,955
	$32,559,014

The figures and tables heretofore given show, that, while producing the bulk of all the cotton raised, the United States, comparatively speaking, manufacture a trifling portion of it in value. The people of the United States, at this time, own more merchant ships, have built more miles of railway than any other people, and made greater progress in material prosperity than any other nation, during the last 10 years. But they have failed to make progress in manufactures like Great Britain. The United States cotton manufacture developed rapidly during such period as it enjoyed the favor of Congress, and has suffered in competition with the superior skill and greater capital of England, when this favor has been withdrawn. The want of a continued and uniform American policy, has been the source of our weakness as a government.

Looking, therefore, at the facts concerning the cotton culture and its manufacture, the important question for the people of the United States, is: "Shall we manufacture our own cotton, or send it to other countries, to be the means of enriching them at our expense?" The history of the cotton manufacture in the United States will show, that the members of Congress have had very inadequate notions of its value and importance; and that the legislation of the country has been, in the main, for the benefit of the foreign manufacturer, and adverse to home industry.

The first cotton mill in the United States was erected at Pawtucket, Rhode Island, by the late Samuel Slater, in 1790. He came over from England, in response to the advertisement of a Pennsylvanian society, for a machine to spin cotton. The laws of England, at that time, prohibited the exportation of machinery from that country, and all attempts to procure models of Arkwright's patents, were frustrated by the vigilance of the revenue officers of England, who seized certain models procured by Mr. Ringold of Philadelphia, after they were ready for shipment, and they became forfeited to the crown.

This led to the advertisement which attracted the attention of Slater, a pupil of Arkwright, who at the age of 22 came to America bringing neither model nor machine. From his memory however, he produced a water frame with 24 spindles, on which yarn of the fineness of 40 was spun, and a mill was forthwith erected for its manufacture. A second cotton mill was built in 1795, a third in 1803. In 1810, there were 62 cotton mills running 31,000 spindles. The war of 1812 gave the cotton manufacture its first great impulse. In 1800 the cotton consumed in the United States was 500 bales.
In 1805 1,000 "
In 1810 10,000 "
In 1815 90,000 "

In 1816, Capital employed was $40,000,000
Cotton consumed 27,000,000 lbs.
Cloth manufactured 81,000,000 yards.

The peace of 1815 prostrated the cotton manufacture, and the cheaper English goods destroyed the sale of American cottons till the tariff policy enabled them to recover.

The policy of the government, in reference to cotton goods, is shown by the various tariff acts. The duties on cotton fabrics are stated in the following table taken from the *Merchants' Magazine* for May, 1861, p. 564, as follows, viz.:

Date of Act.	Duty on Cotton goods.
1789, July 4	5 per cent.
1790, August 10	7½ "
1792, May 2	10 "
1794, June 7	15 "
1797, March 3	17½ "
1804, March 26	20 "
1812, (war tariff, duties doubled	40 "
1816, April 27	25 "
1824, May 22	25 "
1828, May 19	25 "
1832, July 14	25 "
1833, March 2 (compromise tariff) *	"
1841, September 11	20 "
1842, August 30	30 "
1846, August 6	25 "
1857, March 3	19 "
1861, March 2	30 "

* When the duty exceeds 20 per cent., to be reduced biennially till it shall cease after 1842.

The change from a *home* valuation, to *ad valorem* duties, in 1846, brought into practice the low valuation in England, which operated so disastrously on all cotton manufactures from 1846 and onward. From 1816 to 1833-'5, the cotton manufacture flourished, gradually reducing the price of cotton fabrics by the active competition it excited, till the Compromise tariff of 1833 reduced the manufacturing industry of the nation to comparative bankruptcy, and brought on the panic and financial revulsion, which culminated in the suspension of specie payments by the Banks in 1837.

The cotton manufacture revived again, under the tariff of 1842. National bankruptcy was succeeded by plenty from 1842 to 1846 till the famous "Revenue tariff" of 1846 struck a staggering blow at the industry of the nation. The California gold discovery of 1847, and the vast supply following it, averted for a while the inevitable revulsion, following too large an importation of foreign goods. This revulsion finally came upon the country in 1857. A decline in the price of cotton followed the panic of 1857. This has enabled our cotton manufacturers to recover in part the ground previously lost. The tariff of 1861 framed by practical men, will advance the cotton manufacture, and its permanence as a policy will ensure a rapid increase of home production and a comparatively steady reduction of prices. The return to *specific* duties on the finer qualities of cotton fabrics will protect the country from undervaluations heretofore regarded as a matter of course at the English custom house.

The lack of manufactures, in 1812, revealed the weakness of our position, as a nation, and led to the protective policy of 1816, first inaugurated by Mr. Calhoun and his associates in Congress. The suffering of the nation was great in maintaining the war, but the lesson taught us, our ability to manufacture all fabrics required for ordinary consumption, was of far greater value, than the cost of the war.

In the judgment of the most intelligent manufacturers in the United States, had the tariff of 1832, or even that of 1812, been continued to this time, the increase of cotton goods would have been mainly confined to the United States. Instead of this, the great development of this branch of industry has been in the British Isles as already shown.

The comparative consumption of cotton in the two countries, is shown in the following table:

	1842. Lbs.	1850. Lbs.	1860. Lbs.
United St.	104,997,200	260,736,650	450,011,962
G't Britain,	473,976,400	588,200,000	1,140,510,112

The value of the cotton manufactures of the two countries, in 1860, however, is estimated as follows, viz.:

United States	$96,807,307
Great Britain	402,486,018

These approximate results are ascertained, by adding to the price of raw cotton in the United States, 10.85 cents per lb. in 1860, the cost of manufacturing, 8.44 cents per lb., according to the ratio of cost as shown by returns of the census of 1850. This would make the cost of manufactured cottons, 19.29 cents per lb. in the United States, in 1860, against 35.29 cents per lb. in Great Britain.

As each pound of cotton consumed in England, in 1859, was valued at 35.29 cents after its manufacture, by applying the same price to the quantity consumed in 1860, 1,140,510,112×35.29 gives $402,486,018 as the value of the cotton manufacture of the British Islands for 1860.

The export price of cotton averaged 11.3 cents per lb. in the United States in 1850. The returns of the manufactures for 1856 make the price of it 14.1 cents per lb. If to this you add as the cost of manufacture 10.06 cents per lb. on the basis of 57 per cent. for raw cotton, and 43 per cent. for the labor added, according to the returns of 1850, and the cost of manufactured cottons would be 24.07 cents per lb. in the form of fabrics. Apply this price to the cotton consumed in 1860, 450,011,962 lbs.×24.07, and the value is $108,317,779
against 65,561,687
in 1850—an increase of $42,756,092
in 1860, over the production in 1850, or 65½ per cent. as the aggregate increase of the manufactures in 1860 over 1850.

In any aspect of the question, therefore, the value of the English cotton manufacture is four times as great as that of the United States.

Two causes have been chiefly instrumental in producing this result,—the undue absorption of

capital into railways in the United States, and the encouragement held out to the English manufacturers by the United States tariff of 1846.

The business of the United States was in the most healthy condition ever known in 1846, at the time the tariff act of that year came into effect. The Banks of the country then held the largest relative amount of specie to their circulation at any time in the history of the country. Every thing was prosperous, and the material interests of the country were in process of healthy development. Our manufactures of cotton and of iron were gradually filling the place of imported articles and at cheaper rates.

The same influences that broke down the tariff of 1832, overthrew that of 1842, followed by the same results; and the promise of cheap railroad iron, from England, added new stimulants to the speculative feeling in favor of railways, while rail makers in this country were broken down by it. Railways were started in all sections of the country and created a most unnatural and unhealthy demand for money. Unprofitable schemes found favor, and lines competing with the most valuable State works were encouraged by legislative grants. The most striking example of this short sightedness, perhaps, is the Hoosac Tunnel project of Massachusetts, when the State voted aid to a large extent, apparently for the purpose of competing with its own great line, the Western Railroad.

While these extraordinary expenditures in railroad were going on, capital went sparingly into other branches of industry, while the system of undervaluation of cotton fabrics at the British custom house, gave their goods a preference in the American market. It was impossible to resist the influence of cheap capital in England, controlling by its influence the Metropolitan press and the action of Congress, ready at all times to undersell the American manufacturer at such prices as invited competition. The supply for the English home market was easily ascertained, and cheaper prices on exported goods did not disturb the price at home. The home consumption price 43.51 cents per lb. in fabrics against 32.63 cents for all exported goods, does not necessarily prove, that the exported goods were inherently of cheaper grades or qualities. Ask any intelligent importer of cottons, whether the English people as a body consume finer cottons or higher priced goods than the average of the exports? He will answer, No. The Americans on the whole consume the higher grades.

We think, therefore, we are justified in the assertion, that the cheap price of money in England and their system of undervaluing exports, have been the chief causes of the extraordinary increase in the manufacture of cotton goods, as compared with their advance in the United States. The cost of money in England, has not averaged, over 2½ or 3 per cent. against an average of from 12 to 18 per cent. paid by American cotton manufacturers, from 1847 to 1857. The check to railroad speculations in 1857, and the decline in the price of money and of labor since, has greatly favored our cotton manufacturers, and the new tariff, if allowed to remain, will soon change the prospects of our cotton manufacture. The following table shows the operations of the tariff acts from 1842 to 1861 in reference to cotton manufactures.

TARIFF ACTS, RATE OF DUTY.

		1842.	1846.	1857.	1861.
Cotton, unbleached, 100 threads sq. inch or less, and over 5 oz. p. yard	per cent.	30	25	24	sq. yard 1 ct.
100*a*140 threads, not 5 oz	"	30	25	24	" 2 cts.
140*a*200 threads, "	"	30	25	24	" 3 cts.
over 200 threads, "	"	30	24	24	" 4 cts.
Cotton bleached, 100 threads sq. in. or less, and over 5 oz.	"	30	25	24	" 1½ cts.
100*a*140 threads, not 5 oz	"	30	25	24	" 2½ cts.
140*a*200 threads, "	"	30	25	24	" 3½ cts.
over 200 threads, "	"	30	25	24	" 4½ cts.
Cotton colored, 100 threads sq. inch or less, and over 5 oz	"	30	25	24	sq. yd. 1½ cts. & p. ct. 10
100*a*140 threads, not 5 oz	"	30	25	24	" 2½ " & " 10
140*a*200 threads, "	"	30	25	24	" 3½ " & " 10
over 200 threads, "	"	30	25	24	" 4½ " & " 10
Cotton, other plain woven, costing over 16 cents sq. yard	"	30	25	24	per cent. 25
Cotton, all manufactures of, not otherwise enumerated	"	30	25	19	" 25
Cotton bagging, 10 cts. lb. or less	sq. yd.	4 cts.	20	15	lb. 1½ cts.
" " over 10 cts. lb	"	4 cts.	20	15	lb. 2 cts.
" braces, or suspenders	per cent.	30	30	24	per cent. 30
" caps, gloves, leggins, mitts, socks, stockings, wove shirts, and drawers	"	30	20	15	" 30
Cotton cord, gimps, and galloons	"	30	30	24	" 30
" embroidery, or floss	"	25	25	24	" 20
" hosiery, unbleached	"	30	20	15	" 30
" lace, including bobbinett	"	30	25	19	" 30
" laces, insertings, trimmings and braids	"	30	25	24	" 20
" spool and other thread	"	30	25	24	" 30
" thread, twist, and yarn, all unbleached and uncolored	"	25	25	24	" 30
Cotton thread, twist, and yarn, all bleached or colored	"	25	25	24	" 30
Cotton twist, yarn, and thread, all other on spools or otherwise	"	30	25	24	" 30

The import duty above given does not show the full measure of protection afforded. We have already shown that the cost of transporting cotton to England is 1.52 cents. per lb., including all expenses, before it reaches the hands of the manufacturer. This is equal to 15 per cent. on its value. The cost of returning it to the American consumer, after its manufacture, including insurance and commissions, may be put down at half as much more, showing that the American manufacturer has an advantage of 22½ per cent. in his own market, without regard to the duties. The lowest rates by the tariff of 1857 were 15 and 19 per cent., averaging 17 per cent., affording an apparent actual protection of more than 40 per cent.; and yet, in 1860, under the operation of that same tariff act, $32,559,014 worth of cotton goods were imported into this country.

It is not strange, therefore, that the cry should be raised, by the English manufacturer, and his agents in this country against the new tariff. No others can fairly object to the principles of the tariff act of 1861. Its great feature, in reference to cotton is that the duty is specific in most cases favoring the importation of goods of high intrinsic value.

If the effect of the present civil strife should be to retain the tariff of 1861 even at the cost of a large debt, the price will be cheap; for it will do more to make our nation self-reliant and self sustaining, than any other means that could be devised. The United States produce all the means of subsistence, and most of the materials that enter into consumption by a luxurious people. It is only luxuries that we require from other nations. If we trust to our own people, to produce that for us, they will soon invite the skilled laborer of other lands to come over and settle with us. In our warmer latitudes, we can produce nearly all the luxuries that characterize a tropical climate.

Many intelligent men contend that we can now manufacture as cheaply as in England, and the skill of our mechanics has improved upon the cotton machinery of England. The cotton mills at Lowell were said to cost $40 per spindle, including the plant and rolling stock. Better machinery can now be put into running order, at $12 per spindle, and new machinery of the most approved construction can now be contracted for, at $5.40 per spindle, without the buildings or the driving power. In England they are valued at the rate of 23s. 6d. or $5.68 per spindle, in the recent valuable work of Mr. Mann on the cotton trade of Great Britain. For two or three years past $6.00 per spindle has been considered a fair price in the United States.

Mr. Samuel Bachelder, of Boston, Treasurer of the York Manufacturing Company of Maine, has recently submitted an interesting paper to the Board of Trade of that city, on the statistics of the cotton manufacture, in which he estimates, that there are from 38 to 40 spindles to a loom in the United States, while according to the statement of Mr. Mann there are only 20 spindles to a loom in England. This shows the superiority of our machinery. According to Mr. Bachelder each spindle in this country consumes annually from 70 to 75 lbs. of cotton. This would give us about 6,000,000 spindles in the United States in 1860, against 3,633,693 in 1850, and 2,112,000 in 1840, or an increase of 76 per cent. in 10 years from 1850 to 1860, a ratio of increase greater than the relative increase of cotton.

Mr. Bachelder estimates that each pound of cotton produces from 2.97 to 3.14 yards of cloth, —that the price of cotton cloth is from 6.35 to 8.10 cents per yard, or about 22 cents per pound, a result substantially agreeing with our estimates based on the facts obtained from the census returns of 1850. He also estimates the product of a spindle

at being $12.75 to $16.60,—showing an aggregate value of $88,020,000 as the value of the cotton manufacture in 1860. But if the value of the manufactured cottons is 22 cents per lb., the aggregate value would be 450,011,962×22=$99,002,621, or in round numbers $100,000,000 as the product of United States cotton manufacture in 1860.

The figures contained in Mr. Bachelder's pamphlet, received since the foregoing paper was written,—fully sustains the general views which we have sought to maintain,—the ability of the people of the United States to assume the bulk of the cotton manufacture of the world, if allowed reasonable protection by our own government. In 1860, England took of us for home consumption 1,140,510,112 lbs. of raw cotton at 10.85 cents. per lb., paying us $123,745,347 for it. She added to it $278,740,671 before it was sold, as shown by the low figures stating its actual or declared value.

To our 450,011,962 lbs. of cotton consumed, we have added, at most, less than 100 per cent. by the labor bestowed on its manufacture. With these facts before them, Congress will, we think, hesitate, before striking again at an interest so vital to our prosperity, as the cotton manufacture of the United States.

Trial of a Steam Engine.

A new steam fire engine was tried yesterday at the Broad street pumps. It is a second class rotary, similar to Nos. 1 and 3, and combines several improvements which add much to its efficiency and economy. It was built by Silsby, Mynderse & Co., Seneca Falls. The engine itself weighs 4,400 lbs., and loaded for service weighs 5,200 lbs. At the trial yesterday, steam was made and the engine working in five minutes from the time the match was applied. Water was thrown horizontally through fifty feet of hose and an inch and eighth nozzle, 218 feet; through an inch and a quarter nozzle the same distance; two streams through seven-eighth nozzles 208 feet. An inch stream was thrown from one hundred and eighty to one hundred and ninety feet perpendicular; an inch and an eighth stream nearly the same distance. The suction was from 16 to 18 feet.

The engineer expressed himself much pleased with its operation in all its parts. The principle of the machine has now been tested here with steamer No. 1 nearly two years and with No. 3 something more than a year. There seems to be no doubt of the capacity and durability of machines of the rotary pattern.—*Provid. Journ., June 18th.*

The Ohio Canals.

The lessees of the Canals have appointed the following officers and agents to take charge of and manage the Public Works:

Geo. W. Manypenny is the General Agent, John J. Joyce, Secretary, and Benjamin F. Smith, of the firm of Bartlitt & Smith, Treasurer.

The Miami Canal and Maumee Roads are divided into four divisions for Superintendence and repairs, and Joseph Cooper, Thos, Brown, Wm. J. Jackson, and A. L. Backus, appointed Superintendents of the respective divisions.

The Ohio, Walhonding, and Hocking Canals are divided into four divisions, and Robert H. Nugent, Thomas Miller, D. McCarty, and Sylvester Medberry, are the Superintendents.

Hon. Edward Ball is the Superintendent of the Muskingum Improvement.

New Brunswick and Canada Railway.

The Aroostook *Times* learns from Mr. Osborn, the manager of the St. Andrews Railway, that there is a good prospect of the road being completed this summer, to the O'Donnell settlement, about 12 miles from Houlton. Fourteen hundred tons of rails have been shipped from England, and it is expected that the contractors will resume operations in about two weeks. A branch line is being surveyed to connect it as well with St. Stephens as St. Andrews.

Result of Forty Years' Workings in the Anthracite Coal Fields of Pennsylvania.

(Prepared by P. W. Sheafer, Eng. of Mines, Pottsville, Pa.)

PROGRESS OF THE COAL TRADE.

Total third coal field	22,069,640

In a former communication published in the October number, 1858, of the *Merchants' Magazine*, I furnished the areas of the anthracite coal fields of Pennsylvania, as follows, in detail:

First Southern, or Schuylkill coal field.	sq. miles.	acres.
1. East of Tamaqua, mostly covered by the lands of the Lehigh Coal and Navigation Company	16	10,240
2. Tamaqua to Pottsville	36	23,040
3. Pottsville west to fork of basin	55	35,200
4. North Fork, Lykens Valley prong.	16	10,240
5. South Fork, Dauphin prong	15	9,200
6. North Mine Hill range	8	5,120
Total area of the first or Southern field	146	93,440
Second, or middle coal field.		
Shamokin district	50	32,000
Mahanoy	41	26,240
Beaver Meadow, Hazleton, Big and Little Black Creek basins	35	22,400
Total	126	80,640
Third, Northern, Wyoming & Lackawanna Coal Field	198	126,720
Total area of the anthracite coal fields	470	300,800

We have now shown the area of the several coal fields and the amount of coal exhausted from each. A more difficult task remains, viz., to show the contents of coal in the areas just described.

A solution of this problem is almost impossible, from the fact that if you multiply the thickness by the above areas it will not furnish the cubic quantity, for the reason that the coal beds do not lie in horizontal strata, but vary in their degrees of inclination from 10 to 80 degrees; therefore, the greater the inclination of the coal beds the greater area is covered by them, often so as to double the surface area, but not in the same proportion can you count an increased quantity of coal. Our experience shows us that the steeply inclined coal beds in the red ash districts are generally so crushed and broken as to be almost valueless. The steep inclinations are generally in the north, on which account north dipping coal beds in the red ash region are not generally desirable. We have a remarkable example in the Sharp mountain which does not show a successful colliery in the distance of 40 miles; its coal beds are nearly vertical.

We illustrated this fact in 1858. Of the 105 collieries then in operation, there were but

15 north dipping beds, producing.. 175,954 tons.
74 south " " " ..1,315,792 "

To keep our estimates of coal quantity on the safe side we will calculate the areas as if horizontal, say 300,800 acres of coal.

The third element is the coal's *thickness.*

This varies in the several coal fields. The nearest approach to the facts is as follows:

The southern coal field embraces the red, white and gray ash coals, averaging about 25 yards of coal.

The middle field about 15 yards of coal.
The northern " " 15 " "

Total Coal Areas and Approximate Quantities.

	Less ½ for working and breaking.
First, southern coal field, 93,440 acres by 25 yards coal's thickness —11,308,824,000 cub. yards or tons	5,653,120,000
Second, middle coal field, 80,640 acres by 15 yards coal's thickness —5,854,964,000 cubic yards or tons	2,927,482,000
Third, northern coal field, 126,720 acres by 15 yards coal's thickness —9,119,872,000 cubic yards or tons	4,599,936,000
300,800 acres. Total, 26,361,076,000 cubic yards or tons, net	13,180,538,000

This product of 83,856,759 tons of coal is from Pennsylvania alone, whose population in 1860 was 2,916,018.

The whole area of anthracite in Pennsylvania is but 470 square miles, and is all contained in the seven counties of Schuylkill, Carbon, Luzerne, Columbia, Northumberland, Dauphin and Lebanon.—*Philadelphia North American.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, June 22, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Money and Business.

There has been some improvement in the stock market during the past week, the quotations closing firmer. Government stocks are in demand at 83*a*83¼, and Border State stocks have also advanced. There has been some speculation in New York Centrals at 74⅝, and other roads. This rise has been looked upon with suspicion in some quarters, inasmuch as it has been produced by no apparent cause found in an improved condition of the country. There has been an increase of the shipment of produce from the West, giving an increased business to the main trunk railways, which shows an improvement over the amount of business during the corresponding week last year. This again is shipped to Europe. Gold, still continues to come to New York, and Bankers' Bills on foreign countries range from 105 to 106.

The merchants are now somewhat engaged in discussing the merits of Mr. Thompson's proposition to the President and Secretary of the Treasury in reference to establishing an office in New York for issuing treasury notes secured by 75 per cent. in Government Stock, and 25 per cent. cash. This it is argued will give the Government seventy-five million dollars immediately, and furnish a medium of circulation.

Properly authorized representatives of the Pennsylvania Railroad Company and of the recently organized Philadelphia and Erie Railroad Company, have united in a mutually satisfactory arrangement for permanently leasing the work of the latter named company, in its present incomplete and unfinished condition, to the Pennsylvania Railroad Company. Three millions of the Philadelphia and Erie bonds are to be endorsed by the Pennsylvania Railroad Company, which, it is estimated, will realize more than sufficient to finish and equip the road. Existing contracts for construction, &c., made by the Erie Railroad Company are to be carried out, but payments are to be made under authority of the Pennsylvania Railroad Company from the three millions of endorsed bonds. The Philadelphia and Erie Railroad Company has, over and above the three millions named, between three and four millions of bonds, the proceeds of which are to be applied to the payment of the company's debts. The rent under the lease is a per centage of receipts.

The Jeffersonville (Indiana) Railroad Company gives notice of its readiness to redeem on the 1st of July, at the office of the United States Trust Company in this City, at the lowest offer below par, a part of its first mortgage bonds for the sinking fund, agreeably with the provisions of a contract made to the holders of said bonds, bearing date April 14, 1859.

The books of the Minnesota Mining Company will be closed from the 22d inst., to July 2, for the payment of $5 per share dividend recently declared.

A letter from Richmond intimates that the July interest on the public debt of Virginia will be paid in that city in Virginia currency. In regard to the interest on the Missouri State debt, much uncertainty still exists; at best, it will be paid at St. Louis, in Missouri currency. Strenuous efforts are being made in that city to accomplish the object if possible. The interest on the debt of St. Louis county will be promptly paid—the whole amount needed, $75,000, having been placed in this city. The interest on that portion of the debt of Missouri issued to the Hannibal and St. Joseph Railroad, will be provided for by that Company.

The Revenue bonds, $400,000, due on the 1st inst., have been paid, and there is a balance of $88,000 from the funds provided for this purpose, which can be applied to the interest payment. The banks also owe $100,000 bank tax, there is $100,000 in the Treasury, and the State has bank stock upon which she can borrow $250,000. It requires but a small amount added to these to meet the interest, and strong efforts will be made to raise this amount.

The Marine underwriters have reversed their determination of last week in regard to the War risk, and are again inserting the War clause in consideration of the extra premium of only 1 per cent.

The Comptroller of this State has advertised for proposals for a loan of $700,000, on account of a deficiency in the sinking fund, to pay a portion of the General Fund Debt, to bear interest at the rate of 7 per cent. per annum, payable quarterly, the principal reimbursable on the 1st of July, 1870. Proposals will be received until noon of the 25th inst., for the whole, or any part not less than $5,000. The payments may be made in the following certificates of State stock issued to the New York and Erie Railroad Company, amounting to $400,000' reimbursable, viz:

1861—Aug. 1, 5½ per cent	$100,000
1861—Sep. 1, 6 per cent	100,000
1861—Oct. 1, 6 per cent.	100,000
1862—Jan. 1, 6 per cent.	100,000

The transfer books of Ohio State stock were closed on the 15th, and will be re-opened July 1

for the payment of interest for fifteen days, after which payment will be made at Columbus, Ohio.

There has generally been some delay in the pay ments of the mortgage coupons of the Cleveland and Pittsburg Railroad Company. This delay has been increased lately in consequence of some action on the part of certain foreign bondholders, who expressed a doubt as to the proper working of the receivership. Upon which, the receiver demanded an investigation, and the Ohio District Court appointed Judge Hitchcock a committee for that purpose.

The judge has just completed his examination, and reports the accounts of the Receiver as perfectly satisfactory. The company, we understand, as soon as the court confirms Judge Hitchcock's report, will begin to pay up all the overdue coupons, and the report itself will be published immediately.

The receipts of the road for May were about $100,000 which is largely ahead of the same month last year. The obstructions on the Baltimore and Ohio Railroad throws a good deal of traffic northward over this road. The unfunded debt and income bonds of the company have been nearly all converted into the new 6 per cent. mortgage bonds. The time for converting expires on the 1st of July.

The State Treasurer of Michigan has advertised for proposals for a war loan of $500,000, the bids for which will be received at the Michigan Insurance Bank, at Detroit, until the 8th of July at noon. The Legislature has authorized $1,000,000 to be raised, but it is expected that not more than the amount now offered will be issued. The bonds will be of the denomination of $100, $500 and $1,000. The rate of interest is 7 per cent. to meet which a tax has been authorized and a sinking fund provided for, for the gradual payment of this loan. The funded debt of the State is only about two and a quarter million dollars.

The Connecticut Legislature has passed the Loan bill which authorizes the issue of bonds to the amount of $2,000,000, bearing interest at the rate of six per cent. per annum, with semi-annual coupons attached, payable on the 1st day of January and July of each year, at the treasurer's office, with the principal payable in twenty years from date, or at an earlier date after the expiration ten years, at the pleasure of the General Assembly.

The treasurer is ordered to sell, from time to time, on the requisition of the Governor, such portion of the bonds as the exigencies of the public service may require, the most favorable proposals always to be accepted, and no bids accepted less than the par value of the bonds.

The State of Indiana has placed the funds in New York for the payment of the 1st July interest on her public debt.

The Providence and Worcester Railroad Company will pay a semi-annual dividend of 4 per cent. July 1.

The Western Railroad has declared a semi-annual dividend of 4 per cent., payable July 1 to holders of stock 18th inst.

General McClellan, of Ohio, was last week elected President of the Ohio and Mississippi Railroad.

The Cleveland, Columbus and Cincinnati Railroad Company has declared a semi-annual dividend of five per cent., payable Aug. 1, at the United States Trust Company in this city.

The following is a comparative statement of the prices of some of the leading articles of subsistence, as they were quoted in Northern and Southern markets during the past week:

Corn, per bushel.

Memphis	70	New York	56
New Orleans	80	Philadelphia	54
Montgomery	$1 10	Cincinnati	28
Charleston	1 20	Chicago	21

Flour—per barrel.

Memphis	$8 50	New York	$4 75
New Orleans	9 50	Philadelphia	5 50
Montgomery	10 00	Cincinnati	4 50
Charleston	7 50	Chicago	3 50

Mess Pork—per barrel.

Memphis	$27 00	New York	$16 50
New Orleans	26 00	Philadelphia	17 50
Montgomery	26 00	Cincinnati	14 75
Charleston	27 50	Chicago	15 50

The Receiver of the La Crosse and Milwaukee Railroad gives notice that he will pay on presentation at his office in Milwaukee, with exchange on New York, the coupons of the first mortgage bonds, Eastern Division, payable 1st May, 1861; also coupons of the bonds issued by the City of Milwaukee in aid of the La Crosse and Milwaukee, Fond du Lac, and Green Bay Railroads, payable 1st September, 1860, and 1st March, 1861. The earnings of this road for May, and for the season, which are given elsewhere, show a large increase over the corresponding periods of the previous year, and are said to be highly satisfactory, notwithstanding the officers complain of the great deficiency in the rolling stock. We learn that efforts are making to re-organize this road after the plan of the old Milwaukee and Mississippi road, which is now known as the Milwaukee and Prairie du Chien Railroad Company. The same parties who re-organized the latter company are now turning their attention to the La Crosse. The plan is substantially that adopted by the other road, and provides for a

7 per ct. mort. over the whole road for	$2,460,000
First-class preferred 7 per cent stock	1,500,000
Second-class preferred 7 per cent stock	1,000,000
Common stock	2,440,000
Making the whole capital and debt	$7,400,000

On this sum it is claimed the net earnings will pay 7 per cent. interest.

The Legislature of Ohio, at their last session, authorized the Commissioners of the Sinking Fund to make loans to the amount of $2,750,000 for the purchase of arms, etc., for the support of the Federal Government. Of this sum about $1,000,000 has been arranged, though not all received. The whole amount will be required. The bonds offered will be payable in seven years, at the State Treasury, with interest at six per cent., payable semi-annually, and are exempt from taxation.

We stated in our last issue that funds had been forwarded to Europe by Virginia for the payment of the July coupons on the State debt. That State has a small debt in sterling bonds, the interest upon which is payable in London, and it is the interest upon this debt, about $58,000, which has been remitted.

The bidding for the Three Million Pennsylvania loan for war purposes, was equal to the amount needed at par. The loan has ten years to run, is exempt from taxation, and the law which authorizes the issuing of the loan, makes provision for raising by taxation the necessary means to pay interest and principal. The list of bids contains the names of seventy-four banks, insurance companies, and railroads. The largest amount taken by one corporation, is $300,000, taken by the Farmers' and Mechanics' Bank, Philadelphia. The Pennsylvania Central Railroad subscribed for the same amount.

☞ We give elsewhere the result of a trial at Providence, R. I., of a new steam fire engine, recently supplied to that city by Messrs. Silsby, Mynderse & Co., of Seneca Falls, N. Y. The agent in this city is Charles W. Copeland, Esq., 122 Broadway.

Railroad Earnings.

The regular monthly meeting of the Directors of the Baltimore and Ohio Railroad, was held on the 12th inst., when exhibits of the condition of the road in its several departments were submitted. It was stated that the revenue of the main stem and branches of the company, as far as reported for May, amounts to $208,394 54 to which is to be added the payments to be made for large government services, etc., the accounts for which are not yet adjusted. These extra services consist in the transportation of troops, munitions of war and other Government property to and from the capital. These accounts, when settled, will, it is believed, more than make up the deficit made in the item of passenger transportation caused by the obstructions to travel on the Washington branch and main stem of the road.

The earnings of the La Crosse and Milwaukee Railroad for May, 1860 and 1861, and for the season, to June 1, were as follows:

	May, 1860.	May, 1861.
Passengers	$22,782 07	$23,495 95
Freight	44,159 88	86,382 24
Miscellaneous	2,582 52	3,593 71
Total	$69,623 49	$113,471 85
Increase		$43,848 36
Earnings for five months, 1861		$332,463 59
" " " 1860		233,978 20
Increase		$98,485 39

The receipts of the Grand Trunk Railway of Canada for the week ending June 8,

were	$65,987 63
Week ending June 7, 1860	63,378 16
Increase	$2,609 47
Total traffic from July 1st, 1860	$3,201,562 94
Corresponding period previous year	2,688,398 21
Increase	$513,164 73

The earnings of the Erie Railroad for May, as compared with the corresponding period last year, were as follows:

May, 1861	$507,480 37
" 1860	419,991 57
Decrease	$87,488 80

Hudson River Railroad.

The following gentlemen have been elected directors of this company for the ensuing year Samuel Sloan, James Boorman, John David Wolfe, Edward Jones, William Kelly, D. Thomas Vail, Erastus Corning, Wm. H. Hays, Robert P. Getty, Henry A. Smythe, J. B. Johnston, E. H. Miller, Moses H. Grinnell. Subsequently Samuel Sloan was re-elected President, and D. Thomas Vail, Vice-President.

Sale of the Kaighn's Point Ferry.

The property of this ferry was sold at public sale, a few days since, for $30,000. The property included the ferry boat Stephen Girard, and eighty feet front on the river, extending north and south of the ferry dock, and reaching east as far as the wants of the ferry require. Of course, this sum is far below its value, and only goes to show with what reluctance capitalists invest their money. In a few years the purchaser will double his money. —*Phil. E. Journal.*

Journal of Banking Law.

BANKING. A CERTIFIED CHECK EQUIVALENT TO A DEPOSIT,—THE STATUTE OF LIMITATIONS DOES NOT BEGIN TO RUN UNTIL DEMAND IS MADE FOR ITS PAYMENT.

The Supreme Court of Pennsylvania in the case of the Girard Bank *vs.* the Bank of Penn Township, have just decided that where a party receives a check and proceeds to the bank and gets the bank to certify that it is "good," the bank then holds an amount of money, equivalent to the amount of the check, on deposit in favor of the holder of the check.

The case also decides that where a check is so marked "good" and the holder does not demand payment for more than six years, still the statute of limitations will not bar an action brought by the holder of the check against the bank, nor will the statute begin to run until payment is demanded of the bank.

The check in question was drawn on the 7th of October, 1852. When it was certified, did not appear, but it was probably certified when it was drawn. It was not presented for payment until September 3, 1859. Nearly seven years, therefore, elapsed from the time it was certified to the time a demand was made for its payment.

The case was tried in the District Court of Philadelphia and a judgment was rendered for the defendant. The defendant then appealed, and the judgment below was reversed. The following is the opinion of the Court.

STRONG, J.—Were this a suit against the Bank of Penn Township by the original depositor, the statute of limitations would be interposed in vain, not so much because a bank is a technical trustee for its depositors, as for the reason that the liability assumed by receiving a deposit is to pay when actual demand shall be made. The engagement of a bank with its depositor is not to pay absolutely and immediately, but when payment shall be required at the banking house. It becomes a mere custodian, and is not in default or liable to respond in damages until demand has been made and payment refused, such are the terms of the contract implied in the transaction of receiving money on deposit; terms necessary alike to the depositor and the banker. And it is only because such is the contract, that the bank is not under the obligation of a common debtor to go after its customer and return the deposit wherever he may be found. Hence it follows, that no right of action exists, and the statute of limitation does not begin to run until the demand stipulated for in the contract has been duly made.

Nor is it easy to see why the holder of a check marked "good," stands in any different position from that of the original depositor. Presenting a check and having it thus certified, is clearly not a demand for the money deposited. Its purpose is not to demand payment, but to obtain evidence that the sum mentioned in the check remains on deposit to answer the check when presented. It contemplates that the bank is still to retain the custody of the money. How retain it? As a depository, or as value paid for the acceptance of a bill of exchange? Certainly not as the latter, for then no demand at the banking house would be necessary before suit, and the presentment of a bill payable on demand, merely for acceptance, is an absurdity. When a check payable to bearer, or order, is presented with a view to its being marked "good," and is so certified, the sum mentioned in it must necessarily cease to stand to the credit of the depositor. It thenceforth passes to the credit of the holder of the check, and is specifically appropriated to pay it when presented, and as the purpose of having it so certified is not to obtain payment, but to continue with the bank the custody of the money, the holder can have no greater rights than those of any other depositor. Certainly he has no right of action until payment has been actually demanded and refused. That he stands on the footing of an ordinary depositor is the doctrine of Willetts *vs.* the Phœnix Bank. In that case it was said by Chief Justice Oakely, "it is the duty of the officer certifying a check, to cause it to be immediately charged as paid in the account of the drawer, and when this is done the sum thus charged will remain as a deposit in the bank to the credit of the check, and be forever withdrawn from the control of the maker, except as a holder of the check. Such a deposit stands exactly upon the same ground as any other. The bank, instead of being prejudiced, is benefitted by the delay of the owner in calling for its payment, and can with no more propriety impute laches to the unknown holder of the check than to a known holder of an ordinary deposit." Marking a check "good," was held to be an unconditional engagement to hold a sufficient amount of the funds of the drawer to meet the check whenever it should be presented for payment. The Farmers' and Mechanics' Bank *vs.* the Butchers' and Drovers' Bank, is to the same effect. The doctrine is sound. Checks on a bank marked "good," are to be regarded as evidences of deposit to the credit of the holder, and laches in making a demand for payment is no more imputable to him than to any other depositor.

These principles were conceded by the learned judge of the District Court, but he was of opinion that inasmuch as there was no evidence, in this case, of any demand made by the holder of the check within six years from the date of the contract, the plaintiffs could not recover.

Nearly seven years, elapsed from the date of the deposit before demand was made for its return, and the question now is whether such delay in making the demand bars the plaintiff from a recovery. If it does, then this artificial rule which is said to have been adopted in analogy to the statute of limitations, is far more severe upon depositors than is the statute itself. The statute begins to run, not from the date of the deposit, but from the time when the depositor makes demand for payment, and is met by a refusal. This rule completes the bar in six years from the date of the deposit, and as it was applied in the present case, it amounts to a presumption incapable of being rebutted. On the 10th of October, 1854, within six years from the commencement of this suit, the defendants paid the money to Adam Dietrich, the original depositor, taking his bond of indemnity against the certified check which he claimed to have lost, though in truth he had endorsed it away. This paying a duplicate check, and taking a bond of indemnity, was a distinct acknowledgement that the money then remained in bank, on deposit to the credit of the holder of the check which had been certified. It was certainly sufficient to rebut any presumption less than a conclusive one, that it had been paid. Now, as no statute requires that, in cases where a creditor must make a demand before he can sue, the demand shall be made within six years from the date of the contract, or action be debarred; any rule exacting demand within that time can have no other basis upon which to rest than a presumption that the debt has been paid, or the deposit withdrawn. What becomes of such a presumption in the face of a clear acknowledgement of the debtor that the debt remains unpaid, or that the deposit is a continuing one?

We cannot agree that there is any such rule applicable to an ordinary case of debtor and creditor, banker or depositor, or bailor and bailee. It would be mischievous in its operation upon contracts generally, and mischievous in the extreme when applied to contracts of bailment. And we think it would be a surprise, were we to hold that banks or other corporations can defend themselves against claims for deposits or undrawn dividends, on the ground that no actual demand has been made for them within six years.

In Thorpe and Wife *vs.* Booth, it appeared that suit had been brought upon a promissory note dated March 12th, 1813, whereby the defendant promised to pay seven hundred pounds "twenty-four months after demand." The note was not presented for payment until June 28, 1823; more than ten years after it was given. The defendant pleaded the general issue and the statute of limitations. But the plaintiff was held entitled to recover on the ground that the cause of action did not arise until twenty-four months after the demand was actually made. That it was not made within six years from the date of the note was treated as of no consequence. This was a case between a simple debtor and creditor. There is even less reason for requiring a depositor to make speedy demand, for it would defeat the very purposes of the deposit.

* * * * * * * * *

Upon the whole, we find nothing in the adjudicated cases which requires us to hold that a depositor is barred of his action against his banker by delaying to call for his deposit more than six years from the time when he placed the money in bank. And we think such a doctrine would be alike impolitic and unjust.

Judgment reversed, and judgment on the verdict for the plaintiffs.

U. S. Coast Survey.

The officers of the United States Coast Survey have received orders from headquarters to prepare to commence operations up the lakes. It is not reliably ascertained at what time they will go, but probably in a few days. The field of operations will probably be on Lake Superior. The following officers, so far as our informant was advised, will take charge of the survey: Captain Meade, Topographical Engineer and Superintendent of the Lake Survey, commanding the United States steamer Search; Lieutenant J. L. K. Smith, Topo-

graphical Engineer and Assistant on Lake Survey, commanding the United States schooner Coquette; Assistant J. A. Potter, commanding the United States steamer Surveyor. The astronomical party will be in charge of Assistant James Carr. The topographical parties will be in charge, respectively, of Assistants W. H. Harding, D. F. Henry and Henry C. Penny.—*Detroit Free Press.*

Steamship-Building on the Clyde.

Of all the vessels constructed in the Clyde for different parts of the world, we do not know that any are intended for a more important purpose than the steam trains of shallow barges for the navigation of the Indian rivers which have there been built and tested. We have already informed our readers that two of these trains, built by Messrs. Reid and Co., of Port Glasgow, are of such large dimensions and of such great power that they will be able to ascend any of the great rivers of India, each carrying a cargo of three thousand tons under hatches, on 2½ feet draught of water; and by thia great carrying power they will be able to convey cotton, flax, wool, sugar, and other important products, from the interior to the coast, at a low rate, with large profits to themselves, while they will return up the rivers laden with British manufactures. Some portions of these vessels have been already sent to Calcutta, and are being put together; and the powerful steamer Jumna, which, after having been tested on the Clyde by the eminent engineers, Messrs. Penn and Napier, and found completely to fulfill her intended objects, has since been taken asunder, has been laden into a clipper-ship, now on the point of sailing for Calcutta, where she may be expected to arrive in about 90 days from the present time. We may, therefore, hope to have the Jumna and her sister ship, the Ganges, running upon the Ganges in the present year—not to speak of the two smaller steamers which the same company has sent out to Calcutta. and two others to Kurrachee.—*Herapath.*

Suspension Bridges.

Without going back to the rope bridges of the Chinese and the Indians, the erection of a suspension bridge across the Tees in 1741, is a sufficiently early instance of the introduction of structures. In this case the span was but sixty feet, and the footway, suspended at a height of sixty feet above the stream below, was but two feet wide. It was not, however, until Telford reported upon the practicability of a bridge at Runcorn Gap that the suspension principle attracted any considerable attention. The widest span of bridging then standing in Britain was that of 236 feet, over the Wear at Sunderland, although Mr. Rennie had just completed his design for Southwark bridge with its centre span of 240 feet, and he had also planned an iron bridge, with three arches of 350 feet span each, for the Menai Straits. Telford's design, therefore, for a bridge over the Mersey, with a single span of 1,000 feet, and two side spans of 500 each, greatly surpassed not only the boldest works previously erected, but even his own gigantic conception of a cast iron arch of 600 feet clear span on the site of old London bridge. When, however, we distinguish such a design as one of great boldness, it is not to be understood that the designer had ventured nearer the limits of safe resistance of iron than the most orthodox engineer would now do. No part was to be loaded beyond 10,000 pounds tension per square inch of section. Confining himself to this limit, Telford naturally preferred a system which admitted of spans of even 1,500 feet to the arch which, although theoretically capable of extension to spans, in cast iron, of several thousand feet, is limited, practically, by the difficulty of lateral stiffening, and by that of providing sufficiently solid abutments, to spans but of a few hundred feet. The girder had not been employed, in Telford's time, to any considerable extent; but when we consider that in one of its best forms, that of a wrought iron tube with cellular top and bottom, a girder proportioned like those of the Britannia bridge would only bear its own weight over a span of 1,570 feet, and that the Britannia tubes, if extended in length simply, without being correspondingly deepened and thickened, would break down at a span of 850 feet, it is hardly probable that Telford would have preferred such girders to a system which is capable of spans of at least 4,000 feet, and, if the chains have no load beyond their own weight, to 7,500 or 8,000 feet before breaking down. Mr. Edwin Clarke, whose work on the Britannia and Conway bridges may be considered as an authoritive declaration of the views of the late Robert Stephenson, and who has calculated the span, above mentioned, at which a tubular girder would break by its own weight, states that the 1,570 feet span would require a tube 100 feet high, 48 feet wide, and weighing no less than 62,000 tons! An iron bar, welded together, or an iron wire, whatever its size or weight, provided its strength is at the rate of only 50,000 pounds per square inch of actual cross section, would not break down until stretched over a span of at least 7,500 feet, provided the deflection of the bar or wire were 1-15 of the span. Inasmuch, however, as good iron wire, which has been and is likely to be still further employed in suspension bridges, has an average strength of 100,000 pounds per square inch, the ultimate limit of wire spans may be considered as fully 15,000 feet, or nearly three miles, and even with an attached roadway, as at least a mile and a half. The strain upon a wire or chain cable, suspended at the ends and drooping with different deflection, has been ascertained experimentally, and is besides easily calculable. There are but few suspension bridges in which the strain on the cable, at the towers, is as much as twice the actual weight of the cables and their suspended load. In Hammersmith bridge, the proportionate deflection of the chains of which is a fair standard for suspension bridges generally, the strain on the cables, at the towers, is 1,857, or less than 1 7-8 times the weight of the cables (between the towers) and their suspended load. In the Niagara railway bridge the whole suspended weight, when the bridge is unloaded, is 1,000 tons, the strain produced by which is 1,810 tons. This is the strain on the cable at the tops of the Towers, although it is, of course, to be borne in mind that the supporting power of the cable is twice as great, with its two points of suspension, as it would be were it suspended from one point only and at the same curve. In other words, each half of the cable supports, separately, one half only of the whole weight, and the actual strain of 1,810 tons at each tower is produced by a weight of but 200 tons. The strain produced by the "half spans" or end spans outside the towers, of Hungerford and Chelsea bridges, are equal to that arising from the whole main span. The greatest strain on a suspension cable is always at the summit of the towers, and here the strain is due to one-half of the suspended weight, between the towers, acting in a direction which is tangential to the curve of the cable where it meets the tower. The catenary so nearly resembles the parabolic curve that this direction may be almost exactly determined in the following manner: At the middle of the span drop a verticle line from the lowest part of the catenary curve. On this line lay off, below the centre of the cabler or chain, at its lowest point, a distance equal to the deflection of the cable, so that the vertical distance of the point thus found, below the points of suspension of the cable, will be equal to twice its deflection. From this point draw diagnonals, on each side, to the tops of the towers, or to the points of suspension of the cable. These diagonals will coincide with the line of strain at the summits of the towers, and by as much as each of these diagonals exceeds twice the deflection of the cable, will the greatest strain on the latter exceed one-half of the whole uniformly distributed weight suspended between the tower. In the Niagara bridge the span, between the centres of the towers, is 822 feet, twice the mean deflection of the two cables on each side (one being deflected 54 feet and the other 64 feet) is 118, and the diagonsal of a right angled triangle, with sides of respectively 411 feet and 118 feet, is 426.6 feet. Then as the 118 is to 426.6, so is 500 tons (the weight suspended by each half of the four cables collectively) to 1,817 tons, the total strain produced on the cables. This result so nearly approaches the actual strain that the rule in question is preferable to the longer formula generally employed.

The capacity of iron cables, when suspended between fixed supports, being once determined, and the results comprehended practically by engineers, as they were more than forty years ago, it was natural that the suspension principle should have been extensively applied. The Galashiel bridge, of 112 feet span, and the Peebles bridge, of 110 feet span, were constructed in the year 1816; the Dryburgh bridge, of 260 feet span, was completed in the following year, and that over the Tweed at Kelso, 437 feet between the points of support of the chains, was finished in 1820. The Union suspension bridge, over the Tweed near Berwick was completed also in 1820, its span between centres of towers being 449 feet. The Newhaven suspension pier, with three spans of 209 feet each, was finished in the following year, and in 1823 was completed the Brighton chain pier, with four spans of 255 feet. In this year also, M. Seguin, of Lyons, introduced wire as a material for the cables of suspension bridges. Hammersmith bridge with a clear span, between the centres of supports, of 422 feet three inch, was opened in 1824. Telford's principal work, the Menai bridge which occupied upwards of six years in construction, was completed in 1825. The distance between the centres of the towers is 570 feet 10¼ inch, the span of the catenary being 570 feet. The Conway suspension bridge measures 372 feet between the points of suspension. The Montrose bridge, over the Esk, was completed in 1859, and the distance between centres of towers is 423 feet. Marlow, Norfolk, Micklewood, Broughton, and Twerton suspension bridges, with spans of from 103 feet to 584 feet, were also erected at about the same time. A number of suspension bridges has also been erected, prior to 1830, in France. In 1834, the Fribourg bridge, erected by M. Chaley, was completed. This bridge has a span, between the faces of the towers, of 870 feet 4 inches, its cables being formed of 4,224 wires, each 0-12 inch in diameter. The Charing Cross or Hungerford bridge was completed in 1845, the span of its catenary being 676½ feet, and, although occupied only as a foot way, its chains have a total cross sectional area near towers of no less than 312 inch. This strength is to be increased one-half on applying the chains (which are soon to be removed from Hungerford) to the 703 feet span at Clifton. We may notice here the bridge over the Dordogne at Cubsac, which consists of five spans of 400 feet each at an elevation of 125 feet above the water. Next may be mentioned the suspension bridge erected by Tiernay Clark over the Danube, at Pesth. This bridge has a central span of 666 feet besides two side spans. It was ten years in construction, being completed in 1849 at a cost of £622,042. A bridge of half the span, or 334 feet had been erected twenty years before over the Danube, at Vienna. Mr. Charles Vignoles' great bridge over Dnieper, at Kieff, was completed in 1853, at a cost of £432,000. It has four spans of 440 feet, from centre to centre of towers, and two half spans of 225 feet. The suspenion bridge at Glasgow is also a recent work, and Mr. Page's Chelsea bridge is still more so. The late Mr. Rendel constructed a handsome suspension bridge also at Inverness.

In America, the greatest suspension spans yet attempted have been executed, and others still larger are in progress or projected. Wire cables have been employed in all cases, in preference to chains. The widest span is that of 1,043 feet constructed by Mr. Serrell, over the Niagara river at Lewiston. The next is that of 1,010 feet erected by Mr. Ellet over the Ohio river at Wheeling. The latter engineer erected one also of nearly 800 feet span over the Niagara river, near the falls. This bridge, completed in 1848, was subseqnently removed to make room for the present railway and highway bridge, of 822 feet span, erected by Mr. Rœbling. The wire of the first bridge was found to be perfect after six years' use, and was accord-

ingly employed in the cables of the present structure. Mr. Rœbling has another railway bridge of 1,224 feet span, in progress, and he has projected one of 1,800 feet span to connect New York and and Brooklyn, and another of 2,600 feet, or nearly half a mile, in a single span, across the Mississippi river at St. Louis. Mr. R. M. Ordish, of Great George Street, has made a design for a bridge of half a mile span, across the Thames, below the Tower, and Mr. Peter Barlow has proposed one with a single span of 3,000 feet across the Mersey at Liverpool.

It is perfectly true that several suspension bridges have been greatly injured or entirely destroyed by storms, whilst others have fallen in consequence of undulations caused by the motion of carriages or the marching of troops over them. The Brighton pier and the Menai bridge were greatly injured by storms, and the little bridge at Broughton, near Manchester, fell in consequence of the motion imparted to it by the marching of a body of troops, all of whom were percipitated into the water below, not one, however, being drowned. The Wheeling bridge, over the Ohio river, in America. was wrecked in a gale, and a suspension bridge at Newport, Kentucky, U. S., broke down under a passing load. In France, too, where a number of suspension bridges have failed, one recently broke down over the Garonne. In every case, however, of failure, the platform had no stiffening, and there was nothing to prevent the undulation of the chains or wire cables. In one storm a wave, estimated at 16 feet high, traversed the flooring of the Menai bridge, the chains and platform rising by that amount. The chains were not broken, however, a proof, in itself of their ample strength. Had the platform been stiffened by a light girder, it is improbable that any extensive undulation could have occurred. Suspension platforms so stiffened are known to withstand the severest storms without injnry, as also the galloping of mounted troops. Before the public opening of the Pesth bridge, the Hungarian troops crossed it in confusion, pursued by the Imperialists, and for forty-eight hours the platform was covered with a flying mass of horses and men. The Russian cavalry cross the Kieff bridge at a gallop. There is no check upon the speed of carriages crossing Chelsea bridge, except the interventioh of the toll taker before crossing at all. The Niagara railway bridge, after six years' use, has been pronounced to be in a perfect condition. The floor of this bridge, it must be admitted, is stiffened (in addition to the pair of continuous girders, 19 feet six inch deep) by fifty-six wire stays anchored to the rocks below. In applying girders to suspension bridge platforms, the weight is, of course, increased, and the limit of span theoretically reduced. Practically, however, there is reason to believe that a trussed platform admits of much longer spans than where no stiffening is employed. Although the deflection of a trussed girder might, by itself, be excessive over a clear span of 1,000 feet it is evident that this deflection must be considerably reduced by suspending the girder from a chain. Mr. Peter M. Barlow states, as the result of actual experiment, that, under all circumstances, the combination of the chain and girder reduces the deflection of the latter to about one twenty-fifth the amount when standing alone. Professor Rankine states as the result of mathematical investigation, (by suspension from a chain) the deflection of the girder is reduced to one twenty-seventh its amonnt when standing by itself. The practical results obtained in the working of the traffic over the Niagara bridge, the trussing of which is of timber, appear to bear out these deductions. Telford was of the opinion, moreover, that suspension bridges could be made available for any and all traffic, an opinion which was ascertained also by the late Mr. Rendel. The same opinion is held, also, we believe, by Sir W. Cubitt, Mr. Vignoles, and Mr. Page, and, most certainly, by Mr. Barlow. George Stephenson, and the late Mr. Brunel, professed much the same faith; and the time is likely to come when it will be matter for wonder that any engineer ever held otherwise. —*London Engineer.*

Coinage in Great Britain.

Nine years have elapsed since the discovery of gold in Australia, and a comparison may now be drawn between the amount of that most precious metal which has been coined at the Royal Mint between the equal periods comprised between 1843 and 1851 and 1852 and 1860 inclusive:

Year.	Gold coinage.	Year.	Gold coinage.
1843.....	£6,607,849	1852.....	£8,742,270
1844.....	3,563,949	1853.....	11,952,391
1845.....	4,244,608	1854.....	4,152,183
1846.....	4,334,911	1855.....	9,008,663
1847.....	5,158,440	1856.....	6,002,114
1848.....	2,451,999	1857.....	4,859,860
1849.....	2,177,955	1858.....	1,231,023
1850.....	1,491,836	1859.....	2,649,509
1851.....	4,400,411	1860.....	3,121,708

These figures exhibit a total coinage of £86,153,680,—viz., £34,431,958 in the first nine years, and £51,719,722 in the second. The yearly average between 1843 and 1851 was £3,825,773, and between 1852 and 1860, £5,746,635, showing an increase of as nearly as possible 50 per cent. The fact must also be taken into consideration that a very large number of sovereigns have been coined at the mint established in Sydney. The value of the silver coined has undergone considerable fluctuations, having reached its maximum in 1853, when it was £701,544, while in 1848 it was only £35,442. The copper coin struck fluctuated between £448 in 1850, and £61,538 in 1854. The total value of the silver coinage in the 18 years was £5,982,461, and of the copper coinage £241,449, the aggregate metallic issues of all descriptions having been £92,377,590.—*London Times.*

Journal of Railroad Law.

IOWA COUNTY SUBSCRIPTIONS TO RAILROADS: PREVIOUS DECISIONS OVERRULED, AND THE POWER OF COUNTIES TO ISSUE BONDS IN PAYMENT FOR RAILROAD STOCK DENIED.

It has now been decided by the Supreme Court of Iowa that the counties in that State have no power to issue bonds in payment of subscriptions to railroad stock.

On the 24th of December, 1858, the electors of the county of Scott, by a majority vote, authorized the county judge to subscribe $275,000 to the capital stock of the Davenport and Cedar Valley Railroad Company, and $100,000 to that of the Le Claire and Davenport Railroad Company. By this vote he was also authorized to levy a tax to pay the principal and interest of the bonds, not to exceed one per cent. in each case in any one year. On the 27th of the same month these petitioners filed their petition for an injunction to restrain the county judge from subscribing the stock and issuing the bonds. The injunction was granted, but subsequently, on respondent's motion, was dissolved and the bill dismissed. The complainants then appealed; contending that in the previous cases decided in this State the question of the power of the county to subscribe for stock and to issue bonds therefore, was incumbered with the additional fact that the bonds then issued were hold by innocent third parties who had parted with value for them, and the county had received the benefit. Therefore, those cases were not authority to decide the facts as set forth in this case; for here the bonds were not yet issued, this being a motion to restrain the county judge from subscribing for the stock and issuing the bonds.

It was contended in behalf of the county that the constitution did not expressly or by implication forbid the exercise of this power; and there being no constitutional prohibition, the Legislature had conferred the power upon the county by section 114 of the code of 1851. The following is, in substance, the opinion of the Chief Justice reversing the judgment below, deciding that the county had no such power, and restraining the County Judge by a perpetual injunction from proceeding to issue the bonds.

WRIGHT, C. J.—In the case before us, the question is made for the first time, to the present members of the court, *before* the bonds have been issued, and before the rights of third parties have intervened. In my opinion the county has no power, inherently or otherwise to issue bonds and subscribe stock for any such purpose; and putting it upon this plain, broad ground. I deny that such bonds are valid, whether held by the railroad company or by an indorsee.

I deny that under the Constitution (old or new) the Legislature can confer this power upon the counties. I deny in the second place that a majority have any inherent right to vote such a tax, so as to subject the property of the minority to seizure and sale for the purpose of paying the same. And in the third place, I affirm, that the Legislature never has conferred this power upon the counties.

Taxation is an element of sovereignty. Safety to the dearest rights of the citizen demands that this should be so, and that it should not be exercised, except where it is necessary for the welfare or safety of the public. All ordinary taxation, whether national, State, or County, is based upon this ground. The citizen pays these taxes in return for the protection and security which is guarantied and secured to him by law, and the political and municipal organizations created for the like purpose. To support these governments, and those institutions which are essential to their well being and vital to their continuance, he is subject to taxation. For a purpose such as that embraced in the proposition submitted in this instance he is not bound. However much such enterprises may tend to develop the material resources of the country, they can in no proper sense be said to render more secure his person, his life, or his liberty, nor to place his property under more perfect protection. It is true that intelligence and knowledge may be more generally diffused, as a consequence of the increase of railroad facilities. And the same is true where mills, manufactories and machinery are introduced, and yet it would scarcely be claimed that a county has the inherent right in its corporate capacity to tax the people for any such purpose. The argument that a majority must rule under our form of government, and that each citizen as a member of society, must submit to this rule as applied to such questions, is no less dangerous than fallacious. Carried out, popular will when thus exercised, could legalize the execution of the citizen: could take A's property and give it to B. These propositions would be regarded as monstrous. And yet how is it different when the majority attempt to tax the minority witbout the authority of legislative sanction, for a purpose entirely foreign to the support of the Government. I see no difference in principle, and there is none certainly when viewed in reference to these fundamental rights which are secured to us by the natural law, and which no legislation can take from us.

Then again the counties exercise granted powers, and as municipal organizations cannot

exercise any other. If not expressly granted, yet if necessary to carry out, or accomplish the purpose and object of their creation, they may be exercised, but not otherwise. If the power claimed in this instance has not been granted, or is not necessary to the fulfillment of the purposes designed in the creation of the corporation, the conclusion follows that its exercise would be illegal and nugatory. * * * * * *

The language which it is claimed gives this power is as follows: "The county judge may submit to the people of his county, at any regular election, or at a special one called for that purpose, the question whether money may be borrowed, to aid in the erection of public buildings; whether the county will construct or aid to construct *any road* bridge which may call for an extraordinary expenditure; whether stock shall be permitted to run at large, or at what time it shall be prohibited, and the question of any other local or police regulation, not inconsistent with the laws of this State," The question is what "roads" are meant? Does the section embrace railroads, or only the ordinary highways or roads of the country?

After noticing and answering the argument in favor of the proposition that the word "road" includes and means "railroad," the learned Judge proceeds as follows:

The code, itself, has given a definition of the word road which, in my opinion, places the question beyond controversy. By section 26, we have a rule for the construction of the statutes of this State; and by the fifth clause it provides that "*the words 'highway' and 'road,' include public bridges, and may be held equivalent to the words 'county way,' 'county road,' 'common road', and 'State road.'*" In the light of this language, what becomes of the argument that the word *'road'* means *'railroad.'*

Then again, the same case states that the words of the statute are to have their natural and ordinary sense or meaning. Granted, and what is proved? Just this, that the word 'road' according to Webster, applies generally to highways, and as a generic term includes *highway, street and lane*, Not only so, but at the time of the passage of the code we had not a mile of railroad in the State; even now in this State when we have several lines of railway constructed, no person understands the ordinary meaning of the word to include a railroad. What charter incorporating a company for the purpose of constructing a railway ever spoke of it as a *road company*. What act of the Legislature giving lands, conferring privileges, or imposing duties upon such a company can be found, which designates it as a *road company?* I answer: None. The truth is, every person, everywhere and under all circumstances, when designing to speak with any degree of accuracy, in this State at least, if they refer to such a *road*, they use the *rail*. In those States where the most usual mode of travel is by railway, in ordinary conversation they may be spoken of as roads. But not so even in such States, when anything like legal accuracy, or the legal sense is aimed at.

But in this State it is not true that the word *road* is understood railroad, either in ordinary conversation, or when used in the statute, for whatever purpose framed, and particularly was this the case at the time of the adoption of the code.

His Honor then refers to the history of the legislation which resulted in the passage of the act and concludes as follows:

"In view of this history, I ask, can anything be clearer than that the Legislature never intended to confer the power claimed by the appellee in this case? It seems to me not; and that whether we look to the language of the law; the construction given to the words used by the code itself; to the natural and received sense of the language employed; to the history of its passage, the subsequent attempt to confer the power; or to all of them combined; the argument is abundant, convincing, overwhelming against the position that the power claimed has been conferred.

Such being my construction of the law which it is insisted confers this power, it becomes unnecessary to examine the question of the power of the Legislature to authorize taxation by the counties for such purpose.

In my opinion, the cause should be reversed, and the injunction made perpetual. And this being the opinion of a majority of the court, it is so ordered.

NIAGARA STEAM FORGE,
COR. PERRY ST. AND OHIO BASIN SLIP.
T. D. PATCHIN, Lessee,
CHAS. D. DELANEY, Sup't. } Buffalo, N.Y.
MANUFACTURE to order all kinds of Light and Heavy Forgings and Hammered Shapes, such as
Car Axles, Crank Axles,
TRUCK AND DRIVING AXLES,
Steamboat and Propeller Shafts and Cranks,
MILL SHAFTS, LOCOMOTIVE FRAMES, CONNECTING RODS, PISTON RODS, CRANK PINS,
Wrought Shafting of any Length and Size, etc., etc.
Also, Every Description of HEAVY BLACKSMITHING.
Orders or inquiry by mail, will receive prompt attention.
Address T. D. PATCHIN, BUFFALO, N. Y.

RAILROAD IRON.
THE RENSSELAER IRON COMPANY,
TROY, N. Y.,
OFFER Rails of their own manufacture deliverable as may be desired by purchasers.
OLD RAILS
received in exchange for new, or for re-manufacturing.

CINCINNATI, OHIO.

SIMEON DRAPER, Auctioneer.

By SIMEON DRAPER,
OFFICE, No. 36 PINE ST., NEW YORK.
REGULAR AUCTION SALES
AT 36 PINE ST., EVERY DAY.
STOCKS and BONDS bought and sold at private sale
Sale every day at 1 o'clock. See Catalogue.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for Buildings, Vessels, RAILROAD CARS, etc., by which spontaneous ventilation can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.
Address HENRY RUTTAN,
Coburg, Canada.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.
WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

CAR DUCK.

HEAVY 4-PLY FITCHBURG DUCK OF ALL WIDTHS, u to 146 inches, PLUSHES, BURLAPS, CAR HEAD LININGS, and all kinds of RAILROAD SUPPLIES.
For sale by
WILLIAMS & PAGE,
67 Water st., Boston

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

ANALYTICAL AND

Manufacturing Chemistry,

No. 24 WILLIAM STREET,

Rooms Nos. 28 & 29. NEW YORK.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. The best modes furnished for manufacturing, purifying and deodorizing oils from coals, petroleum, and other bituminous substances. Coal Oils tested and purified. Superintendents and skilled workmen furnished to manage Coal Oil Works and Mines. The Kerosene patents from which originated the Coal Oil Business of the United States were granted to Dr. GESNER.

Ballooning for War Purposes.

Sublimity, dash, and love of eclat and adventure are almost necessarily so closely connected with the aeronaut profession as to render it impossible perhaps ever to absolutely eliminate the influence of these qualities from the use of balloons under any circumstances and for any purpose. We must not expect the absence of these, but only the addition thereto of the other sterling qualities pertaining to manhood and patriotism. There are in our country hearts and hands able and willing to turn to all the profitable uses of which it is capable, every resource which agility, science, power or wealth can command, and if ballooning may be made of service to our armies, there are thousands of intelligent amateurs, and no doubt scores of experienced and hitherto successful constructors and managers of aerial vehicles who are ready to sacrifice their personal comfort, to risk their lives, and *even* to suppress the desire for immediate or at least for antecedent fame in such attempts.

Balloons were first used for reconnoisance in 1794 in France, at the battle of Freurif, and they were used with more or less success, for the same purpose before the great battle of Solferino, and other battles in the Italian Campaign. The character of our people and the rapid march of improvements in any art in this country, when attention is fairly invited to it, give promise that they may, without any great stretch of probabilities be rendered far more useful during the present struggle.

Photography has made rapid strides and is still progressing. The entire process of producing pictures as generally practiced requires much elaboration, but the negatives may be produced by a very brief exposure in the camera, and it is possible, we may even say reasonably practicable, for a balloon to sail over a tract of country, taking at short intervals by the aid of a large camera, a complete bird's-eye view of the whole country. Camp tents are very conspicuous objects, and troops on a march or in review, with small arms, as generally brightened (let us hope for sufficient reasons) are almost equally so. A glance at one such view would often convey a volume, and a comparison of a large number might solve many additional questions. In many instances an imperfect knowledge of the topography of a district might be partially atoned for by a profusion of such views, with the explanations of a trusty rustic. In others the existence and condition of earthworks, and the presence or absence of water in the ditches, or of guns behind the parapet, might be ascertained by a mere observation, without the additional aid referred to.

But there are serious difficulties in the way of such operations. The first and greatest with a freely floating balloon is obviously the chance of carrying the information to the wrong market. Munchausen's veracious narrative records the uprooting of trees by a whirlwind and their final falling by a change of wind and taking root in the same spots. Can this performance be realized in practice with the art of aeronautics? If not regularly can it be sufficiently often to render it worthy the attempt? Are there upper currents and under currents, or sea breezes and land breezes, so nearly regular as to be relied on at any time of the day or of the year? We are wealthy, but can we afford to hang three balloons upon the pines of Carolina to be seized perhaps in tolerable order by the chivalry, for every one which is expressed back by country wagon or special train to loyal head quarters?

These are questions which remain to be answered in connection with the flight of free balloons, and it is only by such that great heights can be reached or near views obtained of an enemy's positions. The uses of similar gas bags attached to the ground by ropes may be equally great, but they must necessarily be different.

It has been proposed a great many times to anchor a balloon by such means at elevations of 500 or 600 feet and maintain it permanently there, providing for ascent and descent by any suitable apparatus. The weight of the ropes, etc., fixes a very low range for the height of such aspirations and the continual and rapid escape of gas even through the best prepared material limits the time. Few are aware of the fact that the gas used in balloons is not "held" by the oiled silk or other fabric but only checked. The little pink globes sold about the streets, thickly varnished, offend the nostril by the invisible and almost incomprehensible escape of their contents, and the toy purchased at sun-set must be enjoyed that evening if at all. A balloon may be held by a rope of sufficient strength to retain it in a calm, and may fly for a few hours by continual unloading. This is all. The altitude of 1,200 feet was attained by Dr. Black, of Boston, in taking his recent photograph of that city. The height of 3,500 feet, to which Mr. Goddard rose at the battle of Solferino, is the highest we have heard of as attained under such circumstances, and the flight of 36 hours performed by Prof. Wise and his three associates in their very successful journey from St. Louis to Northern New York, in 1859, was among the longest on record under any circumstances, and such can only be made by taking, as is always done by successful *voyageurs* in balloons, a large surplus of gas at the start, balanced by sand which latter is discharged as required.

The height obtained by Prof. Lowe (of Atlantic navigation fame), at his recent experiment in Washington, at the grounds of the Smithsonian Institute is estimated by accurate observers to have been much less than that of the derrick on the dome of the Capitol. The dispatch which reporters believe was sent to the President from that position, perhaps demonstrated the practicability of telegraphing from balloons if it were ever doubted; but this was all that was attempt-

ed. Let us hope that it is not typical of the success of the entire project of war ballooning.

Conveying or instantaneously propagating signals or orders *during* a great battle is a point of much importance and it would seem among the possibilities to aid this by an elevated operator. But the difficulties under such conditions become evidently many times intensified. Gas can only be had at certain points, time is required for every operation with these awkward and conspicuous aids, and, to say the least, the problem of utilizing them to any marked extent for such a purpose remains as yet unsolved.

There is work for inventors in every branch of the subject of army operations. In none perhaps is it more inviting than in this now being considered. But *our* military ballooning is evidently in a very primitive condition as yet, the only facts arrived at by its aid being almost absurdly negative ones.

Specie Exports from England to America.

In less than six months—that is to say, since the 28th of November, when these shipments commenced—we have sent the large sum of £5,800,000 in specie to America. That hoarding is going on in that country is indicated by the fact that after the absorption of this sum, and of some large amounts drawn from the continent, as well as of the whole of the heavy consignment of gold which have continued to come forward to New York with the usual regularity from California, we can trace an addition of less than five millions sterling to the stock of the precious metal in the banks at that city and elsewhere. Hoarding is the inevitable consequence of social confusion, to say nothing of civil war. In the face of a constant fall in the exchange arguments have been used, the drift of which would apparently be that we shall pay America in the form of rifles and munitions of war for the rest of the grain which we shall need from her. In some of our midland districts the orders pressed by the agents of the contending American governments have unquestionably given an impulse to certain branches of industry; but whoever heard of an adverse balance of trade being redressed in such a fashion? Munitions of war, we fear, will go but a small way toward liquidating our debt to America for corn and flour. Supposing, even, that we undertook the entire task of arming a quarter of million of men, what proportion would its cost bear to that of providing, if only partially, for the daily sustenance of 36,000,000? No one can doubt for a moment that the real cause of the fall in New York exchange to 104, announced last week, and upon which the Banks of England have acted, is the grain movement. Again, we see the argument used, that under the distrust inspired by the existing civil dissensions, capital will flow from America for investment in safety here. Isolated transactions of this kind will doubtless be effected by individuals, but to imagine that there will be any displacement of capital of sufficient importance to obviate the pressure from which we are now suffering, seems to be a very unsafe view indeed. It is most unlikely that the investments by Americans in our comparatively high-priced English securities will amount to a tithe of the English investments in the wretchedly depreciated American securities. Had the Americans a superabundance of capital to dispose of they might, of course, transfer it for investment here. But how does the case stand? Why have they thrown the prices of their securities to so serious an extent? Simply because, in their present condition, they do not want securities at all, but capital in its most available form. A severe fall in prices in their stock markets is one means of attracting capital from the foreigner. Hereafter we shall probably realize large profits upon these investments, for as soon as the present troubles have passed away, the Americans will buy back from us at high prices the securities which, for their immediate accommodation, they are now transferring to us at low ones; but for the present the effect of these transactions is unquestionably to increase the amount of the balance against us.—*London News, May* 20.

Ohio and Mississippi Railroad.

From the report of the Superintendent of this road, Wm. F. Biddle, Esq., we learn that the number of passengers carried during the year ending April 30, 1861, was 255,734, of which 128,492 were carried eastward, and 127,242 westward, the earnings from which were $472,998 80. The average rate per passenger from Cincinnati to St. Louis was $4 74; the average rate per passenger, other than from Cincinnati to St. Louis, $1 77; and the average rate per local passenger, $1 57. The total number of passengers carried one mile was 16,935,451.

The number of tons of freight carried was 111,509, of which 58,247 were carried eastward, and 53,262 westward. The gross earnings from freight for the year amounted to $312,545 23. The rate per ton per mile was 2.2 cents. The total number of tons carried one mile was 14,133,069. The report says:

In comparing this with past years, it is necessary to consider its very remarkable history, commercial as well as political, and the strange succession of unexpected events which have exercised so marked a depressing influence on business of all kinds. An examination of the reports of our connecting roads, at Cincinnati and elsewhere, from which our through traffic is derived, shows that these causes have been general in their action, though producing a severer effect on our line, owing to its geographical position, and the comparatively unsettled and unimproved section of country through which it passes. Viewed in this light the decrease in the business of the year just past, from that of the preceding year, is fully accounted for, without at all detracting from the intrinsic merits and strength of the line.

The gross revenue for the year has been $898,817 73, showing a decrease of $116,666 72 from last year.

The amount expended for operating the road, not including $16,274 33 for exchange and interest, has been $728,874 63, showing an increase of $3,937 55 over last year, and giving actual net earnings of $169,943 10, being a decrease of $120,604 27 from those of last year.

There has been a large increase of expenditures on repairs of railway, repairs of bridges, and repairs of passenger cars, and a comparatively trifling increase on repairs of water stations, repairs of depots, oil, waste and tallow, printing and stationery, and loss and damage to freight, giving a total increase of $78,296 74. There has been a large decrease in expenditures on transportation expenses, repairs of engines, repairs of freight cars, fuel, loss and damage to passengers and baggage, and cattle damages, and a slight decrease on repairs of shop tools and machinery and gratuities, amounting in all to $74,359 19, and giving the net increase in operating expenses as shown above.

The increase of $37,930 20 on repairs of railway, of $24,593 17 on repairs of bridges, and of $9,155 20 on repairs of passenger cars, amounting to $71,678 87, almost equals the large reduction in the other important items of expenditure. But we have the satisfaction of knowing that the economy effected in the latter will, in all probability, be permanent; and that the substantial improvements resulting from the large outlay on the former, will soon place us in a position to make a corresponding reduction in them.

During the year 8 miles of track have been ballasted, and 75,183 new ties, and 6,950 new chairs, have been put in the track; 453 tons of old iron have been rerolled at Indianapolis, 204 tons at Covington, and 100 tons of new iron purchased at Cleveland, all of which was put in the track during the fall and winter of 1860. In March, 1861, 500 tons of new iron were purchased from the Cambria Works, Johnstown, Pennsylvania, nearly all of which is now laid, extending from Milan to Laughery creek, almost six miles. This rail is of a new pattern, weighing 57 lbs. per yard, and 4½ inches high, giving greatly increased vertical stiffness. It is laid with an improved fish joint, 18 inches long, the outside bar being of seasoned oak, and fastened with slotted square bolts and wedge keys instead of screw bolts and nuts—the whole costing but 50 cents per joint, exclusive of labor in putting it down. This combination affords much greater smoothness and stability of surface than the track heretofore laid on the road, and from present indications promises to wear well.

Seven culverts, containing 387 cubic perches of masonry, have been built to take the place of wooden ones. There are yet remaining ninety wooden culverts on the road, of which at least twenty, containing about 990 cubic perches, must be rebuilt during the present year.

Trestle No. 1 at the Miami Bridge has been substantially rebuilt with pine timber, and the material is on the ground for rebuilding No. 9 on mile 99. These expenditures, together with the large amount of work that has been necessary to keep the canal bank between Cincinnati and North Bend in repair, in thoroughly ditching all cuttings, in repairing an extensive slide at the eastern approach to Otter Creek Bridge, in clearing out and widening the cut near Loogootee, in filling the approaches to Bridge No. 63, over the Wabash and Erie Canal and in widening and repairing the roadway in several other places, have caused the increase noticed above, in the amount charged to repairs of railway.

It was found absolutely necessary early in the summer of 1860 to commence extensive repairs on very many of the bridges, and a large force of carpenters has been constantly at work from that time, under the superintendence of Mr. T. D. Lovett. This force has renewed with pine timber the upper chords of Nos. 3, 8, 9, 12, 17, 18, 22, 23, 24 and 27, and has otherwise generally repaired them. It has also renewed a large portion of lower chord and a number of posts and braces in the west span of No. 64, at West Fork of White river, placing it in thorough repair; has framed one upper chord for No. 29, which will be put on in a few days; has placed trestles under Nos. 6, 7 and 10; and has thoroughly repaired all the small bridges. No. 30, at Muscatatac Creek has been rebuilt, by putting two spans 107 feet in length of Howe's truss, with a centre pier 35 feet in height, in place of a single span of McCallum's truss 214 feet in length. No. 33 has been built in place of trestle work at Mutton Creek, one span of 130 feet, with substantial abutments. In both these cases the difference between their cost and that of renewing the original structure has been charged to construction. The eastern abutment and centre pier of No. 64 have been entirely rebuilt in the best manner, and the western abutment repaired. In addition to this work by the company's force, Nos. 2, 4, 5, 37, 60, 62 and 63 have been repaired under a contract with the McCallum Bridge Company, on a plan suggested by Mr. D. C. McCallum after a personal examination of most of the bridges, and which has so far answered a good purpose. The Bridge Company is now at work on No. 65 at the Wabash river, which will probably be completed this month.

Notwithstanding the large amount of work here described, which fully accounts for the increase in expenditures on repairs of bridges, a still larger amount yet remains to be done to make all our bridges entirely sound and reliable.

The draw at the Wabash river and Bridge No. 10, must both be rebuilt at once, and Nos. 6, 25, 26 and 28 ought to be rebuilt during this season. We must look forward to renewing three or four bridges each year for several years to come.

The great number of these structures upon our line will always necessitate a large force and heavy outlay to keep them in repair, and I most earnestly recommend the adoption of iron in place of

wood for all new bridges, as the only means of permanently reducing expenditures in this department.

During the year there have been erected the following buildings: A freight house at Aurora, 30 by 20, with 6 feet platforms in front and rear; a boarding house, for men at Dillsboro', 19 by 27, with kitchen 14 by 14; a depot at Hardenburg, 40 by 24, with 10 feet platform; a depot at Sparksville, 40 by 24, with 10 feet platform; a joint transfer freight house at Mitchell, 96 by 30, with 8 feet platforms in front and rear, and 24 platforms at the ends; a depot at Shoale, 16 by 25; a depot at Wheatland, 40 by 24, with 10 feet platforms; and a joint transfer freight house at the crossing of the Evansville and Crawfordsville Railroad, 80 by 16, with 4 feet platforms.

A new cast iron turntable has been put in at Storrs, the engine house enlarged by 5 more stalls, and the track relaid and thoroughly ballasted.

The year has been more than usually fruitful in accidents to trains, which, although in no case producing any but very trifling injury to passengers, have yet caused much damage to cars, and swelled the expense of repairs on them very considerably beyond the natural depreciation from use. This is especially true of the passenger cars, which suffer most from such mishaps. Nearly the whole number of passengers cars have had entire sets of new wheels during the year; 21 passenger cars, four second class cars and seven baggage cars have received new tin roofs; two passenger cars and four second class cars have been rebuilt and painted; ten passenger and two baggage cars have been repaired and painted, and one new baggage car has been built. With the exception of the old cars built at Cochran, the passenger equipment now running is in better condition than at the date of the last report, giving reason to expect a reduction in this item of expense during the year just begun.

The most important work on freight cars has been replacing 204 old and defective roofs, mostly of canvas, with tin, and at the same time strengthening the framing of the roof. A great saving will be effected by this, in damages to goods from leakage in rainy weather, which has heretofore been a severe burden on the profits from transportation of freight. Four freight cars have had new roofs of canvas laid over felt and coated with rubber cement.

There have been 89 iron trucks built, to replace old and defective wooden ones, and 346 rubber springs purchased and used.

The motive power of the road has been kept in good condition, though heavily tasked at times. The Bissell patent truck has been placed under four of the passenger engines, and the castings are ready for two more. On a line with so much curvature as ours, this improvement is of great value, giving increased steadiness and safety at high speed.

I hope that this season will enable us to make such improvements in our track that the rate of speed which has been forced on us by competing and connecting lines will be less destructive to both roadway and rolling stock.

With an increase in the mileage of engines of 22,979 miles, there has been a decrease in the expenditure for fuel of $10,623 24—caused partly by a decrease in the average price paid for wood, and in the quantity purchased in advance of use, and partly by increased watchfulness and a system of check on its consumption. The erection of sheds for covering the supply at the important stations is very necessary, and would no doubt produce still further economy.

I would call attention to the very satisfactory reduction of $8,739 04, (53 per cent.,) in the item of cattle damages—one of the most annoying sources of loss to which Western railways are subjected. This reduction is principally due to the services of Mr. T. Gazlay, local attorney for the company. About 10,000 feet of fencing have been used in closing dangerous and exposed places, and several miles of road have been fenced by the farmers along the line, which, together with a number of cattle guards placed at public road crossings, have materially diminished the danger to cattle; and it is probable that a still further reduction in this expense may be made.

The operations of the year, although resulting in a serious loss of revenue, have produced a decided improvement in the condition of the road, rolling stock, and business facilities.

The adverse influences have been entirely beyond our own control, and, it is hoped, will be of short duration. Their removal will doubtless bring a large return of traffic to the line; and while it is now a source of regret that the operation expenses cannot be further materially reduced without impairing the efficiency of the organization, it is some satisfaction to know that when that time arrives a business fully fifty per cent. greater can be done with almost the same expenditure.

The crops along the line did not show the increase that had been looked for, having suffered much from drought, especially the corn.

In addition to this the great Southern demand for produce of all kinds that began in the winter, and has since been constantly on the increase, has diverted much traffic to the roads crossing us that we should otherwise have obtained. At no time during the year were we able to compete successfully with the river for carrying cotton, the difference in rates being such as to almost close the business with us.

The number of hogs fed along the line was much larger than last year; but the greater part of them were either contracted for or sold at Louisville and New Albany, giving us very short hauls, and in many cases being driven to the cross roads.

A large decrease of tonnage in flour and grain, is due to the same cause.

The light crops have of course lessened the purchases of the farmers, producing a decrease of tonnage in groceries, furniture, household goods, &c., and also a decrease in the local travel. The trade in lumber, lime and cement has been very dull, owing to the stoppage of building operations, and we have suffered accordingly.

From present indications the crops of this year will be good. The unsettled condition of the Southern States, and the embargo on shipments of produce to them, will most probably cause a return to this line of the traffic which last season changed its market; and though we cannot look for a complete re-establishment of prosperous business until our national affairs are satisfactorily settled. I do not think that the prospects of the year now begun give reason to apprehend less favorable results than those of the one just past.

Cultivation of Cotton in Jamaica.

We perceive with much pleasure that in consequence of the present unhappy state of America, the Cotton Company of Jamaica have determined on immediately laying out several thousand acres of land in the cultivation of cotton.

Would it not be desirable for Bahamian planters to turn some of the waste lands of this colony to the same account.

From Demerara, we learn that on the 3d of April the Governor announced that the applications for coolies had amounted to 7,315, or 3,315 more than, according to his own previous representations, they were likely to obtain, while, on the other hand, the applications for Chinese emigrants have been increased from 1,100 to 3,085. The court determined to limit the applications for the former to 5,000. The number of Chinese to be ordered at once has been fixed at three thousand one hundred, but it is understood that further applications will be received, and orders for any additional numbers sent on. The votes on the estimate for the proportion of passage money payable by the colony are, in the case of coolies $48,000, and in the case of Chinese $125,000; and the entire vote for this year's expenses on account of immigration to be borne by the colony, amounts to $289,220. This is entirely exclusive of the provision for interest and sinking fund on the public debts due on account of immigration. That provision is set down at $181,240—making a total of $470,460, or nearly one-third of the entire estimated expenditure, for immigration purposes.—*Nassau Guardian, June* 1.

La Crosse and Milwaukee Railroad.

As stated last week, efforts are being made to re-organize this company upon a basis somewhat similar, and believed to be susceptible of equally favorable results, of the recent scheme of the creditors and shareholders of the Milwaukee and Mississippi Company, to which the actual or productive value of the La Crosse line might be likened. The proposed plan is to sell the road under the decree of foreclosure, to be purchased for the benefit of assenting creditors and farm mortgage stockholders; and pay the present creditors and that class of stockholders with bonds and stock of the new company as follows:

Value of property		$7,400,000
Divided as follows:		
Mortgage, 7 per cent. thirty years	$2,460,000	
1st preferred stock, 7 per ct.	1,500,000	
2d " " "	1,000,000	
Common stock	2,440,000	
		7,400,000
Appropriate the mortgage bonds to pay 1st mort.		
Eastern Division, at par		$900,000
City of Milwaukee at par		314,000
2nd mort. Eastern Division, 25 per cent.		250,000
Land grants Nos. 1–1,991, 50 per cent...		995,500
Unappropriated		500
		$2,460,000
Appropriate 1st preferred stock to pay—		
2nd mort. E. D. 50 per cent...	$500,000	
Land grants Nos. 1–1,991, 50 per cent.	995,000	
Unappropriated	4,500	
		1,500,000
Appropriate 2nd preferred stock to pay—		
Land grants Nos. 1,992–2,500, at 75 per cent.	$381,750	
Land grants Nos. 2,500–4,000, at 40 per cent.	600,000	
Unappropriated	18,250	
		1,000,000
Appropriate common stock to pay—		
Land grants Nos. 2,500–4,000, at 35 per cent.	$525,000	
Farm mortgages, at par	1,000,000	
Milwaukee & Minnesota stock, ($1,500,000), at 20 per cent.	300,000	
Unappropriated	615,000	
		2,440,000
Cost of road		$7,400,000

Scinde (India) Railway.

By advices from Kurrachee, dated 21st April, several heavy trains have passed over the railway with regularity and safety, some of them containing about 300 passengers. The line has also been used for the conveyance of troops, artillery carriages, military stores, and for Punjaub materials. The Parsees and other traders at Tattah, on the Indus, are forming branch establishments at the Joongshaei station, and the collector of the district is laying out the surrounding ground for building purposes. The Tattah traders also propose constructing, at their own expense, a branch or tramway to connect Joongshaei with Tattah. The company's steamer "Stanley" was to leave the terminus at Kotree, on the Indus, for Mooltan, it being her first commercial trip, on 23d April, taking first and second class passengers with about 200 tons of cargo, receiving for the upward freight alone about 1,200*l*. Cargo had been already collected at Moultan for the return trip to Kotree.

Journal of Railroad Law.

IOWA LAWS RELATIVE TO CATTLE RUNNING AT LARGE; NO TRESPASS FOR THEM TO BE UPON A RAILROAD TRACK; A DIFFERENT MEASURE OF COMPANY'S LIABILITY FOR ACCIDENTS WHEN THE ROAD IS PROPERLY FENCED.

The plaintiff, one Alger, recovered a judgment in the State of Iowa against the defendants the Mississippi and Missouri Railroad Company, for the sum of ninety dollars, by way of compensation for injuries done to his ox, by a train of cars passing over the defendants' road. The track was not enclosed, and the plaintiff's ox being permitted to stray at large, as by the laws of Iowa they are allowed to do, came upon road, and was there run over by the defendants' cars.

The cause was appealed to the Muscatine District Court, and at that trial exceptions were taken by the defendants to the rulings given and refused by the court; and upon these exceptions to the charge of the District Judge an appeal was taken to the Supreme Court of that State.

The defendants requested the District Judge to charge the jury, "that a case of negligence would not be made out against a railroad company by showing simply the injury to plaintiff's ox. It must be shown, if the ox was on the railroad track without defendants' consent, that there had been wanton, or wilful, or gross negligence on the part of the company to create a liability;" but the court refused so to charge, and instructed the jury as follows:

"In order to recover, the plaintiff must show the injury alleged, and that the same happened in consequence of the negligence of the defendants, their agents or servants. If at the place where the injury happened the defendants' road was fenced, and if the ox got upon the road of the defendants from the plaintiff's own land, or without the knowledge or consent of the defendants; and if as soon as the ox was discovered to be on the track, the engineer and servants of defendants used ordinary diligence and exertions; that is if they used all means within their power consistent with the safety of the train to prevent the injury, then the defendants are not liable."

"If the owner of the land through which a railroad is constructed, or who lives near to, or adjoining such road, permits his cattle to run at large, knowing that they are liable to find their way upon the track, and perhaps thereby endanger the safety of the trains, then such owner assumes and takes upon himself all the risk of injury and damage which may be done by the running of trains unless he can show that such injury and damage were occasioned by the negligence and misconduct of the railroad company or its agents and servants in charge of the train. The defendants are not bound to fence their road in from cattle, and the owners of cattle have a right to allow them to run at large for the purpose of subsisting and grazing. Yet if they do allow them to run at large, knowing their liability to get upon the land of the defendants, they assume the peril of all accidents which may be occasioned to them by trains, in case such accidents cannot be prevented by reasonable and prudent exertions on the part of the agents and persons in charge of such trains. The gist of the plaintiff's action is the negligence and misconduct of the defendants. The burden of showing this is on the plaintiff. This negligence the jury cannot infer from the mere fact of the injury, and unless such carelessness and misconduct are shown, the jury should find for the defendants."

The court gave the following charge at the request of the plaintiff.

"If by the exercise of proper care on the part of the servants of the defendants, the injury to the plaintiff's ox might have been avoided; and the jury find there was a want of such care, then the defendants are liable to the extent of the injury. What is proper care is a question of fact for the jury to determine, taking into consideration all the circumstances of the case."

The Supreme Court affirmed the judgment of the District Court holding this charge to be correct. The following is the opinion rendered at the decision of the case.

STOCKTON, J.—The principal portion of the argument for the defendants is directed against the rule of law established by this court in Wagner *vs.* Bissell, and re-affirmed in Heath *vs.* Coltenback, that the owner of cattle is not required to keep them within their own enclosure, and that he may lawfully suffer them to run at large upon the unenclosed land of an other person. We have seen no reason for a change of this rule. It seems to us founded in reason and justice, and is well supported by authority. If the cattle of the plaintiff were lawfully permitted to go at large, he is not to be considered a trespasser if they are found upon the railroad track of the defendants. Nor can the mere fact of their being permitted to go at large, be a ground of imputing negligence to the owner.

It may be, as is held in the charge of the court, that the owner by suffering his cattle to roam at large, knowing their liability to go upon the track of the defendants' road, takes upon himself the risk of their being injured by the locomotive. This risk assumed by the owner does not, however, release the railroad company from the obligation of using ordinary care and diligence in running its trains to avoid injuring the cattle, nor for all responsibility for injuries except those resulting from gross or wilful negligence. In those States where the owners of domestic animals are required to keep them within an enclosure, and are not allowed to suffer them to run at large, the courts have ruled that when they are suffered to run at large and happen to stray upon the track of a railroad, the servants of the company are released from the duty of exercising ordinary care, and the company is only liable for gross negligence or wilful injury.

If the cattle, however, are lawfully at large and without any wrong upon the defendants' road, the owner may recover for any damages resulting from the servants or agents of the company causing the locomotive engine to be driven in such a way as to kill or injure the cattle. If such cattle are altogether wrong doers in being upon the railroad, the company are responsible only for wilful injury or gross negligence.

The test of the liability of the defendants is whether at the time of the accident reasonable and ordinary care was exercised to avoid the injury. The road of the defendants not being enclosed, it was to be expected that animals running at large would come upon the track, and the defendants are required to run its engines with reference to this known rule of law, that within the State of Iowa cattle are allowed to run at large, and without any wrong may come upon the defendants' road.

Whether there was negligence or want of care was a question properly left to the jury. The care required is such as under the circumstances the defendants might reasonably be expected to give to prevent injuries. In Beers *vs.* Housatonic Railroad Company, it was held that "there is no distinction between railroad and ordinary highways in regard to the degree of care which the law requires on the part of those who have the direction or management of vehicles upon them. The rule is the same on this subject whether they are driven or propelled on one or the other of these roads, and where there is an interference, whether one of them crosses a road of the same, or of the other kind. The proprietors of railroads have no immunity which excuses them for a less, or authorizes them to require a greater degree of care when about to cross an ordinary road, than if theirs was one of the latter description. Reasonable care is what is required of those having the management of vehicles on either of them in all cases."

It is to this reasonable care the defendant is to be held until its road is fenced and provided with cattle guards, of such a character as shall prevent the cattle of adjoining proprietors from straying upon the road. When such barriers and safeguards are provided, and not until then, will domestic animals found upon the track be regarded in the light of trespassers, and railroad companies released from the obligation of exercising reasonable and ordinary care, in running their trains, and held liable only for gross negligence, evincing wilful misconduct. Judgment affirmed.

New York Canals.

The quantity of flour, wheat, corn and barley left at tide-water during the third week in June, in the years 1860 and 1861, is as follows:

	1860.	1861.	Increase.
Flour, bbls.	35,341	42,318	6,977
Wheat, bush.	291,380	629,457	327,677
Corn, bush...	541,539	301,898	*239,641
Barley, bush.	899	1,323	424

The aggregate quantity of the same articles left at tide-water from the commencement of navigation to the 22nd of June inclusive, during the years 1860 and 1861, is as follows:

	1860.	1861.	Increase.
Flour, bbls.	242,621	198,007	*44,614
Wheat, bush...	1,763,108	5,501,817	3,838,649
Corn, bush.	3,982,733	3,969,754	*12,979
Barley, bush. .	73,912	107,206	33,294

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a gain of 723,116 bbls. of flour.

Iron Bridge over the Tonawanda.

The New York Central Railroad Company are now putting up a splendid iron bridge over the Tonawanda at this place. The old one, which was built of wood, is quite old, and could not have lasted much longer. The iron bridge will be a great improvement.

The new structure is to be a wrought iron, trussed girder bridge, of 124 feet span, with a double track; 105 tons of iron are used in its manufacture.

Mr. Howard Carroll, Assistant Chief Engineer, is here overseeing the putting up of the Bridge.—*Batavia Adv.*

American Railroad Journal.

Saturday, June 29, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Money and Business.

The general improvement noted in our last in the stock and grain markets has hardly been sustained. The advance in New York Central, and Toledo and Rock Island was not sustained, falling ½ on Friday. Harlem shares are affected adversely by the question as to the disposition of the bonds of 1861 and 1865. On Saturday the whole stock list was depressed 1½ lower than on the previous Wednesday. Border State stocks were irregular; but securities of the General Government advanced. The close of the week showed a better trade in domestic produce in the way of foreign shipments; and something of an improvement in both dry goods and groceries.

The week opened dull in the money market, there being no employment for capital at the Banks or in private hands. Foreign exchange continues at the same 105 to 106, American State stocks were sold quite freely in England at low rates, but good railway shares stand best in comparison.

The stock market opened firmer on Tuesday; the Galena and Chicago shares declined, being affected by the report that no dividend would be declared this spring; this is considered good policy. Wednesday showed a renewed firmness in State and Federal securities. Galena and Chicago also improved and New York Central remained firm at 73¾ for the cash stock. The loans of the Northern and Western States have all been taken at very favorable terms. Thus Maine took a million at $102.50. New York, $600,000 at $101.60. Indiana, $1,200,000 at 87, which shows a credit in advance of the Federal Government.

On Wednesday the market was generally lower. Owing to a fresh arrival of State stocks from the West, Tennessee's fell 1¼ and Missouri ¼.

Breadstuffs were generally lower; exports still continue, and the freight rates are firmer.

With the exception of the few drawbacks already noted, we think the improvement of last week still continues to be felt. The shipment of produce to foreign countries must necessitate the forwarding of Western produce, which is now going on, which in turn will restore Western credit and act favorably upon domestic produce.

The Bank of Commerce has received instructions to pay, when due, the July coupons on the three millions Missouri State bonds issued to the Hannibal and St. Joseph Railroad Company.

The coupons of the first mortgage bonds (Eastern division) of the La Crosse and Milwaukee Railroad, due May 1, 1861; also the coupons of the bonds issued by the City of Milwaukee in aid of the LaCrosse and Milwaukee Railroad, and the Milwaukee, Fond du Lac and Green Bay Railroad, payable September 1, 1860, and March 1, 1861, will be paid on presentation at the office of the receiver in Milwaukee, with exchange on New York.

The Delaware, Lackawanna and Western Railroad will pay on the 10th of July one year's interest on the paid-up capital stock of the company, payable in the stock of the Warren Railroad Company.

The Louisville and Frankfort and Lexington and Frankfort Railroad Companies have declared a semi-annual cash dividend of two per cent., payable 24th inst.

A dividend of 2 per share has been declared by the Eastern Railroad; also $2 per share on the Eastern Railroad in New Hampshire—both payable July 1.

The Old Colony and Fall River Railroad has declared a dividend of $3 per share, payable July 1.

The Boston and Maine Railroad Company has declared a semi-annual dividend of 3½ per cent., payable July 1. The January dividend was four per cent.

The Boston and Providence Railroad Company have declared a semi-annual dividend of four per cent. payable July 1.

The Terre Haute and Richmond Railroad has declared a semi-annual dividend of 5 per cent., payable July 1st, at the office of the Farmers' Loan and Trust Company in this city.

Coupons No. 12 from civil bonds, No. 14 from fire bonds, and No. 2 from city bonds of San Francisco, will be paid in this city on the 1st of July, by William T. Coleman & Co. The coupons not presented by the 1st of January, 1862, will have to be sent to San Francisco for collection.

The semi-annual interest due July 1st, on bonds of the Joliet and Chicago Railroad Company, will be paid at the office of Messrs. M. K. Jesup & Company, No. 44 Exchange Place, New York.

The interest due 1st proximo on the Bonds of the State of Iowa, will be paid on and after that date, upon presentation of the coupons, at the Citizens' Bank.

The Panama Railroad Company have declared a semi-annual dividend of 6 per cent., payable on and after July 1st, at the office of the Company, 88 Wall st.

The Boston and Lowell Railroad Company have declared a semi-annual dividend of 3 per cent., payable July 1st.

New York and Erie Railroad Company 4th and 5th mortgage coupons, past due, and unsecured coupons, past due, also fractional parts of shares in the new "Erie Railroad Company" are purchased by Messrs. O'Brien, No. 29 Wall st.

The trustees of the Western Vermont Railroad will pay on the 1st of July, a semi-annual dividend of 3½ per cent, on the 1st mortgage bonds of the road, at the Merchants Bank in this city.

The interest due 1st July on the bonds of the Housatonic Railroad Company, will be paid upon presentation of the coupons to Messrs. Ketchum, Son & Co., New York, or to H. Nichols, Esq., Treasurer, Bridgeport, Conn.

The interest coupons due July 1, 1861, of the funded debt of the State of Michigan, payable in the City of New York, will be paid at the Metropolitan Bank.

Interest coupons, due July 1, on Minnesota 8 per cent. State Loan will be paid at the office of Messrs. Kirtland & Co., No. 24 Pine St.

Coupons of Yuba County bonds, due July 1, will be paid at the office of Messrs. Wells, Fargo & Co.

The Buffalo and State Line Railroad Company has declared a semi-annual dividend of 5 per cent., payable July 15. The earnings of the six months give a net profit of 8⅜ per cent. on the capital stock, above interest and all expenses. At a recent meeting of the stockholders the old board was re-elected.

The Shore line Railroad, which affords such agreeable facilities to passengers for Boston, Providence and Newport—and the watering-places on the Sound—has added a new attraction in forming a connection of their mid-day express train with the steamer Golden Gate, at New London, for Norwich and other points *North and East*. The Gate also connects with the steamers from New York.

The Appleton Manufacturing Company of Lowell have declared a dividend of four per cent.; the Newmarket Manufacturing Company, three per cent.; the Holyoke Water Power Company, three dollars per share, payable at the Bank of Hartford County, July 10.

The report of the Morris and Essex Railroad Company, which was presented at the annual meeting on 19th inst., an abstract of which we gave in the JOURNAL of 4th ult., urges the commencement of work on the extension of the road from Hackettstown to Washington and Phillipsburg, opposite Easton, at the earliest possible moment. It is stated that it is in contemplation, partly in connection with existing lines of road, to form a continuous line of railroad from Newburg on the Hudson river, to Stanhope, intersecting the Morris and Essex road at the latter place; one object in view, and the principal one, being to reach the coal field of Pennsylvania.

The Comptroller of Wisconsin states that since his report of May 25th, about $175,000 bonds of Seceded States have been withdrawn. Since May 15th, about $390,000 of the poorer sort of bills have been destroyed, leaving the present circulation some $3,740,000, against $4,451,572 on the first of October last. The best banks are beginning to take out new circulation.

We learn that the Western Maryland Railroad has been opened to Westminster, and two trains are daily running between that point and Baltimore with considerable success. A fair amount of passengers and freight are being taken daily. The receipts from freight alone are quite large, and it is generally understood that the Company will be amply prepared to adjust the July interest from the net earnings of the road.

The Memphis and Little Rock Railroad is rapidly progressing towards completion. The grading has been finished beyond Madison, and it is believed that the entire line will be finished to Little Rock by the first of November.

The Davenport *Democrat* says the work on the Mississippi and Missouri Railroad, beyond Marengo, has commenced again. Contractor Williams has forty men at work grading, and the work of putting down the iron will soon commence.

The Albany *Statesman* says that the work of building the fourth section of the Albany and Susquehanna Railroad has been commenced. An extra force has been engaged and the work will be pushed to a speedy completion.

The Buffalo and Lake Huron Railroad has been extended to the wharf of Goderich.

The railways of Victoria, Australia, are extending rapidly. There are no less than eight trains running in different directions from Melbourne from three stations.

The City Assessors have just concluded the work of making up the annual valuation of the property of the city of Rochester. The total valuation, according to their rolls, is $11,370,762. This valuation includes both real and personal property. It is slightly more than the valuation of last year.

The following table exhibits the receipts of flour and grain at Chicago for the first five months in the years 1859, 1860 and 1861:

	1861.	1860.	1859.
Flour, bbls.	418,813	238,052	148,500
Wheat, bush...	2,994,014	1,494,322	995,853
Corn, " ..	6,224,066	5,976,446	1,570,580
Oats, " ..	299,709	545,902	230,321
Rye " ..	116,452	66,070	17,115
Barley " ..	66,072	905,237	192,044

The railroads of Wisconsin are doing an enormous freight business at present. The blockade of the Mississippi has tended to greatly increase the amount of freight shipped east from Prairie du Chien. The rate on wheat by rail is consequently three cents higher than last year. The receipts of grain at Milwaukee last week were nearly 1,000,000 bushels. The *Wisconsin* says of the business of the Milwaukee and Prairie du Chien Railroad:

"The increase in the amount of business transacted by this thoroughfare at the present time is truly astonishing. Every car owned by the company (and there is no small number of them) is in constant demand to transport over the road the vast amount of freight destined for its terminus and intermediate points. The trains which daily leave Prairie du Chien are of immense length, and before reaching this city require 'extras' for their assistance in carrying the freight which accumulates at the intermediate stations. Indeed, the whole machinery of the road is in constant operation, and the business is rapidly increasing.

On Friday last there passed over the road 186 cars heavily laden with wheat and flour alone, making in the aggregate at least 40,000 bushels. This is but one day's exhibit, and has, probably, been excelled a number of times within the past month."

We find in the Louisville *Journal* the following extract from the message of Gov. Harris to the Legislature of Tennessee, now in special session:

"Under the provisions of the act of 1852, the principal and interest of the internal improvement bonds of the State are made payable in the City of New York. It will be impossible to pay the interest accruing, at that point, during the continuance of the war.

I recommend that you so amend the laws referred to as to require the payment at the Bank of Tennessee, at Nashville or at Charleston or New Orleans of all sums which may become due from the State to the people of all Governments which are on terms of peace and friendship with us, who are and were previous to the commencement of the war *bona fide* owners of our bonds, and that you adopt such policy towards the owners and holders of our bonds, who are citizens of States at war with us, as is recognized and justified by the law of nations regulating their intercourse as belligerents.

The ordeal through which the country is now passing necessarily prostrates the trade and commerce of the country, and deranges the currency to a greater or less extent. Such legislation as will tend to secure a uniform currency throughout the Confederate States is of the highest importance. I, therefore, submit the question to your consideration for such action as, in your opinion, the general welfare demands.

By the .... section of the act of the 6th of May, 1861, it is made the duty of the Governor to issue bonds of the State for the purpose of raising a fund with which to defray the expenses of the Provisional Army of the State. In view of the scarcity of a circulating medium, and the probable difficulty of converting any considerable amount of bonds into money in times like the present, I respectfully recommend that you so modify that act as to authorise the issuance of Treasury notes to the extent of three-fifths of the amount of said bond; and that the same, when issued, be made receivable by the State in payment of all taxes or Government dues."

Mr. Thompson, of the *Bank Note Reporter*, says of his recently published plan for a National Currency, based on the pledge of the Public Stocks of the United States and 25 per cent. in Bullion, that:

"The plan is similar to the Currency Department of the Bank of England. The proposed issue of circulating notes, like the Bank of England notes, are to be based partly on specie and partly on Government Stock, and to be convertible into specie on demand, at the option of the holder, as are the Bank of England notes. The Government to make up any depreciation on the Stocks, in case a sale becomes necessary to replenish the specie for redemption. The Bank of England, on holding £14,000,000 sterling of consols, and £10,000,000 specie, issues £24,000,000 of notes. Our plan is simply the same: the United States being the promisor in our case, instead of a bank in England."

The New Bedford *Standard* says that the Fairhaven Branch Railroad has been sold to the New Bedford and Taunton, Taunton Branch, and Providence and Boston Railroad Companies, for the sum of $300,000. This road is about 15 miles in length, from Fairhaven, connecting with New Bedford by a ferry to West Wareham, where it connects with the Cape Cod Railroad, by which it has connection with Boston by that and the Fall River Railroad. Its cost, according to the balance sheet of December, 1859, was $491,516. The purchase of the road will give the Taunton Company the control of both routes, from New Bedford to Boston.

According to the Pottsville *Miner's Journal*, the Anthracite Coal trade for the week ending 22d inst. summed up 211,724 tons, against 227,949 tons in the corresponding week of last year. The aggregate for the season was 2,972,203 tons against 3,110,669 for 1860. The Journal adds:

"On the 1st of July, the rates of toll and transportation will be increased 15 cents on the canal and railroad. A corresponding increase in the price of tolls, coal, etc., will take place in the other regions after the 1st of July.

We learn that many of the factories in the East, that were closed, have started again, and others are preparing to start, to prepare a supply of goods for the Fall trade."

The following is a statement of the Iowa State Auditor, showing the debt and resources of the State, submitted at a recent meeting of Gov. Kirkwood and his colleagues, on the commission of the Legislature to issue $400,000 of bonds for war purposes:

RESOURCES.

Tax delinquent and unpaid for which lands are to be sold in October—and cash in hands of County Treasurers		$435,061 00
Cash in banks in transitu to the State Treasury		7,471 87
Cash in the State Treasury		53,696 00
Total		$496,228 87

PRESENT LIABILITIES.

Warrants outstanding at date	$105,833 27	
Amount of appropriations undrawn, estimated to January 1, 1862	125,000 00	
		230,833 27
Balance to credit of State		$265,395 60

DEBTS OF STATE, BONDED, ARE

Bonds of 1858, due in 1868.	$200,000	
School Fund of State, use for revenue purposes		122,205 75
Total		$322,295 75

The liabilities show the expenditures to Jan'ry, 1, 1862. The resources are exclusive of the taxes for 1861, estimated at from $320,000 to $360,000, which year's tax will be levied in September next and become due in November.

Judge Wright of the Supreme Court of Iowa, has granted an injunction restraining the City Council of Davenport from levying or collecting any taxes for the purpose of paying the interest or any part of the principal of the $298,500 bonded debt of that city. The proceeding was commenced in the Scott county District Court by Mr. Hubbell, in behalf of a large number of the most wealthy taxpayers of the city. Among the items of this indebtedness are $50,000 issued to the Chicago and Rock Island Railroad Company, and $75,000 to the Milwaukee and Mississippi Railroad Company, which, it is contended, were unconstitutionally issued, because the constitution does not authorize a city to build railroads in another State; and secondly, because the city has no constitutional power to issue bonds to build any railroad in the State.

The following circular has been sent from the Treasury Department to the New York office in regard to the July coupons on the Texas indemnity 5 per cent. loan of 1865, The whole amount of this loan outstanding is $3,461,000:

It being understood here that a portion of the Texan Indemnity Bonds, of which semi-annual interest coupons become due on the 1st July proximo, have been indorsed since that State has passed under the control of insurgents, and that another portion remains in the Treasury of that State, it has become the duty of this Department to stop the payment of the coupons of both these portions.

In order to distinguish them from such as have been taken from bonds heretofore negotiated in good faith to innocent holders, you are hereby instructed to require all persons who shall present to you coupons of Texan Indemnity Stock for payment, to exhibit the bonds with the coupons from which they were taken, together with the affidavits of the present holders taken before competent authority, stating at what date and from whom the bonds in question were purchased by them.

The Illinois Central earnings for June and the business of the Land Office will show no marked changes from June last year. The currency troubles, and the low prices of Corn in Chicago have had some influence upon the business and the latter cause had rendered it necessary to reduce the rate of freight on that article of produce in order to enable the farmer to move it to market. This company has remitted the interest due in London, and has the funds provided for the interest on the full paid stock, due 1st July.

Principles versus King Cotton.

That Cotton is King has got to be quite a trite saying. But like many other sayings of the kind, it is said much more than it is believed. People love to throw sarcasm even if they hit themselves, and the pleasure derived from this source often outweighs the injury they are sensible of receiving from the blow. That cotton has a controlling influence is undoubtedly true. Since the invention of the cotton gin, the white puff balls that bloom on the southern plantations have been transported from continent to continent; have been woven and mixed into all kinds of fabrics, to cover the human form, and the raising, the transportation, the manufacture, and the selling of the manufactured article has given employment, and, of course, food to millions of our race. Still, it is not "king," any more than Indian corn is king. Deprive the world of cotton, and it will use wool and flax; deprive the world of Indian corn, and it will use wheat, rye, oats, etc. Neither are king until you deprive the world of all other articles that may be used, although, perhaps, not as cheaply, for the same purposes. When the early Massachusetts settlers were saved by the discovery of Indian corn, very likely corn was, for the time being, king. And when we are entirely dependent upon cotton cloths for clothing we may acknowledge the sovereignty of King Cotton, and bow to the hand that deals out to us the grateful blessing. We acknowledge the power and influence of cotton; but, at the same time, we assert that principle is still more powerful. The world is not yet entirely dependent upon it, and there are men enough left whose interests remain untouched, to stand by principle and to reclaim half-yielding men to the dictates of honor and justice. Deeply as the unhappy events which have culminated in the Great Cotton Rebellion are to be deplored, it is still satisfactory to feel that for once the exact power of "King Cotton" is to be measured. Piled up in bales upon the wharfs of Charleston and New Orleans it will beckon English capitalists to come and take it; it has done so already, and the great English ship of state careened to the call—but with English honor for ballast, the noble ship soon righted. Throughout the Northern States the individual interests of merchants, mechanics and artisans all were sacrificed upon the altar of principle; and the word "Union" symbolizing all the blessings we have received as a nation since the War of Independence, has become the watchword of our armies, and is upon the tongue of every citizen. Surely there are noble principles embodied in the word, and so far they have the victory over "King Cotton." *

Cleveland and Toledo Railroad.

At the annual meeting of the stockholders of this company held in Cleveland on the 19th inst., the following gentlemen were elected directors for the ensuing year: John Gardiner, Norwalk; A. N. Ramsdell, New London, Conn.; Wm. M. Vermilye, G. Talbot Olyphant, New York; Joseph Benjamin, Elizabeth, N. J.; Samuel M. Young, Toledo; John W. Sprague, Huron; James Mason, Joseph Lyman, Cleveland.

At a subsequent meeting of the Board, the following officers were re-elected:

JOHN GARDINER, *President.*
H. C. LUCE, *Treasurer.*
L. D. RUCKER, *Superintendent.*
E. SHELDON, *Cashier and Paymaster.*

The total receipts of the company for the year ending June 1, 1861, were | $920,000
Expenses, including interest | 792,000
Net earnings | $128,000

—equal to four per cent. on the capital stock. The running expenses were 46 1-2 per cent.

The floating debt June 1, 1860, was	$286,000
" " " " 1, 1861, "	196,000
Reduction during the year	$90,000

The net earnings of the year were applied as follows:—

Reduction of floating debt	$90,000
Contribution to sinking fund	24,000
Cash on hand	14,000
Total	$128,000

No charges were made to construction account during the year, a fact which cannot be said of any previous year since the road was built.

The road is represented as follows:

Bonded debt	$3,848,420
Capital stock	3,343,812

Newport and Covington Suspension Bridge Company.

The annual meeting of the Newport and Covington Bridge Company took place on the 3d inst., when the annexed report was presented:

RECEIPTS.

Balance on hand June 4, 1860		$8,681 46
Tolls for 12 months to June 4, 1861		8,124 00
Total		$16,805 46

EXPENDITURES.

Collectors' salaries	$960 00
Judgment of Gray	14,479 18
Secretary and Treasury	150 00
Sundries	962 85
Total	$16,552 03
Leaving a balance on hand of	293 43

The company is still indebted to John T. Lewis, assignee of John Gray, in the sum of $199 74, and B. W. Foley, fyr services for President for the past year, $150, which, with some few smaller debts —the bills of which have not been rendered —constitute the whole indebtedness of the company.

Messrs. Caldwell, King and Constance of Newport, and Stephens and Foley, of this city, were elected directors for the ensuing year. The President, Secretary and Treasurer were re-elected.—*Covington Journal.*

Census of England, 1861.

The population returns of England and Wales as based upon the census taken in March last and recently published appears to be 20,205,504, an increase of 2,169,576 since the census taken 10 years ago. This is equivalent to an increase of 10½ per cent. for the decade.

The population of London is 2,803,034, an increase of 440,798 in the last ten years. This is evidence that the village has not yet been completed. To show more directly the vastness of the increase it need only be stated that the population added in a single decade is equivalent to that of Boston and Baltimore together or of the three queen cities of the West—Cincinnati, Chicago and St. Louis in 1860. It is greater than the population of Philadelphia in 1850; and far outnumbers the whole white population of South Carolina. The total population of London outnumbers the whole people of Kentucky and Tennessee, and is, indeed, equivalent to one-fourth the white population of the slave-holding States of the Union. The great State of Ohio only equals this village in population.

The number of emigrants that left the shores of the British Islands in the 10 years 1851-'61 was 2,249,355, of which about one-third was from England and Wales. Had these numbers remained at home and increased in like proportion to the existing population the decennial increase would have been about 15 per cent.

The Irish and Scotch returns are not yet published.

Oswego and Syracuse Railroad.

At the annual meeting of the stockholders of this Company, held in Oswego on the 11th inst., Frederick T. Carrington, Luther Wright, Abraham P. Grant, Edward B. Judson, Gilbert Mollison, Sylvester Doolittle, Allen Munroe, Thomas T. Davis, Joseph Bartlett, Samuel Willets, Henry H. Martin, Rufus H. King, and Austin Myres, were elected Directors for the ensuing year.

At a subsequent meeting of the Directors, Frederick T. Carrington was elected President; Allen Munroe, Vice President; Luther Wright, Treasurer, and A. P. Grant, Secretary.

Railroads in Algeria.

In reference to the works originally undertaken by Sir Morton Peto—the suspension of which was announced some weeks since—it appears that a scheme for their resumption will shortly be submitted to the French Corps Legislatif on the following basis:—1. Construction of the entire line from Algiers to Oran, already decided on. 2. Execution of all the lines conceded, the earthworks and bridges by the State, the way, stations, and rolling stock by the company in whose favor the concession is made. 3. Reduction of tariffs as a compensation for the sacrifices made by the State in undertaking part of the cost of establishing the lines. Surveys for a line from Algiers to Constantine, and another from Setif to the sea, are being pursued with avidity, and are already sufficiently advanced to show that the line to Constantine would be shorter and less expensive than that to Oran.

Railroad Earnings.

The earnings of the Macon and Western Road for May, 1861, were $25,408 17
May, 1860 ..... 23,119 53

Increase $2,288 64

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of May, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$205,985 43	$180,581 83
" " merch'dise	31,762 69	53,775 33
" " travel, etc.	16,169 37	30,653 55
Total	$269,917 49	$265,010 71
Transportation, roadway, dumpage, renewal fund, and all charges	131,983 34	148,717 67
Net profit for the m'th,	$131,934 15	$115,293 04
Profit for the previous 5 months	469,121 12	462,403 29
Total profit for 6 mos.	$601,055 27	$577,696 33

The receipts from coal have increased over the receipts of the corresponding month last year $25,404, but has lost a rather larger sum in receipts from merchandise and travel. The charges have been reduced about $18,000, leaving the net gain of the month over May of last year, $16,600. The business of the half-year to June 1, 1861, shows an increase of net profits of $23,358.

The following are the earnings of the Great Western Railway of Canada for the week ending June 14, 1861:

Passengers $16,934 72
Freight and live stock 14,869 12
Mails and sundries 1,360 68

Total $33,164 52
Corresponding week of last year 29,825 37

Increase in 1861 ..... $3,339 15

The receipts of the Nova Scotia Railway for May amount to $10,670 93, being $1,436 18 over the corresponding month of last year.

Cedar Rapids and Missouri Railroad.

At the recent annual meeting of this company, the following board of directors was chosen:

Oakes Ames, Boston, Mass.; C. A. Lumbard, do.; Chas. Walker, Chicago, Ill.; John Wentworth, do.; John Weare, Cedar Rapids, Iowa; John F. Ely, do.; G. M. Woodbury, Marshalltown; C. E. Whiting, Onawa, Monroe county, Iowa; J. I. Blair, Blairstown, New Jersey; L. B. Cooker, Oswego, New York; L. C. Sanders, Boonsboro, Iowa; E. Ruggles, Tama county, Iowa; John A. Sterns, Elizabethtown, New Jersey; H. F. Scranton, Scranton, Pa., James Blair, Marksborough, N. J.

Logansport, Peoria and Burlington Railroad.

The following gentlemen were elected directors of the Logansport, Peoria and Burlington Railroad, at a meeting held in this city: Chas. L. Frost, Chas. A. Secor, Samuel Gilman, Adolph Rusch, New York; John P. Brown, Portland, Me.; W. A. Willard, Valentine Dewein, Geo. C. Bestor, Wm. H. Cruger, Peoria. The following resolution was adopted:

Resolved, That the amendment of the charter of this company, passed at the regular session of the State of Illinois, changing the name of this corporation to that of Logansport, Peoria and Burlington Railroad, be, and the same is hereby accepted and approved.

Railways in India.

Mr. Ireland Danvers, Secretary to the railway department for India, reports that on 31st December, 1860, the number of miles open amounted to 842, being an increase of 208 during the twelve months. Of these 842 miles, 100 are constructed with double and 742 with single lines of rail. The most important of the lately completed sections is that on the East Indian, between Cynthea and Rajmahal, Calcutta being thus connected with the Ganges, so as to render it possible for 250 miles of dangerous river navigation to be avoided. No new lines have been sanctioned during the year, and the Oude is postponed; 227 miles of the East Indian (Allahabad to Jubbulpore), 240 miles of the Punjaub (Delhi to Lahore, and 183 miles of the Great Indian Peninsula and Madras (Sholapore to Bellary) have also been postponed. The extent of line now in course of execution is 2,932½ miles, of which 1,353½ are expected to be opened during the present year, and the remainder in 1862. This will include the great trunk line from Calcutta to Delhi. The number of persons employed on the lines at present open is 18,789, of whom 1,137 are Europeans, and the rest natives, the employment of the latter being found increasingly practicable and advantageous, so that they now occupy some of the positions hitherto filled by Europeans, such as station masters, &c. A scheme has been brought forward for a line into the Guicowar's territory in connection with the Bombay and Baroda, and another to bring the French town of Karricall, on the coast of Madras, into communication with the Great Southern of India. These, however, are "foreign" works, and the Indian Government, although desirous of facilitating them, have no direct concern with them. The importance of constructing ordinary roads as feeders to the railways is engaging attention; the Madras Government having sanctioned the construction of 43 roads, of an aggregate length of 1,083 miles. The usual rate of speed is from 20 to 23 miles per hour. The annual earnings on 30th June were 318,310*l.*, and will probably amount to 400,000*l.* for the year ending 30th June next; but, although the indications of traffic are satisfactory, the ultimate prospects cannot be estimated with accuracy until the entire cost of each line is conclusively ascertained. The cost of the East Indian, for instance, was calculated at 12,000*l.* per mile, but it now seems that it will reach 16,000*l.*; so that instead of a revenue of 802,950*l.*, to produce a net 5 per cent., there must be a revenue of 1,100,000*l.* Out of 3,112,500 passengers, five have been killed. Up to the end of last year the total number of shareholders was 17,118, of whom only about 336 were native Indians. The latest estimates for completion of all the lines sanctioned in India amount to 56,000,000*l.*, of which, however, about 7,000,000*l.* represent the cost of the sections that are to be postponed, reducing the requisite amount to 49,000,000*l.* Of this sum, 34,396,445*l.* had been raised up to 30th April, the end of the Indian official year, leaving about 14,000,000*l.* to be supplied, of which at least 8,000,000*l*, is required for the twelve months ending 30th April, 1862. Of these eight millions, six will be expended in India.

U. S. Coast Survey.

The officers of the United States Coast Survey have effected their arrangements preparatory to commencing operations up the lakes. The steamer *Search* left Detroit on Monday, with a topographical party, in charge of Assistant W. H. Harding and W. T. Casgrain. The steamer *Planet* took up, Tuesday, a party in charge of Assistant H. E. Penny. The schooner *Surveyor* also left Detroit yesterday with a party, under the command of Assistant J. F. Potter. The schooner *Coquette* will, probably, leave in a few days, with a party of topographical engineers, in charge of D. F. Henry. The shore parties under command, respectively, of Messrs. Hardy, Penny and Henry, will commence operations on the West end of Lake Superior; and Assistant J. F. Potter's party will complete the work left undone last season on Lake Michigan. They will, probably, be gone till October.—*Detroit Free Press.*

A Discovery in Electro-Magnetism.

Mr. A. G. Halcomb, of New York City has recently obtained a patent for a combination of the positive or attractive force of the electro-magnet, with that of a permanent steel magnet; it having been discovered by him, that this combination will produce much greater magnetic power—so great that the operator can dispense entirely with the relay battery. By connecting the cones of an electro-magnet with a permanent steel magnet, a force is developed greatly in excess of the sum of the forces of the permanent and electro-magnetism when used separately. Thus place an electro bar magnet, with an attractive power equal to one ounce, in the north pole of a permanent steel magnet that has a magnetic power of ten ounces; and their united power instead of being eleven, which would be their sum, will be twenty-three.

Pennsylvania Coal Company.

The following gentlemen have been elected directors of this company for the ensuing year:—John Ewen, Wm. R. Griffith, Isaac L. Platt, Wm. F. Havemeyer, Thos. W. Pearsall, Chas. Morgan, Jonathan Thorne, Geo. L. Brown, John Q. Jones. At a subsequent meeting of the Directors, John Ewen was unanimously re-elected President of the Company for the ensuing year.

Albany and Susquehanna Railroad.

It is said that the Directors of this Company are determined to expedite this work from their own resources, and have that portion of the road between Albany and Schoharie completed and cars running by the early part of next summer. Much of the grading between these points is already done, except the heavy section lying in New Scotland, in this county, and the contract for the grading of this portion of the work has been let within the past few days to James Brady, of West Troy, and John Phelan of this city.—*Albany Atlas and Argus.*

New York Central Railroad.

It is said that on the occasion of the recent visit of the President and Directors of the New York Central Railroad Company to this city, it was definitely agreed or understood that the projected tunnel, under the Erie Canal, should be constructed the coming winter, so as to be ready for use next spring.

It was also ordered that a station house for locomotives be constructed in the eastern part of the city, to supply the place of one burned there some years since. The building will not be a round house, but a semi-circle, with turn-table out of doors, and will bontain stalls for about twenty locomotives. The location of the building was left with Mr. Chittenden, who will probably be here the present week to determine where the building shall be erected. The work will be commenced very soon. All the freight trains of the city are made up below North street, and despatched hence, and it would be convenient to have stalls for engines there.

The freight business of the company continues to be very large. Two new locomotives from the Schenectady Works were brought upon the Western Division last week, and we believe there are now 63 on this Division, all, or nearly all, in capital order. Such is the pressure, however, that the engines find plenty to do, and frequently double the road, making extra trips to keep the work up. On Friday an unusually large number of freight cars were sent eastward from Buffalo, including 104 cars laden with live stock, and all the engines which were there had business to bring down trains. The track, engines and rolling stock being in first rate order, enables the company to do an incredibly large amount of business. This company has recently purchased ten thousand tons of coal at Erie, Pa., to be delivered along the line of the road. Some of this purchase has already arrived in this city by Canal. This looks as though the Company intended to increase the number of coal-burning locomotives the coming season.—*Rochester Union.*

The Monster Cannons of America and England.

The new principle of casting large guns—hollow instead of solid—by means of a current of water introduced into the core which forms the mould of the bore, thus cooling from interior, has been successfully applied to the manufacture of a monster cannon at the Fort Pitt Foundry, Pittsburg, in the United States of America. It is found practically that guns of larger calibre, cast by the ordinary solid method, have not the requisite strength to bear the strain in firing, owing to the fact that melted iron shrinks in cooling, the process of solidifying not being simultaneous throughout the mass, but progressive from the surface inwards. In consequence of the strong compression formed on the outer and first cooled portions, it is obvious that, independently of flaws and cavities about the surface of the bore, where the greatest strength and hardness are required, the metal is there the least dense and the least hard of the whole mass; and it is mainly owing to this fact that guns become so soon unserviceable by the enlargement of the bore round the seat of the ball after prolonged firing. The state of compression on the outer crust of the gun assists the internal effort of the charge, and after a certain number of rounds, with full charges, the gun bursts. The greater the mass of the castings the greater the irregularities of structural arrangement, and the more unfit the gun bec.mes to resist the strain of explosion. Hence the hitherto practical limit to the calibre of cast iron guns; no nation having yet succeeded in manufacturiug safe and serviceable guns of more than ten inches calibre.

By the new process of cooling internally, the metal about the bore is in a state of compression, and the exterior in a state of tension; which, in fact, is what it ought to be in order to obtain the greater strength of the whole thickness of metal when subjected to internal strains. Moreover, the metal about the bore first cooled will be, as it should be, the hardest and densest. On the old system, on account of the inequalities produced in the physical structure of the metal, it is well known that, beyond a certain limit, little or no increase of strength is given to the gun by increasing its thickness of metal; and that on this account a practical limit has hitherto been placed to the manufacture of cannon of very large calibre, which would be found incapable of resisting the great strain to which rifled cannon are subject. A new era in the casting of iron cannon has commenced, and we now proceed to describe the last great practical result of this new and highly ingenious process.

The monster gun, better perhaps known by the name of the 15 inch gun, has the following dimensions:—Its total length is 15 feet 10 inches; greatest exterior diameter 4 feet across the breech, fining down to 25 inches at the muzzle. The thickness of metal behind the ellipsoidal chamber is twenty-five inches, and sixteen and a half inches at the junction of the bore with the chamber, fining down to five inches at the muzzle. The weight of this enormous piece of ordnance is nearly twenty-two tons. The solid sixty-eight pounder, the heaviest cast iron gun of our own service, weighs about four tons fifteen hundred weight.

The fifteen inch gun is mounted at Fortress Monroe upon an iron centre pintle carriage, running up and recoiling in the usual manner; and fires shells of two classes. The first, to be used where the greatest possible explosive effective is wanted, of the minimum thickness (two and a half inches) admissible to endure the shock of the charge, is about 305 pounds weight, containing about eighteen pounds of power. The second, for battering purposes, has a wall of five inches thickness and weighs 410 pounds. There is also a solid shot of the enormous weight of 425 pounds; but for the reasons already mentioned connected with solid castings of large masses, it is very doubtful if it is practicable to cast a satisfactory solid shot of this diameter. The windage allowed is one-tenth of an inch.

Major Barnard, of the American Engineers, who has published a most interesting account of this cannon, gives us the following summary of the practice carried on with it in the experimental trials:—In five trials, at 2,000 yards, with thirty-five pounds of powder, the lateral deviations were confined within five yards on either side of the target. The vertical deviations, probably due to varying initial velocities, or perhaps to some difference in the weight of the shells, ranged seventeen yards each way short and over. With forty pounds of larged grained powder the initial velocity was found to be 1,328 feet per second. The greatest range attained, with the maximum elevation of 28 deg. 35 min., was 5,730 yards, with a time of flight of twenty-seven seconds.

Such immense charges, however, produce far less strain on the gun than might be supposed, owing to the nature of the powder used, and described in the official reports as "large grained," and as "Rodman's perforated cake powder" The former is of 6-10ths inch cube in the size of its grains; the latter is compressed into solid cakes at a considerable pressure, and perforated with holes to admit access to the flame. The object intended by this improvement is to retard the burning (analogous to the plan adopted by Sir William Armstrong's slow burning powder), and thus reduce the excessive strain to which all guns are subject with fine grained powders, and which by the number of angles presented to the tongues of flame, are inflamed almost instantaneously, and before the heavy projectile is started from its seat. This result is estimated by a pressure gauge introduced into the chamber of the gun. The comparative initial pressures of the "perforated cake," "large grained," and common cannon powder, are estimated to have about the ratios of one-seventh, one-third, and unity—a result of very great importance in its bearing upon the practicability of using cast iron guns of extraordinary calibres.

It will be interesting at this point to notice the performance of the English monster gun, better known as the Horsfall gun, mounted near Southsea Castle, Portsmouth; this being the largest piece of ordnance hitherto made in this country. The weight of this gun is about twenty-two tons, and it throws a solid shot of about 360 pounds of weight. 130 rounds have been fired, with charges of forty and fifty pounds of powder; and with eighteen degrees of elevation a range of a little over 5,000 yards was obtained. But that the cannon was unable to stand these proof charges, comparatively moderate for its calibre, was known to be strongly suspected by the Director General of Artillery, and this opinion was confirmed by the discovery of a crack of over three inches in length in the chamber, when searched and examined lately by Captain Freeth, Assistant Inspector of Artillery. It is probable that it will be again subjected to proof at an early date. The American fifteen inch cannon had, up to the date of the latest reports, fired 350 rounds with full charges; and at the 300th round, when the last search was made, the most delicate tests applied to the bore failed to indicate the slightest enlargement or deterioration of any kind.—*London Army and Navy Gazette, May* 18.

Bridge over the Schuylkill at Norristown, Pennsylvania.

The new bridge, to take the place of the old one, over the Schuylkill river, at DeKalb street, Norristown, has been contracted for with Bolton, Christman & Co., of Norristown, at the rate of $22 25 per lineal foot. It is to be constructed on the Burr plan, and the work will be under the charge of Owen Raysor, of Bridgeport. The bridge is about 820 feet long and 37 feet wide, and is to be completed by the 1st of October. The company will proceed in a few days to remove the old structure, when they will raise the abutments and piers about eighteen inches. The old bridge

was built in 1826, having thus been in constant use, by a very large travel, for thirty-five years, during all which time it not only yielded a handsome per centage to the stockholders on their investments, but provided a sufficient surplus fund to pay the entire cost of its reconstruction.—*Germantown Telegraph.*

Eastern Bengal Railway.

This line, from Calcutta to Kooshtee, a distance of 108 miles, gives good promise of being opened in a year from this date. The earthworks will be completed in the course of six months; the whole of the brickwork is expected to be finished early in the spring of 1862; while several of the iron bridges are already in position, and others are in course of preparation for erection. Mr. Purdon announces that the two great cylinder bridges across the river Echamuttee, at 64 miles, and the river Koomar, at 93 miles 67 chains, are progressing steadily:—

"The first, consisting of five openings of 80 feet span, has almost all the columns raised to the full height to receive the superstructure, which is being conveniently put together on the spot, and will be erected before the end of the present year. The second, or Koomar bridge (the company's greatest work), consists of twelve openings of 80 feet span. The foundation columns for the south abutment, and four of the piers, have been sunk to the requisite depth by pneumatic pressure; and the remainder of the piers, together with the north abutment, are in rapid progress, and expected to be got down before the next rains; and the whole of the columns raised above the low water level by July next; and if successful there will be little difficulty in getting the entire bridge finished by May, 1862."

There are about 50 miles of general embankments and surface forming fully completed, and 40 miles thrown up, but not yet trimmed or consolidated, while 20 miles of the heavier embankments remain to be finished. The condition of the Calcutta terminus leaves little doubt of the booking-offices, passenger and carriage shed, &c., being roofed and otherwise finished by the end of 1861. The rolling stock will be next in readiness, with all the various equipments, such as water-cranes, turntables, &c., completed, and the line made ready for opening.—*London Railway Times.*

Stephenson and Brunel.

"The Life of Robert Stephenson, F. R. S., late President of the Institution of Civil Engineers," by John Cordy Jeaffreson, barrister-at-law, and William Pole, member of the Institution of Civil Engineers; and "Memoirs of the Life of Sir Marc Isambard Brunel, Civil Engineer, V. P., F. R. S., &c., by Richard Beamish, F. R. S., are announced by Messrs. Longmans, of London.

Lake Superior Copper Mines.

From Nov. 20, 1860, to June 1, 1861, the Pewabic mine produced 874,378 lbs. of ingot copper. In the same time last season, 391,870 lbs.; gain this year, 482,503 lbs.

From Nov. 20, 1860, to June 1, 1861, the Franklin mine yielded 658,002 lbs. of ingot copper. In the same period of the last season, 51,621 lbs; Gain this year 606,381 lbs. It thus appears that during the first six months of the present shipping year, these two mines show an excess of 1,088,889 lbs. of ingot copper, worth nearly $200,000 over the product of the same portion of the previous year.

At present, ingot copper is dull, though not heavier than many other leading articles of prime necessity. Its sale cannot be forced, to any extent, while its price is so low that in many localities it cannot be produced to much profit. But the last assertion does not apply to the leading American mines—certainly not to the Cliff, Minnesota, National, Pewabic, Quincy or Franklin. All of these are yielding largely, and in none of them does the refined metal cost above 15 cents per lb., at the outside. At some of them it is said to cost less than this figure; but even at 15 cents for cost, the product pays a profit of 25 cents with an unusually low price for copper.

Rise in the Price of Ship Timber.

The proposal of the Government to have built immediately forty or fifty gun-boats has thrown the timber market into quite a commotion, and in some classes of timber the prices have jumped up five or ten dollars in a single day. Hard pine is quite scarce, and those who have a stock on hand are quite fortunate. A representative of one of the largest ship builders in New York, who is understood to be a large competitor for the gun-boats, was in this city last week trying to buy up what hard pine he could find. He purchased one cargo and had it shipped to New York. In oak timber there is also a large increase in price, and a further advance is expected. There is quite a large quantity of timber cut and ready for shipment in Virginia, owned by Northern men, which, under the existing state of things, cannot be shipped North. We hear of one party who had four cargoes on shipboard, which their men were obliged to leave.—*Boston Journal.*

North Missouri Railroad.

This road is again open to St. Joseph. Its regular trips were resumed on the 20th inst.

NIAGARA STEAM FORGE,

LOCOMOTIVES FOR SALE.
THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

The Future of Our Manufacturing Interests.

To prophesy is, at all times, attended with more or less risk of reputation; unless like the oracle of Delphi we choose our language with a view to a double construction, so that we can resort to either one as future events may render necessary. To speak in reference to the future with a degree of confidence necessary to secure even our own belief, to say nothing of impressing others with similar views, has heretofore been equivalent to impossibility. War with its horrid realities, and especially a civil war, has been the last calamity that has ever entered into the minds of Americans; and now when it had really come and the hosts of armed men were hastening to a conflict, in which *brother's* blood must flow, men could not think, nor write—nor prophesy. They could only stand in amazement, while slowly the painful reality crept over them, and only the necessity for occupation led them back to life and forced them to accept as a fact that which no earthly power seemed adequate to avert.

Manufactures always suffer in times of general business prostration. The product of the workshop is the first want that ranges above actual necessity. In hard times men will only buy the food necessary to keep them in existence, and, consequently, the farmer reaps the benefit of his humble but sure occupation. The *cause*, however, of the general prostration has much to do in determining the extent to which a particular branch of business is to be affected. The country at large was never in a better condition. The balances of 1857 were all struck, and the economy which that crisis necessitated, had placed trade throughout the country upon a better footing; the harvest of 1860 was full, and the granaries of the West are still loaded with its products. Suddenly the dark cloud of war overspreads the horizon; the South no longer buys of the West; the West cannot pay its debt to the East; Southern State stocks fall, and Western Banks collapse, merchants cannot get money for their bills receivable, or in turn pay their debts or order more goods from the manufacturer. The factories stop work, and the mechanic, thrown out of employment, remains idle at home or enlists for the war. Thus while all the materials for prosperity exist, distress is the universe cry. Is this thing to continue? is the question we now propose to ask and to answer. There are many facts which afford something of a data upon which we can base a calculation with some degree of confidence; and these have led us to the conclusion that the worst of the "hard times" are over, and that for the manufacturing and railroad interests an era of prosperity is about to open.

We call attention to the truth, in the first place, that as in ordinary times much of our apparent prosperity is fictitious, so, in hard times, much of our distress is also fictitious or exaggerated. In "good times," men do business largely on their own credit, and *trust largely to the credit* of others; but when a time comes when ordinary caution only should be used, immediately business men distrust too easily their neighbors' credit, and their own credit is distrusted in return: hence follows a panic and universal prostration. With the return of events calculated to inspire confidence, credit is again restored and its attending prosperity follows. The war is at present the great drawback. But accepting the war as a fact, what is likely to be the result? In any event, the locality of the war will be confined to the Border States: the inhabitants of the great and populous districts of the North will not be harrassed by fears of personal danger, and they will, therefore be left to pursue quietly their occupations. The surplus population will go to the war, and the money spent in their outfit and in the payment of their wages will be circulated among the people at large and create at once a vast body of consumers. The effect of this has already begun to be felt in an increased demand for domestic goods. The West will undoubtedly suffer from the loss of its southern market, but its produce is beginning to move eastward; and while this tends to square up eastern debts, it also gives employment to the great lines of railroad. As the South is cut off, the commercial intimacy between the West and the East must increase.

Another great source of demand will be found in the destruction of property during the war. Already a number of bridges, costing immense sums of money, time and labor, have been destroyed. No less than forty-seven locomotives belonging to the Baltimore and Ohio Railroad have been destroyed, together with a large amount of its rolling stock. To fit out this road alone would set a large number of our machine shops at work, and give employment to hundreds of operatives. Wherever the hostile armies penetrate there goes destruction to buildings, and machinery of all kinds; especially to railroads, with a view of obstructing the advance of the foe. This, it is true, is a loss to the country; but the immediate effect is to cause renewed activity in the department necessary to reconstruct the property destroyed, while the loss is distributed over the whole community and shared not only by ourselves, but our posterity.

Thus admitting the war goes on, still we think that the manufacturing interest of the country is about to revive. The chief loss we feel is in southern trade; but recovering from this, we find the great West still open, and ready to make good bargains. The disinclination to import foreign goods, as well as the economy felt to be necessary by all classes, encourages domestic manufactures, and supplies in no small measure the place of a protective tariff. On the other hand, should the war, happily, terminate, the reaction in business would not only be great, but it would rest upon a

firmer foundation, for the very economy which the masses of the community have been compelled to exercise. Our citizens are not poor;—they are exercising economy, and are cautious about entering upon new enterprises, and this very spirit will ensure a steady revival of confidence and business, which, acting in conjunction with causes already noted, will impart new vigor to our manufacturing interests.

Philadelphia and Erie Railroad.

A special meeting of the stockholders in this road was held at the office of the company, Walnut St., Philadelphia, on Thursday, the 27th ult., for the purpose of considering a proposition having for its object the leasing of the road to the Pennsylvania Railroad Company, and its early completion from Sunbury to Erie. The meeting was organized by the appointment of Gideon J. Ball, Esq., of Erie, as Chairman, and P. M. Price, Esq., of Lock Haven as Secretary. Wm. G. Morehead, Esq., President of the Company, then read the following report:

To the Stockholders of the Philadelphia and Erie Railroad Company.

Gentlemen: Since your last annual meeting, the extraordinary condition of the country has seemed to render it necessary for your Board of Managers to agree upon a permanent lease of your road to the Pennsylvania Railroad Company, as the only means of securing its speedy completion, and you have been called together especially at this time to take the terms of the lease into consideration, and if it meet your approval, give it your ratification. The Board of Managers have had this subject before them for several weeks, during which they have given to it, in all its details, their anxious and deliberate consideration, and they have arrived at the result just stated, only after having exhausted every other possible means within their control to continue the prosecution of the work. By the passage of the act last winter, authorizing them to issue $5,000,000 of first mortgage bonds—the State receiving second mortgage bonds in exchange for those given her in 1857 for the purchase of the State canals—your Board fully believed that they would have no difficulty in negotiating said bonds for an amount sufficient to enable them to complete and fully equip the road. In this they have been disappointed by the present national difficulties, which preclude the possibility of negotiating bonds on any unfinished road, in this country or in Europe.

From this cause they have been unable to go on with the work, or to realize from any source sufficient means to enable them to pay the existing pressing liabilities of the company.

It is not deemed necessary to detain you here by going into a detail of the terms of the lease, as the same is herewith presented. It has been confirmed by the respective Boards of the two Companies; and if carried into effect by your ratification, which is now solicited by the Board, no doubt is entertained but it will furnish all the means necessary for present relief, and for the speedy completion and equipment of the road.

By order of the Board,

Wm. G. Moorhead, *President.*

The Secretary, Mr. Price, then read the form of lease proposed by the Philadelphia and Erie Railroad Company, and amended by the Pennsylvania Railroad Company.

Various amendments in the wording of the lease were proposed, and some discussion ensued, without, however, any decided action. It was finally determined to adjourn, to meet again Friday morning, in order that the Common Council (the City of Philadelphia being a large stockholder in the road) at a meeting to be held the same afternoon, might finish their action on the resolution passed the week previous by a Select Council, authorizing the Mayor to vote the city stock. In order that this matter may be more clearly understood, we give the following extract from the proceedings of a meeting held by the Select Council on the 15th:—

Communication received from the City Directors of the Philadelphia and Erie Railroad Company:

"The directors elected by your honorable bodies to represent the city of Philadelphia in the Board of Directors of the Philadelphia (late the Sunbury) and Erie Railroad Company, deem it their duty to communicate to you the proceedings of the Board of Directors of the Company, so that you can take the necessary steps to secure the interests of the City.

It is well known to most of you, that at the last regular session of the Legislature, an act was passed to relieve said Philadelphia and Erie Railroad Company from the embarrassments into which it had fallen by reason of their inability to pay the State the interest which had become due them on the purchase and sale of the canals. This act was highly advantageous to the company, but the financial depression which has followed the troubles now existing in our country, has in part prevented the accomplishment of the desire entertained by your representatives of seeing the road in the progress of completion.

Efforts were made to negotiate the bonds of the Company, but without success, and in addition to this the outstanding floating liabilities of the company were rapidly maturing, with no prospect in view of means wherewith to meet them. Under these circumstances, a proposition was made to lease the road to the Pennsylvania Railroad Company, for the period of nine hundred and ninety-nine years; the Pennsylvania Railroad Company to endorse and guarantee the interest and payment at maturity of $3,500,000 of the bonds of the five millions loan authorized by the recent act of Assembly, said company to run the road, keep it in order and pay forty per cent. of the gross earnings of the road to the said Philadelphia and Erie Railroad Company.

The draft of a lease was submitted to the Board of Directors and considered by them. Your representatives earnestly entreated them to delay action thereon until the lease could be perfected, and all the necessary shields and guards had been inserted therein, to secure the proper development of the resources of the road for business as well as the correct and faithful application of the means secured by the said endorsement and guarantee, towards the early completion of the road and the disbursements therefor, hoping thus to assure the city that there was some hope of a return for the *two and a quarter millions of dollars* invested therein. This was obtained, and a consultation with the Committee of Railroads from your honorable bodies was had, and at their instance a provision was inserted in the proposed lease requiring the approval of the Pennsylvania Railroad Company to the contracts for the completion of the road and the expenditures therefor. Being thus secured in having the services of competent railroad management for all work to be done, and the proper disbursement of the funds, your directors cast their votes for the lease, and it obtained a unanimous vote of the Board.

The measure having been agreed to by the Board it must next be submitted to the stockholders for their consideration and action, and in view of this a meeting has been called for the 27th instant, at which said proposed lease will be submitted.

Having reference to the peculiar condition of the company as found by them when taking their places—the utter inability of the management to meet its obligations, and the impossibility of proceeding with the construction of the line without some additional aid, your representatives found in this proposed measure the only mode of relief, and having succeeded in surrounding the proposition with all the guards which they esteemed necessary for the protection of every interest of the city, they acted as above suggested, and recommend to your honorable bodies the immediate passage of a resolution, authorizing the vote of the city to be cast in favor of the measure at the stockholders' meeting, to be held as above."

At the meeting of the Select Council on the 27th, the subject came before the body at a late hour, and there being no quorum to vote, the subject was postponed till the next meeting, to take place on the 11th inst.

The adjourned meeting of the stockholders was held on the 28th, and the subjoined resolutions, rendered necessary by the non-action of the Common Council, were passed by an almost unanimous vote, about two millions of stock being represented by persons present:

Resolved, That in the opinion of this meeting it is of vital importance to the interests of the stockholders that authority be given to the President and Managers to execute and carry into effect a contract with the Pennsylvania Railroad Company, without unnecessary delay.

Resolved, That as the City of Philadelphia is the owner of nearly one-half of the entire stock of this company, the whole of which, together with all other municipal and private subscriptions, is in imminent danger of sacrifice, unless the said contract be consummated, this meeting does hereby respectfully, but earnestly, request the Councils of the said City to co-operate with other stockholders in their efforts to complete the road, and save their property, by authorizing the vote of the City to be cast, without delay, in favor of said contract.

Resolved, That a copy of these resolutions be transmitted to the Mayor of Philadelphia, with a request that he will communicate them to the City Councils, at the earliest practical period, and that this meeting do now adjourn till four o'clock P. M., on Tuesday next, to await the action of that body.

Thereupon the meeting of the stockholders adjourned, to meet again on the 2d inst., it being understood that a special meeting of the Council had been called for the 1st inst., to consider the question.

Philadelphia and Erie Railroad.

By an act of the last Legislature of Pennsylvania, the name of this road was changed from the "Sunbury and Erie," to the Philadelphia and Erie Railroad, which is now its corporate title, and in which name it will hereafter transact all its business. An act of the same legislature also authorized the Governor to appoint a commissioner, for the purpose of proceeding over the road, examine its grading, decide upon the work performed, and report to the Governor a full and accurate account of the condition of the road. After this report has been made, it will be decided by the Governor whether the bonds deposited with the State authorities, securing the faithful expenditure of the money appropriated by the State for the completion of this road, can be lifted without damage to the Commonwealth.

In compliance with the provisions of this act authorizing the appointment of the said Commissioner, the Governor has appointed Col. John A. Wright, who will at once proceed to the discharge of the duty thus assigned him. In this appointment the interests of the State will be faithfully represented, as few men are the superiors of Col. Wright in the knowledge of railroads, their construction and operation. With this experience and knowledge, Colonel Wright also carries to his work a business capacity that has already won him a character for industry and integrity of which any man may well be proud.

The people of Pennsylvania will look for this report with an interest commensurate with the importance of this great public improvement, which is of itself a monument of Pennsylvania enterprise. The country it traverses, the immense resources which it will assist in developing, the new markets it will create along its line, and the

easure and travel it is destined to pour into the p of our beautiful metropolis on the banks of the elaware, make the Philadelphia and Erie Raiload one of the most important links in the great chain of improvements with which Pennsylvania is binding her interests to those of distant territories, and with which she is also drawing into closer communication her own towns and cities.—*Harrisburg Telegraph.*

The Drain of Gold to America--Causes and Consequences of the Transfer.

The dispatch of £5,000,000 ($20,000,000) in gold to New York during the early part of the year was followed, with only a short intermission, by a further sum of £1,400,000, forwarded within the past three weeks. Of this latter total, £320,000 had already arrived out at the date of the last advices, yet the rate of exchange showed no improvement, the quotation being still 105½. All the leading bankers in that city as well as the principal firms here are perplexed at this result. The apparently anomalous remittances in January and February were in some measure accounted for—after a variety of futile explanations had been attempted—by the rush of our people to purchase American securities at what they believed to be greatly depreciated prices, but since that time their operations are believed on the average to have tended rather the other way. With the cotton season closed and little produce to come forward except grain, flour and salted provisions, the fact that under these circumstances we are still remitting bullion at the rate of more than a million and a half a month may well excite surprise. The value even of the enormous quantities of breadstuffs we are receiving from New York cannot be estimated at more than about £1,300,000 per month, and, as the American importation of our goods—although greatly reduced—has still continued during the present year at a monthly rate of at least £1,000,000, the existence of a very adverse balance seems now inexplicable. But of course there must be a satisfactory reason for it, and a little reflection will show where it lies.

For years past we have acted as bankers for America in nearly all her transactions with the East, and partially also in those with the continent, Australia, and elsewhere. When a merchant in America sent orders to China or India, he would direct the bills for the amount to be drawn upon his correspondents in London, and to provide for this liability he would remit bills or specie to our market. Hence there was a steady flow hither of California gold, and the rate of exchange at New York was nearly always in favor of England. But it now appears that since January there has been a remarkable suspension of American orders to the East, as well as to the continent of Europe, and consequently that the claims on London falling due from those quarters on American account, must for some time be unusually small. The Americans not having to provide for such claims have been enabled to instruct us to remit to them in specie those amounts we should otherwise have had to retain in preparation for payments to other parties on their account. Thus, while their rates of exchange have been rendered most unfavorable to us, those between China and England and the Continent and England have been advantageously influenced. With this solution, we can understand how it is that since the beginning of January we have parted with £6,000,000 of gold to America, instead of receiving from her a certain amount, as under normal circumstances we should have done, and that the bank bullion, nevertheless, stands at this moment almost exactly as high as at that period. We shall at the same time be relieved of such disquiet as may have prevailed from the many statements circulated as to the nature of the American drain and the predictions as to its consequences. Sound observers could see from the first that, practically, there could be no long continued injurious draft upon our resources from that quarter.—*London Times.*

New York and Harlem Railroad.

In reply to the statement in some of the city journals that the Harlem Railroad Company had made an assignment, and was to be re-organized, the company has thought proper to make the following explanation. It appears that the new mortgage contains no stipulations not usual in railroad mortgages, and that the stockholders are in no worse condition than before its issue:

NEW YORK AND HARLEM RAILROAD CO.,
PRESIDENT'S OFFICE, NEW YORK, June 25, 1861,

Some erroneous statements having appeared in the newspapers in reference to the condition of the Harlem Railroad Company, and particularly in regard to an issue of new bonds, I deem it proper to make a statement of facts.

Since the year 1857 some of the unsecured bonds of the company have matured, the amount now due and to become due within the next five years, being $300,000. To take up these bonds and to protect all parties in interest, the Board of Directors have decided to issue new bonds of the company to the amount of five hundred thousand dollars, secured by a mortgage upon the road, rolling stock and all the real estate lying north of Forty-second street. This will be a fourth mortgage. A considerable amount of city property, between Forty-second and Forty-fourth streets, and not embraced in prior mortgages, is covered by the new mortgage. The bonds thus to be issued are to be exchanged *at par* for the overdue bonds, so that there will be no increase of the debt, the operation being merely to substitute ten years' bonds for those already due. The remainder of the issue will be appropriated to secure the small floating debt and to the extension of the city track through Madison avenue. The terms of the new mortgages are similar to those of the third mortgage. There is no assignment to trustees. Three trustees are named, as is usual in railroad mortgages, for the protection of the mortgage security. No arrearages of interest remain unpaid on the bonds of this company. The interest on all the bonds, secured and unsecured, has been fully and punctually paid, and the road for the past three years has earned, and now earns, sufficient to pay its expenses and the interest on all its debts; but, it is utterly impossible for the company to pay the principal of the unsecured bonds.

Though the gross receipts may be somewhat diminished as compared with the past year, in consequence of the existing war, yet the good condition of the track and rolling stock allows the expense to be decreased, so that the net revenue will probably not be impaired. When the present Board took possession of the road, in 1857, the track and rolling stock were very much out of repair, and large outlays have been made in renewing them; being now in good condition, a more moderate expenditure will keep them up.

In authorizing the new issue of mortgage bonds, to take up those which have become due, the Board has deemed that the interest of all parties would be best secured and protected.

ALLAN CAMPBELL, President.

Baltimore City Passenger Railway.

A meeting of the proprietors and stockholders of the City Passenger Railway Association has been held to elect a President and Directors for the ensuing year. It is said that two tickets were placed in nomination. The following, of which a majority are citizens of Baltimore, were elected: President, Henry Tyson; Directors, Jonathan Brock, J. W. Randolph, John W. Walker, Wm. Chestnut, A. W. Markley and C. S. Grove.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics*."

American Railroad Journal.

Saturday, July 6, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Money and Business.

The table in the adjoining column will show the fluctuations of the Stock Market during the past week. We gave last week, and the week previous, a list of dividends declared by the different railroad companies, and when and where payable, and the same in reference to the payment of interest upon railroad, city, county and State bonds. This list is continued in the present number; and although a little behind time, is still valuable for future reference. The Banks and Insurance Companies have also declared their usual dividends. With two or three exceptions, noted below, the interest upon Southern Stocks and bonds has been withheld. Virginia paid the interest upon her sterling bonds held abroad; Florida, upon her bonds hypothecated in this market. The State of Kentucky, and the City of Louisville, have paid. So, also has the City of Mobile. The interest upon the bonds of St. Louis County has been met, together with the bonds of Missouri issued to the Hannibal and St. Joseph Railroad. In view of this, the Board of Brokers voted Monday that all Southern Stocks be sold hereafter at the Board, July interest on—the following being exempted from the rule: the bonds of Kentucky, the bonds of Missouri issued to the Hannibal and St. Joseph Railroad Company, and also those of Louisiana, which, being always paid at New Orleans, the Board deemed it wise to sell interest off.

General produce is rather heavy, and foreign shipments continue. The shipments of domestic produce for the fiscal year are by far the heaviest in value ever reported, and the largest increase has been made since the commencement of our political troubles. The business doing in imports and domestic commission goods show a slight improvement.

The rates of exchange for the European Steamer of Wednesday advanced to 106½ and 106¾, owing to the extra demand, on account of the July dividends on American securities collected for European holders.

We understand that notwithstanding the report in circulation that the Attorney General of Pennsylvania had forbidden the payment of interest on Philadelphia securities to individuals in the seceding States, the Treasurer is paying to all without any inquiry as to their residence.

Efforts have been made to induce the Secretary of the Treasury to modify the circular issued to the Treasury department in this city in reference to the July coupons on the Texas Indemnity 5 per cent. loan of 1865—but so far without success.

It is asserted officially that no irregularity exists in the accounts of the late treasurer of the New York Central Railroad, whose decease was announced on Tuesday.

The coupons due July 1st, on the mortgage bonds of the Long Island Railroad Company, will be paid at the City Bank of Brooklyn.

The coupons due July 1st, on the bonds of the City of Brooklyn, will be paid at the Long Island Bank in that city.

The coupons of the Evansville and Illinois Railroad Company, due 1st July, will be paid at the office of the Farmers' Loan and Trust Company, 56 Wall St.

The Hartford and New Haven Railroad Company, have declared a semi-annual dividend of $3 per share, payable to the New York stockholders, at the Union Bank in this city.

The State of Ohio has placed in this city the money required to pay the 1st of July interest on her Public Debt. It will be borne in mind that all dues on this account not applied for at the State Agency in New York, No. 25 William street, by the 15th July, will be returned to Columbus, to be disbursed on the application of stockholders, from the State Treasury direct.

The New York, Providence and Boston Railroad Co., has declared a dividend of two per cent., payable at the office of M. Morgan & Sons, No. 37 William St.

The Nassau Bank will pay the interest coupons due July 1, on the bonds of Muskingum County, and City of Zanesville, Ohio.

Messrs. Gilman, Son & Co. state that they are informed by telegraph that funds will be provided for the payment of the July coupons of the bonds of Fulton County, Illinois, though remittances may be delayed a few days after the first.

The Treasurer of Philadelphia announces that he is ready to pay the city loans maturing July 1, and also the semi-annual interest on the funded debt of the city.

The dividend of 5 per cent. declared by the Buffalo and State Line Railroad Co., is payable on the 15th of August next, not on the 15th of July, as stated last week.

The coupons due 1st July, 1861, on $400,000 first mortgage bonds of the Sacramento Valley Railroad Company, will be paid at the office of Schuchardt & Gebhard.

The deferred February coupon on the first mortgage bonds of the Wabash Valley Road (Lake Erie, Wabash and St. Louis Company) will be paid at the Bank of the Republic.

The interest coupons of the third mortgage bonds and bonds of 1872, of the New York and Harlem Railroad Co., due July 1, will be paid at the Treasurer's Office, corner of 4th Avenue and 26th Street.

The interest due July 1, on bonds of the Lackawanna and Bloomsburg Railroad Company, will be paid at the Mercantile Bank.

The following bonds and coupons, due July 1, are paid at the office of Duncan, Sherman & Co.: Chicago City bonds; Chicago City coupons, municipal; Chicago City coupons, water; Albany City bonds; Albany City coupons; Utica City coupons; Detroit and Pontiac Railroad coupons; Atlantic and Great Western Railway coupons; Buffalo and State Line Railroad coupons; Buffalo City coupons; Buffalo City bonds; also interest on New York State 5½ and 6 per cent stocks.

The Paterson and Ramapo Railroad Co. have declared a dividend of 2 per cent.; also, the Paterson and Hudson River Railroad Co., a dividend of 4 per cent., both payable at the offices of the Treasurers in Paterson.

The interest on the State Debt of Illinois is paid by the American Exchange Bank.

The July interest on the County debt of St. Louis County, Missouri, has been deposited with the Bank of Commerce.

The interest on the bonds of the State of Kentucky, and City of Louisville, due July 1, will be paid at the Bank of America.

The interest on the debt of the City of Mobile is paid by the Merchants Bank.

Messrs. Meigs & Smith pay the interest on the debt of Florida.

National Finances.

Various schemes are now before the public, having for their object, the replenishing of the Government treasury and, incidentally, the relief of the country at large from the present financial embarrassment. Secretary Chase is not destitute of advisers; but we conceive it to be no light task to determine from the multitude of them the one that is the wisest, or the plan that in actual trial will result the best; nor do we envy the responsibilities that rest in the execution of this important trust.

The great object to be kept in view is the preservation of the Government credit. A perpetual borrower is apt, in time, to lose his credit, and therefore his ability to borrow. In proportion as the want is created, the ability decreases. A man's credit is never so good as when his neighbors know that there is no occasion, and that he does not wish to borrow; and as it is with individual, so is it with government credit—the difference being rather in favor of the individual than the Government; for an individual may excite sympathy, and so gain as a favor that which he cannot pay for; but this is never the case with a government. The raising of the necessary funds with the least sacrifice of the public credit, is perhaps the only *legitimate* object which the Treasury department should have in view; but it is maintained that another good may be secured, which, while preserving the public credit and providing the necessary funds, will also furnish a currency, or an equivalent, uniform throughout the States, to take the place of the depreciated money which is now extensively in circulation at the West, and which adds embarrassment to the already prostrated business interest of the country.

One scheme proposed is the establishment of a United States Bank, which, while giving an uniform currency, and relieving business, will also lend to the Government sufficient to carry it through its difficulties. This, however, we do not believe will be approved. The opposition made to the old United States Bank would be likely to revive, and it would receive the additional opposition of the now numerous petty banks and bank stockholders scattered throughout all the States.

Another scheme is the issuing of small Treasury notes based upon a deposit of specie, equivalent to 25 per cent. of the amount issued, and the balance 75 per cent., in United States bonds. Backed by the government credit, it is thought that these would be received in general circulation, and the specie deposit would be sufficient for the redemption of those presented. Direct taxation is also urged by some; but this is generally obnoxious; it would create a vast body of office holders necessary to collect the revenue; and while meeting the demands of the Government, it still would do nothing towards furnishing a national currency.

A writer in the New York *Times* suggests the raising of "twenty or thirty millions in 20 years' stock, interest at 7 per cent., to be retained in coin as a specie basis; four hundred and seventy millions in Treasury notes of five dollars and upwards, redeemable at pleasure, bearing interest at the rate of seven per cent. per annum; payable yearly, on presentation of certificate at certain banks located at the principal cities of the Union: convertible into stock having 20 years to run from the passage of the act, at the option of any holder of $500 and upwards (when the interest is paid, the payment is to be stamped upon the back of the note) and to facilitate their use as currency, *custom* can establish that periods of three months only shall draw interest. Coin to be demanded of them only at the offices of the Sub-Treasuries, and from thence to be re-issued; and to be used by the Government in payment of every due or purchase whatsoever. Or, two hundred millions in notes, three hundred millions in stock, to be issued at par only."

The fact that these notes bear interest, and are convertible into stock in sums of $500, would tend to make them sought after as investments for small sums as well as large, and would also in time come to be used as deposits with the State Comptrollers by the Banks themselves in order to secure their own issue. One of the evils under which we are at present suffering, arises from the fact that a great variety of securities are received by the various States as security for the bills issued by the Banks organized under their respective laws: thus the Banks of Illinois secured by Southern State stocks, are affected disastrously by the depreciation of those securities in the New York market; and what has now taken place in reference to these Banks, may take place at any future time in reference to other Banks secured in a similar manner.

The issue of small notes, of $5 and upwards, bearing interest at 7 per cent., would tend, we think, to make them desirable to thousands as a means of laying up money, who now never attempt to save or accumulate. The laborer with a five dollar Treasury note in his pocket, the mechanic or the clerk with twenty-five, has a *productive* fund, which while it lays idly in his pocket is yet making for him a profit, and continuing to pay him for his past labor; he is thus stimulated to economy, perseverance, and renewed industry; he becomes with age a greater man, a better citizen, and a much stronger support to the Government itself. It seems to us that there is also a justice in having a circulating medium which will bear interest payable to the bearer. Now the Banks make the interest, and get a premium for circulating their own notes. We do not object to the Banks doing this. We think the Banks should be allowed to sell their bills to the highest bidder, and the fact that they sell at all is proof that they are wanted; but if a circulating medium can be made to bear interest, we see that manifest good is likely, in many cases, to be the result.

What plan will finally be recommended to Congress by Secretary Chase, we, of course, have no means of judging. Certain it is that the country needs all the financeering ability it possesses; and we hope the end will prove the wisdom of the means adopted.

Locomotive Performances on the Illinois Central Railroad for May, 1861.

We are indebted to SAMUEL J. HAYES, Esq., Superintendent of Machinery, for a copy of his statement of the Performance of Locomotives on the Illinois Central railroad for May, 1861, from which the following is compiled:

	Chicago branch.	South division.	North division.	Total.
Miles of road.	252.5	230.75	225.0	708.25
MILES RUN.				
By pass. trains.	32,093	26,892	25,216	84,201
" freight "	31,799	12,847	25,285	69,931
" other "	14,044	9,692	7,111	30,847
Tot. miles run.	77,936	49,431	57,612	184,979
RUNNING EXPENSES.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending June 15th, 1861, were.....$66,025 84
Corresponding week, 1860..... 54,105 50

Increase.....$11,920 34
Tot. traffic from July 1, 1860, to date,$3,332,663 53
Corresponding period, 1859 ..... 2,795,805 22

Increase.....$536,858 31

The earnings and expenses for May, 1860 and 1861, of the Watertown and Rome Railroad, were as follows:

	1860.	1861.
EARNINGS.		
From Passengers	$10,056 94	$9,752 35
" Freight	18,534 78	20,240 96
" Miscellaneous	2,862 06	2,116 91
Total	$31,453 78	$32,120 23
EXPENSES.		
Maintaining road	$9,063 65	$5,350 24
Repairs of machinery	2,283 07	2,350 24
Operating road	7,116 18	8,983 87
Overcharges refunded	45 95	30 05
Total	$18,478 85	$17,511 23
Net	$12,974 93	$14,809 00

The earnings of the Cincinnati, Wilmington and Zanesville Railroad in May were $13,685 84; and the expenses $12,544 43.

The following are the earnings of the Great Western Railway of Canada for the week ending June 21, 1861:

Passengers.....$16,365 45
Freight and live stock 14,209 58
Mails and sundries 1,406 88

Total.....$31,981 91
Corresponding week of last year..... 29,310 00

Increase in 1861.....$2,671 91

Michigan Central Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: John W. Brooks, Nathaniel Thayer, R. B. Forbes, H. H. Hunnewell, and J. M. Forbes, of Boston; Elon Farnsworth, of Detroit, and Erastus Corning, D. D. Wilkinson, and George F. Tallman, of New York.

Buffalo and State Line Railroad.

The following gentlemen were elected directors of company on the 25th ult.: George Palmer, Alanson Robinson, Henry L. Lansing, Buffalo; Dean Richmond, Batavia; Joseph Field, Rochester; James S. Wadsworth, Genesee; Charles L. Lee, Silver Creek; George W. Patterson, Westfield; William Keep, Lockport; John Wilkinson, Hamilton White, Syracuse; Daniel Drew, Nathaniel Marsh, New York.

Halifax and Quebec Railway.

We have seen a letter from Mr. Nelson, of London, who says that in a few days Lord Elgin (formerly Governor General of Canada) would bring the subject of the Halifax and Quebec Railway before the House of Lords.—*St. John News.*

New York and New Haven Railroad Company.

The following is a comparative view of the receipts and expenses of this company from April 1st 1852, to April 1, 1861:

April to April.	Total Receipts.	Proportion paid Harlem R. R. Company.	Earnings of the New York & N. Haven R. R. Company.	Current Expenses.
1852 and 1853.				
Passengers	$666,283 19			
Freight	120,315 42			
Mail, express, etc.	20,005 53			
	$806,604 14	$67,170 06	$739,434 08	$418,372 87
1853 and 1854.				
Passengers	$776,250 03			
Freight	141,550 42

	$1,018,068 16	$92,992 40	$925,075 76	$599,602 20

The Whitworth Gun.

Whitworth's guns were tested at Southport, near Liverpool, on the 15th and 24 of April last. Four of his guns were tested. Two were three-pounders, the guns weighing only 208 pounds. One was a twelve-pounder—the calibre of the guns just received at Washington. The London *Illustrated News* says, of the three-pounders, they shot *five miles and a half!* This range the London *News* says, was greater "than that of any gun of any calibre that had before been tried, not excepting any made by Sir William Armstrong. He on one occasion succeeded in throwing a 32 pound shot 5 miles and 330 yards—a range which neither he himself nor any one else exceeded until it was far surpassed by Mr. Whitworth."

The *News* thus far compares the Whitworth gun with the far-famous Armstrong gun:—

It has since been said that precision rather than range was chiefly aimed at by Sir Wm. Armstrong. It would seem likely, however, that the gun that was able to give its shot the best impetus for flight would also give it the truest impetus for precision. The statement, however, had the high authority of Mr. Sidney Herbert, who supported it in the House of Commons by giving what must be taken to be the best results in precision obtained by Sir W. Armstrong. Out of forty shots fired with the Armstrong twelve-pounder, Mr. Herbert gave the results of fifteen, fired respectively at elevations of seven, eight, and nine degrees. And here we may contrast this mode, so often adopted in recording artillery practice, of giving the results of selected shots, with that adopted in recording the experiments at Southport. The exact result of every shot fired there has been published, without any suppression or allowance for trial or wild shots, and without any selection of a favorable per centage of the hits made. This enables any one acquainted with the subject, even though not present at the experiments, to deduce correct conclusions from them.

But to return to the account of the Armstrong twelve-pounder, which it will be interesting to compare with the Whitworth twelve-pounder, as to precision of fire as well as range. We quote

Mr. Herbert's speech made in the House on Friday, Feb. 17: "The last gun made by Sir William Armstrong, and sent to be tried, was a twelve-pounder. At 7 degrees of elevation, in five rounds, the range was from 2,465 to 2,495 yards, the difference in the range being 30 yards, and the greatest difference in width three yards." With these may be compared the practice with the Whitworth of the same calibre (twelve pounder), fired at the same elevation (7 degrees) on Feb. 21, as appears from the table below. The range was 3,078 yards to 3,107 yards, the difference in range being 29 yards, the greatest difference in width 1⅔ yard.

The range of the Whitworth at 7 degress (3,107 yards) exceeded the Armstrong at 7 degress (range 2,495 yards) by 612 yards; it, in fact, exceeded the range obtained by the latter gun at 8 degrees, and even 9 degrees, and was therefore not fixed at 8 degrees or 9 degrees.

Objections have been made to the Whitworth cannon on the score that it does not fire shell; but if, as Mr. Whitworth states, it is adapted for solid shot, and still better for shell and hollow shot filled with molten iron, the objection is without foundation. He also states that his guns are actually stronger than they are practically required to be, and may be fired, as mortars, at any elevation, and with the largest charge of powder that they can consume. This was strikingly illustrated by the practice of the three-pounder at Southport, when it was, with its carriage, elevated on a platform, and fired like a mortar at 35 degrees, without injuring it in any way. This must be ascribed to the fact that the recoil in guns firing the mechanically fitting projectiles from the polygonal bore is reduced to its minimum. The projectile is easily started; and in familar terms, soon acquires way when it is propelled through the smooth, well lubricated tube, and, as provision is made for keeping it at its Issues perfectly concentric with the bore, it is propelled under the conditions most favorable as to range and precision, and also as to recoil. The bore, as is well known, is a spiral hexagonal in section, the corners being rounded off. The pitch of the rifling, or the turn, is a rapid one.

The three-pounder is 70 inches long, and, with a bore of 1½ inches, has one turn in 40 inches, and weighs only 208 lbs. The twelve-pounder, with a bore of 3 2 inches, has one turn in 60 inches. The eighty-pounder, with a bore of 5 4 inches, has one turn in 100 inches. The quick turn and reduced bore are recognized as being the special features in the Whitworth system, both for rifled cannon and the rifled musket.

All the cannon fired at Southport are breech-loaders. The breech end of the gun is closed, when charged, by a cap screwed on something like a magnified top of a pencil case, except that, being of larger proportions, it is turned by a handle. The cap is not detached, but works in a hoop, which is connected by a hinge-joint to the breech of the gun.

The method of charging and working the gun is as follows: Two or three turns of the handle unscrews the breech-cap, which is received and supported in a hoop, and is then slung back, or rather on one side, like an opened door, leaving the breech end of the gun exposed. The projectile is then pushed in, and behind it is inserted a tin cartridge-case, containing the powder, and shaped hexagonally to fit the rifle bore. The powder is kept in the cartridge-case by a wad or hexagonal cake of lubricating material, such as a mixture of wax and tallow. In the rear end of the tin case is a small orifice corresponding with the vent, which is made in the centre of the breech-cap. The tin cartridge-case being inserted, the hinged hoop carrying the breech-cap is swung to in the door fashion, and by turning the handle, it is screwed firmly on the rear of the gun. An ordinary friction fusee is then inserted in the vent, made as stated, in the centre of the breech-cap, and the piece is discharged generally in less than a minute from the time of beginning to load, and that without any attempt at hurry.

When the piece is discharged there is no escape of gases from the breech; and when it is unscrewed and swung aside, the end of the tin cartridge-case is seized by hand, or by a suitable gripping instrument, and is withdrawn from the gun. The case thus brings away with it all the fouling deposits; and, as the barrel is completely lubricated by the lubricating wad, no sponging or cleansing by water is required; in fact the shots, as they issue, clean the gun.

Next to the gun itself, the tin cartridge-case, whose convenience and utility were strikingly manifest, was most admired. Its suitableness for storage and superiority over the old flannel bag were universally acknowledged.

It should be mentioned that, at different times during the continuance of the experiments, many military officers of high rank in our own and foreign services, and of acknowledged authority in matters relating to artillery, were present.

☞ The specie in the New York Banks on Tuesday, 2d inst., reached $45,500,000 which is 50 per cent. on their net deposits.

Camden and Atlantic Railroad.

The following gentlemen have been elected directors of this road for the ensuing year: John Brodhead, Stephen Colwell, Francis M. Drexel, A. J. Antelo, Andrew K. Hay, Joseph Porter, W. D. Bell, Jonathan Pitney, Enoch Doughty, Ellis Lewis, Joseph W. Cooper, William Schmœle, Thomas McKeen.

New Locomotive.

The Pennsylvania Railroad Company have recently placed upon their road a new locomotive of great power and finish. It was constructed at the Lancaster Works, and is intended for heavy freight trains. The driving-wheels are five feet in diameter, and the cylinders eighteen by twenty-two inches. A number of locomotives from this road have been sent South, for military use below Washington.

Traveling Slipway for Railroad Ferry.

Before the British Institution of Civil Engineers, April 16, 1861, the subjoined paper was read "On the Floating Railway across the Forth and Tay Ferries," by Mr. Wm. Hall, Assoc. Inst. C. E.

The works described in this paper were undertaken in connection with the Edinburgh, Perth, and Dundee Railway, for the purpose of establishing an unbroken communication between Edinburgh and the country north of the Tay, by which goods (and even passengers, if required) could be conveyed across the ferries, without removal from the wagons.

One of the chief difficulties which had to be overcome arose from the difference in the levels of low and high water, averaging 16 feet at spring tides. Several plans were proposed; among others, hydraulic and steam cranes, to lift or lower the wagons, but it was considered that this would be too slow a process, as well as be liable to damage the wagons. Another design proposed girders 100 feet in length, having one end hinged on shore, and the other attached to a floating caisson, to rise and fall with the tide; but, owing to the exposed situation, this would have rendered necessary the construction of costly protecting piers and jetties.

The works actually carried ont at the Forth Ferry consisted, on the east or sea side of the piers at Granton and Burntisland, of a slipway, having an inclination of 1 in 6, and constructed of solid masonry. Rails were laid upon this slipway, on which traversed a heavy platform, of a wedge shape, the upper surface being always horizontal. This platform was 65 feet in length and 21 ft. in breadth, and was formed of a wooden framework, having four main longitudinal timbers, into which rails were sunk. The platform rested upon 24 cast-iron wheels, each 30 inches in diameter, with a flange cast on the middle of the rim, so as to allow the wheels to bear evenly on both sides of the rails. To the sea end of this traveling platform were attached girders, by means of universal joints, four wrought-iron trough girders, for spanning the distance between the platform and the stern of the vessel. The girders were raised or lowered, as required, by two powerful winch crabs, placed on a staging elevated above the platform, at about the middle of its length. The two chains, one on each side, for lifting the girders, were passed round the barrels of the crabs, and thence over two derricks to the ends of the girders, counterbalance weights being attached to the other ends of the chains. To provide for the safety of the platform, in the event of the fracture of the hauling chain, two lines of racks were laid along the surface of the slipway, into which worked pawls, attached to the axles of the wheels. Steel points, turning on hinges, were attached to the ends of the girders and also to the pier ends of the main timbers of the platform, to prevent an abrupt transition of the wagons to or from the vessel. Each of the universal joints, by which the girders were attached to the platform, consisted of a bolt or pivot, 3½ inches in diameter, the middle of which was ball-shaped, and worked in a corresponding portion of a cup or socket. This socket was circular, and was made in two parts, having a projecting collar and flanges, which were clipped by, and were bolted to, the plates fixed to the main timbers of the platform. The socket was shaped in a radial form, to allow the pivot full play, and to permit of the ends of the girders moving 3 feet on each side. By these means, a range of position was obtained to the extent of 6 feet, to compensate for the pitching or rolling of the vessel.

A stationary engine of 30 H. P., similar to a locomotive with the wheels removed, was fixed on the quay, for raising or lowering the platform, and for drawing the wagons off the vessel. On the crank shaft of the engine was fixed a pinion, working into a wheel, on the shaft of which were three winding drums, one placed in the middle of each line of rails, and one in the centre of the intermediate space. The winding drums were 2 feet 10 inches in diameter, with flanges, on the periphery of which wood was bolted, and round which there was a wrought-iron friction band acting as a break. The speed of the engine was decreased by toothed wheels and pinions; seventy strokes of the engine giving thirty-five revolutions to the drums, and, by other intermediate wheels and pinions, three revolutions and one-fifth to the chain wheel. The weight of the platform was about 70 tons, and it was moved up and down the incline at a velocity of 18 feet per minute.

The steam vessel, named the "Leviathan," for conveying the goods traffic across the Forth, was built by Mr. R. Napier. It was constructed of iron, 172 feet long, 54¼ feet in breadth over, and 34 feet between, the paddle wheels, with 11 feet depth of hold. The draft of water, when loaded, was 6½ feet, and when unloaded, 4¾ feet. The vessel was propelled by two steeple engines, each working its own paddle, of the collective nominal power of 210 H. P. On the deck there was standage for three lines of wagons, the end ones on each line being "scotched." The description of rail used throughout was the inverted bridge rail, weighing 53 lbs. to the yard, the same as on the Granton Pier; and they were sunk into the longitudinal timbers, so as to be flush with the surface of the deck.

The works at Granton and Burntisland, on the Forth, including the slipways, platforms, stationary engines, and gearing, cost £10,000, and the "Leviathan," complete, £16,226. The working expenses for six months, ending July last, were £768 for the stationary engines and machinery, and £1,305 for the vessel.

The "Leviathan" generally made from four to five double trips, a distance each way of 5½ miles, in the day of 24 hours, and could take from thirty to thirty-five wagons at a time. During the last six months, 37,618 trucks had been so conveyed across the Forth. The time occupied in making a single trip was 26 minutes, and the operations of loading and unloading were performed in from five to eight minutes.

At the Tay Ferry, some modifications, suggest-

ed by experience, were made. The inclination of the slipway was 1 in 8, and it was formed of timbers resting upon wooden piles. The length of the ferry was only 7/8ths of a mile. The vessel, the "Napier," was 140 feet in length, 40¾ feet in broadth over, and 22 feet clear between, the paddle wheels; and she was propelled by a pair of oscillating engines of 112 H. P. There were two lines of rails on the deck, with standage for fifteen wagons. The vessel made from six to seven double trips, and carried on an average 180 wagons per day. The works cost, including the slipways, platforms, stationary engines, and gearing, £8,800, and the vessel, "Napier," complete, £9,182.

These works were designed by Mr. Bouch (M. Inst., C. E.,) and were executed under his directtons by the author; Messrs. Anderson being the contractors for working the ferries.

In conclusion, the author remarked, that the "Floating Railway" might be adopted with advantage in all places where the expense of a bridge or a tunnel offered an insurmountable obstacle, or where the navigation would not admit of interruption by the erection of a bridge, as at the Mersey and Bristol Channels, and across the Straits of Dover.—*Newton's London Journal of Arts.*

Journal of Railroad Law.

ROLLING STOCK AND EQUIPMENTS; LIABILITY OF, TO BE LEVIED UPON; A SALE WILL BE RESTRAINED WHEN THE COMPANY IS INSOLVENT OR THERE IS A MORTGAGE TRUST.

The assignees of the Richmond and Schuylkill Passenger Railway Company filed a bill in equity, in the Pennsylvania Supreme Court, and moved for an injunction to restrain the sheriff from selling the cars, horses, harness and other personal property belonging to the company. The sheriff was about to sell the property by virtue of certain executions issued upon judgments granted in favor of the defendants; and the whole amount of the judgments exceeded the supposed amount of the property so levied upon and belonging to the company. The company had mortgaged their road and personal property to secure bonds issued and sold by them to the amount of $100,000. The company was insolvent and had made an assignment in trust for its creditors, the assignee being one of the plaintiffs in this action.

The following is in substance, the opinion of the court rendered upon the decision. The court ordered a decree to be entered, stipulating for security to each creditor and for a continuance of the liens of the executions upon the property, until the validity of the mortgage should be decided, or until an execution should be returned and the process of sequestration should be instituted, and the property should be divided among the creditors *pro rata.*

WOODWARD, J.—The ground assumed by the plaintiffs is that the property seized by the sheriff is not subject to levy and sale under execution for two reasons; first, because "it is in law an accession to the franchise, belonging to it as much as the rails of the road, and cannot, therefore, be sold by the sheriff; and secondly, because it is so mortgaged to the said Imlay and Eckfelt, and they have a constructive possession or lien upon the same which forbids the sale."

I am not prepared to affirm the first of the above propositions. That the rolling stock and equipments of a railroad company may not be seized in execution and sold by a sheriff after the company has become insolvent, or has mortgaged its stock and equipments, is supported by sound reasons and respectable authorites. But in such cases the equity which would restrain a sale at law, springs from the fact of insolvency, or from the trusts created by the mortgage. Where, however, the question is presented independently both of insolvency and mortgage trusts—where the exemption from levy and sale is claimed on no other ground than that of accession to the corporate franchise, I cannot agree that rolling stock and equipments are as much exempt as the rails of the road. I know of no reason why a railroad company's horses and carriages may not be seized in execution by a judgment creditor in the same manner as the horses and carriages of any other debtor—no reason, I mean, that is intrinsic and self-existent in the economy of the corporation. Reasons may arise out of the equities created in favor of other parties by a state of insolvency, or the fact of a mortgage. These shall be noticed hereafter; but apart from these considerations—considering a railroad company with reference only to its judgment and execution creditors, I suppose it holds its personal property as all other debtors do, subject to levy and sale for debts. It is attempted to apply the doctrine of fixtures, and to treat every thing as part of the company's freehold which is essential to the carrying on of its appropriate business. That doctrine has never been so applied anywhere, I believe, certainly not here in Pennsylvania. If it be assumed that the company have a freehold in anything—even in the rails of their road or the ground whereon they rest, a particular lot of horses, harness and cars cannot be considered a part of the freehold, as between landlord and tenants, fixtures, or necessary articles ready to be used as fixtures, sometimes are considered. Among the goods levied on in this instance are four cars unfinished, sleighs, stoves, omnibuses, two clocks, six shovels, a looking-glass, a carpet, a settee and such like—are all these to be treated as fixtures—or in the language of the bill as accessories, to the franchise? They are, no doubt, all necessary to the successful prosecution of the company's business, and if cars and horses are to be exempted on ground so broad and indefinite, I do not see why everything in the levy is not equally entitled to exemption. Not to pursue this branch of the case further, I am of opinion that neither the company nor its assignee has an equity to demand a stay of a sheriff's sale of such goods and chattels as are in this levy.

How stands the case, then, upon the equities of the trustees in the mortgage? * * * *

I have concluded not to decide the question at present. With a hundred thousand dollars of outstanding bonds in the hands of *bona fide* holders, many of whom are not represented in this proceeding, except as the trustees may be regarded as their representatives—with a hasty and imperfect argument on a motion for special injunction before the coming in of the answer to the plaintiffs' bill, I should feel that I was putting the rights of parties to unwarrantable peril by authoritatively deciding so grave a question on this preliminary hearing. Let it be reserved, therefore, to the final hearing.

But in order not to decide anything on the effect of the mortgage, I must assume it as an existing fact in the cause. It does establish a trust for the bondholders. It does cover all the personal property of the company. It is not material that some of that property was acquired subsequent to the mortgage, for equity will support a mortgage in respect to such property, were the terms of the instrument are large enough to comprehend it. It is, therefore, a *de facto* mortgage of the goods levied in execution. So much I must assume, or else I am liable to prejudice the rights of parties beyond what I intend.

Assuming so much, can there be any doubt that equity will protect the property for the purposes of the trusts expressed in the mortgage? The reasoning of the late Justice McLean, and the authorities cited by him in the case of Hoe *vs.* Pennock & Hart, fully answer this question in favor of the plaintiffs.

Without deciding that the mortgage in this case is null and void as to the execution creditors, I feel constrained, at the suit of the trustees, to support its trusts. Until that is decided, equity is bound to protect the parties claiming under the mortgage. I do not feel willing to pass upon the validity of the mortgage in the circumstances of the present hearing. It seems to result, therefore, as a necessary consequence, that the interposition asked for should be granted.

What adds very much to the equities of the plaintiffs, and presses with considerable weight on my mind, is the fact charged in the bill and affidavits, and not controverted on the part of the defendants, that the company is totally insolvent and has made a general assignment for the benefit of creditors. The defendants are execution creditors of the company. As such they are subject to our statutes that regulate execution process against corporations. Now the act of 16th June, 1836, does in effect, though not very formally, classify all debtor corporations as either solvent or insolvent corporations. A solvent corporation is one whose estate is sufficient, an insolvent corporation is one whose estate is insufficient, to pay its debts. A judgment creditor of a corporation sees it in possession of real and personal estate and carrying on business in its appointed sphere. The *prima facie* presumption is that its estate is sufficent to pay its debts, and he issues his execution, and the sheriff goes on to make the money in the manner prescribed in the 72nd section of the act of 1836. If it is an improvement or transportation company, its canal or railroad, and whatever is an essential and indispensable incident of these may not be seized, but all its personal and real property, not so connected with its franchise, is leviable like any other debtor's personal or real property.

If, however, the execution be returned unsatisfied in whole or in part, then the 73rd section institutes the process of sequestration. Such a return becomes the legal evidence of insolvency and then the policy of the law is to substitute sequestration for all other execution process. Property that was liable to execution, but may not have been found by the sheriff, would not after that be liable to be seized in execution, but would pass to the sequestrator for the benefit of all the creditors.

Now the act of Assembly is founded on the clear equity that all creditors have to share in the assets of an insolvent corporation. If its estate will not pay its debts, divide it, *pro rata,* among the creditors, for equality is equity. And when in a court of equity the insolvency of the compa-

ny is shown, not indeed in the statutory mode, but in a manner quite as satisfactory, are we not to interpose and protect the property from the sacrifices of a sheriff's sale, and secure it in some manner to the use of all the creditors *pro rata?* We have no power to institute sequestration—that must be had in the court where the judgment is, but I suppose we might stay a sheriff's sale until a creditor could get such a return of his execution as would entitle him to demand sequestration in the appropriate court. Or where, as in this case, there is an apparent trust to be administered for the benefit of creditors, I suppose it is perfectly competent, nay, indispensably necessary for me to say that in view of the insolvency of the corporation its assets must in some form go to the benefit of all the creditors, instead of those few who happened to get their executions first into the sheriff's hands. Whether that end is to be attained through the trustees named in the mortgage, by placing the road with its equipments in their hands to be kept up and used for the benefit of the creditors, or whether the goods are to be permitted to pass to the assignee, or whether a court of equity would provide its own receiver, are questions that need not now be considered; but that, in one form or the other, the great principle should be carried into effect that all estates of an insolvent corporation should be administered for the benefit of all creditors, is, I think, too clear and just a conclusion to be questioned.

And here comes into view the public interests involved in the corporation. It must be presumed that the public have an interest in the maintenance of this transportation company, else it would never have been incorporated. But the public interests are not to be sacrificed because the company is insolvent. It was to prevent this sacrifice in just such a contingency that Judge Tilghman suggested the sequestration process in 13 S. & R. 212. Sequestration is a form of equitable relief. It is now a statutory remedy which belongs to the court which renders the judgment, but the equity on which it is founded may, in other forms, be asserted in a court of equity. And it is a matter appropriate to be considered, that by doing equity to all creditors alike, we subserve the public interests, and possibly maintain for general use, a railway that was designed to be a public convenience. A sale by the sheriff of the horses and cars would deprive the public of all benefit from this road.

The defendants have a legal right to the fruits of their execution, and as between themselves the maxim is, "first come first served," but the trusts of the mortgage are a prior equity to any of their legal liens. They obtained their judgments with notice of the mortgage, and before their executions are returned the insolvency of the company appears. Out of these circumstances an equity arises which is prior and superior to their rights as execution creditors.

I will, therefore, direct a decree for a special injunction to be drawn, sipulating for security to each creditor who is named as a defendant in the bill, in an amount at least equal to his debt, interests and costs, and for a continuance of the lien of each *fi. fa.* until the further order of this court; but enjoining the said creditors and sheriff against proceeding to sell the goods levied on until the further order of this court, the securities given to be approved by Judge Read or the Prothonotary, on reasonable notice.

Cotton in Jamaica.

We understand that advices have been received, from their agent in Jamaica, by the Jamaica Cotton Company, enclosing the first pod of Sea Island Cotton that has burst from a tree planted in November last. The anxiety of the people to plant, and especially of the small settlers, appears to be very great, and they are buying up seed in all directions. The agent of the Company states that he has employed about one hundred men to clear and burn off land in order to a new plantation, and that he will undertake to get one thousand acres planted without delay; and as to picking it, that there will be no want of hands to get in any quantity that money can be found to plant. He has been paying one shilling per square chain for cutting down the timber and bush, and hoeing clean. The Jamaica papers speak with high approbation of the plan, and hope the Company will proceed in the work with vigor, as one greatly required for the employment of hands not fit for sugar cultivation.

NIAGARA STEAM FORGE,
COR. PERRY ST. AND OHIO BASIN SLIP.
T. D. PATCHIN, Lessee, CHAS. D. DELANEY, Sup't. } Buffalo, N.Y.
MANUFACTURE to order all kinds of Light and Heavy Forgings and Hammered Shapes, such as

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

New Channels of Business.

"Now thrive the armorers, and honor's thought
"Reigns solely in the breast of every man."

There is a native activity and a variety of resources, in the mental constitution of the Anglo-Saxon race, which ever serves it in a time of need, and which raises it above, and enables it to surmount, almost all the accidents or conditions which circumstances may throw in its way. It is this characteristic which has placed our fathers at the head of the races, in all that pertains to the comfort, intelligence and morality of mankind. It is this "activity and variety of resource" that has made the inhabitants of the British Islands the first power among the nations—the mistress of the sea—and the wealthiest people of the globe. William of Normandy ruled over no mean subjects, in virtue of his triumph at the battle of Hastings, and despite his power and the hosts of his followers which were quartered upon England, the body of the people still retained their customs, usages and laws, and if they could not shine at court, they could, and did, turn their attention to the improving of their condition, to manufactures and to commerce. Their success in these departments gradually accumulated the wealth of the country into their own hands; with the wealth followed the power; and thus the humble artisan and the despised merchant became in reality the king, and in securing their own privileges, secured also the rights and preserved the liberty, of which we are all now so justly proud.

But it is in this country that this activity has had the best opportunity of displaying itself, and has accomplished the greatest results. We had the advantage of starting when the world had already reached a high degree of civilization. We commenced with the light of the sixteenth century. Our fathers were men who had courage enough to dare, and perseverance enough to encounter the dangers of a voyage across the then unknown deep, in a comparatively early state in the art of navigation. Our continent was thus settled with picked men, and although not always from the most respectable classes of society, yet always possessing many of the manly virtues. We have also had the advantage of being untrammelled by customs; by privileged classes whose rights have been sanctioned by long usage; by an overbearing aristocracy supported by entailed estates; by a monarchical government legislating to preserve inequalities of conditions, to secure the wealth of the few at the cost of the many, on the plea that it is necessary to preserve the peace, harmony and prosperity of the whole; by an immense national debt, the accumulation of ages of wars and of kingly magnificence; all these we have been rid of; and the unparalleled prosperity which has peopled the valleys of the Ohio and Mississippi; which has connected the homes of parents at the East with the cottages of the children at the West by the railroad and telegraph, has been the result.

Now for the first time in the history of our prosperity a giant domestic insurrection threatens our peace, and disturbs our business relations. Yet possessing this characteristic activity and variety of resources, which has so well served our fathers in times past, what may we calculate, fairly, honestly and without self-deception, will be the effect of this war upon the States still loyal to the Union? With the Southern States our communication is cut off, and, consequently, our information from that quarter is meagre, and our remarks only in part apply to them.

We do not wish to underrate the disadvantage resulting from the closing to our merchants, both east and west, of the southern market. It is unquestionably a great loss; and a greater loss still results from the general depreciation in securities and the derangement of exchanges. But the East and West can still interchange the products of the manufacture for the products of the farm. Should the foreign demand for produce fall off, its unfavorable effect is partially relieved by the increased cheapness of produce at home, which to our unemployed or half employed operatives is no small consideration. If western grain brings a low price, eastern manufactures must bring a low price also; and thus, when the banks at the West settle their accounts, although the same amount of business may not be done, still the necessaries of life will be plenty and cheap in both sections of the country.

But there are other important elements of calculation which we have not considered. "While honor's thought reigns solely in the breast of every man," the armorers thrive; the munitions of war are being prepared upon an enormous scale—cannon are being cast—guns made; and camp equipage and means of locomotion are being provided; thus giving occupation to thousands of our citizens, and removing them from competition in the departments to which they belonged at home. The President recommends in his message to Congress the increasing of our army to 400,000 men. To arm and provide these men with all the accoutrements of war, is no small item of employment. The Secretary of War, in view of the fact that this army comes from the body of the people, and has been accustomed to better living than that commonly allotted to soldiers, recommends a change in the order of rations, so that more fresh meats and vegetables can be provided. He also recommends providing the troops with water-proof capes and blankets to serve as a protection against the effects of the climate. As to the procurement of arms he says: "The department found it absolutely necessary to procure arms to some extent from private manufacturers. It is believed that from these sources, they can be obtained, equal in quality, and not much higher in cost, than those made in the national workshops. It would, therefore, appear a wise policy

on the part of the Government to encourage domestic industry by supplying our troops, in part, *from private factories of our own country*, instead of making purchases from abroad."

Thus an immense amount of labor will be required to fit out and keep in supply the army and navy alone. The money spent for this purpose by the Government, as well as that paid to the soldiers for their services will go into immediate circulation, and will create wants in those who receive it for the fabrics which now overstock the market. Our citizen soldiers have families at home; they are either fathers, husbands, or brothers, and the money will be sent to them for disbursement. While we are looking out for their safety and comfort—while life in the camp is made as comfortable as the numerous inventions of the age having this object in view can make it—those at home, by the providing of these very articles, are better prepared to support the burdens of the war.

Again, can we not calculate upon the characteristic activity and inventive faculty of our people to originate new employments, to set on foot new business enterprises and to discover new wants and new methods of supplying them? The wealth of the land is yet untold—the "Sesame" which shall open the stronghold of our treasures is yet unspoken. Activity is the law of our lives, the secret of our success, and the surety of continued prosperity. While the armorers thrive and the hosts are gathering for battle, a new impetus may still be given to the more peaceful pursuits. Fortunately the great railroad interests of the country lie in the direction of their roads—in the East and the West. And this fact alone proves how much more the eastern and western sections of the country are dependent upon each other than either section is upon the South. We do not say this boastingly, for there is no section of our country which we would willingly leave out of our calculation; but we accept it as a fact, and draw from it our own conclusions. The onward march of this country in prosperity may be temporarily stayed, but it can never be permanently retarded.

Baltimore and Ohio Railroad.

In addition to $75,000 deposited with the City Register, for the payment of the quarter's interest, maturing this day, on the five million city loan, the Baltimore and Ohio Railroad Company, we understand, will pay the following at the Merchants' Bank:

On their bonds of 1867	$15,000
On their bonds of 1875	33,855
On their bonds of 1880	21,000
On N. W. Va. Railroad, 2d mortgage bonds indorsed by B. and O. Railroad	30,000
On N. W. Va. Railroad 3d mortgage bonds indorsed by B. and O. Railroad	15,000
The aggregate being	$189,855

This promptness, during a period of such serious derangement and disaster is gratifying.

It is understood that the city must provide for the payment of the coupons on the North-Western Virginia bonds guarantied by it, and that the interest on the third mortgage bonds of the North-Western Virginia Road, unindorsed, will not be paid, the Baltimore and Ohio Company having already paid a sum largely in excess of its agreement. The Baltimore and Ohio Company does not pay the $45,000 as stated on North-Western Virginia bonds guarantied by it under the contract with that company, having none of their funds for the purpose, but pays as indorsers from its own means.—*Baltimore Sun, July* 1.

Jeffersonville Railroad.

The earnings of this road for the year ending December 31, 1860, were:

From passengers		$127,882 95
" freights		158,699 70
" mail and express		15,423 76
		$302,006 41
And the expenses were:		
Repairs of road	$52,778 84	
" cars	21,307 01	
" machinery	15,932 17	
Running trains	33,884 12	
Station expenses	22,122 57	
Fuel	19,644 89	
Oil and waste	2,627 61	
Rents	5,136 89	
Salaries	5,736 10	
Stock killed	3,370 83	
All other expenses	6,667 66	
		189,208 69
Excess of earnings		$112,797 72
Add balance from previous year		107,622 27
Sale of old iron, etc.		3,594 86
		$224,014 85
Disbursed as follows.		
Interest on bonds	$51,170 00	
Taxes	6,312 88	
Transportation account	18,845 17	
Rolling stock	12,002 00	
Plaining mill and machinery	3,775 22	
Overcharges refunded, fencing, interest, etc.	1,991 24	
		94,096 51
Balance to profit and loss		$129,918 34

The following is a comparative statement of earnings from the transportation of passengers, freight, mail, express, etc., from 1853 to 1860 inclusive:

1853	$147,342 33	1857	222,484 08
1854	206,544 15	1858	229,982 85
1855	218,388 08	1859	242,095 28
1856	270,827 34	1860	302,006 41

It will be seen that the earnings of the past year are $31,179 07 in excess of any former year's business, and $59,911 13 more than in 1859. The ratio of increase is greater in freights than passengers, being $44,024 89 in the former, and $18,017 09 in the latter. The Treasurer, in his report says:

The transportation expenses for the year may appear large, but in this expenditure is embraced an unusual amount of permanent repairs on road, bridges, trestle work, repairs of cars, etc.

By reference to the report of the Road Master, you will find his statement of the purchase of 51,670 cross-ties, at a cost of $8,454 20—being a sufficient number for re-laying about 17 miles of track, or near one-fifth of the entire road—and of the purchase of about one hundred tons of iron, at a cost of $4,150 84. There has been put up, 833½ yards of stone work on abutments and culverts at a cost of $3,277 15. There has been replaced 198 bents of trestle-work, all new, making 3,100 feet span, at a cost of $4,650 30. Also, trestles for culverts and new cow pits, $478 70, and extraordinary repairs on Rockford Bridge, $1,930 25; on Muddy Fork bridge, $1,282; and on Langdon's, Baker's and Stucker Fork bridges, $269 65.

In addition to the ordinary repairs of cars, there were built 36 platform cars, at an expense of $5,400.

These expenses, in the aggregate, amount to $29,893 10, and were necessary to be made in order to secure a safe and speedy transit of the business of the road. Deduct this sum from the transportation expenses, and it leaves, as the working expenses of the road, the sum of $159,315 59, which is about 52¾ per cent. of the transportation earnings.

The interest on 199 Louisville City Bonds issued to this Company in payment of 2,000 shares of stock, has been assumed and paid by said City since November 1, 1858, and amounted on the 1st November last to the sum of $23,880, which may be regarded as a deferred debt, and does not appear in this statement.

The Company had on hand January 1, 1860, 5,400 cords of wood: and there has been purchased during the year 11,039 cords—making 16,439 cords. Of this there has been used 11,996—leaving on hand January 1, 1861, 4,443 cords. The difference in the quantity of wood consumed, as compared with the previous year is much less in proportion to the mileage of engines. The Superintendent says:

We shall want for track the present year, to be purchased and re-rolled, 200 tons of rails, also between 30,000 and 35,000 new cross-ties. There has been stone-work and masonry done on bridges and culverts amounting to nearly $3,000, and I would recommend an expenditure of about $500 for stone work at 39 mile post during the present year. Timber abutments, particularly at places where there is a heavy current of water, are not only insecure, but unprofitable, being liable to be swept away by freshets. During the present year we shall have to re-build bridges and build new ones, which will cost between thirteen and fifteen thousand dollars. New bridges will have to be made at Silver Creek and Muddy Fork, and those at Columbus and Flat Rock must undergo heavy repairs. There is still an imperative need of a freight depot at Seymour. We are also greatly in need of a passenger depot at Jeffersonville. Our present building is already too small for the transaction of both freight and passenger business, thus retarding the successful or economical operations of these departments. A convenient and suitable depot could be put up for $1,000, and, in suggesting this, I know of nothing which would be of greater advantage to our business, or tend more to its economical performance.

The Company have 15 engines. The number of miles run during the year has been 329,461, at a cost for repairs of $15,720 79, or 4.77 cents per mile run; using 1,436 gallons of oil, costing $1,077 29, or .32 cts. per mile run. Number of miles run to a pint of oil 31½. Cost of waste, $157.32. Cords of wood used, 11,580. Average cost of wood per cord on tender $1.62½. Miles run per cord of wood, 28. Average cost for wood per mile run, 5.80 cents. The President, in his report, says:

An apology is due you for so long a delay in presenting this Report, as you had a right to expect its publication at a much earlier period, as has been the custom with us heretofore. The officers' Reports were later coming in than usual, from the fact that we have accounts with many more roads than we have had in former years, and more labor is required to get up all accounts with them. Much of the delay is attributable to this cause. Again, when their Reports were ready for the press, we had just entered into a condition of the wildest excitement and darkest uncertainty, produced by our national troubles; and as we had always been enabled by that time to form an approximate estimation of the business of the year, we were still anxious to present what we regarded as an approximation; but the condition of public affairs furnished no tangible indication as to the effect on our business. Until the policy of the Administration was at least partially defined, we would not undertake to say whether our business would be largely increased or very much diminished. Although our receipts up to May 1st in this year exceed, comparatively, any former year, yet our business henceforth, or until peace is restored, will be materially diminished;

our traffic with the South, which has constituted our heaviest trade, being now entirely cut off.

We felt much encouraged, during the latter part of 1860, with the prospects for an increased business to and from the Louisville and Nashville Railroad, which furnished us a larger business than we had anticipated, an evidence of which is shown in our gross receipts for that year, exceeding our estimate in last Report. Our earnings would have been even larger, had not the traffic in hogs been very much lessened by the stringency in the money market, commencing with November of that year. The inability of pork merchants to furnish money with which to move hogs in this direction, deprived us of the transportation of a large number originally intended for this market, which were shipped to Cincinnati, New York, and points in the interior.

The Company have now a sufficient fund on hand to ensure a prompt compliance with the contract entered into with its first mortgage bondholders to retire a portion of its bonds in January and July of each year.

Sec'y and Treas'r—J. H. MCCAMPBELL.

Massachusetts Railroad Dividends.

The following dividends are payable in July, at the dates given in the margin. All are for six months, except the Berkshire Railroad, quarterly. None have increased their dividends since January, and those which pay less are the Boston and Lowell, 1 per cent.; Boston and Maine ½; Metropolitan 2; Stonghton Branch 1; and the Worcester and Nashua 50 cents per share. The Michigan Central passes the July dividend.

Manufacturing stocks show a material falling off in dividends, and several omit a six month's payment altogether. The only companies which now divide the same as in January are Hill, Lowell Bleachery, Middlesex, Newmarket, and Salisbury. The Appleton falls off 1 per cent., Bates 1, Douglas Axe 1, Dwight Mills 2, Franklin 2, Great Falls 2, Jackson 2, Lancaster Mills $6½ per share of $450, Manchester Print works 2 per cent., Monadnock Mill 1, Nashua 3, Naumkeag 2, Pacific 1, Salmon Falls 1, and Stark Mills 2 per cent. less. Many of the manufacturing companies have earned handsomely in excess of the amount divided, but in view of the future prospects of their business, an immediate reduction in dividends has been deemed advisable by the managers of different companies. The Chicopee, Cocheco, Contoocook and Hamilton pass their usual dividends. The total of manufacturing dividend now is $545,900, against $935,200 in January last. We omit the list.

Dividends have also been declared by other incorporated companies, amounting in the aggregate to $217,191.

The whole amount of the Philadelphia, Wilmington and Baltimore Railroad bonds of 1883, is $2,300,000, of which about $1,200,000 are held in New England and payable in Boston.

Vera Cruz and City of Mexico Railroad.

The Mexican *Extraordinary* of May 25th, contains a very able address of Don Manuel Escandon, the rich Mexican capitalist, to the Mexican people, on the subject of the Mexico and Pacific Railroad, from Vera Cruz to the city of Mexico, and thence to some port on the Pacific. The Commonfort government granted to Mr. Antonio Escandon the privilege of constructing this railroad, by a decree dated 31st August, 1857, and immediately thereafter Colonel Andrew Talcott, formerly of the United States Engineers, was appointed Chief Engineer of the road, who, with a corps of efficient engineers, made a detailed survey of the route between Vera Cruz and Mexico. Mr. Escandon says:

Nothing can be more satisfactory than the result shown by the engineers' report of their operations. After a minute examination of the country between Mexico and Vera Cruz, it has been ascertained that in spite of the high elevation of the interior range of mountains, and notwithstanding that this has to be overcome in a comparatively circumscribed distance, still the difficulties presented are considerably less than those which have occurred on many lines of railroad in other countries. After forming most carefully estimates upon the most certain and ample foundations that could be desired, the cost has been found to be much less than had been anticipated, and will not exceed the amount which a loyal and sincere effort on the part of persons of various classes of society could easily contribute towards its realization.

There were some serious defects in the original charter which have been remedied by the present government. The first defect was the apportionment made to the government of 20 per cent. of the profits of the road. The supreme government has voluntarily come forward and has agreed that the exchequer shall not have the special benefit of 20 per cent. of the profits, but that the same shall be applied to the redemption of the eight millions of railroad bonds to be issued, and thereafter to be applied to the sole use and benefit of the stockholders. The obligation imposed upon the company by the original charter—viz: to construct a penitentiary and military hospital in the city of Mexico—has been rescinded by the supreme government. The company will, therefore, not have to occupy itself in anything more than its legitimate object—viz: the building of the railroad. To aid in the construction of the road the government has ceded a third part of the public lands in Sonora, the possession of which shall be entered upon when the section of the road between Puebla and Mexico shall be in operation. The supreme government has, moreover, decreed that a portion of the duties shall be paid by importers in shares of the railroad. This idea unites the advantage of affording positive assistance to the railroad and of satisfying the commercial public.

Some other additions of minor importance have been made in the privilege.

An organization has been effected, the members of which are gentlemen of the highest social position and financial ability in the republic of Mexico, who have decided upon the immediate construction of the road. The section from the city of Mexico to the city of Puebla will be put under construction without any unnecessary delay. The charter, which is a perfect monopoly for constructing a railroad through the centre of population in Mexico, cannot fail, in a pecuniary point of view, of resulting favorably to all concerned. Few

things can contribute more efficaciously to consolidate the peace of that republic, (which constitutes for the present its greatest necessity and the most fervent desires of all good citizens,) than this great and useful enterprise, which will give worthy employment and useful occupation to that restlessness, or it may be called activity, of which in other matters Mexico unfortunately gives so many proofs. Mr. Escandon concludes his address as follows:—

May the enterprise which I now present to my fellow citizens attract their attention as strongly as it has occupied mine. The more I reflected upon it the more its importance increased in my eyes, and I am bold to say, that if there exists any means of animating the central part, which is the heart of the republic, and of diffusing the life which will spring up as by irradiation throughout the whole body of the nation, it is the opening of communication by railroad.

The magnitude of the enterprise shall not restrain us from undertaking it. Let us venture to do what men of other nations have already accomplished, and Mexico will yet have a place among the nations of the earth, worthy of her great resources and her ancient renown. "I have grown gray," says Don Manuel, "in business, and might naturally wish for retirement after a laborious life; but I am yet resolved to employ the days that are yet left to me on this earth, and the means which by my exertion I have acquired, in the development of this great enterprise, and if I shall be allowed the satisfaction of seeing it accomplished, I shall believe that I have fulfilled my destiny, and have not been a useless member of the society in which it pleased Providence to place me."

Mr. Lyons, one of the engineers called to take charge of the construction of the railroad, will sail for Mexico during the ensuing month. Colonel Talcott, the Chief Engineer, will probably be in Mexico in the autumn.

Journal of Railroad Law.

INSTRUMENTS ISSUED BY THE BURLINGTON RAILROAD COMPANY DECLARED NEGOTIABLE PROMISSORY NOTES: WHAT WAS SUFFICIENT NOTICE TO CHARGE THE INDORSER.

The defendants were engaged as contractors in building the Rutland and Burlington rail road; and received from the company in satisfaction of their contract and work, the note in suit, together with four others, each of the same date and amount, and in every respect corresponding, except that the numbers of all the said notes marked thereon were different, each from the other. The action was brought against the defendants as indorsers, and the following is the language of the instrument:

RUTLAND & BURLINGTON RAILROAD COMPANY,
No. 253. $1,000.
BOSTON, April 1, 1850.

In four years from date, for value received, the Rutland & Burlington Railroad Company promises to pay in Boston, to Messrs. W. S. and D. W. Shuler, or order, $1,000, with interest thereon payable semi annually, as per interest warrants hereto attached, as the same shall become due; or upon the surrender of this note together with the interest warrants not due to the Treasurer, at any time until six months of its maturity, he shall issue to the holder thereof ten shares in the capital stock in said company in exchange therefor, in which case interest shall be paid to the date to which a dividend of profits shall have been previously declared, the holder not being entitled to both interest and accruing profits during the same period.

T. FOLLETT, Pres't. SAM. HENSHAW, Treas.

The defendants endorsed this note to the plaintiff at the city of Boston shortly after it was made, and also in the same manner and at the same place transferred the other four notes to the plaintiff.

On the 4th of April, 1854, a notary public, in Boston, at the request of the Bank of Commerce of that city, to which the plaintiff had sent the note for collection, presented the note at the office of the Treasurer of the Rutland & Burlington Railroad Company and demanded payment of the instrument, which was refused; and then notified the defendants by depositing on the same day in the Post office in Boston a written notice of which the following is a copy:

City of Boston, April 4, 1854.

To Messrs. W. S. and D. W. SHULER.

Please take notice that a promissory note made by S. Henshaw, Treasurer, for $1,000, dated April, 1st, 1850, payable in four years in favor of yourselves and endorsed by you, has been presented by me to the office of the Treasurer, and payment being duly demanded was refused, whereupon, by direction of the holder, the same has been protested, and payment thereof is requested of you.

ADOLPHUS BATES, Notary Public.

It also appeared that Sam Henshaw never signed as Treasurer or otherwise any note in which the said defendants were named as payees, except the notes above mentioned.

The points made by the defendants were; first, that the instrument was not negotiable so as to make the indorser personally liable, as in an ordinary promissory note; but that the indorsement operated merely to transfer the note, or pass title to it; and second, that if it was a negotiable promissory note, still the notice of its dishonor was insufficient to charge the defendants as endorsers.

Judgment was originally rendered in favor of the plaintiff; this judgment was affirmed at a General Term of the Supreme Court, and an appeal was then taken to the Court of Appeals. The following is the opinion of the court of last resort.

WRIGHT, J.—Whether the blank indorsement of the defendants imports any binding contract, depends on the law of Massachusetts; in which State it is to be assumed, from the facts in the case, that the original instrument and indorsement were made. But the law of Massachusetts does not differ from that of this State or of England in any particular, material to the present inquiry. In Massachusetts there has been, apparently, a relaxation of the common law rule so far as to extend the remedy against indorsers to notes payable absolutely in a medium other than cash; but in all other respects, the legal rules applicable to negotiable paper, are the same in that State as in our own.

The instrument on which the action is brought, has all the essential qualities of a negotiable promissory note. It is for the unconditional payment of a certain sum of money at a specified time to the payee's order. It is not an agreement in the alternative to pay in money or railroad stock. It was not optional with the makers to pay in money or in stock, and thus fulfill their promise in either of the specified ways; in such case, the promise would have been in the alternative. The possibility seems to have been contemplated that the owner of the stock might, before its maturity, surrender it in exchange for stock, thus canceling it and its money promise; but that promise was nevertheless absolute and unconditional and was as lasting as the note itself. In no event could the holder require money and stock. It was only upon a surrender of the note that he was to receive stock: and the money payment did not mature until six months after the holder's right to exchange the note for stock had expired. We are of the opinion that the instrument wants none of the essential requisites of a negotiable promissory note. It was an absolute and unconditional engagement to pay money on a day fixed: and although an election was given to the promisees, upon a surrender of the instrument six months before its maturity to exchange it for stock, this did not alter its character, or make the promise in the alternative, in the sense in which that word is used respecting promises to pay. The engagement of the railroad company was to pay $1,000 in four years from date, and its promise could only be fulfilled by the payment of the money at the day named.

We are next to inquire whether the notice was sufficient. A notice that in terms, or by necessary implication or reasonable intendment informs the indorser that the note has become due and has been presented to the maker, and payment refused, is sufficient. The party to whom the note is addressed, should not be misled by an indefinite or uncertain description of the note and, from the imperfection of the notice itself, be unable to determine to what particular note it refers. A notice which omits an essential feature of the note, or misdescribes it, is an imperfect one, but is not necessarily invalid. It is invalid only when it fails to give that information which it would have given but for its particular imperfection; and even in case the notice in itself be defective, if, from evidence *aliunde* of the attendant circumstances, it is apparent that the indorser was not deceived or misled as to the identity of the dishonored note, he will be charged. A note is well described when its maker, payee, date, account, time and place of payment are stated; and when a notice sets forth these particulars, with reasonable accuracy, together with the facts of presentment and dishonor, it cannot be rendered invalid by showing *aliunde* that notes similar as to parties, date, amount, and time, and place of payment were outstanding, and were only distinguishable from each other by their numbering. * *

But it is urged that there was a failure to charge the defendants as indorsers for the reason that there was a misdescription as to the maker, and the notice contained no reference to the number by which the note was designated and distinguished by four others of a similar description given and transferred by the defendants simultaneously. I think both of the reasons are without force, and that the notice construed in the light of its attending and surrounding circumstances was sufficient. At least from the contents of the notice itself, and the extrinsic facts admitted in the case, it was a question not of law but of fact, whether knowledge was actually brought home to the endorsers; and that question of fact has been found against the defendants in the court below. * * * * * * * *

I am of opinion that the action was well brought against the defendants as indorsers of a negotiable promissory note; and that the notice of its dishonor was sufficient. The judgment of the Supreme Court should be affirmed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, July 13, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Money and Business.

The daily advance in the prices of shares and bonds during the past week is more marked. The upward movement extending over nearly the entire list. This is owing to the indications which are becoming daily more and more apparent that we are fast approaching the end of our political troubles. Considerable business has been done in border State Stocks. Kentucky 6's reached 72; Louisiana 6's 55; Missouri 6's 41¼; North Carolina 6's 54; Tennessee 6's 42½; and Virginia 6's 49. Missouri 6's issued to the Hannibal and St. Joseph Railroad Company, sold at 50. The credit of the General Government has also advanced 3½ per cent. in the face of the call made by it for a new, and to this country and people, enormously large loan.

On Wednesday the $250,000,000 loan bill passed the House of Representatives. This authorizes the Secretary of the Treasury to borrow the above amount upon the credit of the United States, and pledges, specially, the duties of imports on tea, coffee, sugar, spices, wines and liquors, and also such excise and other internal duties or taxes as may be received into the treasury, for the payment of the amount borrowed. The Secretary is authorized to issue certificates of coupons, or registered stock or treasury notes, in such proportions of each as he may deem advisable; the stock to bear interest at seven per cent., payable semi-annually; the treasury notes to be of any denomination not less than fifty dollars, to be payable three years after date with interest at seven and three-tenths per cent., payable annually on the fifty-dollar notes, and semi-annually on notes of a higher denomination. He is also authorized to issue, in exchange for coin and as a part of the above loan, or in payment of salaries or other dues from the United States treasury, notes of a less denomination than fifty dollars, not bearing interest, but payable on demand by the Assistant Treasurers of the United States at Philadelphia, New York or Boston; or treasury notes bearing interest at the rate of 3.65 per cent. and exchangeable at any time for certificates of stock, or treasury notes for fifty dollars and upwards.

The last quotations show an improvement in breadstuffs. There is a fair demand for flour from the trade and for export. Wheat is somewhat sought for, while corn and meal remain unchanged. The last quotations of cotton were 15¼@15½.

The Central Railroad of New Jersey has declared a quarterly dividend of 2½ per cent., payable on the 15th inst.

Dividend Warrants of $14 52, payable Dec. 31, 1862, are now ready at the office of the Farmers' Loan and Trust Company, New York, for holders of preferred stock in the Philadelphia and Reading Railroad Company, being for the six dividends payable July 1, 1858, to Jan. 1, 1861, inclusive, and which includes all arrears on the preferred stock, together with interest thereon at 6 per cent. per annum from the dates at which the dividends successively accrued until the maturity of the warrant.

The interest coupons due July 1, on the bonds of Belmont County, Ohio, will be paid on presentation at the Nassau Bank.

The Harrisburg (Pa.) Railroad Company has declared a semi-annual dividend of 3½ per cent., equal to $1 75 per share.

The Bank of the State of Missouri has declared a dividend of three per cent., payable to New York stockholders at the Bank of Commerce, on the 20th inst. The Farmers' Bank of Kentucky, and the Bank of Kentucky, each announce a dividend of four per cent., payable at the Bank of America in this city.

The Secretary of the Treasury has yielded to the solicitation of parties interested, and modified his instructions to the assistant treasurer in this city in reference to the payment of the July coupons on the Texas Indemnity 5 per cent. loan. The dispatch sent by Mr. Chase to Mr. Cisco, reads as follows: "Pay all coupons of Texas Bonds which you have no reason to suppose to have been negotiated since the attempted deposition of Gov. Houston in February last."

The report of the Secretary of the Treasury has been the chief topic of discussion in financial circles during the past week. The Secretary states that he requires for the fiscal year 1862 not less than $318,579,581. Of this he proposes to raise $20,000,000 by a customs duty ranging from 2½ to 4 cents per pound on sugar, 5 cents per pound on coffee and 15 to 20 cents per pound on tea. Thirty millions of dollars, he estimates, will be yielded by the present tariff as it stands, and by imposing a duty on articles now in the free list and reducing duties now so high as to be prohibitory, other $7,000,000 may be gained for the revenue. The revenue from the sales of lands and miscellaneous sources may be estimated at $3,000,000. And lastly $20,000,000 may be raised either by a direct tax of ⅛ of one per cent. on real and personal property throughout the country,

or by special taxes on stills, distilled liquors, ale and beer, tobacco, bank notes, spring carriages, silver ware, jewelry and legacies. Turning from the resources of direct taxation to that of loans, he suggests a national loan of $100,000,000, bearing 7 3-10 per cent. interest annually; the certificates to be Treasury notes of various denominations, from $50 to $5,000, and to be redeemable at the pleasure of the government after three years. He also suggests a public loan of $100,000,000, bearing seven per cent. interest, and to be negotiated at or above par, either here or in England, the principal to be redeemed at the pleasure of the government after thirty years, and the interest to be secured by the direct taxes above mentioned. Finally, he recommends that the government be authorized to put in circulation Treasury notes for $10 a $20 each, bearing 3 65-100 per cent. annual interest, and payable one year from date, the aggregate amount of such Treasuryn otes not to exceed $50,000,000. The following, therefore, are the sources of income from which Mr. Chase expects to obtain means to carry on the government:—

Estimated revenue from present tariff	$30,000,000
Estimated revenue from sales of lands, &c.	3,000,000
Duty on sugar, tea and coffee	20,000,000
Additional revenue from changes in the tariff	7,000,000
Direct taxes	20,000,000
National loan by Treasury notes	100,000,000
New seven per cent. loan	100,000,000
Small Treasury notes, one year to run.	50,000,000
Total	$330,000,000
Aggregate amount required as above.	318,579,581
Surplus	$11,420,419

The city of St. Louis is in default on the interest of her bonded debt. The causes of which, as explained at a meeting of the bondholders held on the 6th inst., by a commissioner from St. Louis appointed for that purpose, appears to be only of a temporary natnre growing out of no indisposition on the part of the city authorities to remit with their usual promptness, but an absolute present inability to do so. After a conference on the subject it was determined by the creditors not to fund the over-due coupons, but to recommend the city authorities to obtain such legislation at the next session of the Legislature as will render taxation sure and ample to meet the accrued and accruing interest on the debt, and to instruct their assessors to restore the old valuation of the real and personal taxables, which it seems were reduced this year about 25 per cent. The principal representatives of the Foreign Bondholders expressed much repugnance to the precedent of suffering so large and wealthy a city as St. Louis to fund her overdue coupons, and upon this the proposition was abandoned.

Rome, Watertown and Ogdensburg R. R.

The name of the Watertown and Rome Railroad has been changed to the "Rome, Watertown and Ogdensburg Railroad Company." This change is rendered appropriate by the determination of the Company to build a branch of nineteen miles in length, connecting its road directly with Ogdensburg, and rendering the line between Rome and Ogdensburg its main line. Both the building of the branch and the change of name were specially authorized by an act of the Legislature of 1860. It is expected that cars will be running over the new branch by the first of January next.

Philadelphia and Erie Railroad.

An adjourned meeting of the stockholders of this road was held on the 2d inst., at which Mr. Gideon J. Ball, of Erie, presided. The meeting was attended by various persons from the Central and North-western portions of the State. Among those from Erie County were Hon. Gideon J. Ball, Samuel A. Black, Superintendent of the Western Division of the road; C. B. Wright, Director; Joseph Henderson, representing the County Commissioners; James Gunnison, Philip Goesler, and S. E. Neiler. From Cameron county, Samuel N. Lawrence. From Warren, Thomas Struthers. From Lecoming, Robert Crance, John A. Gamble. Philadelphia was represented by Mayor Henry, Jno. M. Riley, Joseph R. Flanigen, and other city directors. The meeting was a large one, embracing many other persons interested in the work or residing on the line of the road. The object of the meeting was to take a vote upon the proposed lease of the road to the Pennsylvania Railroad Company. The following preamble and resolutions were offered by Mr. Henderson:

Whereas, The President and members of this company have submitted to the stockholders a measure providing for the completion of the Philadelphia and Erie Railroad, through an endorsement of certain of the bonds of this company by the Pennsylvania Railroad Company and the subsequent leasing of the said road to the said company, as will hereby appear:

Therefore, Resolved, That the said measure so submitted, by the President and Managers of this company, for the approval of the stockholders, be and the same is hereby approved, and the President and Managers be and they are hereby authorized to enter into and execute a contract with the Pennsylvania Railroad Company in due form of law, to carry the same into effect, when ratified by the stockholders of the said last named company.

A stock vote was required upon the resolution. The result was that 36,829 votes, representing that number of shares of stock, amounting in the aggregate to $3,682,900 at their par value, were cast in favor of the resolutions. The whole stock of the road is 42,365 shares. There was no opposition to the measure. Of the stock voted on, the City of Philadelphia holds 22,500 shares; the city of Erie 2,000; the county of Erie 3,000; and the balance by individuals.

It is understood that a special meeting of the stockholders of the Pennsylvania Railroad will soon be called to ratify the proposed lease, and as soon thereafter as practicable, the work upon the line of the Philadelphia and Erie Railroad will be resumed, and urged on with all possible dispatch to completion.

Chesapeake and Ohio Canal.

The repair of the canal is progressing rapidly, with the prospect of an early resumption of business. The Washington *Star* says:

We learn that President Spates, of the Chesapeake and Ohio Canal, has been in our city for a day or two, perfecting arrangements for the immediate resumption of navigation on that important work. He has given orders for the repair of the dam above the Little Falls, and the removal of sand bars on the Georgetown level. This it will take about eight or ten days to do, by which time the line will be navigable throughout. About one hundred and twenty-four boats, loaded with coal, are laying above Williamsport, ready to come down.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending June 22,

were	$56,746 49
Week ending June 23, 1860	53,091 78
Increase	$3,654 71
Total traffic from July 1st, 1860	$3,389,410 02
Corresponding period previous year	2,848,897 00
Increase	$540,513 02

The following are the earnings of the Great Western Railway of Canada for the week ending June 28, 1861:

Passengers	$18,478 73
Freight and live stock	14,043 30
Mails and sundries	1,441 93
Total	$33,963 96
Corresponding week of last year	29,594 34
Increase in 1861	$4,369 62

The earnings of the Buffalo, New York and Erie Railroad for June, 1861, were $46,773 01
June, 1860 44,603 05
Increase $2,169 96

The receipts of the Jeffersonville Railroad Company from all sources from January 1st, to April 30th, 1861, were $86,366 72
Corresponding period of previous year 81,122 97
Increase $5,243 75

The earnings of the Galena and Chicago Railroad for June, 1861, were $164,933 51
Same month, 1860 93,448 90
Increase $71,484 61
Corrected earnings for the previous month $165,707 22

The statement of the Illinois Central Railroad for June is as followa:

Land Department.

Acres Construction Lands sold	4,716.65	for	$76,520 51
Acres Interest Fund L'ds sold	320.00	"	5,738 09
Acres Free Lands sold	1,372.11	"	20,713 41
Total sales during the month	6,408.76	for	$102,972 01
To which add Town Lot sales			132 50
Total of all			$103,104 51
Acres land sold since Jan'y 1, 1861	61,936.83	for	$962,362 41
Acres sold prev'sly (net sales)	1,260,273.46	for	16,147,983 91
Total	1,322,210.29	for	17,110,346 32
Total cash receipts in June, 1861			$37,879 29
Total receipts since Jan. 1, 1861			328,134 29
Total cash and bonds received to June 30, 1861			4,523,532 31

Traffic Department.

Receipts from Passengers		$69,982 56
" Freight		103,958 60
" Mails		6,358 34
" Rent of road		5,923 10
" Other sources		1,971 53
Total receipts for June, 1861		$188,194 13
Do. do. 1860		188,060 59
Total receipts since Jan'y 1, 1861		$1,455,916 96
Total receipts in corresponding period of 1860		1,172,884 01

The net receipts of the New York and Harlem Railroad for June, 1860, were $93,516 84
June, 1861 87,492 93
Decrease $6,023 92

There was one working day less in the month this year than last.

The earnings of the Hudson River Railroad for June of the past three years have been as follows:

June, 1859	$115,444 23
" 1860	129,996 34
" 1861	123,382 33
Decrease from June, 1860	$6,614 01

One working day less.

The business of the Toledo and Wabash Railroad for June was:

	1860.	1861.
Passengers	$16,824 00	$14,161 60
Freight	50,604 57	64,912 28
Total	$67,428 37	$79,073 88
Increase		$11,645 51

The earnings of the Michigan Central Railroad in June, 1861, were $133,619 72
June, 1860 123,095 39
Increase $10,524 33

The earnings of the Cleveland and Toledo Railroad for June, 1861, were $60,687
June, 1860 55,180
Increase $5,507

The earnings of the Chicago and Rock Island Railroad in June, 1861, were $86,841 83
June, 1860 97,350 55
Decrease in 1861 $10,502 72

The business of the Illinois Central Railroad for the first six months of 1861, as compared with last year, was as follows:

	1861.	1860.
Traffic	$1,437,663 99	$1,172,885 01
Land sales	982,362 41	265,085 93
Collections	328,134 29	272,478 27
	$2,728,169 69	$1,711,449 21

The Six Hundred Cannon.

As the order from the Government for six hundred rifled cannon, from the Phœnix Iron Company, is the subject of some carping and jealousy in the New York papers, we are led to make the following statement:—

A few weeks ago an English engineer of eminence was in this country, on business, and went to see the manufacture of these cannon. On his return he informed us that the system of manufacture was entirely new, and the cannon made by it were, he considered, equal if not superior to anything that had ever been produced in any country. To testimony so perfectly disinterested it is unnecessary to add anything further; but none who know the cool judgment and rigid integrity of Colonel MEIGS, who recommended the making of a contract with the Phœnixville Company, would require any other voucher for its propriety.

We are persuaded that the journals which have criticised it have not been aware of the true facts of the case. There is such ample scope for criticism in the greater portion of the transactions connected with the war, that it is a great mistake to select one such as this for animadversion. Those who are familiar with the circumstances of the Capitol extension contracts, know that if Captain MEIGS would have consented to wink at iniquity, he might have been now a millionaire. We have too few such not to prize them when we find them. We understand that, in addition to the recommendation of Colonel, now Brigadier-General MEIGS, to purchase the arms manufactured by the Phœnix Iron Company, the contract was urged by Major LAIDLEY, Captain DYER, and other officers of the Ordnance Bureau, all of whom had either witnessed the process of manufacture, or assisted in the numerous satisfactory experiments made with the guns, under the direction of Colonel CRAIG, then in charge of that Department.—*Phil. Inquirer.*

Minnesota and Pacific Railroad.

The St. Paul *Press* of the 3d inst., has the following:

Rumors have prevailed for the past four or five days that gentlemen of capital from Dayton, Ohio, were about closing a contract with the Minnesota and Pacific Railroad Company to complete and equip, with cars running, by the first of January next, that portion of the road extending from St. Paul to St. Anthony. We are pleased to inform our readers that these rumors have not proved unfounded. Yesterday the parties deposited with the Governor, in compliance with the law of last session, the required amount to be forfeited to the State, unless this portion of the road be so completed and in operation by the commencement of the year 1862. The deposit was made in $8,000 of Ohio sixes of the recent issue of par "Union Bonds," put in here at the rate of 90 cents on the dollar, and $3,000 of Minnesota State Interest Warrants, which latter securities are payable, by law, out of the first moneys that come into the Treasury of the State. The above class of Ohio sixes are redeemable in 1866, and the whole loan was taken at par within the past two months. Taking, then, this $8,000 of Ohio stock at ten per cent. discount, and the $3,000 of our par obligations, it will be seen that the securities deposited amount to $10,200—the fraction of $200 being over and above the sum required by law.

The contractors left on the Keokuk yesterday, and will, of course, immediately prepare to commence work upon the road. From what we know of them they are not the men to make a present of eleven thousand dollars to Minnesota just for the fun of the thing.

Mineral Land Co.'s Agency.

S. W. Hill, Esq., who has been below for some weeks, and who passed up in the Planet on Saturday, has been appointed agent of the Mineral Land Company. This company was organized some two years ago, we think, on the basis of the mineral lands of the Sault Canal Company, both copper and iron. There are large tracts of these lands, both in the copper and iron districts. Mr. Hill's peculiar qualifications for an agency of the kind, will be questioned by none. He will spend a portion of his time in this neighborhood.—*Lake Superior Journal, May* 28.

The Chesnut Street Bridge.

We are pleased to see that at length there appears to be every probability that this long needed improvement will be made. Although for years there has been an almost unanimous expression of opinion as to its necessity, yet it has run the gauntlet of temporary opposing interests so often, and has been debated in all its details over and over again, that more than once it has seemed to be lost sight of. At last, however, all the preliminaries and preparations have been concluded, and the only step now required, prior to the vigorous commencement of operations, is the approval by Councils of the contractor's bid, and the instructions to the Survey Department to have the work started.

In view of the prospective benefits which must accrue to the improvement of the city from the bridge, the present moment is particularly opportune for the undertaking. During the existing stagnation, it will afford employment for a large number of mechanics, who might otherwise be idle, and by the time of its completion, some eighteen months or two years hence, it will give a stimulus to the extension of the city that will largely increase the basis of taxation, and assist in alleviating the burden entailed upon us by the war. Councils will soon be adjourning for their summer recess. We hope, therefore, that they will take the earliest opportunity to put the contract into shape; for, if left until the fall, the legal opposition which has been threatened may delay the matter until the winter sets in, and thus postpone the whole for another year, in which case there may be some danger that the city will lose the contribution of a hundred thousand dollars from the Chesnut Street Railway.—*Philadelphia Inquirer.*

New York Canals.

The quantity of flour, wheat, corn and barley left at tide-water during the first week in July, in the years 1860 and 1861, is as follows:

	1860.	1861.	Increase.
Flour, bbls.	8,900	50,100	41,200
Wheat, bush.	266,300	996,600	729,900
Corn, bush.	227,100	393,700	166 600
Barley, bush.		17,600	17,600

The aggregates of the receipts of the above articles for the years 1860 and 1861 have been:

	1860.	1861.	Increase.
Flour, bbls.	277,000	293,300	15,700
Wheat, bush.	2,417,600	7,999,600	5,582,000
Corn, bush.	4,575,000	4,762,600	187,600
Barley, bush.	78,700	129,000	50,300

Reducing the wheat to flour, the excess in the receipts of 1861 is equal to 1,132,100 bbls. of flour.

United States Census.

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations.

By M. Cezanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

The system of founding tubular piers by pneumatic fixtures is a happy imitation of a design conceived in 1841 by M. Triger for sinking a mine shaft in an island of the Loire, near Angers. It is but a few years since that it was adopted in England, and it has already met with many applications. Still, there are but few documents published upon the subject; and it is for this reason that I have undertaken to give an account of my own personal observations upon this matter.

The notice is divided into three parts:

The first contains a summary description of the bridge upon the Theiss, at Szegedin (Hungary), preceded by some indications of local circumstances. The second is devoted to iron arches. The third to tubular piers, and their pneumatic fixtures.

PART FIRST.

General Indications.—The South-east Austrian Railroad follows nearly the left bank of the Danube from Presbourg to Pesth. From this point, while the Danube bends to the south, the railroad is directed to the south-east, and terminates at a quay upon the Danube, which it meets again at Basias.

This trace necessarily encounters all the affluents of the left bank, between Presbourg and Basias. The crossing of the Theiss is effected at Szegedin, 2.17 miles below its confluence with the Maros, upon a bridge, which is the object of this notice. By an agreement, dated June 10th, 1856, between the Austrian company and the imperial government, was determined.

1st, The trace of the centre line of the bridge.

2d, The distance between the abutments at 186 klcfter, or 1,157 feet.

3d, The height of the rails above the highest water of 1855, to be 26 feet.

It obliged the company to construct a durable bridge, and to finish all the work by July 1st, 1859, and remitted them one-half the duty upon wrought and cast iron.

These conditions allowed a great latitude to the company; and the study of the local circumstances controlled their decision.

The Theiss rises in the Karpathian Mountains, near the frontiers of Moldavia, of Bulkowine, and Transylvania. After coursing a circuit of 172 miles in a valley which is only 338 miles long, it enters the Danube, not far from Belgrade. Its gentle slope as compared with other rivers is seen in the following table, taken from a pamphlet by M. Michel, upon the navigation of the Danube.

Table of Slopes of some Rivers.

Name of River.	Slope per 1,000 feet.		Difference between high and low water. Feet.
Danube	0.125	from Passau to the sea.	
	0.400	above Vienna	39.36
	0.043	in Hungary	29.52
	0 0534	from Rassowa to the sea.	18.68
Theiss	0.028	from Tibisca-Uhlak, near its source, to the Danube	
	0.0081	near the Danube	14.76
Rhone	1.456	at its outlet from Lernau	
	0.543	near Lyons	
	0.742	at Valence	
	0.288	at Tarascon	
	0.053	at Aries	
Rhine	0.554	23.2 at inlet of canal from Rhono to Rhine.	
Garonne	0.440	30.7 at Agen. 42.6 at Langons.	
Loire	0.390	30.3 at Nevers.	
Allier		20.8 at Moulins.	
Seine	0.100	25.5 at Paris.	
Nile	0.144	42.7 at Upper Egypt.	
Mississippi	0.058	21.6 at Cairo.	
Ohio		65.5 at Cincinnati.	

The velocity of the Theiss is generally from 0.98 feet to 1.96 feet at the surface; it attains, however, at Szegedin, 3.28 feet and 3.93 feet in high water.

The regime of the river is very regular. In spring the water rises slowly; it maintains nearly a constant level throughout the summer, and falls at the approach of winter. The minimum is always attained in the cold weather between October and March.

The highest water known, which was taken for a reference plane, occurred in April, 1855; the lowest water was observed in the winter of 1857-8, during the construction of the bridge; the difference was 26½ feet.

Hungary forms, between the Karpathes and the Danube, an immense triangular plain, which the Theiss traverses from the summit to the base, and which, in respect to public works, not many years since, was in a state of nature. The waters of the Theiss and of the Maros, at certain points, extended freely more than 43 miles from their beds, forming upwards of 247,114 acres of sorrily celebrated marsh.

One of the first essays for public improvement in Hungary was the formation, in 1846, of a vast syndicate of all the proprietors dwelling upon the Theiss and the Maros. A systematic regulation and endikement of the two rivers was undertaken. This work, interrupted for many years by the revolution, is now continued by the imperial government;* still, their effects are hardly appreciable, and it was admitted during the preparation of the project of the bridge, that there would be high water throughout the duration of the construction.

* The system adopted for this work consisted in substituting straight lines for the circuits of the river, and providing each bank with strong levees, 1,312 feet apart. It was hoped by these means to increase the slope of the river, and to preserve the plain.

The diversion of the river was effected by digging a narrow canal during the low water, when they commenced enlarging and establishing its bed. Some of these diversions succeeded, they being navigable, while the ancient bed is under cultivation; but many of them have been filled up each year by the freshets, and can only be maintained by costly dredging; and the river has been entirely choked more than twenty times without subduing the perseverance of the dredgers. The sluggish and muddy waters of the Theiss and the Maros have a prodigious depositing power. We have seen at Szegedin, a single freshet deposit in a few weeks a bed of clay several yards in depth, and completely efface an enormous trench, excavated most zealously by the population of the city, who sought in it a remedy against the inundations which they anticipated from the construction of the bridge.

When the water stood at 20.4 feet, the width of the river on the site of the projected bridge was 738 feet.

The section of the profile was 1,947 square yards. The delivery (calculated by the application of Eytelwein's formula to a great number of observations made with Woltmann's mill) was 1,406 cub. yds.

And, consequently, the mean velocity was 0.72 yds. or 2.16 ft.

There is no stone or lime in the neighborhood of Szegedin; within 30 and possibly 60 miles range, cannot be found a pebble the size of a walnut. The sand itself must have been brought from afar, the river usually depositing a muddy slime, or occasionally a very fine sand, ill suited for masonry. Wood only is abundant, though the plain is barren as far as the limits of the horizon. The river brings it from Transylvania; it is usually composed of the trunks of pine, of a soft and coarse fibre, but of considerable length and diameter.

Szegedin was, in 1856, the head of the South-east Railroad, and so communicated easily with Pesth, where the Danube brought stone; with Bohemia, where hydraulic lime was prepared; and finally, with France and England.

The low water being unusually, the Theiss is navigated at all seasons, except the icy, by steamboats from the Danube, and by large barges from 50 to 80 tons.

As for the bottom of the river, the soundings made in 1855 by the company showed, at the site of the projected bridge, an indefinite depth of very fine sand mixed with clay. It is easily undermined, but offers a certain resistance to compression.

General description of the Theiss Bridge.—The bridge at Szegedin is composed of eight rolled iron trussed arches of 136 feet span, supported by seven cast iron tubular piers, and two abutments in masonry, with one of which is connected a viaduct in masonry, with seven arches. The whole length of the structure is 1440.7 feet.

Arches.—The arches are parabolic in form; their sagitta is 16.84 feet.

Their springing is at 4.6 fdet above the highest water on record.

The height for free navigation under the arches is, consequently, 21.4 feet.

Each arch is composed of four rolled iron trusses, each bearing a line of rails, and connected with each other by different systems of strutting. The two trusses belonging to each track are spaced at 5.7 feet.

The axes of the tracks are 13.12 ft. apart. The platform is formed of oak cross beams, in section 9 ins. × 12 ins., and 28.5 feet long, spaced at 3.36 feet, and bolted upon the rolled iron trussea. These cross sleepers bear directly the four lines of rails, the joist flooring, and the hand railing which bears the electric telegraph.

The length of cross-pieces is produced to 30.58 feet, projecting beyond the piers, thus allowing a space of 2 feet for the safety of the guards. There is no ballast upon the platform.

Piers.—Each pier is formed of two cast iron columns, 9.84 feet in diameter, bearing each a track, and consequently spaced 13.12 feet from axis to axis. These columns, whose sides are 1.37 ins. thick, are filled with piles and beton, and are connected by wrought iron stays. Their feet are enveloped with an enclosure of piles and sheet-piling, provided with beton, and protected by an enrockment.

The column properly so called, is surmounted by a cast iron capital, and by a square body of wrought iron, upon which are bolted the cast iron shoes which receive the ends of the trusses. The two square bodies of the same pier are strongly connected together by a system of diagonal braces.

The junction of the square bodies and the capitals is concealed by a wrought iron cornice.

The columns descend about 39 ft. below the summer level, or, say, 29.5 ft. into the bottom of the river. The point of the interior piles penetrates 19.6 feet lower. Each pier is secured above by an ice breaker of oak.

The heads of the two neighboring piers are connected, and held at an invariable distance by the stringers of the trusses which they bear.

Abutments.—Upon the right bank, where lies the city of Szegedin, the earth is at the level of high water; the bank of the river is occupied below the bridge with merchandise platforms, and above by the city harbor. To maintain a communication between the harbor and these platforms, the abutment upon this bank has been prolonged by a viaduct. The first six arches are full centered, with a span of 18.53 feet. The last is surbased, and skewed 83°. It has in the axis of the bridge an opening of 31 feet. It is constructed in the helicoidal system.

The piers of the viadnct are of cut stone; the arches, spandrils, and return walls are faced with red and white brick.

The abutment proper is faced at the heads with cut stone, and with rustic-work at the four corners. In the interior of the mass, there are two modes of cut stone construction: one is in the form of an arch, and receives the springing of the iron arches; the other is composed of four walls stepped, starting from the rear summit of the abutment, and descending towards the springing of the arches. These walls each received a wrought iron mooring of the truss (2d part). The remainder of the abutment is built of rubble masonry. At the demand of the military engineers, two horizontal cast iron cylinders were imbedded perpendicularly to the axis of the bridge, serving the purpose of mining chambers.

Upon the left bank, there is no viaduct, and the abutment is connected with the embankment by return walls.

The two abutments are founded, in the same manner, upon a mass of beton, contained in an enclosure, and poured dry upon the piling designed to consolidate the bottom of the excavation.

There are 80 piles under the right abutment, and 120 for the total foundation of the left abutment; the heaviest loaded bear 88,000 lbs. Some were driven to an absolute refusal; the mean set was at 4-10ths inch for 10 blows of a ram weigh 2,200 lbs. with a fall of 19.6 ft. The beton is loaded at a maximum of 37.4 lbs. per square inch. The calcareous sandstone which receives the heels of the arches bore during the proof trial, 199.4 lbs. per square inch.

(To be continued.)

The Armstrong Gun and its Cost to the Government.

For two years Sir W. Armstrong has been superintending the manufacture of his gun, at an amazing cost to the nation, and he now tells us that during the same time he has been engaged in perfecting another invention, which is likely to supersede his first. Now, we have no hesitation in saying that the public interests have in this matter been trifled with. Millions of money ought not to be expended on Sir William's breech-loading gun unless it was supposed to be the most perfect that could be produced. But he could not have supposed it the most perfect, or why should he for two years have been engaged in perfecting another invention on another principle? He could not have had much confidence in his own invention or he would not, in so short a time, have attempted to supersede it. He has now presented the nation with his two guns. In which has he most confidence, and which does he recommend for the future? If he has the most confidence in the first, why introduce the second at the present moment? If in the second, who sanctioned the waste of public money in the costly manufacture of the first? This is a vital question and demands investigation. We suggested, a short time since, that a commission should be appointed, consisting of competent persons, to inquire into the fitness of the Armstrong gun. It is now more than ever necessary that some such tribunal should be constituted, as there is not merely a gun but guns to be inquired into. It is possible, and in fact likely, that when two or three or more millions are expended on the first Armstrong gun it will be found that it is not so efficient as the second or the third Armstrong gun. We may then be invited to begin *de novo* and once more reconstruct our artillery system. We consider it would be much better to bring the maturest thoughts and the ripest judgments to bear on the question at once and this may be done by appointing such a commission as we have recommended.—*London Mechanics' Magazine, May* 18.

Cape Cod Railroad.

The annual report of the Directors of the Cape Cod Railroad is in the hands of the printers. The result of the year's operation is very satisfactory. Besides paying expenses and interest on bonds, the liabilities of the company have been lessened about $37,000, thus totally extinguishing the floating debt of the corporation.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

New War Inventions.

It is no part of an American's nature to long bemoan the ills that are past. There is too much elasticity of mind; and there is also a charm of novelty in the new condition of things, which in some measure compensates for past misfortunes. Inventors as a class, are perhaps in a better condition than any other body of men, to take advantage of the new demands that the war has necessitated. In the art of attack and defense, there is abundant opportunity for the inventor to display his skill. It brings to him a new and to the American inventor a somewhat novel field of employment, and while he reaps the fruit of his genius in a remunerative return for the product of his brains, others are incidentally benefitted by the bringing into the world of a machine or contrivance theretofore unknown. To how many men is given employment! How many hungry mouths are fed! How many soldiers carry to the camp the comforts of civilized life! How many are thus preserved from sickness and death to return again to their homes! And again, how much more certain and less bloody is war itself made, by the ingenious researches of the inventor!

The inventor should be regarded not merely in the light of a professional man at work for the purpose of securing a pecuniary profit, but as a public benefactor. It is true that all inventions are not useful, but when this is the case, the inventor loses his time, and the community nothing; when, however, one does prove useful, it is, in many instances, difficult to estimate its public value. In the new avenues of business which the inventor has already opened during the last few months,—in the new devices and contrivances for carrying on the war, all of which must be manufactured and made ready before they can be used—he has conferred an unusually acceptable benefit upon the community. Says a recent number of the *Scientific American:*

"There is an enormous demand for improved fire-arms, cannon, shells, projectiles, explosive grenades, and military accoutrements of all kinds. More than half of our patent department force is kept constantly employed on this class of inventions, and a great proportion of the applications for patents which have passed through this office within the last two months are on the following inventions, which, in the aggregate, pertaining directly and indirectly to the war, amounts to more than one hundred:—Improved breech and muzzle-loading cannon; mode of mounting and operating heavy ordnance; improvements in guns, pistols and locks; improvement in projectiles and shot, the number of the two latter being very large; improvement in bits for cavalry horses; improvement in stirrups; improvement in drinking cups and drinking tubes for soldiers; tents, camp beds and tables combined; epaulets and mode of fastening; modern portable huts for soldiers; military caps, combining lightness and peculiar shapes for protecting the wearer from the sun, etc. Some of these inventions have been already adopted, and the manufacturers are making money out of their contracts, while others are patiently waiting the action of the officials before whom their inventions have been submitted for examination."

An army is a vast body of men who are non-producers. Those who stay at home must supply their wants. They themselves are helpless; they depend upon us for food, for clothing, for all the conveniences which they are able to carry with them; and these, thanks to the inventive faculty of our people, are now very numerous. Mr. E. H. Hill, of Massachusetts, has recently patented a portable camp cooking apparatus. It moves on four wheels, has a large furnace which heats ovens and boilers, contains a table and kneading trough, and is so light that it can be easily drawn by two men. Of course, this is a great comfort and convenience to the soldier. It transports the kitchen to the camp, and, by its means, the server of his country may have his dinner ready cooked when he halts on a march instead of waiting to collect materials to build open fires and to cook his food in the old and inconvenient manner. A patent camp hut made of thin pine boards formed into panels, and fitting together by dovetail joints, intended principally for the use of the sick, has been invented by a Mr. Derrom of New Jersey. Tents for single soldiers, which may be carried in a knapsack have been invented. In another part of the JOURNAL will be found the decription of a flexible drinking tube and filter by means of which soldiers may drink the waters of springs without stooping; and at the same time the water is cleansed from all impurities.

But the engines of destruction form the most numerous branch in which the skill of inventors finds employment. Perhaps we are mistaken in saying that they are the most numerous; but they make the most noise, and readily force themselves upon our attention, while the others are more modest and peaceful; and when this is taken into consideration, the two branches may be found to be more evenly balanced.

Our readers have already heard of the Sawyer gun and ball, of Hotchkiss' rifled cannon ball, of breech-loading and muzzle-loading cannon and rifles, of steam cannon, of rifled cannon, of Dahlgren howitzers, of Rhodman guns, etc., etc., all of which have their especial merits as to power of execution. The Sawyer cannon ball, weighs forty pounds without the charge and contains a cavity to receive the three pounds of powder which constitutes the latter. Its shape is oblong, and pointed at the end in which is contained a quantity of fulminating powder; the ball, of course, invariably strikes end first, which explodes the ball, and carries death and destruction to every thing in its way. With only half the ordinary charge of powder the ball was carried over four and a-half miles.

The Dahlgren howitzer is the result of the observative experience of Captain John Dahlgren, in the Mexican war. They are small light guns

made perfectly devoid of ornament, weigh only 450 pounds, and carry a 12 pound ball. They are intended to be easily transported from vessels to the land and back again, with a view of operating against an enemy upon the sea coast. The government is having large quantities of them made.

The Phœnix Iron Company, near Philadelphia, is engaged in filling an order from the Government for 600 cannon of the Griffin rifle patent. These are made of rolled wrought iron, not forged as with other wrought iron guns. A three-pounder throws a ball 3½ miles; and from the fact of the gun being rolled hollow, it has been proved to have all the strength of the best bronze gun. Batteries of these guns are being made for the city of Philadelphia.

Mr. De Brame exhibited a short time since at the Polytechnic Association of the American Institute, a new and very novel cannon. It is a breach-loader, and the breach contains six chambers which revolve to the position opposite the barrel. The barrel is made of iron bars, some inches apart, and confined in their position by rings. This allows a ventilation which keeps the barrel cool, and it being rifled, the ball is found to be as well directed as in solid barrels.

Mr. George P. Brayton, of Providence, has invented a breach-loading cannon. A strong loop of wrought iron is attached to heavy trunnions on the upper and under side of the gun, and swings right and left. When swung to one side, the bore of the gun is exposed; and this being closed by a tight fitting breach pin, the loop is swung back over the pin, making all solid. One of the chief features of this invention is. that if it is necessary to abandon it to the enemy, it is rendered entirely useless by carrying off the breach pin.

The Rodman gun now at Fortress Monroe was cast at Pittsburg. It carries a ball 15 inches in diameter; is 16 feet long, 4 feet in maximum diameter, and weighs 49,100 pounds. It can be loaded and fired in 1½ minutes, and it is so nicely adjusted that six men can work it.

The Hotchkiss rifled cannon ball which has proved so effectual at Fortress Monroe, was patented in 1855 by Andrew Hotchkiss and repatented July 24, 1860, by B. B. Hotchkiss.

Mr. J. S. Smith has patented an invention for the more readily picking of cartridges. Mr. J. J. Hischbuhl has invented a spring pad for the purpose of closing tightly the touch-hole of the cannon after firing, and thereby preventing the premature discharge of the gun while in the act of loading. Mr. John Sigourney took out a patent in 1857 for a projectile for rifled cannon, which is supposed to combine simplicity and strength to a degree theretofore unattained.

These are but a few of the many inventions which are being daily issued by the Patent Office. The success which has followed the exertions of our men of genius in inventing articles calculated to develop the peaceful art of agriculture, now bids fair to attend the same exertions directed to the field of war. We hope the dawn of piece will, ere long, put an end to the necessity of the actual use of any of these life-destrying engines. But enough has already been done to show how readily our people adapt themselves to a new condition of things; and how fertile is the inventive faculty of the American nation.

City Passenger Railroads.

The track of the railroad from Brooklyn to Coney Island is now being laid. The road will extend through Water, Main, Prospect, Jay, Smith, 9th-street, 10th-avenue, 15th-street, to the Coney Island road, and thence to Wyckoff's Hotel, on the easterly end of Coney Island. The road is to be completed by the 20th of September. The entire length is about ten miles. The fare will be five cents to the city line, and thence to the end of the route fifteen cents. The cars are now being manufactured at Springfield, Mass. They are to be finished in the best manner, and to be replete with every convenience.

The Brooklyn City and Newton Railroad Company having obtained a charter from the Legislature last winter, and recently the assent of the Common Council, have commenced work upon the new route. The road will extend from Catharine ferry through Main street, Water street, Front street, Gold street, Bridge street, De Kalb avenue, Broadway, thence to the city line, and to the village of Newtown, in Queens County, a distance of about eight miles. The entire route is to be in running order about the middle of September.

The construction of a horse railroad, on the omnibus route between the Jersey City and Hoboken Ferries, has been commenced. It will be completed early in the Fall.

Eastern Railroad.

The Eastern Railroad Company of Massachusetts was chartered April 14, 1836, and the construction of the road was commenced in August following. The different sections of it were opened as follows: from East Boston to Salem, 13 miles, August 27, 1838; from Salem to Ipswich, 12 miles, December 18, 1839; from Ipswich to Newburyport, 9 miles, August 28, 1840; and from Newburyport to the New Hampshire State line, 10.2 miles, November 0, 1840. Total length of main line, 42.2 miles. Total cost to May 31, 1861, $3,125,124 77.

The Eastern Railroad Company of New Hampshire was chartered June 18, 1836. The construction of the road was commenced in 1839, and completed and connected with the Eastern Massachusetts Railroad November 9, 1840. It extends from the New Hampshire State line to Portsmouth, a distance of 16.6 miles. On the 2d of June, 1839, an act was passed authorizing the company to lease the road to the Eastern Railroad Company of Massachusetts for a term of 99 years from the 18th of February, 1840, the latter agreeing to keep the road in repair, operate it as a part of its own line, and pay to its stockholders the same dividends as to its own. The road is entirely managed by the Massachusetts Company, that of New Hampshire exercising no acts except such as are necessary to the maintenance of its organization. Its construction account at the close of the fiscal year, May 31, 1861, was $510,779 41. The share capital of the company, $492,500.

The Marblehead branch, Salem to Marblehead, 3 miles in length, was authorized in 1839, and completed in December of the same year. Its cost has been $55,843 05.

The Gloucester branch, Beverly to Gloucester, 13.1 miles in length, was authorized in 1845, and completed in December, 1847. Its cost has been $338,879 71.

The Salisbury branch, Amesbury to Salisbury, 8.8 miles in length, was authorized in 1845, and completed in January, 1848. Its cost has been $79,189 38.

The Saugus Branch Railroad Company was chartered in 1848. The road was completed early in 1853, and purchased by the Eastern Railroad Company, under the authority of an act of the Legislature passed April 30, 1852. The road is 8.4 miles in length, extending from South Malden to Lynn. Its cost has been $236,746 82.

The South Reading Branch Railroad Company was chartered in April, 1848, and the road completed Sept. 1, 1850. Its share capital, and equipment was purchased by the Eastern Company July 1, 1851, and since October 1st of that year have operated the road. It is 8.1 miles in length, extending from Salem to South Reading. Its cost has been $209,382 64. Share capital $209,533. Though owned by the Eastern Company, a separate organization is maintained, and a separate report made annually to the Legislature.

The Portland, Saco and Portsmouth Railroad Company was chartered March 14, 1837. The construction of the road was commenced in 1841, and the whole line opened for public use November 21, 1842. On the 28th of April, 1847, a contract was made between this company and the Eastern and Boston and Maine Railroad Companies, whereby the two latter took a lease of the road of the former for a period of 99 years, agreeing to maintain and operate the same, guaranteeing 6 per cent. annually on its cost, and sharing equally in the profits and losses growing out of the lease, excepting an allowance of 25 cents per passenger in favor of the company transporting such between the leased line and Boston. The earnings of the leased line have been sufficient to keep it in repair and pay the rent guaranteed. For the year just ended the Eastern Railroad Company's proportion of the surplus income has amounted to $19,000. The road is 51.30 miles in length. and cost, including equipment, $1,494,792.

The Essex Railroad Company was chartered March 7th, and organized May 29th, 1846, and the road was soon after placed under contract. The first section from Salem to South Danvers 1¾ miles, was opened Jan. 18, 1847, and the whole line to North Andover. 19.86 miles, in 1848. On the 31st of August, 1846, the road was leased to the Eastern Railroad Company for five years from the date of its completion, the latter agreeing to maintain and operate the same, charging therefor the average cost of maintaining and running its own and the Essex road, excepting the cost of the ferry; the lease to be binding on the Essex Railroad Company until the payment of its liabilities to the Eastern. The Eastern Company also guaranteed, and have paid, the interest on the 1st mortgage bonds of the Essex Company to the amount of $214,400, which fall due Sept. 1, 1861. The road has been run by the Eastern Company since its opening. The amount due from the Essex to the Eastern Company is $263,980 04, and interest secured partly by a first mortgage on the portion of the road from Salem to Danvers.

In 1852, measures were taken to change the entrance of the road into the city of Boston, avoiding the ferry at East Boston. The change was effected on the 10th of April, 1854, when trains commenced running to and from the Station on Causeway St. The new route makes use of the

portion of the Grand Junction Railroad between the Salem Turnpike and the crossing of the Boston and Maine Railroad, under a lease, extending 10 years from March, 1852, paying as rent the sum of $11,000 annually.

We have received a copy of the 26th annual report of this company for the fiscal year ending May 31, 1861, from which we learn that the receipts during that time were:

From passengers	$516,959 70
" freight	130,685 80
" parcel post and cars	12,243 73
" extra baggage	369 32
" U. S. mail	9,624 00
" miscellaneous	6,007 19
" property accounts, rents, etc.	8,615 33
	$684,685 07

And the expenditures were:

Coal, 5,205 tons	$30,017 95	
Wood, 2,629 cords	12,884 03	
Machine shops	2,080 69	
Maintenance of way	84,558 64	
Locomotive power	53,817 65	
Train expenses	73,245 34	
Office establishment	24,729 91	
Station expenses	54,226 36	
Mail expenses	1,199 68	
Insurance and taxes	9,334 54	
		346,094 79
Balance		$338,590 28
Rent of G'd Junction road	$11,000 00	
Interest paid and accrued	105,997 63	
		116,997 63
Net earnings		$231,592 65
The net earnings last year were		229,643 93
Decrease		$8,051 28

The surplus income from the Portland, Saco and Portsmouth Railroad might properly be added to the receipts of this company, which would make the gross receipts $703,685 07, and the net increase over last year $10,948 72.

The equipment of the road has been increased in value, and is believed not to be exceeded in completeness and efficiency by that of any railroad in New England. During the year, in addition to general and ordinary repairs, the company have built at their own shops one new engine, and substantially re-built another. Complete and thorough repairs have been made upon nine or ten more, putting new boilers into several, and adapting them to the burning of coal; so that all the principal traffic of the road both freight and passenger, is now moved by coal. One new engine has also been purchased, making 28 engines in all, and rendering the motive power ample for the prompt and economical transaction of business.

Two passenger cars have been rebuilt, and thorough repairs made on several others. Two smoking cars have been constructed from an old 16-wheel car. The number of passenger cars, including the two smoking cars, is now 47. One new baggage car, 32 new short box cars, and 15 long box cars have been built; and 5 platform cars and 4 hand cars re-built.

The equipment of the road now consists of 28 locomotives; 47 passenger, 13 baggage, 155 box, 73 platform, 17 cattle, 136 coal and gravel, 23 hand, and 12 rail and stone cars.

Constant attention has been given to the bridges, so as keep them at all times in a condition of absolute security. The company have laid down during the year 742 tons of new iron rails, of which 314 tons were laid on the main road, and 428 tons on the Gloucester branch. In addition to which 4,779 rails, equal to about 80 tons, have been put down, chiefly on the branches, turnouts, and less used portions of the road. These latter have been welded at the company's shops at Salem and Portsmouth. The number of sleepers used during the year was 29,917, besides 6,854 on the Essex road and 1,739 on the South Reading Branch. A new side track, 700 feet in length, with switches, has been put in at Wenham, and also new turnouts and side tracks at East Boston, Cliftondale, Lynn, and at the Salem Mill-pond.

The fuel account as compared with former years, when wood alone was used, shows a striking reduction of expenditure. It will be seen by the following table that the number of miles run by engines the past year has been greater than in former years, and yet the fuel has cost but $42,901 98, against $71,327 58 in 1858, which was the last year that wood was used exclusively.

The following statement will show the number of miles run by engines, the cost of fuel used, the cost per mile run by engines, repairs of engines, and cost per mile for the seven years ending May 31, 1861:

	Miles run.	Cost of fuel.	Cost of fuel per mile run. cents.	Repairs of engines.	Cost of rep'rs per mile run. cents.
1855.	404,776	$88,427	21.84	$27,179	6.71
1856.	360,551	87,268	24.20	34,446	9.55
1857.	380,403	82,700	21.74	35,447	9.32
1858.	366,582	71,327	19.45	26,892	6.34
1859.	410,997	60'635	14.75	26,035	6.33
1860.	422,321	47,735	11.30	29,497	6.97
1861.	456,825	42,902	9.38	29,011	6.35
Tot.	2,802,455	$480,994	.....	$208,509	....
Av.	400,350	68,713	17.159	29,787	7.033

The number of passengers carried the past year was 1,378,963; tons of freight carried, 112,091.

In reference to the payment of dividends, etc., the report says:

In our last annual report we stated that we had no reason to doubt that the stockholders might look with confidence for a dividend in January last, with the expectation of regular dividends thereafterwards. The ominous aspect of public affairs at the time of declaring the January dividend, seemed to render it discreet to begin and to keep our dividends at a rate which we could hope to maintain under adverse circumstances, and the unhappy civil war, in which the country is now involved, makes it still more advisable. We therefore declared a dividend of two per cent., and another for a similar amount at this time. These dividends, together with the amount of $75,000 for income bonds, due 1st December last—being rather more than two per cent. on the capital of both roads—have been paid out of earnings. The amount of income bonds that have been paid, make in fact the divided income of the railroad six per cent. for the year. The actual net earnings have been, as appears above, somewhat more.

In conformity with the recommendation of our report of last year, and the vote of the stockholders at the last annual meeting, we have issued bonds payable in 1872, fsr the purpose of refunding the bonds due in 1862, to the extend of $605,000, and the corresponding amount of bonds due in 1862 have been cancelled.

The remaining bonds due in 1862 will doubtless be exchanged, or we shall be prepared to pay them at maturity, from sales of bonds due in 1872. In fact we have been purchasing them as favorable opportunities offered.

The financial condition of the company in comparison with former years is highly favorable. We have no floating debt. Our bonded debt has been reduced by the payment of $75,000 of income bonds within the year, and the 1862 bonds are provided for or already exchanged—leaving the earnings of the road, after providing for the annual instalment of $75,000 of income bonds, applicable to the payment of dividends.

The receipts on the South Reading branch during the year were $16,237 61; and the expenditure $20,523 48—a loss of $4,285 87.

The receipts of the Essex Railroad were $76,470 35; and the expenses $51,398 75—net income $25,071 60.

The gross income of the branches was as follows:

	1860.	1861.
Gloucester	$63,286 95	$65,676 23
Marblehead	21,727 98	19,739 56
Salisbury	13,914 04	13,692 48
Saugus	111,279 80	115,725 99
	$210,208 77	$214,834 26

The financial condition of the company at the close of the fiscal year was as follows:

	Dr.
Cost of road and branches	$4,045,166 37
" equipment	315,165 00
Real estate	84,375 61
Due from Essex Railroad	264,102 34

Interest account	41,598 61
	$5,045,630 04

The bonded debt of this company now amounts to $1,960,000 and may be described as follows:

Massachusetts State 5 per cent. bonds, $500,000—dated 1st July, 1837, $100,000; 1838, $100,000, and 1839, $300,000; payable, principal in 20 years, and interest quarterly, 1st January, 1st April, 1st July and 1st October, in Boston. These bonds constitute the sole mortgage on the road. In 1856 an Act was passed by the Legislature, extending the time of payment, and making the capital payable in sums of $75,000 per annum after 1864.

Five per cent. bonds, $710,000—dated 1st July, 1852, and payable, principal 1st July, 1862, and interest semi-annually 1st January and 1st July in London. In 1861 these bonds were extended so as to be made payable in 1872.

Six per cent. bonds, $450,000—dated 1st August, 1854, and payable, principal, 1st August, 1874, and interest semi-annually 1st February and 1st August, in Boston.

Income 6 per cent. bonds, $300,000—dated 1st December, 1854, and payable, in sums of $75,000 annually on the 1st December; interest semi-annually 1st June and 1st Dec., in Boston.

Interest on all classes of bonds has been regularly paid.

To assist in the construction of the Great Falls and South Berwick Railroad, the Eastern Com-

pany guaranteed 1st mortgage bonds of that company to the amount of $60,000, bearing 6 per cent. interest, dated Sept. 1st, 1854, and payable Sept. 1st, 1864; interest payable 1st of March and Sept., at the office of the Eastern Railroad Company, by which it has been paid as it has fallen due.

The time for holding the annual meeting of the stockholders has been changed so as to take place on the second Monday in February, 1862, and the first Monday in February in every subsequent year. The following gentlemen have been re-elected directors for the ensuing year:

President—GEORGE M. BROWNE.

Directors—Samuel Hooper, Micajah Lunt, Franklin Haven, Nathan D. Chase, Wm. L. Dwight, Henry L. Williams, and George M. Browne.

Treasurer—J. B. PARKER.

Superintendent—J. PRESCOTT.

Railroad Earnings.

The earnings of the Milwaukee and Prairie du Chien Railroad, for June, 1861, were:

Passenger	$24,623 36
Freight	108,219 78
Mail and Express	2,362 38
Rents	2,341 00
Ferry	2,270 19
Total	$139,816 71
June, 1860	48,797 30
Increase June, 1861	$91,019 41
The receipts since Jan. 1, 1861, to June 30, 1861, were	439,413 59
Same time, 1860	263,002 31
Increase in six months	$176,411 28

The following are the earnings of the Great Western Railway of Canada for the week ending July 5, 1861:

Passengers	$15,282 08
Freight and live stock	12,746 66
Mails and sundries	1,471 90
Total	$29,500 64
Corresponding week of last year	28,444 97
Increase in 1861	$1,055 67

The receipts of the Grand Trunk Railway of Canada for the week ending June 29, were $59,409 05

Week ending June 30, 1860	55,760 61
Increase	$3,648 44
Total traffic from July 1st, 1860	$3,448,819 07
Corresponding period previous year	2,904,657 61
Increase	$544,162 56

The earnings of the Northern Railway of Canada for the week ending the 6th inst., were:

Passengers	$1,810 92
Freight	7,168 35
Mails and sundries	84 72
Total receipts for week	$9,064 00
Corresponding week last year	6,824 38
Increase	$2,239 62
Total traffic from 1st January, 1861	$210,177 46
Corresponding period of 1860	166,108 64
Increase	$44,068 82

The earnings by the Chicago, Burlington and Quincy Railroad Line in June were:

	1860.	1861.
Freight	$99,770 16	$111,727 00
Passengers	44,115 46	30,408 70
Mails & miscellaneous,	8,537 58	4,920 50
Total	$152,423 20	$147,056 20

The earnings of the Pittsburg, Fort Wayne and Chicago road in June, 1861, were	$206,373
June, 1860	165,795
Increase	$40,578
The earnings of the Erie Railroad for the month of June, 1861, were	$529,757 26
Earnings June, 1860	401,560 14
Increase	$28,197 12

Earnings of the La Crosse and Milwaukee Railroad for June:

	1860.	1861.	Increase.
Freight	$25,716 67	$75,489 02	$49,772 36
Passengers	12,937 17	27,003 75	4,066 58
Mail & misc.	2,136 18	5,509 93	3,333 75
	$50,780 02	$106,002 71	$57,222 69

The traffic receipts of the two railroads leading from Milwaukee to the Mississippi for the first six months of the present year, compare as follows with the first half of last year:

	La Crosse and Mil. R. R.	Mil. and P. du Chien. R'y.
Six months 1861	$440,466 30	$438,011 31
Six months 1860	284,758 22	263,012 21
Increase	$155,708 03	$174,999 10

Boat Building by Steam Machinery.

A company is about to be introduced for the application of the patents of Mr. NATHAN THOMPSON, an American engineer, for boat-building by steam machinery. This machinery is suitable for the construction of boats of every size and mould, and durability and safety are attained from the uniformity and perfection of the various fittings, while the saving in time and labor is extraordinary. The inventor has published testimonials from a large number of the principal persons in the United Kingdom connected with navigation and the working of elaborate constructive establishments, and these are all of the most unequivocal character as regards the value of the system both in a national and commercial sense. "A cutter 30 feet in length can," it is said, "be constructed and delivered perfect in every respect within a few hours after the order is received for it," and the Master Shipwright of Woolwich Dockyard, who was appointed by the Admiralty to examine and report on the method, has fully corroborated the opinions express by other authorities. The revolution which it is likely to create will, it is believed, be analogous to that effected in other departments of labor by the sewing machine, and the contrivances which have of late years multiplied the production of clocks and watches. In our Colonies and distant territories, where so much of the progress of each settlement depends upon the facilities for river and coast navigation, its advantages are likely also to be of especial importance."—*London Times.*

Chalco Railroad.

A charter has been granted to Sres. Arbeu and Co., by decree dated the 26th April, for the construction of a railroad from this city to Chalco, passing through Mixcoac, Coyoacan and Tlalpam. The charter provides for the sale of stock to the amount of two millions of dollars, in shares of one thousand dollars each, of which the government takes two hundred shares. Two months are given for the survey of the route and the presentation of the plans and estimates. Work is to be commenced on the road as soon as these plans are made satisfactory, and eight months after the commencement of work the road to Tlalpam is to be concluded. To facilitate the work the government is to give sixty thousand dollars on its stock as soon as operations are actually commenced.—*Mexican Extraordinary.*

Illinois Central Railroad.

Mr. JOHN M. DOUGLASS, of Chicago, has been appointed Resident Director of this road, to fill the vacancy made by the resignation of Gov. BANKS. MR. DOUGLASS has been connected with the company, as counsel, for eight years past. The appointment is spoken very highly of by the Press in Illinois.

The Cape Cod Canal.

The committee on the Cape Cod Canal, after examining several routes, conclude to adopt the one west of Sagamore Hill in West Sandwich, running near Herring Pond, Indian Village, thereby avoiding the deep, muddy marshes. The deepest cut through the route is fifty-four feet seven inches, which is not objectionable, the larger portion extending through a natural valley. The canal will be about 7½ miles long more than half a mile shorter than other proposed routes. The width will be 150 feet, all stoned. The engineers will shortly commence their survey in order to estimate the cost of the undertaking.—*Bristol Co. Republican.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, July 20, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The favorable reports from the Seat of War, combined with the abundance of money, has caused a very strong upward movement in all kinds of securities. The improvement perhaps is most marked in Federal and low priced State stocks. Such has been the excessive depreciation in prices, owing to the war and to the complications growing out of it, that there is great margin for a rise, as soon as the General Government shows itself able to asserts its authority and restore order. The continued importation of gold has reduced the price of money to the lowest rate of interest. The vast expenditures of the Government do not seem to have any influence unless to make money cheaper. There is but little demand for the ordinary operations of business.

Crops in every quarter are most abundant; that of wheat bids fair to be in excess of the great crop of last year. There will be an immense surplus for exportation. Unfortunately for ourselves, the crops in England and Western Europe are equally good with our own, which must have the effect to make prices rule very low for the coming year. The earnings of our railroads continue to be large, considering the condition of the country. The receipts, however, are chiefly from the transportation of produce, there being very little movement of general merchandise or persons except the military.

The Cleveland, Columbus and Cincinnati Railroad Company have declared a semi-annual dividend of 5 per cent., payable Aug. 1. Stockholders registered in New York will be paid at the office of the U. S. Trust Co., 48 Wall St.

The Connecticut River Railroad Company have declared a dividend of 3 per cent., payable Aug. 1.

The New Jersey Railroad and Transportation Company have declared a semi-annual dividend of 5 per cent., payable Aug. 1.

The interest on the 1st mortgage bonds of the Hudson River Railroad Company will be paid Aug. 1.

The Illinois Central Railroad Company have decided to receive corn in payment of land notes at the market value in Chicago, less freight. The heavy losses of the farmers upon their wild cat bank notes have rendered payment in money, in many cases, impossible; but the country is full of corn, and land notes can be paid in this currency with facility.

The Cincinnati and Chicago Air Line Railroad has been formally opened by the running of an excursion train from Chicago to Cincinnati, making the trip in eleven hours.

The war loan of a million of dollars, Massachusetts 6 per cents. was taken at ½a1 per cent. premium.

A new survey of the line between Fall River and Newport has just been completed, and some alterations will be made from the route originally proposed. The work will soon be commenced, and prosecuted with vigor.

Michigan Central Railroad.

This company was chartered on the 28th March, 1846, with a share capital of $5,000,000, with authority to increase the same to $8,000,000, and to purchase the railroad partially completed by the State, having a similar title. The construction of a railroad from Detroit to St. Joseph, on Lake Michigan, was commenced by a private company, chartered in 1831, which, up to 1837, had expended on the work $116,902. In 1837 the State having undertaken an elaborate system of internal improvements, assumed the construction of this line (which formed a part of the system) and opened the first section from Detroit to Ypsilanti, 29.4 miles, in January 1839. The road was extended to Ann Arbor, 8 miles, in October, 1839; to Dexter, 9.5 miles, in July, 1840; to Jackson, 28.7 miles, in January, 1842; to Marshall, 31.7 miles, in August, 1844; to Battle Creek, 12.9 miles, in November, 1845, and to Kalamazoo, 22.8 miles, in March, 1846—in all 143 miles. The State then becoming embarrassed, the road was sold to the present company. It was cheaply constructed, after the fashion of the times, with a flat rail laid upon longitudinal sills. The State expended upon the work about $2,500,000.

The company took possession of the road on the 23d September, 1846, and immediately provided the means for its extension westward to New Buffalo, on Lake Michigan, a distance of 74.8 miles, and for the re-construction of the portion already opened. The graduation of the new line was commenced in March, 1847, and the different sections opened as follows:—from Kalamazoo to Paw-Paw, 16.3 miles, in July of the same year; to Decatur, 7.7 miles, in August; to Dowagiac, 11.1 miles, in September; to Niles, 12.5 miles, in October, 1848, and to New Buffalo early in the spring of 1849.

From New Buffalo the road was extended to Michigan City, 9.6 miles, on the 30th October, 1850. Upon reaching the Lake, communication was had with Chicago by means of steamboats. The road was finally constructed into Chicago on

the 21st April, 1852. That portion of the line west of Michigan City, and in the State of Michigan, was constructed nominally by the New Albany and Salem Railroad Company, under the authority given to that company to construct branches—the State refusing to give authority for this purpose to the Michigan Central Company. For the Illinois portion of its line the Illinois Central Railroad was used under a perpetual agreement therefor. In Chicago its station is occupied and owned in connection with the Illinois Central and the Chicago, Burlington and Quincy Railroad Companies.

SHARE CAPITAL—Authorized, $8,000,000.
" Paid in, $6,057,784.

FUNDED DEBT—$7,968,489: classified as follows:

1st Mortgage, 6 per cent. sterling bonds (not convertible), $467,489—issued 1st July, 1852, and payable, principal 1st July, 1872, and coupons semi-annually, 1st January and 1st July, in London, England.

1st Mortgage, 8 per cent. sterling bonds (convertible), $500,000—issued 1st September, 1854, and payable, principal 1st September, 1869, and coupons semi-annually, 1st March and 1st Sept., in London, England.

Eight per cent. bonds (not convertible), $250,000—dated 1st October, 1850, and payable, principal 1st October, 1860, and coupons semi-annually, 1st April and 1st October, in New York City or Boston.

1st Mortgage, 8 per cent. bonds (convertible), $2,598,000—issued 1st September, 1854, and payable, principal 1st September, 1869, and coupons semi-annually, 1st March and 1st September, in New York City or Boston.

1st Mortgage, sinking fund, 8 per cent. bonds (convertible), $4,153,000—issued 1st Jan., 1858, and payable, principal 1st Jan., 1882, and coupons semi-annually 1st Jan. and 1st July, in New York City or Boston.

FLOATING DEBT—$125,000, being bills payable.

* From the Treasurer's Report, which differs from that of the Superintendent, which is used in the other tables. † Includes: excess of materials on hand, 1st June, 1857, since used $132,554; loss on steamers for two years past $126,786; and amount debited to reduce assets from cost to estimated cash value, $100,000. The actual operating expenses for the year 1857-8 were $1,531,218. ‡ Deficit $14,335.

The equipment of the road consists of 98 locomotives; 62 first class passenger cars with 12 wheels; 8 do., with sleeping seats; 3 drovers' sleeping cars; 12 second class passenger cars; 23 baggage cars; 1,060 freight cars; and 251 cars for gravel, etc.

The following is the list of directors chosen at the annual meeting June 24, 1861:

President—JOHN W. BROOKS, Boston, Mass.
Vice President—H. H. HUNNEWELL, " "
Directors—John W. Brooks, Nathaniel Thayer, R. B. Forbes, H. H. Hunnewell, Elon Farnsworth, Erastus Corning, D. D. Williamson, Geo. F. Talman, J. M. Forbes.
Treasurer—ISAAC LIVERMORE, Boston, Mass.
Superintendent—R. N. RICE, Detroit, Mich.
Auditor—WILLIAM BOOT.
Master Mechanics—A. S. Sweet, Jr., Detroit, Mich.; J. D. Carwood, Marshall, Mich.; Thos. Cobb, Michigan City, Ind.; and Wm. S. Brown, Joliet, Ill.

(From the Journal of the Franklin Institute.)

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations. By M. CEZANNE, Engineer des Ponts et Chaussees. Translated by J. BENNETT.

(Continued from p. 518.)

PART SECOND.

Iron Arches.—The iron arches of the Theiss bridge are copies of the arch bridges constructed upon the Northern Railroad under the direction of M. Maniel, Engineer-in-Chief "des Ponts et Chaussees." They are composed of rolled iron trusses, in which we may distingnish three parts:

1st, The arch proper, which is parabolic, and with a rise of $\frac{1}{6}$ of the span.

2d, A horizontal top stringer, tangent to the summit of the arch.

3d, The spandrils formed of vertical equidistant uprights, and inclined struts, describing with the uprights a series of triangles decreasing towards the summit.

The section of these different pieces is a double **T**, formed of a web and of two stiffening plates fastened with angle-irons.

The pieces of the spandrils are connected with the arch and the top stringer in the same way; the webs of these pieces are prolonged until they meet with the web of the arch or that of the stringer, against which their section rests. The stiffening plates of the stringer or those of the arch return with their angle-irons, and envelop the stiffening plates of the spandrils, thus strengthening the section which without it would present a weak point where the angle-irons of the spandrils abut against those of the arch and stringer. The angles formed by the webs of the different pieces are filled exactly by wrought iron triangles, whose base is cut according with the curve of junction. Finally, the whole assemblage is enveloped with two covering plates, cut in the shape of a goose's foot, and presenting a scarf towards each piece.

The arch proper is traced so that the neutral axis of the different sections forms, from the first vertical upright to the last, a parabola, with a span of 134.78 feet, and a rise of 16.84 feet. The total opening of the arch from heel to heel is 135.85 feet.

The truss is divided into 20 equal sets by the uprights, which are 6.73 feet from axis to axis.

The five uprights of the summit are imaginary, being replaced by a wrought iron plate in full.

The stringer is not perfectly horizontal; it presents, besides the variations in thickness of the wrought irons, a camber of 1.37 inches, obtained at the moment of raising by an energetic wedging of the arches.

The two arches on the same side of the axis of the bridge bear one track; they are, from centre to centre, 5.7 feet.

The two middle arches are therefore, 7.42 ft. from centre to centre.

The width of the intermediate space petween the axis of the rails is 8.2 feet.

The four arches are made solid by three systems of connection, viz:

1. A horizontal strutting in the plane of the neutral axes of the top stringers.

2. A strutting whose surface envelops the neutral lines of the arches.

3. A system of vertical stays or ribs distributed in three vertical planes on each side of the axis of a bay, to wit:

1. In the vertical plane of the second vertical strut two stages of diagonals.

2. In the vertical plane of the fifth vertical strut one stage of diagonals.

3. In the vertical plane of the eighth vertical strut one tier of diagonals.

These diagonals are formed of two **T** irons, opposed face to face, riveted at their ends upon binding gussets fixed upon the arches, and in their middle upon a plate of the same thickness as the gussets.

At the ends of the arches, a wrought iron plate perpendicular to the direction of the last element, is riveted upon two angle irons which are fastened to the web of the arch. This wrought iron plate bears upon the shoes through the intervention of iron wedges.

Against the abutments are interposed between the heel of the arch and its shoe, four couples of steel wedges, which are driven tight when a cold snap occasions any play between the heel and shoe.

The top stringers enter into square bodies and abut against each other at the middle of the pier. They are not directly riveted together but are connected by means of horizontal plates embracing them.

Upon the abutments the top stringers are received by a horizontal cushion of cast iron imbedded in the plinth. The web of the stringer is strengthened each side by two wrought iron plates .43-inch thick; all these five plates are pierced with a hole, in which is inserted a steel dowel 1.98 inches in diameter, and projecting beyond each face of the stringer.

Two iron ties, 1.96 ins. diameter, wormed at one end and flattened at the other in form of a ring, lay hold of this dowel by their rings, and, penetrating the brick masonry which forms the platform of the abutment, traverse the upper stones of the stepped walls and the cast iron pillows imbedded in these stones.

The wormed ends of these ties receive screws, whose tightening draws the truss towards the abutment.

The ends of the steel dowel are wormed and provided with nuts which hold fast the rings of the tie-rods.

All the parts of the trusses receive two coats of red lead paint, and two coats zinc grey.

A measurement of the bridge gives the following results:

Designation of parts.	Partial weights.	No. of parts.	Total.
	lbs.		lbs.
An arch without its struttings	59890.6	4	239,562
Strutting between two arches of the same track	19617.4	2	39,235
Strutting of intermediate space	20332.0	1	20,332
An entire truss			299,129
Weight per running foot $\frac{299129}{136}$			=2,199 lbs.

If we compare with the total of the above table:

1st. The weight of the platform, of the tracks, and the hand rails, at..... 140,250 lbs.

2d. The weight of the proof load, about 2,628 lbs. per running feet of track. 748,000 "

Total..... 888,250 "

We see that the iron arch bears permanently .47, and accidentally the triple of its own weight.

Theory of the Arches.—In the case of a uniform load, the equidistant uprights transmit equal weights to the arch; the curve of pressures or of equilibrium is a parabolic polygon, as in suspension bridges. If, then, the axis of the arch coincide with the parabolic polygon, there will not be, on the supposition of an incompressible arch, any tendency to derangement; the inclined struts will receive no thrust, and it will be easy to determine either by calculation or graphically the thrusts on each of the elements of the arch.

When the load is not uniformly distributed, the uprights transmit unequal pressures upon the arch, which, on the supposition of its being jointed, have a tendency to a change of form. If the uprights are connected by inclined struts forming a series of triangles incapable of a change of form, the arch will preserve its figure, but the inclined struts will produce reactions which must be taken into account in the study of the forces acting upon the different elements of the arch. This investigation may be made by a graphic process easily applied and which is suggested by the theory of the funicular polygon and that of jointed systems.*

This method being applied to the different hypotheses upon the position and magnitude of the loads will give, for the case considered, the value of the efforts in each of the elements of the arch. The section of each element will be determined by dividing the greatest of these efforts found for the element by the co-efficient of work adopted per foot of surface.

The co-efficient of work admitted for the Theiss bridge is, for the elements of the arch proper, which always resists compression, 5 kilogrammes per square millimetre, or 7,122 lbs. per square inch.

For the uprights and inclines, which sometimes resist tension and sometimes compression, according with the position of the movable loads, 2 kilogrammes per square millimetre, or 2,849 lbs. per square inch.

For the top stringer, whose parts act first as elements of the arch, then as beams fastened upon neighboring uprights and loaded on the middle with a part of the load, that of a locomotive axle for example, and finally as a tie between two piers (see the Third Part), the maximum co-efficient adopted was 7 kilogrammes per square millimetre, or 9,971 lbs. per square inch.

The form of the elements and arrangement of the wrought iron pieces are not indicated by any theory, but by practical considerations. It was also to facilitate the execution that a uniform section was adopted for all the inclines and vertical uprights, and that the section of the top stringer and that of the arch were not changed continuously. The top stringer presents only four different sections; the arch presents five, which increase from the springing towards the summit, contrary to the usual custom in metallic arches and in bridges of masonry.

The results of the resolution of the above mentioned efforts justify this anomaly. The weight of the structure being inconsiderable in comparison with that of the movable loads, the curve of pressures departs widely from the axis of the arch. Hence arises a tendency towards a change of form, which is resisted by the energetic action of the inclines; these actions modify the distribution of efforts in the arch and may increase those at the summit and diminish those at the springing line.

When the spandrils of the arch are not constructed so as to support without inconvenience the variations in efforts arising from the change of place of the movable load, it is requisite that the permanent weight should be such that the curve of pressures should not depart from the arch proper, or that it should remain within certain limits traced in this arch. This is a condition rigorously observed for arches in masonry or in cast iron.

(To be continued.)

* The theory of this graphical process is thoroughly described in a memoir written for the Northern Railroad Company, advocating the projects of metallic bridges constructed upon the line from Saint-Quentin to Erquelines.

North Pennsylvania Railroad.

A meeting of the holders of the 1st mortgage bonds of this company was held in Philadelphia on the 8th inst., to hear the report of a committee previously appointed to consider the policy of funding certain coupons of the bonds of the company, due and to become due, which the company confess their inability to pay. The chair was occupied by I. P. Hutchinson, Esq. The following is the report of the committee:

REPORT OF COMMITTEE OF FIRST MORTGAGE BONDHOLDERS OF NORTH PENNSYLVANIA RAILROAD COMPANY.

The committee appointed on the 1st instant "to investigate the affairs of the company, to confer with the Board of Directors of the North Pennsylvania Railroad Company, and to report what action should be taken by the first mortgage bondholders to promote and protect their interests," respectfully report that they have given such attention to the duties assigned to them as the limited time at their disposal would permit.

Their investigation has been limited chiefly to an inquiry into the financial condition and necessities of the company, and they have based their conclusions on this subject entirely upon information asked for and obtained from that Board of Directors. No examination into the affairs of the company generally, or into the management of the road, has been attempted. Such an inquiry, if undertaken at all, should be made thoroughly, and would require much time and labor.

The cash liabilities of the company on the 30th June, as stated by the Board in reply to an inquiry of the committee, was	$189,323 26
Deduct available assets	32,511 11
Which leaves a deficit of	$156,812 15
The amount required to carry the company through the next twelve months may be estimated by adding to the above deficit the 6 per cent. coupons due July, 1861, January and July, 1862	$225,000 00
Ten per cent. coupons, due October, 1861, and April, 1862	35,150 00
Ground rents and interest for 12 m'ths	5,628 00
Making a total of	$422,590 15
Assuming that the reduction of expenses to be effected will balance the falling off of revenue, the net earnings may be put down the same as last year—say	212,000 00
Which shows an estimated deficiency on the 1st of July, 1862, including coupons due on that day, of	$210,590 15

The stockholders should furnish this amount, if they believe that their interest in the road is sufficient to warrant it. They have no right to expect the bondholders to make a concession for their benefit. The company has made default for more than six months in the payment of coupons due last January, and has announced, publicly, that "it will be impossible" to pay the coupons due July 1, 1861, and to mature January 1 and July 1, 1862. It is, therefore, now in the power of the first mortgage bondholders to take possession of the road, or to cause it to be sold under their mortgage. The Committee does not recommend such action at this time, but on the contrary they hope that a generous consideration for the interests of the stockholders will influence the bondholders to give the company one more chance to recover itself.

The committee thought proper to suggest to the Board of Directors that they should make an appeal to their constituents, to which they have replied, that they have no reason to believe that such an application would receive a favorable response.

The other parties having a permanent interest in the road are the bondholders.

There are two mortgages—the first securing $2,500,000, six per cent. bonds. It covers the railroad and appurtenances, a part of the rolling stock and the franchises of the company. It secures to the first mortgage bondholders a preference over all other claims, (including that of the chattel bondholders) upon the net receipts of the road. Under its provisions the first mortgage bondholders have a right to demand that the interest upon their bonds, and also an appropriation of at least $25,000 per annum to a sinking fund, as provided for in the mortgage—shall be first paid out of said receipts.

These are their strict rights, which, however, it might be unwise or unjust to exact.

The chattel mortgage covers certain real estate not necessary for the working of the road, and the rolling stock—a portion of the latter being subject to prior lien under the first mortgage. It secures bonds for five hundred thousand dollars, bearing ten per cent. interest. About $350,000 have been disposed of by the company, and part of the balance has been pledged as collateral, and part are in possession of the company.

In case of default of payment of interest or principal for thirty days, the chattel bondholders may, by summary process, take possession of their property. The interest due to the first mortgage bondholders has not been paid regularly, while that due to the chattel bondholders has always been paid in full, promptly, when due.

The floating debt, amounting to about $100,000, should be paid off.

The two classes of bondholders have a common interest in the success of this road, and it is to be hoped that they will unite in such action as may tend to promote their interest and benefit all concerned.

The committee, therefore, recommend to the first mortgage bondholders that they should fund in a manner somewhat similar to that proposed by the Board of Directors of the North Pennsylvania Railroad Company, the following coupons, viz:—

The unpaid balance being five-sixths, in coupons, due January 1, 1861, amounting to	$62,500
The coupons due July 1st, 1862	75,000
" maturing January 1st, 1862	75,000
Total	$212,500
Provided that the chattel mortgage bondholders shall fund at least one year's interest on their bonds—say coupons due next October and April—amounting to about	$35.000
	$247,500

This would give the company relief to the extent of $37,000 more than the estimated deficiency, and would be equivalent to lending $247,000 at six per cent. interest for about nine years.

The coupons thus funded should not be surrendered to the company, but should be deposited with the trustees; and in case of future default in payment of interest on the bonds of the company, or of the interest on the scrip for the funded coupons, then these coupons are to again become due. The bondholders should also reserve all their legal rights, in such manner that the proposed funding shall be nothing more than an agreement to postpone payment, without, in any way, affecting the other legal rights to which the owners are entitled, by reason of the default of the company. That is, the bondholders should be in the same position as regards their ability to proceed under the mortgage to take possession of, or to sell the road, as they would be if notice of default had been given, and as if the time of payment had not been extended. The object of this reservation of legal rights is to enable the bondholders to institute proceedings under the mortgage, without delay, whenever they may become satisfied that their interest demands such action. This arrangement should be made very carefully and under legal advice.

Much has been said, both in the press and by individuals, about the inefficient management of the road. The committee have not made such an examination into the affairs of the company as would warrant them in expressing an opinion upon this subject. Under existing circumstances they are inclined to believe that the responsibility of securing the most effective and economical administration of the affairs of the company should rest with the *present* Board, without interference. They have already effected a considerable reduction in the salaries of the present officers, whose term of service does not expire until the end of the year. In January next the Board will have it in their power to make changes, without injustice, if they shall deem it expedient to do so.

The Committee append a resolution for the adoption of the meeting, if the views and recommendations contained in the report are approved.

All which is respectfully submitted.

JOHN H. TOWNE,
WM. WELSH,
WM. BUCKNELL,
HENRY J. BOLLER.
Committee.

Resolved, That the views and recommendations contained in the report just read be approved, and that a Committee be appointed to carry them out.

Some discussion ensued; after which, a series of questions and answers which had been submitted by the committee to the managers was road. They embodied the following statements:

The earnings from Dec. 1, 1860, to May 1, 1861, were:—

Passengers		$60,501 47
Coal		50,526 84
Pig iron		5,923 71
Lumber		1,983 67
Local freights		39,828 98
Through freights		13,538 42
Mails		1,378 00
Rents		2,363 10
Total		$176,046 69
The expenses were:—		
Maintenance of way	$11,182 31	
Motive power	31,427 37	
Maintenance of cars	8,192 07	
Conducting transportation.	26,034 47	
General expenses	7,901 25	$84,737 48
Net earnings		$91,309 21
Decrease of gross earnings		8,772 08
" expenses		2,762 13
Decrease in net earnings		$6,009 95

The construction account has been increased $3,156 09 by filling up the high tressel bridge above Gwynedd, not yet completed which, when finished, will be the fifth that has been filled up since the road was opened, leaving but one small one over Sandy Run, which it is not proposed to fill. The balance sheet of June 30th, 1861, shows the following indebtedness:—

Bill payable	$113,935 56
Balance of coupons due Jan. 1, 1861	65,005 00
Balance due on previous coupons	1,127 50
Unsettled accounts and loans	9,255 20
Total cash liabilities	$189,232 26
Less available assets	32,511 11
Actual debt	$156,812 15

In carrying out the proposed arrangement of funding three coupons, the following payments would have to be provided for between now and January 1st, 1863—to wit:—

The present deficit	$156,812 15
Chattel coupons for 18 mos	52,725 00
Ground rents and interest, 18 mos.	8,442 50
Interest on scrip, 12 mos.	13,500 00
Six per cent. coupons, due Jan. 1, 1863.	75,000 00
Total	$306,479 65

Which amount, it is presumed, the net earnings of the road in the next eighteen months will provide for.

Condensed balance sheet North Pennsylvania Railroad Company, June, 1861:—

	Dr.
Capital stock	$3,149,130 00
Installment account	6,745 00
6 per cent. bonds	2,500,000 00
10 per cent. bonds	351,500 00
Ground rents and mortgages	88,973 21
Bills payable	113,935 56
6 per cent. coupons due Jan. 1, 1861	650,005 00
Due on previous coupons	1,127 50
Loans and accounts due	9,255 20
Freight receipts	114,580 56
Passenger receipts	71,209 89
	$6,471,461 92
	Cr.
Construction of road	$4,794,311 28
Equipment of road	396,926 88
Stations and shops	69,737 88
Right of way	204,214 03
Real estate	385,661 34
Telegraph	4,967 39
Trustees	6,354 00
Stock North Pennsylvania Railroad.	25,767 11
Stores on hand	18,039 58
Bills receivable	12,500 00
Sundry accounts	10,814 40
C. M. coupons, due April 1, 1861	17,325 00
Profit and loss account	405,894 63
Interest and discount	11,954 43
Expenses paid on road	89,260 85
Cash on hand	17,733 02
	$6,471,461 92

The report of the Committee was adopted and the meeting adiourned.

Northern Central Railroad.

Receiver Appointed.—GEORGE BRINTON has been appointed Receiver of the Baltimore Central Railroad Company, and is authorized to take charge of and receive and hold, under the direction of the Common Pleas of Delaware county, all the rolling stock, motive power, property and estate of the company.

A New Portable Filter.

We recently had our attention called to a portable filter, weighing scarcely an ounce and small enough to be carried in the vest pocket, designed to be used by soldiers upon a march or elsewhere, for drinking the water from springs and streams, much of which is often dirty, and filled with decayed vegetable matter. A large portion of the sickness, especially disentery, summer complaints, etc., is produced from this cause.

The filter consists of a rubber tube, sufficiently long to reach the spring without a great effort at stooping, on one end of which is a small piece of either wood or metal designed to be inserted in the mouth; and on the other end is a small circular piece of wood or metal about an inch and a quarter long; inside of this is a piece of felt through which the water is drawn, and perfectly strained from all impurities before entering the mouth. A perforated cup prevents the larger particles that may be floating in the water from entering the tube. The felt may be taken out and a new piece inserted as often as required.

A great and additional benefit likely to result from this little invention is the preventing of rapid drinking. Of course, but a small (yet sufficiently large) stream is drawn into the mouth at once, and this prevents the injurious effects so often occasioned by drinking quickly and in large quantities. The inventor Mr. H. A. Hall secured his patent on the 21st of May last; but orders for the supply of regiments or individual soldiers should be sent to Munson & Co., No. 23 Cedar st., New York. Parties wishing to supply friends at

the seat of war can do so, and they will be sent on, without additional expense. These important conveniences sell for 50 cents singly, and ten per cent. off when ordered in quantities.

United States Census.

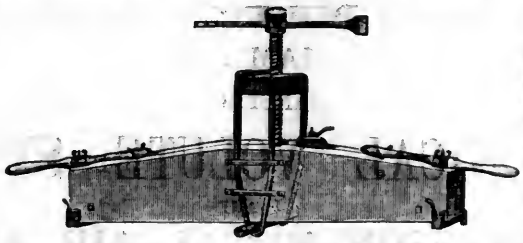
LOCOMOTIVES FOR SALE.



THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.
Boston, Nov. 24, 1860, tf

SPECIAL NOTICE. Transfer of LETTERS PATENT.

WHEREAS Letters Patent, bearing date Nov. 1st, 1853, were granted by the Government of the United States to George Williston, of Brunswick, County of Cumberland, and State of Maine, for a Machine to straighten and curve Railroad Iron, giving and granting to said George Williston, his heirs, executors and assigns, for the terms of fourteen years from the date of said Letters Patent, the full and exclusive right and liberty of making, using and vending to others to be used, the said Machine, and whereas said George Williston sold and transferred one undivided half of his entire interest in said Letters Patent, to Wm. H. Lunt, of Bowdoinham, County of Lincoln and State of Maine, as will appear by reference to deed, date Nov. 2, 1853, recorded in the Patent Office at Washington, Nov. 9, 1853, and whereas the said George Williston and Wm. H. Lunt, have on this 31st day of May, 1861, sold and transferred their entire interest in said Letters Patent, to Albert Bridges and Joel C. Lane, Merchants in the City of New York, doing business under the name and firm of A. BRIDGES & CO.,—THEREFORE, we, the undersigned, hereby notify and warn all persons, against manufacturing, vending or purchasing said Machines from any person or persons whatever, except from us who have and hold the exclusive right thereto.

NEW YORK, July 10, 1861.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. Bell, Major of Ordnance, to Colonel H. K. Craig, Chief of Ordnance, by order of Hon. John B. Floyd, Secretary of War.

Washington Arsenal, December 10th, 1857.
Colonel H. K. Craig, Chief of Ordnance,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

New York, Saturday, July 27, 1861.

Galena and Chicago Union Railroad.

This company was chartered on the 16th January 1836, with authority to construct a railroad from Galena to Chicago. A supplementary act, passed on the 4th March, 1837, authorized the company to connect at any point on its route with the Central Railroad. With the exception of of some preliminary surveys, nothing was done towards construction for the next ten years. On the 24th February, 1847, an amendment to the charter was passed, providing for the re-organization of the company, granting the right of way through lands belonging to the State, and increasing the capital to be raised to any sum not exceeding $3,000,000. Under this act the company organized in the month of April following.

In March, 1848, the first division of the road, extending from Chicago to East Elgin, 42.50 miles, was placed under contract. The first section to the Desplaines river, was opened by the 1st June, 1849, and the whole division to Elgin on the 22d January, 1850.

The second division, extending from Elgin to Rockford, about 50 miles, was commenced in the spring of 1850, and opened for business as follows: from Elgin to Huntley, 12 miles, on the 15th September; to Marengo, 24 miles, on the 18th October, and to Belvidere, 36 miles, on the 3d December, 1851; to Cherry Valley, 42 miles, on the 10th March, and to Rockford, 8 miles, on the 2d August, 1853.

The third division, extending from Rockford to Freeport, and to a junction with the Illinois Central Railroad, about 28 miles, was commenced in the spring of 1852, and completed and opened for business on the 1st September, 1853.

The Beloit Branch, extending from Belvidere Junction to Beloit, 21 miles, where it connects with the Beloit and Madison Railroad, was opened on the 14th November, 1853.

The Chicago, Fulton, and Iowa Line, from the junction (Turner) 30 miles west of Chicago, to Dixon, 68 miles, was authorized by an act passed on the 12th February, 1853. Construction was commenced in May following, and the work completed to Lane, 45 miles on the 10th January, and to Dixon on the 4th December, 1854. The remainder of the line from Dixon to Fulton City was constructed under the charter of the Mississippi and Rock River Junction Railroad Company, and completed to Sterling, 80 miles west from the junction, on the 22d July; to Morrison, 94 miles, on the 23d September, and to Fulton, 105.50 miles, on the 16th December, 1855.

The first division of the road from Chicago to East Elgin was originally laid with a flat rail, resting on longitudinal sills. This was replaced during 1852 and 1853, with a heavy rail similar to that laid on the other divisions. In 1855-6 and '57, the road from Chicago to the Junction, 30 miles, was laid with a second track.

The St. Charles Air Line Branch was opened from South Branch Depot, in Chicago, to Harlem, 10.50 miles, on the 1st January, 1856. This branch was constructed by the Chicago, St. Charles and Mississippi Air Line Company, and soon after sold to the Galena and Chicago Union Company. By this purchase the latter obtained its depot grounds on the South branch of the Chicago River, which have since been connected by side tracks with the railroads entering the city on its eastern, southern and south-western sides.

An extension road from Fulton to the new bridge over the east channel of the Mississippi was constructed in the spring of 1860. This bridge was built by a separate company under the auspices of the Chicago, Iowa and Nebraska Company, for the purpose of connecting its road with the Fulton Branch. It extends from the Illinois shore (2,800 feet) to Little Rock Island. The width of the western channel is only 800 feet. Cars are transported across this channel by ferry boats. To bring this improvement into use the Galena and Chicago Company constructed one mile and three-quarters of road. This company has also purchased extensive depot grounds on the Iowa side.

SHARE CAPITAL—Authorized, $7,000,000.
" Paid in, $6,028,300.

FUNDED DEBT—$3,524,200: described as follows:

1st Mortgage, (3rd Division) coupon bonds, $600,000—dated 1st February, 1852, and payable, principal as follows—$262,000, 1st February, 1862; $160,000, 1st August, 1862; $60,000, 1st, February, 1863, and $118,000, 1st August, 1863, and coupons semi-annually, 1st February and 1st August, in the city of New York. These bonds are secured by a mortgage on the third division of the road extending from Rockford to Freeport, 28 miles.

1st Mortgage (general), 7 per cent., coupon bonds, $1,393,000—dated August, 1853, and payable, principal 1st August, 1863, and coupons, semi-annually, 1st February and 1st August, in the city of New York.

2d Mortgage (general), 7 per cent., coupon bonds, $1,629,000—dated 1st May, 1855, and payable, principal 1st May, 1875, and coupons semi-annually, 1st May and 1st November, in the city of New York.

SINKING FUNDS—1st mortgage, $7,000; 2d mortgage, $480,000.

LENGTH OF ROAD.

Main Line:—Chicago to Freeport	121.00 miles.
Elgin Branch—Elgin to East Elgin	1.50
Beloit Branch—Belvidere to Beloit	21.00
St. Charles Air Line—Chicago to Harlem	10.50
	33.00 "
Chicago, Fulton and Iowa Line—Turner to Fulton	105.50 "
Fulton Extension	1.75 "
Total mileage owned by company	261.25 "

Second track (on main line) 30 miles. Sidings, turnouts, etc., 44.50 miles.

Roads operated by Company under Lease or other arrangement—

Elgin and State Line—East Elgin to Wisconsin State Line	33.20 miles.
Beloit and Madison—Beloit to Footville	17.30 "
Total mileage operated by company	311.75 "

The office of the company is at Chicago, Ills. The officers and directors for 1860-'61, are as follows:

President—WALTER L. NEWBERRY.

Directors—Walter L. Newberry, William H. Brown, Orrington Lunt, Flavel Mosely, Jason McCord, Jonathan Burr, Edward K. Rogers, Wm. Larned, John Wentworth, Chicago; Charles S. Hempstead, Galena; Thos. D. Robertson, Rockford; D. A. Knowlton, Westfield, N. Y.; William H. Ferry, Utica, N. Y.

Vice President—WILLIAM H. BROWN.

General Superintendent—EDWARD B. TALCTT.

Assistant Sup't—EDWARD H. WILLIAMS.

Secretary—WILLIAM M. LARRABEE.

Treasurer—WILLIAM LARNED.

Auditor—HENRY TUCKER.

Attorney—ELLIOTT ANTHONY.

Engineer—W. S. Pope.

Master Mechanic—THOS. BURGESS.

Journal of Railroad Law.

RECIPROCAL DUTIES OF PASSENGERS AND CARRIERS; WHEN A PERSON MAY RIDE UPON THE PLATFORM AND NOT BE GUILTY OF NEGLIGENCE; THE RAILROAD ACT OF 1850 CONSTRUED.

The case of Willis *vs.* The Long Island Railroad Company, decided at the Orange General Term of the New York Supreme Court, determines a number of questions relative to the duties of companies in providing seats for passengers; the obligation which the individual is under to exert himself in getting a seat, when they are encumbered with baggage, or are monopolized by selfish fellow passengers; the construction of the general railroad act of 1850 relative to passengers standing upon the platform of the cars, etc.

The plaintiff together with his minor son got upon the defendants' cars at Hempstead Branch; they had just time to attend to their baggage and get upon the train before it started: they found the car full and therefore took their stations upon the front platform of the first car the train then being in motion. There were empty seats in the rear cars, but the plaintiff did not go through to ascertain whether there were accommodations in the other cars or not, but only passed half way through the first car of the train, when seeing no empty seats they returned to the platform. Some seats were occupied by light baggage, belonging to the passengers, and, in a few instances, two seats were occupied by one person. Soon after

leaving Hempstead Branch the engine and baggage car were thrown from the track. The *first* passenger car was partially broken. No other cars were injured. The accident was caused by poles lying across the track, having probably fallen from a preceding freight train. The engineer's view of the obstruction was intercepted by laborers on the track until too late to avoid the accident. The concussion was very slight and no one was injured upon the train but the plaintiff and his son. Notices like the following were posted in conspicuous places inside of each passenger car in the train:

"Notice. Passengers are notified not to put their heads or arms out of the windows, and not to stand upon the platforms of the cars."

The defence was, concurrent negligence upon the part of the plaintiff, in standing upon the platform and not going through the cars to find a seat: there being a plenty of them unoccupied. At the trial the jury rendered a verdict in favor of the plaintiff for $3,100; and upon exceptions to the charge of the judge the defendants appealed. The following is in substance the decision of the General Term affirming the judgment of the Court below.

By the Court—EMOTT, J.—There can be no serious question as to the negligence of the defendants in respect to the occurrence by which the plaintiff was injured. It was a question whether the engine driver could not and ought not to have seen this obstruction in time to have checked the train and prevented a collision with it. But if this were not so, it would not have required a very great or unusual excercise of care on the part of those having charge of the road and the trains, either to have prevented these things falling from a train while in motion, or to have replaced them if they did fall of: or to have removed them from the track, or to have discovered their presence and warned an approaching train in season to have prevented any injurious consequences. A sufficient number of men upon the train from which the poles escaped, or a force of watchmen upon the track to examine and keep it clear, would have sufficed to prevent the collision which injured the plaintiff.

Such precautions, however expensive or onerous, are far from being beyond the reach of human skill and foresight, and that is the only limit of the duty of a carrier to provide for the safety of his passengers. The principal question in this case is whether the plaintiff is guilty of negligence. The rule is that a plaintiff cannot recover for an injury which he has sustained in consequence of the negligence of a defendant, if his own negligence contributed to produce the injury. * * * * *

The extent and measure of duties and the responsibilities of the carrier and passenger are quite different. The carrier is bound to the exercise of all possible skill, foresight and care. The passenger is bound to conduct himself with due and ordinary prudence, such as a carful man would use under the circumstances. He is not required to foresee unexpected dangers, nor to speculate upon risks, but he is obliged not to expose himself to danger which is known or may be looked for, in a manner inconsistent with ordinary caution. * * * * *

It is not negligence for a man to ride on a platform of a car because he is more likely to be injured there in case a collision occurs, unless he is under obligations to ride where he will be most safe in case a collision does occur. But I think a passenger is not bound to anticipate a collision, or that the train will be thrown from the track. He has a right to expect that he will be carried safely, that the carrier will discharge his duty, will provide a safe vehicle and an unobstructed track, and that the passengers will be exposed to no risks but those incident to that mode of travel. It is not, in my judgment, negligence in a passenger to occupy a position which will involve increased risk to him of the consequences of negligence and misconduct of the carrier. We might as well say that it is negligence for a man to stand or sit near a boiler on a steamboat, because in case the carelessness of the managers produces an explosion, he is more likely to be killed. A passenger neglects his duty when he does not guard against the risks which he knows to be ordinarily incident to the mode of travel which he employs, but he cannot be charged with such a neglect for omitting to provide against the possible consequences of the misconduct of the carrier. I am, therefore, of the opinion that the fact that the plaintiff was upon the platform of the car when he was injured, does not of itself, independent of the statute which I will proceed to consider, bar his recovery of damages for his injuries.

Section 46 of the General Railroad Act provides that "in case any passenger shall be injured while on the platform of any car in violation of the printed regulation of the company posted up at the time in a conspicuous place, inside of its passenger cars then in the train, such company shall not be liable for the injury, provided the said company at the time furnished room inside its passenger cars sufficient for the proper accommodation of its passengers." * * *

The question upon this part of the case is whether the defendants furnished "sufficient accommodations" within "the cars" according to the meaning of the statute. Accommodation means more than room. Sufficient accommodation means room enough to receive the passengers, together with a supply of the conveniences requisite for their comfort, customary in the particular mode of travel. In the case of railroad cars it implies not only space enough within the cars to contain the passengers, but also the means of sitting in the usual manner during the journey. The judge charged the jury at the trial, substantially, that in order to entitle themselves to the protection of the statute it was incumbent on the defendants to furnish not only room in the cars, but seats, and that if there were no vacant seats the plaintiff was not chargeable with fault, nor exposed to the statute, for remaining on the platform. I think this is the true construction of the statute, and that the instruction given to the jury upon this point was correct.

It was contended that although the first car of the train, into which the plaintiff and his son entered, was full, yet there were vacant seats in other cars, which they might and ought to have taken. The evidence went to show, and the jury had a right to believe, that the train made a short stoppage at the station where the plaintiff got upon it, and that he was obliged to make some exertions to get his luggage upon the train, and get in the cars himself before they left the station. There was no evidence that any one connected with the train or the road pointed out either car in particular to the plaintiff, and I see no foundation for the proposition that he should have known or believed that this car would be full, and should have ascended some other car, and that, therefore, the defendants were not bound to furnish accommodations in that car. The premises are not true, and the conclusion does not follow from them.

Nor does the plaintiff's getting upon this car while it was in motion, affect in any way the present question. He was not prevented from finding a seat by getting upon the train while it was in motion. If he did so, it was because he was unable to have the luggage secured before the train started. The plaintiff's injuries or their occasion had nothing to do with the time or the manner of his getting on the train. There was but one point of view in which these facts were material, and the law upon that point was correctly laid down by the court. The judge said to the jury that if the plaintiff and his son had sufficient time after they entered the first car, if they found no seats there, to go through the other cars and obtain seats, the plaintiff should not recover. That if there were accommodations in the other cars, and there were sufficient time and opportunity for the plaintiff to go there before the train started, he had no right on the platform. But he was not bound to go from one car to another after the train had started. This instruction was correct upon all the points which it embraced, and was all to which the defendants were entitled.

The Court also held, that "the conductor knew or ought to have known the conditions of the seats, and it was his duty to have cleared them, if they were improperly occupied, and to have provided seats for persons who were standing either within or without the car. It was his duty and that of his assistants, if he had any, to do this for the comfort and convenience of the passengers, as well as to comply with the statute, which was to protect the defendants in case of a collision or other damage to the train. It was not a compliance with the statute that the defendants would have provided a seat for the plaintiff if they had been requested to do so. They were bound to furnish seats without requests and as a part of their duty.

Prince Edward's Island.

The census of Prince Edward's Island has recently been taken, and the result is as follows:

Queen's County	39,514
Prince "	21,379
King's "	19,755
Total	80,648
Census of 1855 was	71,496
Increase in 6 years	9,152

A Locomotive Feat.

A few days since, engine 107, a Rogers coal-burner, on the Illinois Central Railroad, brought into Chicago 58 loaded cars—53 loaded with wheat and corn, averaging 10 tons, and 5 cars of lead, averaging 3 tons and 300 lbs. each. Estimating the freight cars to weigh 50 tons, and the load 581, we have a weight of 631 tons; and with this load the engine made up ten minutes lost time in a distance of twenty miles. James Wright was engineer, and J. A. Winn, conductor.—*Chicago Tribune.*

American Railroad Journal.

Saturday, July 27, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market has been subject to extraordinary fluctuations the past week, caused by the reported success and defeat of the national forces. On Friday and Saturday the market was very buoyant. On Monday afternoon, the fall equalled 3 or 4 per cent. for the average of the list. One-half of this fall has since been fully recovered, though the market has to-day (Thursday,) slightly receded from the effect of realizations under the recent rapid recovery. The public mind has got very nearly over the effects of the late reverse, and confidence in the ultimate success of the Government is unshaken. Railroad shares, on the whole, are well maintained. The earnings of roads in the Northern States continuing very satisfactory. In these States all our routes of commerce are uninterrupted, and the movement of produce on all continues to be very large. Money continues in the greatest abundance, notwithstanding the numerous loans, State and National, now upon the market. To show the confidence which exists we may state that the war loan of the State of Connecticut bearing 6 per cent. interest was taken from $100.11 to $105.00. It is a somewhat curious anomaly that many of the States can obtain money on much better terms than the Federal Government. The prospects for abundant harvests is most cheering, and if prices continue at the present figures, must exert a very great influence in reviving business and commercial operations.

Parties interested should not forget that the 28th instant is the last day for "assenting" on Erie stock and bonds. The 28th falling on Sunday, the matter must be attended to on the 27th. After the 28th, outsiders are cut off. The assessment is $2 50 per share, which is to be repaid from the first earnings of the road, before any dividend is payable on the preferred stock.

The Delaware and Raritan Canal Company and Camden and Amboy Railroad and Transportation Company have declared a dividend of five per cent. payable in this city by Ira Bliss, at the office of the companies.

The interest on the first mortgage bonds of the Hudson River Railroad Company will be paid August 1, at the Treasurer's office, in New York.

The Brooklyn City Railroad Company has declared a dividend of 4 per cent., payable at the office, No. 10 Fulton-st., Brooklyn.

The seven per cent. mortgage bonds of the Pennsylvania Coal Company, amounting to $600,000, will be paid at maturity, on the 1st day of August next, at the office, in New York.

Long Island Railroad Company.

It will be seen by an advertisement in another column, that this company is disposed to follow the example of the Philadelphia, Wilmington and Baltimore Railroad Company, and have their road and machinery kept up by contract.

Penobscot and Kennebec Railroad.

This company was chartered April 7, 1845. The construction of the road was commenced in 1852, and completed as follows: from Waterville to Kendall's Mills, 3 miles, in December, 1853; thence to Pittsfield, 18 miles, in November, 1854, and to Bangor, 34 miles, in August, 1855. Total length, 55 miles. On the 1st of November, 1856, the road was leased to the Androscoggin and Kennebec Railroad Company for a period of 20 years, the latter agreeing to maintain and operate the same, and to pay to the former three-sevenths of the net earnings of the joint business. Under this lease the company has received $308,237, viz:—for six months ending May 31, 1857, $33,170; for the year ending May 31, 1858, $63,526; for the year ending May 31, 1859, $67,324; for the year ending May 31, 1860, $73,651; and for the year ending May 31, 1861, $70,566. The earnings from its opening to the date of the lease (average 18 months) amounted to $145,577; the expenses of working, $82,544—net earnings, $63,023.

Capital Stock—Authorized, $1,000,000.
" Paid in, $557,779 45.

Funded Debt—$1,205,400; described as follows:

Bangor City 1st mortgage, 6 per cent. coupon bonds, $780,000. The original amount was $800,000, of which $500,000 were issued October 2, 1854, payable in 20 years; interest semi-annually at Boston; and $300,000, April 21, 1855, payable in annual instalments of $20,000 after 1860; interest semi-annually at Boston. The first instalment of $20,000 has been paid. These bonds constitute by statute a first lien on the road, and are further secured by an equal amount of the company's bonds issued to the city. The interest has been regularly paid by the company.

Second mortgage 6 per cent. coupon bonds, $268,800, issued Aug. 1, 1856, and payable in 20 years; interest semi annually at Bangor, Me. The interest has been regularly paid.

Third mortgage 6 per cent. coupon bonds, $156,600, issued Sept. 1, 1856, and payable, principal in 15 years, and interest semi-annually at Bangor. Interest unpaid since March 1, 1858. This mortgage provides for an issue of $300,000.

The annual meeting of this company was held

on the 9th inst., at Bangor, at which the report of the directors for the fiscal year ending May 31, 1861, was presented. The earnings of the joint line of railroad between Bangor and Danville Junction, is as follows:

From 117,461 passengers		$151,191 06
" 82,381.81 tons of freight		151,908 22
" express, mail, etc		15,406 12
		$318,505 40
And the expenses were:		
Repairs of track	$52,677 57	
" rolling stock	25,883 59	
" buildings, etc	8,900 01	
Train expenses	15,314 28	
Station expenses	17,123 50	
Fuel	17,678 51	
Oil and waste	3,252 33	
Salaries and general management	7,586 04	
All other expenses	5,435 71	
		153,851 54
Net earnings for the year:		
Androscoggin and Kennebec R. R. Co., 4-7ths	$94,087 92	
Penobscot and Kennebec Railroad Co., 3-7ths	70,565 94	
		164,653 86
Compared with the previous year, the gross earnings show an increase of		$16,274 56
With an increase in expenses of		23,473 13
Making the decrease in net earnings		$7,198 57

—the amount received by this company is therefore $3,085 10 less than for the previous year. The report says:

The foreclosure of the mortgage given by you to secure the third bonds and interest, will be perfected, and the time for redemption expire, early in July next and before your next annual meeting—unless the interest due on the bonds at the time the notice for foreclosure was given, is paid.

As the directors have no assets or means within their control which can be used for that purpose, it is for you to decide and determine what measures, if any, you will take to prevent the forfeiture of the property, and its passing out of your possession and control.

The owners of the second bonds have given notice as provided by law, of a second foreclosure, for the non-payment of interest accrued since the date of the notice of their first foreclosure. The time of redemption under their first foreclosure, expires January 26, 1863.

Several of the notes amounting to the sum of $7,300, given by the Treasurer for the purchase of the Pier property, fall due the present year, and to avoid the forfeiture of the company's claim to the real estate holden as security by the owners, provision will have to be made by the directors for the payment thereof—unless an extension can be obtained from the owners.

The principal difficulties your directors encounter in providing for the adjustment of all the company's liabilities, arise from the existence of different classes of claims and the manner in which they are secured.

The only method the directors can suggest by which the corporation can be relieved from its present embarrassments, is by a reduction of its indebtedness, (which of course can only be done by the release of a per centage of certain classes of the claims against the company, by the owners, who have no security or but a limited one,) to a sum not exceeding twelve hundred and fifty thousand dollars, with the payment thereof secured by one mortgage on all your corporate property, and one class of bonds issued to that amount on a long term of time, with coupons annexed for the semi annual interest. Such a plan carried into effect, would undoubtedly be for the advantage of a portion of the creditors, and no detriment to the others as the net earnings hereafter will probably be sufficient to pay the interest on the $1,250,000.

GENERAL STATEMENT.

Capital stock		$557,779 45
1st mort. for City of Bangor bonds		780,000 00
2d mortgage bonds sold		268,800 00
3d " "		156,600 00
Interest scrip, due to stockholders		15,489 27
Bills payable and accounts		80,478 84
		$1,859,147 56
Construction account, including lands of Pier Co., and city lot at Bangor	$1,613,473 58	
Equipment	104,019 21	
Stock in Pen. and Ken. R. R. Co	78,014 20	
City of Bangor bonds unsold	1,000 00	
Bills receivable and accounts	1,910 19	
Cash	1,449 08	
Balance of profit and loss	59,281 30	
		$1,859,147 56

The company has of 2d mortgage bonds, which are pledged for $16,233 75, of bills payable, $31,200; of 3d mortgage bonds unsold, $143,400; and 1,140 shares of stock, received mostly for 3d mortgage bonds.

The coupons outstanding amount to $70,488; and the unsettled land damages, etc., to $5,800; to which add interest scrip, bills payable, etc., as above, $95,968 11—making the floating liabilities of the company, $172,256 11.

The assets consist of bonds of city of Bangor, $1,000; bills receivable and accounts, $1,910 19; and cash, $1,449 08—making a total of $4,359 23.

The funded debt consists of the three classes of bonds above enumerated, amounting in the aggregate to $1,205,400.

For all purposes trains have been run upon the line 176,970 miles, viz: in passenger service, 79,065 miles; merchandise service, 73,619 miles, and for other purposes, 24,295 miles—a decrease of 674 miles.

The whole traffic of the line in passengers was equal to 3,948,652 carried one mile, of which 1,652,744, or 41.9 per cent., were carried on this part of the line.

The freight carried was equal to 2,617,600 tons carried one mile, of which 676,882, or 25.9 per cent. were upon this end of the line.

President—HOLLIS BOWMAN.

Directors—Hollis Bowman, Jabez True, T. W. Baldwin, George W. Pickering, William Conner, John Webber, Ira Crocker.

Treasurer—ELIAS MERRILL.

Superintendent—EDWIN NOYES.

The Victoria Bridge at Pimlico.

It is rumored that both the roadway and the piers of this structure, completed a few months ago at a cost of nearly £100,000, are exhibiting signs of weakness. This bridge has, besides a number of short spans in the approaches, four wrought iron segmental arches of 175 ft. span each, there being three piers in the river. After the completion of the work, the piles, we believe, which had served as an enclosure to the piers, were withdrawn, leaving the foundations of the bridge exposed to the scour of the river. From the nature of the bottom, we should suppose that all the protection which the original piles (sawn off below water) could have given, would have been necessary. The arches themselves are formed each of six wrought iron plate ribs, arranged in three pairs, two pairs being placed so as to form the outsides of each span, while the other pair extends along the centre. These arched ribs are each about 4 ft. deep, and, perhaps, ½-in. thick, although they do not appear to the eye to be more than ⅜-in. thick. Flanches are riveted on both top and bottom. The spandrils are made of T-iron, riveted together in a sort of lattice-work. Over the spandrils, horizontal plate beams are placed, with their upper surfaces level with the crown of the arch, so as to complete the horizontal line of the roadway. The latter is carried upon rolled wrought iron cross beams, each about 11 ft. long, and 9 ins. deep, and spaced about 3 ft. apart. The ends of these beams abut against the inner vertical surfaces of the arched ribs and horizontal beams over the spandrils. The fastening of these ends to the ribs is one of the most wretched "cobbles" to be found in bridge construction. First, a short piece of angle-iron, its upper horizontal surface forming a projecting shelf, about 4 ins. long and 3 ins. wide, is riveted by four rivets to the main arched rib (or to the horizontal beams over the spandrils). On this shelf, the end of the cross-beam rests. The form of this beam, in section, is like that shown in Messrs. Mather, Ledward, and Co.'s card in our advertising columns. Two short vertical lugs, formed also of angle-iron and riveted each by three rivets to the main rib, embrace the "stem" or thin vertical part of this beam. Through these lugs and the "stem" of the beam three rivets are inserted. The ends of the beams, therefore, hang by three rivets besides resting on the short projecting flanch of a fragment of angle-iron below. Instead of buckle-plates, blocks of creosoted wood are wedged between the cross-beams, and over these is the ballast and permanent way.—*London Engineer.*

Valuation of the City of New York.

The following table will show the value comparatively, of the real and personal estate in the City and County of New York, as assessed in 1860 and 1861.

Wards.	Assessments in 1860, Real Estate.	Assessments in 1861. Real Estate.
I.	$36,625,512	$36,116,988
II.	21,736,709	21,542,413

Cotton in India.

Mr. Edward A. Newton of Pittsfield, who resided many years in India, has some very interesting statements in the Pittsfield *Eagle*, on the supply of cotton from the East. He quotes the following extract from a letter written by Mr. W. F. Stearns, son of President Stearns of Amherst College, who is a merchant in Bombay, India, dated the 12th of April:

"I went into the interior a few weeks since, as far as Sholapore, and found that the natives throughout the country had heard of the troubles in America, and that the amount of land which had been laid out and planted by them, with cotton, was somewhat astounding. My word for it, founded on personal observation, if the secession movement continues, in five years India will export 4,000,000 bales. The quality is constantly improving, and the means of transportation are becoming so easy that the South will not be able to command the monopoly of the staple out of the Union."

Mr. Newton says there are three qualities of cotton produced in India, the best of which is grown in the province of Madras. The plant is indigenous, and the extent to which it may be cultivated is unlimited, and the cheapness with which this may be done would seem almost incredible to persons not familiar with the country and its inhabitants. But hitherto the method of cultivation has been careless and irregular. He does not confirm the oft-repeated statement that the want of proper facilities of transportation presents an insurmountable obstacle to an enhanced supply, for he says large rivers abound in all the cotton-growing region, furnishing cheap water carriage to the sea-board. He thinks the quality is susceptible of great improvement. Mr. Newton says in conclusion:

"That the extensive cultivation of this important commodity should now be encouraged in all parts of the world for the *material* advantage of mankind must be universally admitted; and, taken in connection with its social and moral results, especially with reference to our own country, the mind is overpowered by the contemplation of their magnitude. Be they more or less, however, of this I *am perfectly sure*, founded on knowledge and experience, that before the expiration of another decade of years, *the world will be flooded with cotton from India*."

Census of England.

The total population of England and Wales and the islands of the British Seas according to the census taken on the 8th April, 1861, amounted to 20,205,504 as follows:

	Males.	Females.
England and Wales	9,758,852	10,302,873
Islands	66,394	77,385
Total	9,825,246	10,380,258

To this should also be added for the portion of the army, navy and merchant seamen the out of the country 162,021 mostly adult males which would bring up the number to 20,367,525.

The population of England and Wales as compared with that of 1851 was as follows:

	1851.	1861.
Males	8,781,225	9,758,852
Females	9,146,384	10,302,873
	17,927,609	20,061,725

showing an increase of 2,134,116 in the decade, equal to 12 per cent.

The following table shows the movements of the population for the last sixty years. The enumeration includes the army, navy, etc., abroad, but not that of the islands:

	Population.	Increase.	Increase per cent.
1801.....	9,156,171	.....	..
1811.....	10,454,529	1,298,358	14
1821.....	12,172,664	1,718,135	16
1831.....	14,051,986	1,879,322	15
1841.....	16,035,198	1,983,212	14
1851.....	18,054,170	2,018,972	13
1861.....	20,223,746	2,169,576	12

—exhibiting a duplication in the last 50 years.

The number of houses, inhabited, uninhabited and building in the same years was as follows:

	Inhabited.	Uninhabited.	Building.
1801....	1,575,923	57,476	*no return.*
1811....	1,797,504	51,020	19,207
1821....	2,088,156	69,707	16,274
1831....	2,481,544	119,915	24,759
1841....	2,943,945	173,247	27,444
1851....	3,278,039	153,494	26,571
1861....	3,745,463	182,325	27,580

The total number of houses in 1861 was..... 3,955,368
and in 1851 3,458,104

Increase in 10 years..... 497,264

or a number sufficient to house 2,500,000 persons.

The returns of the Emigration Board furnish the following details for the 10 years covering the last census period.

Year.	Total No. of Emigrants.	English.	Scotch.	Irish.	Foreigners.	Not distinguished.
1851....	335,986	Native origin not ascertained.				
1852....	368,764					
1853....	329,937	62,915	22,605	192,609	31,459	20,349
1854....	323,429	90,966	25,872	150,209	37,104	18,678
1855....	176,807	57,132	14,037	78,854	10,554	16,230
1856....	176,554	64,527	12,033	71,724	9,474	18,796
1857....	212,875	78,560	16,253	86,233	12,624	19,200
1858....	113,972	39,971	11,815	43,281	4,560	14,445
1859....	120,432	33,930	10,182	52,981	4,442	18,897
1860....	128,469	26,421	8,733	60,935	4,536	27,944
Total.	2,287,205	454,422	121,530	736,731	115,353	154,439

It appears from the above table that 2,287,255 emigrants sailed from the ports of the United Kingdom in the ten years, 1851 60. Of that number, 1,582,475 emigrated in the eight years, 1853-60; and 454,422 were found to be English, 121,530 Scotch, 736,731 Irish, and 115,353 foreigners. The origin of 154,439 emigrants was not ascertained. If we assume that these unascertained numbers should be distributed proportionally over the rest, the numbers of the several classes will be shown in the annexed table:

The emigrants in the first three months of 1851 were 56,584, consequently the number in the two years, 1851-2—namely: 704,730, have to be reduced to 648,146 to obtain the number of emigrants in the interval extending from the 1st of April 1851, to the 31st December, 1852. The nationality was not then distinguished, but a large proportion of the emigrants was of Irish origin, and the best estimate will be made by assuming that the proportions were the same as in 1853; the results appear in the table. 18,734 emigrants sailed from the United Kingdom in the portion of 1861 terminating on the 8th of April, the census day, and they have been distributed in classes in the proportions ascertained to exist in 1860.

ESTIMATED NUMBER *of Four Classes of Emigrants in the Interval between the Census of* 1841 *and* 1861.

Years.	Totals.	English.	Scotch.	Irish.	Foreig'n.
1851 (Ap. 1) 1852.	648,146?	131,718?	47,325?	403,246	65,862?
1853-60.....	1,582,475	503,568	134,674	816,408	127,825
1861 (to Ap. 7).	18,734?	4,924?	1,628?	11,337	845?
Total.....	2,249,355	640,210	183,627	1,230,986	194,532

It may be inferred from the official returns that the emigration from the United Kingdom was not less than 717,913 in the interval of the censuses 1831 and 1841; 1,692,063 in the interval of the censuses 1841 and 1851; and 2,249,355 in the interval of the censuses 1851 and 1861.

Vermont and Canada Railroad.

We are informed, officially, that the decree of the Chancellor's Court of Vermont has been made, confirming the lease to the Vermont Central Railroad in all its parts, and fixing the cost of construction at $1,348,500, ordering the roads to remain in the hands of the present receivers, and the income to be paid in liquidation of rents. The directors can order a four per cent. dividend, payable August 1, if they think proper. The amount of cost of construction is fixed by the Court at the sum on which rent was paid for some years by the Vermont Central Railroad, and subsequently by the trustees for the bondholders; so that the decree of the Court secures to the Vermont and Canada stockholders payment of the whole amount of the back rents, with interest thereon, before any payment is made on the first mortgage bonds of the Vermont Central Railroad.—*Boston Transcript.*

(From the Journal of the Franklin Institute.)

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations.

By M. Cezanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

PART SECOND.

(Continued from p. 532.)

Construction of Arches.—The wrought iron arches were forged in Wales, and worked at Paris by MM. Ernest, Gouin & Co. The riveting, as far as possible, was made by machinery.

The pieces of wrought iron were of such weights and dimensions that they could be stowed in the railroad wagons and so forwarded to Szegedin. Some wagons loaded at the work-shops of MM. Ernest, Gouin & Co., went through without change to Szegedin, having passed the Rhine upon the steam pontoon of *Rurhort*. The greatest part, however, of the pieces sent from Paris were shifted at Dresden.

The trusses of wrought iron were again united at Szegedin, with the elements sent from Paris, and put in position without centerings in the following manner:

A service bridge of carpentry was constructed above the site of the bridge at the level of high water, which is below the springing of the arch. On this service bridge could be brought all the materials for the piers near to the work, and the passenger and baggage trains which were stopped at Szegedin by the Theiss, were forwarded by it towards Wallachia. It had in its middle a movable part, formed of an iron trellis bridge with 59 ft. opening in the clear, weighing 55,000 lbs. and was raised in one piece by four cranes on the passage of a boat. The service bridge was connected with the scaffolding of the piers, and with a stockade 8.2 ft. wide raised in the middle of each arch.

The arches were constructed upon the right bank in great enclosure above the bridge, in which were assembled all the tools and plans of the work; they were laid horizontal and parallel to the axis of the bridge. To bring an arch in position it was made to undergo a series of motions alternately perpendicular and parallel to the axis of the bridge during which it maintained its first direction; it was then brought upon the service bridge and drawn in front of the archway for which it was designed. By a final motion perpendicular to the preceding, the arch was pushed between the two piers upon which it was to rest. All these movements were made by means of iron wagons with four axles perpendicular to each other in couples and moved by strong screws. The wheels of one system of axles were 4.92 ft. apart; those of the other were 9.84 ft. The same wagon being placed upon the crossing of a track of 9.84 ft., with a track of 4.92 ft. perpendicular to the first, could be pushed at will upon either track. It only required the regulation of the height of the movable axles so as to bring in contact with the rails those wheels answering to the track on which it was wished to move.

The method of moving the above named arches is readily seen. The arch is laid upon three wagons; one at the summit, the others at the ends. In the movements perpendicular to the bridge the three wagons advance parallel, each upon a track 4.92 ft.; these three tracks were cut at right angles by the track of 9.84 ft.; on arriving at the crossing, which occurs simultaneously for the three wagons, by manœuvring their movable axles, the whole system is pushed upon the 9.84 ft. track, parallel to the service bridge. Thus we arrive upon the service bridge by three tracks of 4.92 ft., and pass along it by one track of 9.84 ft., having the same axis as the regular tracks, and leave it by three tracks of 4.92 ft. placed upon the scaffolding of the piers at the level of the service bridge and upon the above mentioned stockade.

All the arches are thus brought in their place. The mean distance of transportation for the majority of the arches was 1,968 ft. upon six different directions and so with five crossings.

Motion was effected by two capstans, each worked by eight men; a portion of the track had a slope of 0.03; the velocity was about 9.84 ft. per minute. A change of direction required an hour. There were two crossings upon the service bridge, the one for entering and the other for leaving it. The whole distance between them had to be described in the interval of the passage of two trains.

It was at first proposed to bear the arches endwise upon two wagons only. Many trials for that purpose were made in the work-yard. The operation was found to be feasible but delicate, and any accident might have been attended with serious consequences; the men might be killed and the arch might fall into the river. It was decided to convey the arches flatwise, which multiplied the operations but lessened the chances of accidents.

The increased manœuvring exacted by the flatwise conveyance was considerable. It became necessary to construct a third track of 4.92 ft., that of the middle, and to manage three wagons instead of two. Moreover, the arches had no stiffness in the horizontal plane, and before laying them upon the wagons they had to be strengthened with wooden trusses. Finally, the raising the arch in the vertical plane was much more complicated upon the river than in the work-yard.

This operation was accomplished by means of seven crabs, distributed along the arch, they laying hold of the horizontal top stringer; while the springings sustained by the wagons moved towards the crabs to keep pace with the raising. Nothing was easier than to effect this in the work-yard where the crabs found a natural support upon the ground; but in the river it was necessary to construct a flying bridge from one pier to the other to hold up the crabs. It would then be necessary to construct similar flying bridges for all the arches, or to transport them from one arch to the other. The last method was adopted. The raising of the arch was thus composed of the following operations:

1. The establishment of a fly bridge, sustained by eight enormous beams about 65.6 ft. in length, and resting at one side upon the scaffolding and at the other upon the stockade in the middle.

2. The raising the trusses to stiffen, in a horizontal direction, the arch laid in the work-yard upon the wooden wedges.

3. The bringing the wagons under the arch (the tracks having been constructed before) and freeing the latter from the wedges which had supported it.

4. The landing the arch in its place.

5. The erecting of the seven hoisting crabs along the top cord.

6. The raising the arch, in the vertical plane, setting it in position, and wedging it upon the cast iron cushions.

7. The taking down of the crabs, and returning to the work-yard the wagons and wooden trusses to commence anew the same series of operations.

When one bay was raised, all the fixtures (crabs, stagings, "tendeurs," &c.,) had to be landed, and the flying bridge had to be taken down and moved to the next bay.

Notwithstanding the complication of these operations, the thirty-two arches of the bridge were raised with only one equipment of wagons, of crabs, and of fly bridges, in four months, without any interruption of the navigation or the stopping a single train. The eight last arches were raised in fourteen days, from the 9th to the 23d Oct., 1858.

Below are some principal dates of the construction:

November, 1856.—Approbation by the Minister of the plan proposed by M. Maniel, Director General of the Austrian Society. Conclusion with MM. Ernest, Gouin & Co. of the agreement for furnishing and *setting up* of the cast and wrought iron pieces. Shortly after, the conclusion of the contract for carpentry and masonry.

March 1st, 1857.—Driving of the first piles of the scaffolding and of the service bridge.

July 7th, 1857.—The laying of the first cast iron column.

November 23d, 1857.—Inauguration of the service bridge for the passenger and merchandise trains.

Dec., 1857, Jan. and Feb., 1858.—Winter; the thermometer varied from 14° to —4° (Fah.). The works of the pneumatic foundations and of masonry were suspended. The wrought iron was continued; piling was driven night and day in the cast iron columns.

March 23d and 24th, 1858.—A menacing ice-breaking for forty-eight hours, followed immediately by the opening of navigation and the renewal of the work.

June 15th. 1858.—Raising of the first arch.

Oct. 23d, 1858.—Raising of the thirty-second and last arch.

Nov. 23d, 1858.—The strutting and flooring of the bridge being finished, the trial proof was made.

Dec. 2d, 1858.—The inauguration.

Trial Proofs.—The bridge being uniformly loaded with (8,000 kil. per metre) 5,365 lbs. per running foot, and consequently the piers in equilibrium (see Third Part) the flexures were as a mean 0.47 ins. for the intermediate bays, and .63 in. for the two end arches, whose top stringers were not moored upon the abutments (see Note A).

The passage of an ordinary train upon a track gives the following maxima deflections:

Upon the exterior arch of loaded track.	31 inches
" interior arch	25 "
" " " of unloaded track.	14 "
" exterior arch	08 "

Which proves that the four arches are, in a certain degree, solid.

(To be continued.)

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending July 12, 1861:

Passengers	$15,811 03
Freight and live stock	12,289 98
Mails and sundries	1,322 09
Total	$29,423 10
Corresponding week of last year	27,731 62
Increase in 1861	$1,691 48

The receipts of the Nova Scotia Railway for June were $11,826—being $2,057 more than in the corresponding month last year.

The traffic of the Great Western Railway of Canada for the week ending July 19, 1861, was as follows:

Passenger	$16,386 68
Freight and live stock	10,333 48
Mails and sundries	1,374 25
Total	$28,094 36
Corresponding week of last year	27,070 16
Increase	$1,024 20

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of June, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$215,161 20	$197,907 37
" " merch'dise	28,823 60	48,015 20
" " travel, etc.	26,066 47	32,346 99
Total	$270,061 27	$278,269 56
Transportation, roadway, dumpage, renewal fund, and all charges	138,825 46	143,668 66
Net profit for the m'th,	$139,225 81	$134,600 90
Profit for the previous 5 months	601,055 27	$577,696 33
Total profit for 6 mos.	$740,281 08	$712,297 23

The total net profits of the Reading Railroad, for the seven months of the present fiscal year, it will be seen, are $740,281, against 712,297 for corresponding month last year, being an increase of $27,983. The increase of revenues from coal,

for the month, is $17,153, while the receipts from merchandise fell off $19,192, and from travel $6,280. The working expenses of the month were reduced about $13,000.

The earnings of the Northern Railway of Canada for the week ending the 13th inst., were:

Passengers	$1,728 20
Freight	7,412 96
Mails and sundries	81 65
Total receipts for week	$9,222 81
Corresponding week last year	6,409 73
Increase	$2,813 08
Total traffic from 1st January, 1861	$219,400 03
Corresponding period of 1860	172,518 42
Increase	$46,881 61

The receipts of the Grand Trunk Railway of Canada for the week ending July 6th, 1861, were $55,945 07
Corresponding week, 1860 51,754 37

Increase	$4,190 70
Tot. traffic from July 1, 1861, to date	$55,945 07
Corresponding period, 1860	51,754 37

United States Census.

(To be continued.)

Rolled Armour Plates for Vessels of War.

We noticed some time ago that Messrs. John Brown and Co., of the Atlas Steel and Spring Works, had commenced the manufacture of rolled iron armour plates, in the execution of a commission from the Government. In order to put themselves in a position to meet the demands upon them for this and similar work, they have extended their manufactury, by a tunnel under the Midland railway, to a large piece of ground on its north side, between it and Saville-street. Here, within these two years, has sprung up a new portion of their works, occupying 10½ acres, of which seven acres are covered with buildings. We see it stated that the great Palace of Industry now being erected for the Exhibition of 1862 will require 18.000,000 of bricks. It may afford some means of comparison to state that the new portion of the works of Messrs. Brown and Co., (though about one-third of them yet remains to be completed) have consumed 12,000,000 ordinary bricks and 2,000,000 fire bricks. This new occupied ground contains already 62 furnaces, to the majority of which there is attached a steam engine boiler. The armour plates, in what may be called their embryo state, consists of a number of slabs of bar iron, measuring about 30 inches by 12, and 1½ inch thick. Four of these being laid upon one another and heated in a furnace, are rolled into a plate measuring ab ut four feet square. The weakness of hammered plates has been found to consist in their brittleness. The effect of the great hammering is to granulate the iron so that when struck by shot the plate is shattered. The advantage of the process of rolling is, that it preserves the fibre of the metal. By using iron of different kinds of fibre, and putting together plates rolled both ways, so that the fibres shall cross each other, it is believed the greatest possible amount of resistance is obtained. The plates produced in the way we have described, are brought together step by step till we have at last four plates measuring 10 feet by 4 feet 4 inches, and each 2½ inches thick. These four welded and rolled together by one great final operation, making the massive armour plate of 6 tons, measuring 20 feet long, 4 feet 4 inches broad, 4½ inches thick, weighing 180 lbs. per square foot, and composed in each part of 132 thicknesses of iron. Let us now try to describe the final operation. The four plates laid together are put into the furnace, which requires a truck load of coal for each feeding. This furnace forms an exception to the general rule that the smoke of the furnaces goes by underground flues into one common shaft. This particular furnace has two shafts of its own, the draught of which can be regulated by dampers. And now the indications are given that the heating of the mass of metal is about complete. The foreman of the forge comes upon the scene, strips off his coat, and sees that everything is right for the momentous operation. The foreman of the rolling department is also at his post. Seventy men gather under their orders. A strong chain is passed round the rolls, which are about 20 yards in front of the furnace, to aid in drawing the great heated mass from the fire. And here we must note a peculiarity in these rolling mills which is not seen in those employed upon ordinary work. It is common for rolls to turn only one way, so that when a piece of metal has passed through, it must be returned by lifting over the rolls before it can pass through again. That, however, would be impossible in the case of such huge masses of metal as are rolled at the Atlas Works, and therefore it has been contrived to reverse the action of the rolls, so that the metal passes through them both in going and returning. With this explanation we resume the description of the process. What may be called the wicket gate of the forge opens, and the loose fire-bricks on which the front of the plate has rested are pushed away, that it may be grasped on its fore-edge by enormous toothed tongs, which it requires three men to lift. Now all is ready. The great door of the furnace, about six feet wide, rises. The iron carriage to receive the heated plate is pushed up to the opening. The tongs grasp the plate. The rolls turn, the men pull, and out shoots in an instant the great mass of iron. And here comes into play a minor, but very necessary piece of ingenuity. The moment the whole length of the plate rests upon its carriage, a mechanical contrivance releases the chain, and it is drawn no further. As quick as thought the chain is detached from the rolls, and the men, seizing each side of the carriage as if they were salamanders, run it rapidly up to the rolls. It passes through, and at once its ten inches of thickness are reduced to eight. The rolls are reversed, and back comes the plate, this time losing only half an inch of its thickness. Three times more this process is repeated, and each time the plate is compressed an additional half inch. In all it passes eight times through the rolls. Though this is done in five minutes, there is no hurry, but the utmost precision and care. At each side, when the hot plate emerges, its surface is swept with brooms dipped in water, and sometimes buckets of water are dashed over it, to remove the scales, and give it a fair surface. It is curious to see how impotent is the water upon the mass of glowing iron. Great drops of water run hissing over its surface, and it does not appear to lose anything of its heat. But there is another operation to be performed. Sometimes a black spot upon the surface indicates a blister, which must be tapped. The point of a sharp punch fixed upon a long shaft is placed upon the blister, and one of the sons of Vulcan with a huge two-handed hammer rushes forward and strikes the punch, recoiling from the scorching heat, after delivering the blow, almost as if he had received it himself. And now the rolling of the plate is completed, and it is lifted by a wrough iron crane to the straightening place. Here it is placed on flat iron plates, and two immense rollers of nine tons each pass over it, to insure its being perfectly straight as it cools. The cooling process occupies about 12 hours, and another crane then lifts the plate to the planing tables, where the edges are cut square and afterwards grooved. Some of the earlier plates that were rolled were found to be defective when this process was performed. The planed edges discovered a defect in the welding of two or more of the plates, and they were therefore laid aside for other uses. The liability to this sort of failure has, however, been overcome, and the plate which we saw rolled was the tenth which had been completed in five days, without any mishap. It may, therefore, now be fairly said that all the difficulties of the undertaking have been surmounted, and that the plates can be supplied as fast as they are required. The plates now being made are for the "Black Prince," and it may justly be expected that the completion of the orders for that vessel will be followed by many more. However much we should rejoice if the state of the world would permit the country to concentrate its productive powers upon the arts of peace, we are so deeply convinced of the necessity of England being on a par with the greatest of her neighbors in the arts of war, that we are glad to see the enterprise, ingenuity, and capital of Sheffield contributing in a most important degree, to England's security.—*Sheffield and Rotherham Independent.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

The NEW YORK CENTRAL RAILROAD COMPANY.

TREASURER'S OFFICE, Albany, July 24th, 1861.

THE Transfer Books of this Company will be closed at the close of business on Wednesday, the 31st day of July instant, and will be re-opened on the morning of Friday, the twenty-third day of August next.

JOHN V. L. PRUYN,
4t30 Treasurer *pro tem.*

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for Buildings, Vessels, RAILROAD CARS, etc., by which spontaneous ventilation can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address HENRY RUTTAN,
Coburg, Canada.

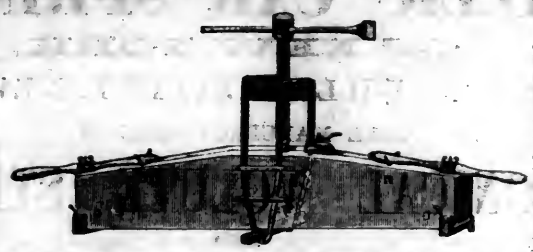
LOCOMOTIVES FOR SALE.



THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

SPECIAL NOTICE. Transfer of LETTERS PATENT.

WHEREAS Letters Patent, bearing date Nov. 1st, 1853, were granted by the Government of the United States to George Williston, of Brunswick, County of Cumberland, and State of Maine, for a Machine to straighten and curve Railroad Iron, giving and granting to said George Williston, his heirs, executors and assigns, for the terms of fourteen years from the date of said Letters Patent, the full and exclusive right and liberty of making, using and vending to others to be used, the said Machine, and whereas said George Williston sold and transferred one undivided half of his entire interest in said Letters Patent, to Wm. H. Lunt, of Bowdoinham, County of Lincoln and State of Maine, as will appear by reference to deed, date Nov. 2, 1853, recorded in the Patent Office at Washington, Nov. 9, 1853, and whereas the said George Williston and Wm. H. Lunt, have on this 31st day of May, 1861, sold and transferred their entire interest in said Letters Patent, to Albert Bridges and Joel C. Lane, Merchants in the City of New York, doing business under the name and firm of A. BRIDGES & CO.,—THEREFORE, we, the undersigned, hereby notify and warn all persons, against manufacturing, vending or purchasing said Machines from any person or persons whatever, except from us who have and hold the exclusive right thereto.

New York, Saturday, August 3, 1861.

Eighth Census.

A neat pamphlet under this title, prepared by Dr. R. S. FISHER, has just been published by J. H. COLTON, No. 172 William st. Issued in advance of the official document and at a time when every one interested in passing events is desirous to obtain some knowledge of the distribution of our population, it is a timely publication, and will undoubtedly command a large sale. The "Seventh Census," a similar work published under the same auspices, in 1851, had a sale of 60,000 copies. The pamphlet contains the population of each State by counties for 1850 and 1860 comparatively; the population of the principal cities, towns and villages; an analysis of all former censuses by States and Territories; a table showing the new Congressional representation; and finally a table giving the results o the latest censuses taken by all the countries of Europe. It is illustrated with a neat map of the United States, exhibiting among other things the territorial arrangements made by the last Con gress. All this for 25 cents.

Amboy, Lansing and Traverse Bay Railroad.

Arrangements have been made with Eastern capitalists to finish the Amboy, Lansing and Traverse Bay Railroad, from Lansing to Bath, and that within a month a body of laborers will be engaged in the work. The company already have the iron spikes and chairs for the continuation paid for.—*Detroit Tribune.*

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending July 13, were $57,345 63
Week ending July 14, 1860 ..... 55,393 00

Increase $1,952 63
Total traffic from July 1st, 1861..... $113,290 70
Corresponding period previous year . 107,147 37

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the fiscal year ending April 30, 1860, and 1861, were as follows:

EARNINGS.

	1860.	1861.
From passengers	$424,223 87	$453,254 66
" freight and mail.	409,047 49	466,716 42
Total.....	$833,271 36	$919,971 08

EXPENSES.

	1860.	1861.
Repairs of road	$71,606 26	$110,298 14
" bridges.....	5,204 38	16,922 90
" build'gs, etc.	12,688 98	14,852 77
" locomotives.	22,309 16	29,724 50
" cars	27,372 47	29,668 01
" tools & machinery ..	2,160 85	2.364 58
Fuel	23,467 52	25,756 76
Oil and waste	7,633 59	4,612 91
Train hands.....	46,318 48	46,017 36
Watchmen.....	8,943 32	8,187 19
Agents, clerks and expenses at stations...	56,594 36	60,925 85
Taxes	21,204 03	21,373 45
General superint'dence	27,607 71	31,035 24
Loss and damage	5,681 06	3,899.53
U. S. Mail	1,107 96	600 00
Contingencies	23,836 38	19,776 21
	$367,736 51	$426,015 40
Earnings less expenses,	$465,534 85	$493,955 68
Interest, profit and loss and extraordinary expenses	389,425 93	365,321.30
Net earnings.....	$76,108 92	$128,634 38

The net earnings of 1860-'61 have been applied as follows:

Reduction of floating debt.....	$89,668 07
Contributed to sinking fund	24,761 48
Cash on hand	14,204 83
	$128,634 38

—which is equal to a net of about 4 per cent. on the capital stock, and which, if the floating debt was out of the way, would be applied to dividends to the stockholders.

The earnings for the year ending April 30, 1860, compared with those of the preceding year, show an increase of $35,115 71, with a decrease in expenses of $15,963 22—making the net increase $51,078 93.

The earnings for the year ending April 30, 1861, show an increase over those of 1859-'60, of $86,-699 72, with an increase in expenses of $57,278 89—making the net increase $29,420 83.

The most rigid economy compatible with the preservation of the property and safety in running the trains, has been introduced into every department; and while the road has been run during the last year for 46⅓ per cent. on the gross earnings, both the road and equipment have been kept in good order.

The following is a comparative statement of the bonded indebtednes of the company as given in the report of the company for the last and preceding years:

		1860.	1861.
Junction income bonds	due June 1, 1862	$52,500	$14,000
" Lloyds "	due Oct. 1, 1862	5,000	5,000
" 2nd mort. "	due Nov. 1, 1862	280,000	265,000
Toledo, Norwalk and Cleveland, 1st mortgage bonds	due Aug. 1, 1863	522,000	521,000
Do. 2d mortgage bonds	due Aug. 1, 1863	299,600	298,300

The following statement will show the condition of the affairs of the company at the close of the fiscal years ending May 31, 1860, and 1861.

	1860.	1861.
Cost of road to date,	$6,771,891 94	$6,697,178 48
Value of equipment	464,148 59	483,160 00
Stocks and bonds owned by Co.	238,238 94	89,298 94
Materials on hand	120,336 89	102,955 82
Real estate	36,332 41	29,252 92
Bills receivable	64,999 39	73,269 68
Due from other Co's, and P. O. Depart.	11,364 80	24,625 10
Cash	5,818 83	15,701 58
Collectible accounts	2,871 53	679 91
Sinking fund	60,707 37	85,468 85
Miscellaneous accounts	70,939 04	465 69
Disbursed on new year	12,532 86	10,349 42
	$7,860,182 59	$7,612,406 39

	1860.	1861.
Capital stock	$3,433,812 50	$3,343,800 00
Bonded debt	3,848,420 00	3,850,570 00
Bills payable	286,081 63	196,413 56
Dividends not called for	2,242 00	2,215 00
Unpaid pay rolls	763 77	1,260 39
Unpaid approved bills	20,446 79	16,788 53
Accrued interest not called for	4,271 39	7,374 16
Miscellaneous unsettled accounts	7,323 32	11,719 82
Receipts of May not adjusted	41,416 26	53,630 55
Income account to balance	305,404 93	128,634 38
	$7,816,182 59	$7,216,406 39

In the above statement important changes are shown in the accounts of the company. These changes are the result of the large net earnings the past year, and of a new valuation of assets, and arrangement of income and other accounts. The assets owned by the company have been reduced from their original cost to some close approximation of their present value, and the bad assets taken out. The income account to May 1, 1860, has been closed, by charging it with the depreciation of the various assets on hand, including the stocks and bonds of other companies, bills receivable considered valueless, and accounts which have heretofore been matter of litigation and now considered worthless, and by crediting construction account with the balance. The amount so disposed of ($305,404 93) had accumulated as net profits, or earnings, for several years in the statements of the company, without any available means or funds on hand as an offset, and it was deemed advisable to charge up this account, and to apply the balance, amounting to $74,713 46, to the reduction of the construction account, so that the present balance of income account will indicate the amount of actual net earnings, undivided among the stockholders since May 1, 1860, or from the time the construction account was closed. All earnings previous to that date, after paying expenses, interest, etc., have gone toward the construction of the road, and acquiring property pertaining to it. By these changes, the general account is rendered reliable and accurate, as showing the true value of assets on hand.

A comparison of the above statement shows:

Bills payable decreased	$89,668 97
Bills receivable increased	8,270 29
Cash and cash items do.	23,143 05
Sinking fund do.	24,761 48
Value of equipment do.	19,011 41
Miscellaneous accounts increased	4,210 18
Capital stock decreased	12 50
	$169,176 98
Offset in part by—	
Bonded debt increased	$2,150 00
Real estate decreased	7,079 49
Materials decreased	17,381 07
More of the new year's earnings used previous to June 1, than last year	13,932 04
	40,542 60
Showing the condition of the company's affairs improved	$128,634 38

The bonds of various classes returned during the year for sinking fund bonds, amounted to $207,850.

In 1855, the company made a new mortgage on its road, equipment, etc., to secure an issue of $3,500,000 of bonds, with additional security of one per cent. sinking fund, to be invested by commissioners, which sinking fund mortgage bonds mature in 1885, and bear seven per cent. interest payable in New York. The bonds were issued and prepared for the purpose of exchanging them for the various issues outstanding of the Cleveland and Toledo Company, the Junction Railroad Company and the Toledo, Norwalk and Cleveland Railroad Company. Exchanges have been made to the amount of $1,173,000 for which sinking fund bonds are now outstanding. These bonds are the first security on the main line of the company's road, excepting $820,000 prior lien of the Toledo, Norwalk and Cleveland bonds.

The sinking fund commissioners have filed their statement for the year. They had

Cash on hand June 1, 1860	$3,954 90
And have received from the company	24,762 63
Accrued interest collected	4,278 41
	$32,995 94
With which they have invested in securities	32,941 58
Leaving balance of cash on hand	$54 36

The total par value of securities now in their hands is $145,075.

The equipment of the road consists of 32 locomotives, 35 coaches, 10 second class, 12 baggage, 4 mail, 252 stock and box, 110 platform and 19 gravel cars.

The entire business mileage of the road has been $4,998,725—of which 1,075,154 miles were by passenger, and 3,923,571 by freight cars.

The total number of passengers carried was 267,664—an increase of 21,186. The average distance traveled by each passenger was 62.6 miles.

The total number of tons of freight carried was 250,438—an increase of 29,470. The average distance each ton was carried was 90.6 miles.

The bridge over the Maumee river has been rebuilt. Eight new stone and two trestle bridges have also been built. Six more stone and five trestle bridges are under contract.

The road repairs have been heavy: 33,000 new cross-ties, 7,900 new chairs, 13 tons spikes, and 675 tons of new iron have been placed in the track, and 11,295 rails taken up and repaired.

The rolling stock is in good working order. The passenger cars have all been repaired, and six new freight cars built, while six more have the wood and iron work all ready to be put together.

Of the future prospects of the road the report says:

Your road is as favorably located as any other line of road in the Western country, passing as it does, through one of the finest agricultural portions of Ohio, with a large and increasing local business, derived from the flourishing villages located upon its line, and with two of the most flourishing cities in Northern Ohio, at its termini, with the converging business of the roads terminating at these cities.

The Toledo, Wabash and Western Railroad, with its connections, stretching away six hundred and eighty miles, to the Missouri river; the two lines of the Michigan Southern and Northern Indiana road, and their connections at Chicago, draining the business from the Mississippi river for five hundred miles west of Toledo; the Toledo and Detroit Road; all pressing their business on and over your road at Toledo, with the Cleveland and Erie, Cleveland and Pittsburg, Cleveland and Mahoning, and their Eastern connections reaching the Atlantic cities, converging their business at Cleveland, and sending it over your road, must always give it a character and position, as an important link in the great through line of railroads, between the East and the West.

The war, for the preservation of the Union, must necessarily have its effect upon all the great interests of the country, and perhaps none more so, than that of the railroads, which require a general prosperity of the country to come up to a full maximum of their receipts, but we cannot but believe, that with the stoppage of business on the Mississippi, consequent upon the war, and the necessary requirements of all the agricultural productions of the Western country, that all the Northern railroads running east and west, will increase their traffic, and be taxed to their utmost capacity, to transport the productions of the West and South-west, to Eastern markets, during the coming fall and winter. The uncertainties consequent upon a state of war, will require prompt and speedy shipments of all articles and productions seeking a market, instead of waiting for the opening of navigation, the railroads will be sought as the means, and must, necessarily, have a large increased freight traffic.

The office of the company is at Cleveland, Ohio. The directors are:

President—JOHN GARDINER.

Directors—John Gardiner, Norwalk, O.; James Mason, Joseph Lyman, Cleveland, O.; Samuel M. Young, Toledo, O.; John W. Sprague, Huron, O.; William M. Vermilye, G. Talbot Olyphant, Joseph Benjamin, New York City; A. N. Ramsdell, New London, Ct.

Secretary and Treas'r—H. C. LUCE.

Superintendent—L. D. RUCKER.

Telegraphing by Night.

The Superintendent of the American Telegraph Company in Boston, has been experimenting in night telegraphing by means of calcium lights. By the interposition of a thin piece of metal, placed in front of the lens of the apparatus for producing the light, it is made to flicker or is entirely shut off. The variations correspond with the different motions by which telegraphic characters are made. The operators at either end can comprehend what is intended to be communicated as readily as they can read a message by the clicking of the telegraph. With the aperture reduced to an eighth of an inch, the light was distinctly seen at Hull from Boston.

Journal of National Law.

THE EMPEROR OF AUSTRIA AND LOUIS KOSSUTH; THE RIGHTS OF KINGS IN ENGLISH COURTS OF JUSTICE; THE CURRENCY OF THE FUTURE HUNGARIAN NATION.

We give this week, instead of our usual article upon Railroad Law, a case recently decided in the English Court of Chancery in which the Emperor of Austria was plaintiff, and certain Messrs. Day, a photographic firm in London, were defendants. It appears that the celebrated Louis Kossuth, whose visit to our shores, and eloquent addresses in behalf of liberty and the Hungarian cause are well remembered by our people, had ordered of the defendants a large number of bank notes, to the nominal value of 1,000,000 florins, with a view of circulating them in Hungary as money whenever his power should be established in that country. The Emperor sought by this proceeding to have the notes and plates destroyed, on the ground that it was an invasion of his prerogative to regulate the currency in Hungary; and by the law of nations he was entitled to the assistance of the English Courts in maintaining his right as a sovereign.

The notes bore the following words in the Hungarian language:

"One Florin.—This monetary note will be received in every Hungarian State and public pay office as one florin in silver, three zwanziger being one florin, and its whole nominal value is guaranteed by the State. In the name of the nation. —Kossuth, Louis."

At the bottom of each note were the arms of Hungary, and at the borders the amount payable was written in the German and Slavonic languages. In February, 1861, the Austrian Ambassador requested Her Majesty's Government to prevent the manufacture of these notes, but was informed that they could not interfere. Thereupon the present bill was filed. It alleged that the plaintiff, as King of Hungary, had the exclusive privilege of authorizing the issue in that country of notes for payment of money to be circulated as money, and also of authorizing to be affixed to documents intended to be published there, the royal arms of Hungary. Nearly the whole currency of Hungary consists of notes for one florin and upwards, issued by the National Bank of Austria, under his authority. That Messrs. Day, unless restrained, would deliver the notes to M. Kossuth, who intended to transmit them to Hungary, there to introduce them into circulation, in violation of the rights and prerogative of the plaintiff as king of that country, and, amongst other things, for the promotion of disorder and revolution there; and that the introduction into Hungary of such notes would create a spurious circulation, and thereby cause great detriment to the State, and the plaintiff's subjects. M. Kossuth affirmed by affadavit, that in April, 1849, the Diet appointed him Governor-President of Hungary, until a permanent settlement could be made, and this appointment had not been revoked; that the plaintiff was not King of Hungary *de jure;* for Ferdinand still lived, and had not abdicated—and were Ferdinand dead, could not be king *de jure*, for by act of the Diet, in 1723, the heir of the last king alone can succeed him; nor was he king *de facto*, for the fundamental laws of Hungary require that a king *de facto* shall be crowned within the kingdom within six months from his predecessor's death. That there are no royal arms of Hungary, the crown being the property of the nation. Every noble, as a member of the sacred crown, is entitled to share in those national rights of which the crown is symbolical, the shield of the national emblem might be used by any one who pleased, and in public documents it was call-*regin corona regin insigne.* That he had no intention of introducing the notes into Hungary while the present dominion of force prevailed, but had prepared them to supply a sufficient currency on the happening of certain changes, which, looking at the state of Europe and of the Austrian Government, might possibly occur in the relations of lawful rights and the dominion of force; and to provide an equivalent for notes issued by authority of the State in 1848 and 1849, and subsequently confiscated by plaintiff's orders. He was anxious never to infringe the law of England.

The following is the decision of the English Tribunal in favor of the Emperor of Austria:

STUART, V. C.—The plaintiff sues in his sovereign character as king of Hungary. He asks the assistance of the Court to prevent an injury of a public kind to what he asserts to be his legal rights. These rights he claims as the acknowledged possessor of the sovereign power in a foreign state at peace with this kingdom. It appears that the defendants have manufactured and prepared in this country a vast quantity of printed paper, purporting to represent public money of Hungary, such as could be lawfully issued by the sovereign power. What they have thus prepared is intended to be circulated at some future time as the public paper money of Hungary. This paper has been thus made and prepared not only without the license of the plaintiff, but as in exercise of some contemplated power hostile to that of the plaintiff, and intended to supersede it. What the court has now to decide is, the question whether the defendants can, by the law of England, be allowed to continue in possession or to be protected in the possession of this large quantity of printed paper manufactured and held by them for such a purpose; or whether, on the other hand, the plaintiff is entitled to have the right of which he claims to be in possession protected against the invasion of the defendants, and to have delivered up to him what has been thus prepared and made ready to be used for a purpose hostile to his existing right. For the defendants it has been argued that this Court has no jurisdiction in such a case; that what is complained of is a public wrong not cognizable by the law of England, because it relates merely to the public and political affairs of a foreign nation. The defendants' counsel have admitted that a foreign sovereign may have relief in this Court, where he sues in his public character to recover public property within the jurisdiction of this Court. But they insist that what is a question in this cause is not any right of property, but a mere public and political right, which by the constitution of Hungary is not absolute in the sovereign, but subject to the control and direction of the Diet of that kingdom. Such a right, they say, is beyond the jurisdiction of this Court. If the question related merely to an affair of state, it would be a question, not of law, but for mere political discussion. But the regulation of the coin and currency of every state is a great prerogative right of the sovereign power. It is not a mere municipal right, or a mere question of municipal law, but a great public right recognized and protected by the law of nations. A public right recognized by the law of nations is a legal right, because the law of nations is part of the common law of England.

These propositions are supported by unquestionable authority. In the modern version of "Blackstone's Commentaries" (4 Stephens Commentaries, 282), it is laid down, and it has so always been held in our Courts, that the law of nations, whenever any question arises which is properly the object of its jurisdiction, is adopted in its full extent by the common law of England, and held to be part of the law of the land. Acts of Parliament which have been from time to time made to enforce this universal law, or to facilitate the execution of its decisions, are not considered as introductive of any new rule, but merely declaratory of the old fundamental constitution of the kingdom, without which it must cease to be part of the civilized world. To apply these acknowledged principles of the law of nations and law of England to the present case, it appears that the British Parliament, by the Act 2 Geo. 4 and 1 Wil. 4, c. 66, has enacted that the forgery or counterfeiting the paper money of any foreign sovereign or state is a felony punishable by the law of England. This statute is a legislative recognition of the general right of the sovereign authority in foreign states to the assistance of the laws of this country to protect their rights as to the regulations of their paper money, as well as their coin, and to punish by the law of England offences against that authority. The friendly relations between civilized countries require for their safety the protection by municipal law of those existing sovereign rights recognized by the law of nations. It appears from the evidence of the defendant Kossuth himself, that the present plaintiff is in possession of the supreme power of Hungary, and that the property now in question which this defendant has caused to be manufactured, in order at some future time to issue it as the public paper money of the state of Hungary, is not intended to be immediately used for that purpose, because of the existing power of the plaintiff. But it also appears that the paper so manufactured is now in the possession and power of both the defendants, ready to be used when the defendant Kossuth shall think fit, for a purpose adverse to the existing right of the plaintiff. The manufactured paper in question, therefore, is property, which has been made for no other purpose, and can be used for no other purpose, except one hostile to the sovereign rights of the plaintiff. It is not property of a kind which, like warlike weapons or other property, may be lawfully used for other purposes; and if the avowed and single purpose for which this property is now in the hands of the defendants be a purpose hostile to the plaintiff's rights, if this Court were to refuse its interference, the refusal would amount to a decision that it has no jurisdiction to protect the legal right of the plaintiff, a legal right recognized by the law of nations, and therefore by the law of England. But it has been said that the right of the plaintiff is not an absolute right, but is subject to the consent of the Diet of Hungary. The prerogative rights of the Crown of England are all directly or indirectly subject to the control of Parliament, and the sovereign rights in most other nations are subject to some control or

limitation; yet they are not, therefore, the less actual rights, and it is at the suit of the sovereign that they are to be protected by the law. Then it is said that the defendant Kossuth contemplates the overthrow of the existing right of the plaintiff, and that when it is overthrown and the power transferred to himself, or some other body which shall sanction the use of this paper as the current money of the kingdom of Hungary, he will then be entitled to use it, and therefore that this Court ought not now to interfere. To this argument the answer is, that this Court, like other public tribunals, can deal only with existing laws and existing governments. Obedience to existing laws and to existing governments, by which alone the laws can be enforced, is essential to the distribution of justice, and to the maintenance of civil society. Therefore, if by the existidg laws the plaintiff has the right which he asserts, and if the defendants have made and have now in their possession the property in question, which has been made, and now is in their hands, for no other purpose than one hostile to the legal rights of the plaintiff, the legal right of the plaintiff ought to be protected by the interference of this Court. This right of the plaintiff is clear on principle, unless the Court is to abandon its protective jurisdiction. It is clear also upon authority. In the case of Farina *vs.* Silverlock (1 K. & John., 509), an injunction was granted against a printer who had made and printed papers, which he had in his possession, merely because they might be used and were ready to be used in such a manner as to violate the legal right of the plaintiff, although they were not, in fact, actually used for that purpose. Foreign states at peace with this country have always been held entitled to the assistance of the law of England to vindicate and protect their rights, and to punish offenders against those acknowledged public privileges recognized by the law of nations. Even the sovereigh power under a revolutionary government, recognized for the time by the Crown of England as an existing government, has had its right protected, and offenders against those rights punished by prosecution in the Courts of England. The prosecution and conviction of Peltier for a libel on the First Consul of France proceeded on this principle. In earlier times Lord George Gordon was tried and convicted for a libel on the Queen of France. These rights of foreign Princes may be for a time suppressed and the law may be silent during the flagrance of rebellion and revolution, when rights both public and private are overturned and destroyed during the crimes and calamities of civil war; but when, as in the present cause, the existing rights of a plaintiff as sovereign of Hungary are recognized by the Crown of England, the relief which he seeks in this case is for the protection of that legal right against the acts of the defendants. That protection can only be effectually afforded by the relief prayed for in this suit, and there must be a decree against the defendants according to the prayer of the bill.

It was arranged between the parties that within one month a day should be fixed for the destruction of the notes.

Madison and Portage Railroad.

Directors, Campbell, Moore and Thompson, with an engineering party of nine, are busy surveying the Madison and Portage road. They have staked out a portion of it on Third Lake fronting the city, and another branch of it leading to the depot will run along Fourth Lake bank.—*Madison (Wis.) Patriot.*

Interest and Dividends.

The Morris and Essex Railroad Company have declared a semi-annual dividend of three and a half per cent., payable Aug. 1.

The Morris Canal and Banking Company have declared a semi-annual dividend of 5 per cent. on the preferred stock, payable Aug. 6.

The New York and Harlem Railroad Company will pay the interest coupons of the 2d mortgage bonds, Dover Extension, and bonds of 1861, on and after August 1, at the Treasurer's office.

The interest due 1st August on the first mortgage bonds of the Cleveland and Mahoning Railroad Company, will be paid by Ward, Campbell & Co., No. 56 Wall-st., New York,

The Paterson and Ramapo Railroad Company are prepared to purchase five thousand dollars of their bonds on such terms as may be agreed upon.

The annual meeting of the stockholders of the Cleveland, Painesville and Ashtabula Railroad will be held at the office of the company, in Cleveland, Ohio, on the 13th inst., for the election of Directors, and the transaction of such other business as may come before them.

The Vermont and Canada Railroad Company have declared a dividend of 4 per ct., payable Aug. 15. This is the first dividend since June, 1854; but hereafter regular payments of four per cent. are expected to be made on the first days of June and December.

The London *Times* of 13th July says: "In the Colonial market the bonds of the Grand Trunk of Canada were flatter. The ordinary stock left off at 19 to 19¼, and Great Western shares 10¼ to 10⅛, showing no alteration. American railway securities closed the same as yesterday. In miscellaneous descriptions there was a decline in Canada land shares; Canada 5 per cents. 98 to ½.

The Philadelphia *Bulletin* says: "The semi-annual interest on the State debt of Pennsylvania will be due August 1. The Hon. Henry D. Moore, State Treasurer, is in town, and has made arrangements for the prompt payment of the interest, amounting altogether to about one million of dollars."

The Nashville and Chattanooga Railroad Company give notice that they are ready to pay their 1st July interest on their bonds, indorsed by the State of Tennessee, on presentation of the coupons accompanied by the certificate of the Comptroller of the State, that the payment may be lawfully made, the Legislature having constituted him sole udge of the question as to whom such payment shall be made.

The coupons due Aug. 1, on the bonds of the New York, Providence and Boston Railroad Company, will be paid on and after that date, at the office of M. Morgan & Sons, No. 37 William-st.

The transfer books of the New York Central Railroad Company which were closed at the close of business, on Wednesday, the 31st of July, will be re-opened on the morning of Friday, the 23d day of August next.

The mortgage bonds issued by the Rochester, Lockport and Niagara Falls Railroad Company, dated Aug. 1, 1851, and due Aug. 1, 1861, assumed by the New York Central Railroad Company under the Consolidation Agreement, will be paid at maturity, upon the presentation and surrender of the bonds at the Bank of Commerce in New York.

The coupons of the first mortgage bonds of the Central Railroad Company of New Jersey, due on the 1st of August, will be paid at the office of the Company, in this City.

An interest dividend on the New Jersey Railroad and Transportation Company will be paid at the Bank of Commerce, in New York.

The past due coupons of the first mortgage bonds of the Milwaukee and Watertown Railroad Company will be paid by Rogers, Coartes & Co., Milwaukee, in funds current there, or by G. S. Robbins & Son, No. 54 William-st., New York, at $35, each coupon bearing 7 per cent. interest per annum on the face of said bonds.

At a meeting of the Board of Managers of the Delaware Division Canal Company, July 31, 1861, a division of 3 per cent. out of the net earnings of the last six months was declared on the capital stock of the Company, payable on and after the 15th of August.

The Macon and Western Railroad Company have declared a quarterly dividend of 3 per cent., payable in Georgia.

The Michigan Southern Railroad Company pay at the Bank of North America interest upon the Northern Indiana 1st Mortgage, the Jackson Branch, the Goshen line, and the Detroit, Monroe and Toledo bonds.

New Drilling Machine.

A new drilling machine, which can be applied to Artesian and other wells, or to blasting purposes, has lately been invented and patented by Mr. Wm. McGee, engineer, and is now on exhibition near the foot of Water street. Either hand or steam power can be applied to it, and the strokes fall with remarkable rapidity, the drill rotating and feeding downward meanwhile at any rate of speed required. The machine is an exceeding ingenious one, and will, if brought before the notice of mechanics, supersede all others extant.—*Buffalo Commercial.*

Copper at Frost Village, Canada.

We have occasionally alluded to the indications of copper which have been discovered in the neighborhood of Frost Village. We have now the pleasure to announce that these indications are regarded as so far favorable that a large amount of money will be expended in search for the metal on the premises of W. W. Williams, Esq., of that place. A party of wealthy Boston capitalists, accompanied by a celebrated practical geologist from that city, have been for some days exploring, and have determined to sink a shaft 150 feet on Mr. Williams' premises. This speaks well for our mineral prospects, and we must hope for the best. —*Waterloo Advertiser.*

Communication with India via the Euphrates.

Sir John Macdonald, E. C., estimates that a single well constructed line of railway "from Seleucia to Jaber Castle, on the Euphrates, 150 miles in length' would cost £1,500,000. The few physical difficulties on the route are between Selencia and Aleppo. The navigation, however, of the Euphrates is very inferior to that of the Tigris below Bagdad. From Seleucia to Bagdad is 600 miles, and a single line would cost £4,000,000. From Seleucia to Bussorah, at the head of the Persian Gulf, is 800 miles, and would cost £6,000,000. A railway from Bagdad to Selencia, 600 miles in length, would at once give us a new and efficient alternative route to India far removed from the intrigues and interference of either our friends or enemies."—*Herapath.*

☞ The last accounts from Buenos Ayres report the favorable progress of the surveys for the projected Grand Southern Railway by the agents, Messrs. Peto, Brassey and Betts.

American Railroad Journal.

Saturday, August 3, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

There has been a decided improvement in the Share Market at the close of the week, no untoward event occurring, and the public mind being re-assured by the vast preparations of our Government, and the powerful re-enforcements continually moving forward to the seat of the war. The Confederates have failed entirely to follow up their advantages, which is an admission that they suffered quite as much as the Federal forces in the late engagement. Matters are now looked upon as in a satisfactory condition, and the Stock Exchange is gradually recovering the tone it had previous to the late reverses. Missouri bonds are greatly improving by the deposition by the State now in Convention of the Rebel Government which had embroiled the State in civil war, and seized and squandered the money provided for the payment of the interest on the State bonds. The new State officers appointed are strong union men, and they will undoubtedly commence the immediate re-organization of the Government, and we may look forward to speedy provision for the payment of the over-due interest. Missouri is abundantly able to pay all her liabilities, and her willingness to do so is shown by the removal of the old State officers.

The demand for money is very slack. There will probably be more activity when the new Government loans come into market. All new enterprises are at a complete stand-still. Crops throughout the country are exceedingly promising both North and South. The crop of cotton bids fair to be a good one for the area planted, but what is to be its fate under the blockade remains to be seen. The southern factors as well as the local press in that quarter, advise planters not to send it forward till the blockade is raised, for fear of its being seized by the Federal troops.

The traffic on Northern railroads continues to be very fair. As far as freights are concerned, from the transportation of our crops, the prospect was never better. Much depends upon the foreign demand for our produce.

We give this week a statement of the Cleveland and Toledo Railroad, covering a period of two years. That road seems to be gradually getting out of its difficulties. Its net earnings the past year were nearly 4 per cent. upon its share capital. A gain for the present, equal to that of the past year, would render this a seven per cent. stock.

We also give a full historical sketch of the Illinois Central Railroad, with full comparative statements of its cost, earnings and expenses from year to year. Having embraced the entire operations of this road from the start, the statement is interesting as well as valuable as a matter of reference. This company appears to have turned the hard point in its history and bids fair, unless prevented by our present unforeseen political troubles, of realizing the expectations originally formed of it.

☞ The Pittsburg and Connellsville Railroad Company have negotiated for the iron to finish the line into Pittsburg, and the work will now be prosecuted vigorously to completion.

Illinois Central Railroad.

This company was chartered on the 10th February, 1851, with authority to construct a railroad from La Salle (at which point the Illinois and Michigan Canal has its South-western terminus) northwardly to the Mississippi River opposite Dubuque, Io., and southwardly to Cairo at the confluence of the Ohio with the Mississippi; and also a branch from this main line to Chicago. The company's capital was fixed at $1,000,000 and might be increased to an amount equal to the money expended in the construction of the road and appurtenances. The main line was to be completed within four years, and the branch line within six years; and the company was authorized to establish its own rates of toll.

The act of incorporation also surrendered to the company all the property acquired by the State of Illinois in the course of the previous efforts made by it to construct a railroad between the same points; and all the lands donated by the United States Government under the Act of Congress, approved 20th September, 1850. These latter consisted of 2,595,000 acres of land upon the line designated, reaching through the State in its longest direction and in alternate sections within six miles on both sides of the road. Provision was made to ensure the faithful application of these means: a deposit of $200,000 in cash or $300,000 in Illinois State Bonds was demanded, and on complying with this provision, the company was entitled to receive a conveyance of the lands aforesaid. But it was also required to simultaneously re-convey to trustees named in the act all the property thus received, and likewise the proposed railroad and all the lands and constructions appertaining to it. The property thus invested was ordered by the charter to be applied to the construction of the road.

Upon compliance with the conditions above related, and the completion of 50 miles of road, one-fourth of the donated lands was to be held free from encumbrance and disposable by the company for its general exigencies, and the remaining three-fourths were to be retained by the trustees as security for the payment of bonds which the company was authorized to issue. The trustees were

to sell the last named body of lands either for cash, or in exchange for the bonds whose payment was thus intended to be secured, and if in cash then the same to be invested in the bonds, which on receipt were to be cancelled.

The charter also *exempts the company's property from local taxation*, but requires a payment to the State in lieu thereof of 7 per centum of its gross receipts.

The main line of the road defined by the act extends through the whole length of the State north and south; the branch leaves the main line at Centralia, and extends to Chicago. The aggregate length of both lines is 704 miles.

On the 10th March, 1851, the company was organized, accepted the charter, complied with the preliminary conditions and made preparations for the commencement of the work. The first engineering party was organized in Chicago on the 21st May following, and commenced the preliminary surveys of the Chicago Branch, and by the middle of summer seven other parties had been organized and were in the field; and before the end of the year the whole line had been surveyed and located.

The first contract for graduation was made on the 15th March, 1852, for that portion of the branch between Chicago and Calumet, 14 miles. This was hurried along for the purpose of allowing the Michigan Central Railroad to enter the city, and was completed on the 15th May following.

Public contracts were first made in June, 1852, when the grading of six divisions of the road was let and on the 14th October following, the remaining six divisions were put under contract. The work was carried on with such vigor that both the main line and branch were completed and brought into operation within the next four years, having been opened by sections as follows:

Chicago to Calumet	14	miles,	May 15, 1852
La Salle to Bloomington	60	"	" 16, 1853

SHARE CAPITAL—Authorized, $25,500,000.
Issued, $17,945,400.

Represented by 79,933 full paid shares..$7,993,300
And 99,521 shares on which $80 is paid..... 7,961,680

$15,954,980

From which deduct amount carried to interest fund in 1851..... 300,000

Total paid of share capital..... $15,654,980

FUNDED DEBT—$15,672,240: classified as follows:

Construction 7 per cent coupon bonds.$12,885,000
" 6 " " " . 4,115,000

Amount issued $17,000,000
Amount returned and deferred to 31 December, 1860..... 1,746,500

Amount now outstanding..... $15,255,500

—dated 1st April, 1851, and payable 1st April, 1857; coupons semi-annually, 1st April and 1st October—the 7 per cent.'s at the company's office in the city of New York, and the 6 per cent.'s in London.

These bonds were issued to provide the means for constructing the road, and to avoid the necessity of immediately offering the company's lands for sale. They are secured by a mortgage by which the company conveyed to trustees its railroad, rights of franchises, real property, and 2,000,000 acres of lands. The same instrument provided for the sale of the lands, under the authority of the trustees, either for cash, or in exchange for the bonds—the proceeds in all cases to be applied to their cancellation. The company also reserved the right to retire the whole, or a part of the bonds, at any time, on the payment of 20 per cent. in addition to their nominal amount, and all accrued interest. As further security for the payment of interest, the company agreed to apply thereto the net earnings and the instalments that might become due on the share capital. It also set apart for the same object 250,000 acres of land, being a portion of the same not included in the mortgage.

Free Land 7 per cent. coupon bonds, $3,000,000
Total amount retired up to 31st Dec. '60. 2,994,000

$6,000

—dated 1st September, 1854, and payable, principal 1st September, 1860; and coupons semi-annually 1st March and 1st September, at the company's office in the city of New York. The sum realized on the $3,000,000 issued was $2,079,876.

These bonds were issued to complete the work, the original estimates having been exceeded. They are secured by a mortgage on the lands owned by the company, not included in the first mortgage, viz: 345,000 acres, and which from the absence of incumbrance upon them had acquired the designation of Free lands, and hence *Free Land Bonds*. The whole issued except $6,000 not presented has been retired.

Optional Right 7 per cent. coupon bonds.$3,200,000
Cancelled $2,543,000; not issued $619,000 3,162,000

$38,000

—dated 20th February, 1858, and payable, principal 20th February, 1868; and coupons semi-annually 1st January and 1st July, at the company's office in the city of New York. The bonds with exception of $38,000 as above have been converted or paid.

Debentures, 7 per cent..... $970,000
Less received on full paid stock and $10 stalment 927,260

$42,740

—dated July 1, 1859, and payable, principal 1st July, 1861; and interest semi-annually 1st Jan. and 1st July, at the company's office in New York.

Eight per cent. coupon bonds..... $332,000

—dated 1st March, 1860, and payable, principal 1st March, 1865; and coupons semi-annually 1st March and 1st September, at the company's office in New York.

These bonds were issued for the payment of such Free land bonds as were not paid in upon stock at maturity. Secured by pledge of an equal amount of share capital; or should all the shares be paid in full previous to their maturity, then on the moneys received therefor. The total amount provided is $500,000.

Clastified Statement of the main items of expenditure of the Company, to December 31, 1860.

LANDED PROPERTY.—It is, says the report for 1860, ten years since the act of Congress conferred upon the State of Illinois the grant of lands. In 1852 Mr. Robert Rantoul, with marked ability, presented to his co-directors and the public, his views of the effect upon the population and resources of Illinois, by the construction of this Railway, and the consequent advance in the value of property. Mr. Rantoul predicted that the census of 1860, would show over 1,700,000 population in Illinois, and that lands, in twelve or fourteen years, would command $12.00 per acre. The reasoning was conclusive to his associates, in face of the fact that Illinois counted at that period only 850,000 souls, with a space covering nearly 20,000 square miles, in the centre of the State, nearly destitute of population, and that upwards of eleven millions of acres of land in the State were offered for sale by the Government, at $1.25 per acre. At a latter day, the Directors had to contend with prejudices in regard to the health of the prairie country, and the general conviction that the Government lands in Illinois, and the States west of it, would for one generation at least, at $1.25 per acre, prevent any prairie lands, destitute of fuel, reaching such extravagant values. The great extent of the lands of the North-western Territory, was apparently the strongest argument against the fulfillment of Mr. Rantoul's predictions, and one which time alone could solve. The Illinois prairies have proved to be perfectly healthy, and the supply of coal and wood is ample. The pioneer has gone beyond Illinois to Kansas and Nebraska, and has discovered, practically, the limit of available land for agricultural purposes. Those elevated arid regions, dry in summer and cold in winter, are too near the great desert of almost perpetual drought. The government surveys and meteorological observations, render it certain that the limit of good lands between the thirty-seventh and forty-second parallels has been reached, and that the annual outpouring of the Eastern States will settle upon the lands of Illinois and Iowa. The most important crop, that of Indian Corn, is uncertain in the States North of these; and every season, farmers move down from Minnesota and Wisconsin, to the milder and more genial climate of Illinois. So long as Missouri and Kentucky continue Slave States, the lands in those States will not compete with the lands of Illinois, and this State will stand in relation to Missouri, as Ohio has for many years in relation to Kentucky, absorbing the emigration, and the value of land will increase in direct ratio with the gain in population. The census of 1860 shows 1,729,000 population in Illinois—nearly one-third of the entire gain in population of the six North-western States within the last ten years is within her borders. The value of land has quadrupled in these ten years—the tide of emigration to Illinois is constant, and with fifty per cent. more added to the population, it seems demonstrated that land will double in value. Hence, I infer, that the unsold half of our lands will, during the next ten years, command nearly double the amount realized for the first half, and to secure this, I would suggest the policy of gradually advancing the price, without however reserving a single acre from sale. After deducting upwards of one million of dollars of sales made in 1855, upon which parties have failed to respond to their engagements, our net sales are 1,260,273.46 acres, at an average of $12.67 per acre, = $15,995,380. Of this $15,995,380, upwards of twenty-five per cent., or $4,195,398, have been collected in cash. The average of $12.67, includes the earlier sales at six to nine dollars per acre. Every acre sold for settlement, adds to the value of the remaineer; and I estimate the ultimate proceeds of our lands as follows:

Acres.				
1,260,273	at	$12.67		$15,995,380
		Town lots.		152,603
200,000	to be sold at	$13..	$2,600,000	
200,000	" "	15..	3,000,000

STATEMENT *showing the condition of the Company's Lands granted by the Act of Congress of 20th September, 1850, up to and including the 31st December:*

	Acres.
The whole grant was for	2,595,000
Of which there have been appropriated to secure the payment of—	
The $17,000,000 construction bonds	2,000,000
The int. on said bonds	250,000
The $3,000,000 free land b'ds	345,000
Total as above	2,595,000

	Acres.
Of the construction lands, to wit	2,000,000.00
There were sold as per report of Jan. 2d, 1860	881,379.25
Deduct for cancelled sales in 1860	40.543.15
Which leaves the previous net sales only	840,836.10
Sold since that date to December, 31st, 1860	53,841.70
Total	894,677.80
Leaving on hand January 1st, 1861	1,105,322.20

	Acres.
Of the free lands, to wit	345,000.00
There were sold as per report of January 2d, 1860	194,222.91
Ded't for cance'd sales in 1860	6,931.16

(To be continued.)

Legal Rates of Interest.

The following are the legal rates of interest in the several States of the Union:

Maine, 6 per cent.

New Hampshire, 6 per cent.

Vermont, 6 per cent., except upon railroad notes or bonds, which may bear 7 per cent.

Massachusetts, 6 per cent.

Rhode Island, 6 per cent.

Connecticut, 6 per cent. By the law of May, 1854, banks are prohibited under a penalty of $500 from taking directly or indirectly, over 6 per cent.

New York, 7 per cent.

New Jersey, 6 per cent.

Pennsylvania, 6 per cent.

Delaware, 6 per cent.

Maryland, 6 per cent.

Virginia, 6 per cent.

North Carolina, 6 per cent.

South Carolina, 7 per cent.

Georgia, 7 per cent.

Alabama, 8 per cent.

Arkansas, 6 per cent. Special contracts in writing, in this State, will admit of interest not exceeding 10 per cent.

Florida, 6 per cent. On special contracts, 8 per cent. is allowed.

Illinois, 6 per cent., previous to 1857, and 10 since that time.

Indiana, 6 per cent.

Iowa, 6 per cent. On special contracts and judgments 10 may be charged.

Kentucky, 6 per cent.

Louisiana, 5 to 8 per cent.

Michigan, 5 per cent. It is lawful to stipulate for any sum not exceeding 10 per cent.

Mississippi, 6 per cent. Since March, 1856, 10 per cent. is allowed on special contracts.

Missouri, 6 per cent. Parties can agree for any sum not exceeding 10.

Ohio, 6 per cent., and all interest charged over this rate is illegal.

Tennessee, 6 per cent.

Texas, 8 per cent. Special agreement in writing not exceeding 12.

Wisconsin, 10 per cent.

California, 10 per cent. On special contracts any rate interest may be agreed upon or paid.

LEGAL TENDER.

The law regulating the payment of debts with coin provides that the following coins be legal tender:

1. All gold coins at their respective values, for debts of any amount.

2. The half dollar, quarter dollar, half dime and dime, at their respective values, for debts of any amount under five dollars.

3. Three cent pieces for debts of any amount under thirty cents and

4. One cent pieces for any amount under ten cents.

By the law of Congress, passed some four or five years ago, gold was made the legal tender for large amounts.

We understand that the affairs of the Staten Island Railroad have gone into the hands of a receiver, W. H. Vanderbilt, Esq., being appointed to that position.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 30, 1861.

THE MORTGAGE BONDS ISSUED BY THE Rochester, Lockport and Niagara Falls Railroad Company, dated August 1, 1851, and due August 1, 1861, assumed by this Company under the Consolidation Agreement, will be paid at maturity upon the presentation and surrender of the Bonds at the Bank of Commerce in New York.

JOHN V. L. PRUYN,
31 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 24, 1861.

THE Transfer Books of this Company will be closed at the close of business on Wednesday, the 31st day of July instant, and will be re-opened on the morning of Friday, the twenty-third day of August next.

JOHN V. L. PRUYN,
4t30 Treasurer *pro tem.*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

SPECIAL NOTICE. Transfer of LETTERS PATENT.

WHEREAS Letters Patent, bearing date Nov. 1st, 1853, were granted by the Government of the United States to George Williston, of Brunswick, County of Cumberland, and State of Maine, for a Machine to straighten and curve Railroad Iron, giving and granting to said George Williston, his heirs, executors and assigns, for the term of fourteen years from the date of said Letters Patent, the full and exclusive right and liberty of making, using and vending to others to be used, the said Machine, and whereas said George Williston sold and transferred one undivided half of his entire interest in said Letters Patent, to Wm. H. Lunt, of Bowdoinham, County of Lincoln and State of Maine, as will appear by reference to deed, date Nov. 2, 1853, recorded in the Patent Office at Washington, Nov. 9, 1853, and whereas the said George Williston and Wm. H. Lunt, have on this 31st day of May, 1861, sold and transferred their entire interest in said Letters Patent, to Albert Bridges and Joel C. Lane, Merchants in the City of New York, doing business under the name and firm of A. BRIDGES & CO.,—THEREFORE, we, the undersigned, hereby notify and warn all persons, against manufacturing, vending or purchasing said Machines from any person or persons whatever, except from us who have and hold the exclusive right thereto.

OIL! OIL!

PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.
PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and
WILL NOT GUM.
In no case has it failed to meet the approval of the consumer.
The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor
F. S. PEASE, 61 Main st., BUFFALO.
Reliable orders filled for any part of the United States or Europe.

Manhattan Oil Company,

Office, No. 16 Broadway, NEW YORK.
JAMES M. MOTLEY, Vice Pres't and Treasurer.
MANUFACTURERS OF
MASON'S SPERM OIL,
AND DEALERS IN
SPERM, WHALE, LARD AND OTHER OILS,
For Railroads, Steamers, Machinery and Burning.

Machinists' Lubricating OIL COMPANY,

No. 68 Courtlandt and 172 Washington Sts.,
NEW YORK,
ALEXANDER POPE, Treasurer.
MANUFACTURERS OF
WHITE METALLIC OIL,
AND DEALERS IN
SPERM, LARD, WHALE, AND OTHER OILS.

MORRIS, WHEELER & CO.,
SUCCESSORS TO
MORRIS & JONES & CO.,
IRON MERCHANTS,
MARKET AND SIXTEENTH STREETS,
PHILADELPHIA.
IRON AND STEEL
IN ALL THEIR VARIETIES.
BOILER PLATE, CAR AXLES,
BOILER RIVETS, RAILROAD IRON,
CUT NAILS and SPIKES, PIG IRON, etc.
Having the selling agency of a number of the Rolling Mills, Furnaces and Forges in this State, **orders for any description of IRON** can be executed.

IRON BOILER FLUES.

LAP-WELDED BOILER FLUES,
1¼ to 8 inches outside diameter, cut to definite length, 2 to 20 feet as required.
Wrought Iron Welded Tubes,
From ⅛ to 8 inches bore, with Screw and Socket Connections. T's, L's, Stops, Valves, Flanges, etc., etc.
MANUFACTURED AND FOR SALE BY
MORRIS, TASKER & CO.,
PASCAL IRON WORKS.
Established 1821.
WAREHOUSE—209 SOUTH THIRD STREET,
PHILADELPHIA.
STEPHEN MORRIS, CHAS. WHEELER.
THOS. T. TASKER, JR. STEPHEN P. M. TASKER.

R. T. EDWARDS,
261 PEARL STREET, NEW YORK,
MANUFACTURERS OF
WROUGHT, CAST AND GALVANIZED
PIPE,
AND EVERY DESCRIPTION OF
STEAM, GAS AND WATER FITTINGS,
Used by Engineers, Manufacturers, Steam and Gas Fitters, Plumbers, etc.
CAST IRON STREET MAINS,

Boiler Flues,	Steam Pumps,	Steam Valves,	Gas Cocks
Heater Coils,	Steam Gauges,	Steam Cocks,	Gas Meters
Steam Traps,	Steam Whistles,	Gauge Cocks,	Oil Cups.

Tongs, Pipe Wrenches, Pliers, Proving Pumps, Vices, etc.

New York and Erie R. R.

PASSENGER TRAINS leave, via Pavonia Ferry and Long Dock, from foot of Chambers street, as follows, viz:

7.00 A. M., EXPRESS, for Dunkirk and Buffalo, and principal intermediate stations.

8.00 A. M., MAIL, for Dunkirk, and intermediate stations. This Train remains over night at Elmira, and proceeds the next morning.

9.00 A. M., MILK, *daily*, for Otisville, and intermediate stations.

11.00 A. M., ACCOMMODATION, *daily*, for Port Jervis, and principal stations.

4.00 P. M., WAY, for Middletown, Newburg, and intermediate stations.

5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Canandaigua, and principal stations. The Train of Saturday stops at all Mail Train stations, and runs only to Elmira.

6.00 P. M., ACCOMMODATION, for Hornellsville, and principal stations.

NATHANIEL MARSH, *Receiver.*
CHA'S MINOT, *Gen. Sup't.*

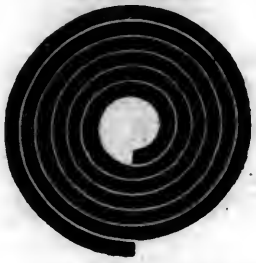
THE METALLIC CAR SPRING COMPANY

OF NEW YORK,

OFFICE, 54 WILLIAM STREET, NEW YORK,

SOLE MANUFACTURERS OF

CONICAL VOLUTE STEEL



AND

COMBINATION METAL AIR AND GUM

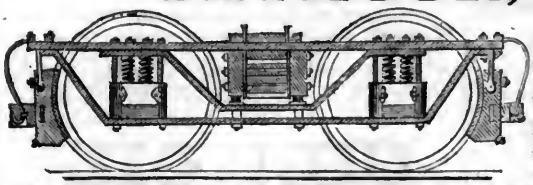
(Patented by R. Vose, Jan. 3, June 5 and 12, 1860)

CAR SPRINGS.

The two most reliable Springs ever offered to the RAILROAD PUBLIC.

COURTLANDT PALMER, President. **CHARLES D. GIBSON, Treasurer.**

RICHARD VOSE, Secretary.



JAMES JEFFRIES & SONS,
MANUFACTURERS OF
LOCOMOTIVE, CAR AND TANK
SPRINGS,
PHILADELPHIA, (rear of Girard House.)

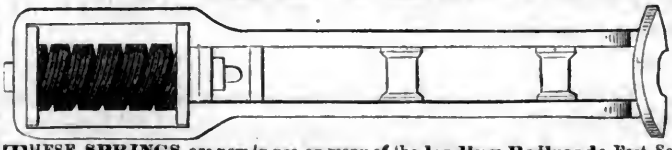
THE HUMPHREYSVILLE MANUFACTURING COMPANY,
(SUCCESSORS TO DWIGHTS, FRENCH & CO.)
SEYMOUR, CONN.,



ARE prepared to fill, at short notice, of the best materials and workmanship, orders for **Wrought** and **Cast Iron Work,** fitted ready for use, for the building or repairs of **Passenger** and **Freight Cars,** complete or in part.

A sample wrought iron truck can be seen at our office. **No. 5 Gold st., NEW YORK.**

We also manufacture—
BEST FAGGOTTED CAR AXLES,
SALISBURY IRON CAR WHEELS,
WROUGHT IRON BOLTS, NUTS & WASHERS,
RAILROAD JACK SCREWS, ETC.

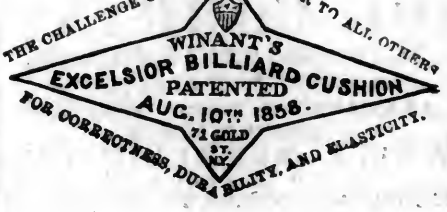
RAYMOND FRENCH, Pres't, Seymour, Conn. **WM. H. MARSHALL,** Treas'r, No. 5 Gold st., N.Y.

STEEL CAR SPRINGS,

MANUFACTURED BY THE
PATENTEE,
Carlos French,
SEYMOUR, CONN,

THESE **SPRINGS** are now in use on many of the **leading Railroads** East, South and West. Samples can be examined and Price Lists obtained at **No. 5 Gold st., NEW YORK.**

EDWIN J. HORNER,
SUCCESSOR TO
McDANEL & HORNER,



LOCOMOTIVE AND RAILROAD
CAR SPRING
MANUFACTURER,
WILMINGTON, DELAWARE.

158
William St.,
NEAR ANN,
NEW YORK CITY.

WM. OSTRANDER,
SOLE MANUFACTURER OF THE
Celebrated Patent Alarm Whistles
FOR SPEAKING PIPES.
ALSO MANUFACTURES AND FITS UP
SPEAKING PIPES at short notice.

BARD, BROTHERS & CO.,
MANUFACTURERS OF
GOLD PENS,
PEN AND PENCIL CASES,
No. 21 MAIDEN LANE,
NEW YORK,
ALSO, MANUFACTURERS OF
BARD & WILSON'S PATENT
Angular Nib Gold Pens.
GOLD PENS REPAIRED OR EXCHANGED.
Manufactory, BROOKLYN, Conn,

LAND AND SUBMARINE
BLASTING,
Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

ANALYTICAL AND
Manufacturing Chemistry,
No. 24 WILLIAM STREET,
Rooms Nos. 28 & 29. NEW YORK.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. The best modes furnished for manufacturing, purifying and deodorizing oils from coals, petroleum, and other bituminous substances. Coal Oils tested and purified. Superintendents and skilled workmen furnished to manage Coal Oil Works and Mines. The Kerosene patents from which originated the Coal Oil Business of the United States were granted to Dr. GESNER.

GESNER'S, Chemists & Engineers.

Gunpowder and Gunpowder Mills.

There are few agents more essential to the progress of our country in material prosperity than the article of gunpowder. Not only is its manufacture a source of wealth, but its employment in developing the internal improvements, and in cutting through the rocks that impede the course of railways throughout our extended territories has done much towards making the resources of our vast continent available. In the early records of the use of Gunpowder we find it employed as an instrument of warfare, and at the present time it is most intimately associated with the battlefield. But not one-third of the powder now manufactured is used for such deadly purposes; and the immediate demand for gunpowder by the Government of the United States, great as it is likely to be, probably will not equal one-quarter of the amount consumed by the people in a time of peace.

The first invention of gunpowder, like the discovery of many other agents that have exerted great influence in shaping the destinies of mankind, is shrouded in the obscurity of the past. The discovery is popularly attributed to the ingenuity of one Schwartz, a German monk and a chemist of the 14th century. Roger Bacon referred to it in his writings in 1270, and gave the following receipt for making it: "But, yet, take of saltpeter with pounded charcoal and sulphur, and thus you will make thunder and lightening if you know how to prepare them." Gunpowder is supposed to have been known by the Chinese at a very early period and to have been used by them in making fireworks. Saltpeter is the spontaneous excrescence of the soil of India, and the people of that country were probably, very early familiar with the article. It was used by the Oxydracae, a people living between the rivers Hyphasis and Ganges, to repel an attack upon them made by Alexander the Great. Philostratus says of this people, "For they came not out to fight those who attack them; but those holy men beloved of the gods, overthrow their enemies with tempests and thunderbolts shot from their walls."

The earliest known receipts combine the same ingredients in similar proportions to those now adopted as best. These proportions are 75 parts of saltpeter, 12½ parts of sulphur and 12½ parts of charcoal. The proportions of different governments vary somewhat, as do also the proportions in blasting powder, but these are the standard proportions of the United States Government. By far the greater portion of gunpowder made in this country is for blasting, and hunting purposes; the former being mostly employed at the North and West, while the latter is mostly consumed at the West and South.

A gunpowder mill is a term which signifies not simply one, but a number of buildings. These are erected some distance apart so that in case one building is destroyed by an explosion, the neighboring one will be comparatively safe. They are generally located at a distance from any village or inhabited place; and beside a stream which will afford the necessary water-power to carry the machinery. The material is transported from one house to another, as the several stages of the manufacture are completed. We recently had the pleasure of visiting the Gunpowder Works of Messrs. Laflin, Smith and Boies, in Ulster county, N. Y., a few miles below the village of Saugerties. This firm do a very large business at the West and South; and through the politeness of one of their number, Mr. Dwight Laflin, the whole process was theoretically explained, and practically illustrated to our understanding.

The Mill is located in a valley in the bed of which winds a stream capable of affording any amount of water power. On either side rise the hills, covered to their tops with woods. The buildings are on the edge of the stream, and are connected together by a plank walk, in order to prevent stepping on the ground and getting any gritty substance into the soles of the workman's shoes, which might easily explode the mill, and destroy the life of the wearer.

The first building we entered is devoted to the charring of coal. Charcoal is the material most easily obtained; but to make good gunpowder it is necessary that proper wood should be used, and that it be charred at a temperature of about 500° If charred at this temperature it will afterwards enter into combustion at a heat of 680; but if charred at a higher temperature it requires a still greater heat to burn it. Willow and Alder are the woods mostly used for making the coal; they being of a porous nature, are easily burned, while woods giving a hard flinty coal are objectionable on account of the slowness of combustion. The building was perhaps 50 × 30, and contained 6 cylinders set in brick work, in which workmen were engaged in throwing in alder wood. The cylinders after being filled are closed, and a fire built under them, soon changes the character of the wood, and upon opening the cylinders, the small sticks are found perfectly charred, of a dark brown color, and leaving no mark whatever upon the hand, like ordinary charcoal. Leaving the coal house we entered the building devoted to the clarification of saltpeter. This article is mostly imported from Calcutta, in a crude state, and is purified by being dissolved in large kettles, boiled down, the impurities skimmed off; and then crystalized. The sulphur is imported already purified. The next building is the mixing room, where the ingredients are mixed in their proper portions: the charcoal and saltpeter being placed in cylinders together with small copper balls, the cylinder revolves and the ingredients are thus thoroughly mixed, while the fine dust being confined in the cylinders, is prevented from escaping. Having been thoroughly mixed in the proper proportions, the material is then taken to the wheel house, and placed in what appeared to us a huge tub, perhaps twelve feet in diameter, and three feet in height. In this tub, the bottom of which is solid iron six inches thick, the sides being constructed of wooden staves, two large iron wheel weighing seven and one-half

tons each, were revolving upon a shaft set in an upright spindle; one being set nearer the spindle than the other, and so adjusted as to cover the entire bottom of the tub in their revolutions. The material is placed in this tub and pressed by these wheels for the space of three or four hours, it being constantly kept damp to avoid an explosion.

After being subjected to this process, the powder is taken to the press house and subjected to the operation of a powerful hydraulic press. The powder is placed between sheets of copper and duck cloth, and after receiving a pressure equal to 120 tons to the square foot, it comes out in hard and brittle cakes of a grayish black hue, from ¼ to ½ an inch in thickness, and from 2 to 3 feet square. This is called mill cake, and is now ready to be reduced to the size required to make the powder. This is done by passing it through rollers, one of which is so adjusted as to yield when any hard substance gets between them, otherwise friction might be produced and the mill be blown up. The powder is then bolted and the dust caused by the attrition of the particles is separated; it is then passed through sieves of different sizes, and the coarse and fine powder separated. The powder is then dried; and for this purpose is placed, some in a room heated by an iron dome rising in the centre of the floor under which is a stove or fire kindled from the outside or beneath the building; and some in an iron pan heated by steam. The last operation is glazing, which is done by placing it in long wooden cylinders and revolving them. This operation changes the powder from a dull greyish color to a shiney black, and renders it more saleable in market. The gunpowder is now completed and ready for packing in kegs or canisters.

There are perhaps from 50 to one hundred gunpowder mills throughout the United States, most of which are small mills located in the mining regions of Pennsylvania, where they manufacture blasting powder to be used in the vicinity. Of large manufacturers, besides the one whose mills we have imperfectly described, there are perhaps four or five; and among these the most extensive are Messrs. Du Pont, whose mills are in the State of Delaware, and the Hazzard Company whose mills are at Enfield, Connecticut.

The explosion of gunpowder is a deflagration, in which the combination of the ingredients is completed at once; the whole, so far as it is capable passing from a solid into a gaseous condition, by the elements of the ingredients entering into new combinations among themselves. The exciting cause may be heat sufficient to effect the decomposition of the smallest particle; more heat is thereby generated and the process goes on. It is most complete when the substances are as wholly converted into gas as possible, and also into those gaseous combinations which set free the largest amount of caloric. But for many purposes a powder which explodes very suddenly is not desirable. For blasting gunpowder it is better to allow time for the shock to distribute itself through the rock, and it is therefore sometimes made of different proportion, and is also made coarser in grain, which also tends to retard its explosion. For this object the gunpowder now used in firing rifled cannon and other large guns is made very coarse; it having been proved within the last six months to be much more effectual.

There is no data by which we can now readily ascertain the relative amount of gunpowder made in this country, and that made in England. During the Crimean war the British Government made large purchases of gunpowder in this country; and notwithstanding the English people export more gunpowder than we do, it is doubtful whether, when we take into consideration our large internal trade, that they manufacture more extensively than ourselves.

Richmond and Danville Railroad.

This company was chartered on the 9th March, 1847, and organized on the 20th November following. The company was authorized to construct a railroad from the city of Richmond in a southwest direction to the town of Danville on the Dan river, and to raise by shares a capital of $1,500,000, the State taking three-fifths of the amount and appointing three of the directors. By subsequent legislation, the right to increase the capital to $2,000,000 was granted, and counties, cities and other corporate bodies empowered to subscribe thereto. The State also agreed to guaranty the payment of an issue of the company's bonds to the amount of $200,000, and to loan to the company $600,000 redeemable by a sinking fund in thirty-four years.

The work of construction was commenced on the section between Manchester and Coalfield in the summer of 1848, and the whole line was placed under contract before the end of 1849. The bridge over James river was also contracted for in the latter year, and in the same year contracts were made for iron to lay the first 100 miles of the road. It was the original design of the company to lay the road as far as the coal mines, with rail weighing 75 tons to the mile, and beyond that point with flat-bar weighing 42 tons. By a resolution adopted in May, 1850, however, the latter description of rail was abandoned for the heavier rail throughout. Up to the present time all but 8¾ miles have been thus laid with heavy rail.

The road from Manchester to the coal mines, was completed and opened for business on the 25th December 1850. On the 19th May following, it was completed to the Appomattox river, 27 miles from Richmond, on the 13th October to Amelia Court House, 36½ miles; and on the 24th November to Jetersville, 43½ miles. In 1852, the road was extended—on the 19th February, to Jenning's Ordinary, 50 miles, on the 15th May to a junction with the South Side Railroad, 54 miles, on the 16th August to the Meherrin, 65 miles, and on the 8th November to Keysville, 73 miles. On the 20th July, 1853, it was opened to Drake's Branch, 82 miles, and on the 4th October to Overby's Station, 85 miles; and on the 1st March, 1854, it was completed to the Staunton river, 90 miles.

The company had now used all its available means and became embarrassed with debts and liabilities which threatened a suspension of further progress. To relieve itself of its disabilities, a second mortgage of the road was executed for $250,000, and a further mortgage in the following year for $150,000. The latter was used for the payment of iron and cross-ties for the 50 miles yet to be completed. With these additional means, together with the earnings of the road already in operation, the line was extended first to Boston (20th December, 1854,) 109½ miles, then to New Ferry (23rd February, 1855,) 120 miles, and then to Barksdales (4th Sept., 1855,) 127 miles, and early in the next year to Danville, having been completed to Ringgold, 135 miles, on the 26th February, and to Dan river, 140 miles, on the 24th March of that year. On the 5th May following the bridge over the Dan was completed and cars for the first time ran into the town of Danville.

The cost of the road to this point has been less than $3,500,000 of which $1,975,000 was share capital, $1,200,000 loans and bonds, and the remainder chiefly net earnings. The State loan is virtually an annuity terminable in 34 years from 1853—the payment to the State of $42,000 a year in semi-annual payments being sufficient for the interest and the liquidation of the capital at the date named.

The extension of this road into North Carolina has for several years been sought by the Company; but the Legislature of that State has repeatedly refused to sanction any direct connection between the railroads of the two States. The extension of the Roanoke Valley Railroad from Clarkesville to Keysville (now under construction) will, however, furnish an indirect connection. A company has also been incorporated under the name of the Dan River Coal Field Railroad Company to construct a road from Germantown, N. C., down the valley of the Dan to the Virginia line near Danville, from which point it is contemplated to extend it to that town. A third connection is also in contemplation, stretching primarily to the base of the Blue Ridge, and thence through the copper regions forming a connection with the Virginia and Tennessee Railroad at the most eligible point. The survey for the latter line has been made and completed under the auspices of the Richmond and Danville Company.

Share Capital—Authorized $2,000,000 in 20,000 $100 shares.

Paid in $1,981,198 on 20,000 $100 shares, viz:

	Subscribed.	Paid in.
State of Virginia $1,200,000		$1,188,599
City of Richmond	250,000	250,000
Town of Danville.....	10,000	10,000
County of Pittsylvania.	30,000	30,000
" Henry	20,000	20,000
Individuals	490,000	482,599

Funded Debt—$898,892, classified as follows:

State of Virginia 6 *per cent. loan*, $561,092—issued in 1853 and payable, principal in 34 years and interest semi-annually, 1st January and 1st July, in the city of Richmond. The original loan was $600,000 which has been reduced to the present amount by the action of a redemption fund of one per cent. per annum paid in semi-annual instalments. By the uninterrupted operation of this fund the whole loan will be paid off at maturity.

Mortgage 6 *per cent. bonds*, $200,000—issued in January, 1851, and payable, principal in 1875, and interest semi-annually, 1st January and 1st July in the cities of Richmond and New York. These bonds are guarantied by the State, to which the road and property of the company are mortgaged as security therefor. This mortgage ranks next to that securing the State loan.

Mortgage 6 *per cent. company bonds*, $1,000—

issued 1st August, 1854, and payable principal 1st August, 1859, and coupons 1st February and 1st August in the city of Richmond. This amount is the remainder of an issue of $260,000 and is now payable on demand.

Mortgage 6 per cent. bonds (registered), $138,800—issued 1st November, 1855, and payable, principal 1st November, 1860, and interest semi-anoually, 1st May and 1st November, in the city of Richmond. This mortgage covered a total of $150,000, of which $10,900 has been redeemed, and $2,300 have been extended.

FLOATING DEBT—$78,608, viz: bills papable, $58,576, and open accounts, $20,132.

COST OF ROAD AND EQUIPMENT—$3,726,037: in detail as follows—

Graduation and masonry	$1,100,216
Wooden bridges and trestling	343,404
Iron bridges	17,716
Superstructure of road, including iron.	698,988
Wood and water stations, buildings and fixtures	731,700
Machine shops, machinery and fixtures	447,840
All other buildings	20,497
Land, land damages and fences	63,570
Engineering, agencies and salaries	164,487
Other expenditures	150,680

The equipment of the road consists of 23 locomotive engines; 11 8-wheel 1st class passenger; 5 second class; 3 smoking; 10 baggage and mail; 189 8 wheel box freight; 44 platform; 8 stone; 60 6 wheel coal (iron); 30 4-wheel box freight; 33 stone; 18 coal (wood); 16 gravel; and 2 sand cars:—total, 430 cars.

The following are the officers and directors for 1860-'61:

President—LEWIS E. HARVIE, Richmond, Va.

Directors elected by stockholders—Lewis E. Harvie, William Palmer, (*Vice President,*) R. O. Haskins, Richmond, Va.

Directors appointed by State—J. B. Stovall, Halifax Co., Va.; Vincent Witcher, Pittsylvania Co., Va.; E. G. Leigh, Powhattan Co., Va.

Treasurer—JOHN S. VAUGHAN, Richmond, Va.

Auditor—THOMAS W. BROCKENBOUGH, "

Sup't—ALEXANDER WORRALL, "

The principal office is at Richmond, Henrico Co., Va.

Connecticut and Passumpsic Rivers R. R.

This company was chartered November 10th, 1845, with an authorized capital of $2,000,000 and power to increase the same to $3,000,000. In 1848, the charter was revived, and the company organized January 15, 1846, and the road opened for use from White River Junction to Bradford, 28 miles, Oct. 10, 1848; and to Wells River Village, 40 miles, Nov. 9, 1848. In Nov., 1850, an additional section of 20⅔ miles, to St. Johnsbury, was opened; and on the 21st of Oct., 1858, the road was extended to Barton, its present terminus. The whole length of completed road from White River Junction to Barton is 90 miles. The Northern section, a length of 20 miles, is now in course of construction, by which it is proposed to connect with the Stanstead, Shefford and Chambly Railroad in Canada, which has already been partially opened. During the past year, the collections from subscribers has been expended principally between Barton and Barton Landing—the most expensive masonry, the heavy embankment, and the rock cutting are so far advanced that the road to Newport and Canada line can be completed in twelve months, provided sufficient payments therefor are made by the subscribers. The amount of share capital paid in to May 31, 1860, was $1,280,400. The funded debt of the company is $800,000, consisting of 1st mortgage 6 per cent. sinking fund, coupon bonds, dated December 1, 1856, and payable, principal in 20 years, and coupons semi-annually at Boston. These bonds were issued to retire the original 1st and 2d mortgage bonds falling due in 1856, '57, '58 and '59, and which were secured on the road south of St. Johnsbury. These bonds have all been taken up with the coupons, and cancelled. The present issue is secured by a first and only mortgage of the entire railroad and all other property of the corporation. For their redemption at maturity, an amount equal to two per cent. of the whole funded debt, or $16,000, is annually set aside from the net earnings of the road, and placed in the hands of trustees, to be invested in these bonds so far as they can be purchased, or otherwise in undoubted productive funds. The coupons on these bonds amounting to $48,000, have been promptly paid the past year, excepting $2,478 not presented; and $16,000 paid to the trustees of the sinking fund. The amount now in the hands of the trustees is $74,400.

The earnings of this road for the fiscal years ending May 31, 1860 and 1861, have been:

	1860.	1861.
From passengers	$75,090 34	$71,691 23
" freight	101,852 55	100,856 71
" mail, express, etc	11,203 04	11,202 33
	$187,646 53	$183,750 27
Expenses	123,027 13	91,067 36
Net earnings	$64,619 40	$92,682 91
Miles run	125,851	118,212
No. of passengers	60,237	60,004
Lbs. of freight		55,611,176
Feet of lumber		4,946,343

The equipment of the road consists of 8 locomotives; 8 passengor, 5 baggage and mail, 103 box, 45 platform, 21 rack, 1 snow and 8 wood car.

The cash value of equipment and materials on hand May 31, 1861, was as follows:

Locomotives	$54,200 00
Cars	76,076 00
Tools and machinery	8,996 32
Materials	20,283 96
8,079 cords of wood	15,627 74
Horses, machinery, lumber, etc	1,068 53
	$176,181 58

The financial condition of the company is as follows:

Notes payable	$54,343 10
Coupons due not presented	2,478 00
Balance of account with connecting roads	3,708 17
	$60,529 27
Cash and notes	$2,881 24
Wood lots	5,743 23
Wood and materials on hand	40,490 26
	$49,017 73

Congressional Appropriations.

The following is a correct list of the appropriations made by Congress during the session which has just closed.

Army	$185,200,397 80
Naval	30,171,525 20
Legislative	286,373 00
Sundry Civil	529,000 00
National Loan	200,000 00
Police, Baltimore	145,000 00
Purchase of Arms	10,000,000 00
Field Fortifications	200,000 00
Side Wheel Steamers	1,200,000 00
Arms and Ordnance	10,000,000 00
Fortifications, contingent	105,000 00
Naval, additional	20,360,000 00
Exhibition of Industry	2,000 00
Arming loyalists in disloyal States	2,000,000 00
Armed ships, etc.	1,500,000 00
For additional loan	100,000 00
Miscellaneous, about	4,000,000 00
	$266,103,296 00

Interest and Dividends.

A semi-annual dividend of 3½ per cent. has been declared on the capital stock of the Pennsylvania Coal Company, payable in New York, on and after the 15th inst. The transfer books will be closed from the 9th to the 16th inst., both inclusive.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics*."

American Railroad Journal.

Saturday, August 10, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The market the past week has been steady, with some improvement toward the close. The most important change has been in the bonds of the Southern States, in which there has been considerable advance. There is a better state of feeling owing to the action of Government in the passage of its financial bills, the more important of which is the loan bill, which provides for an issue of bonds and treasury notes to the amount of $250,000,000, the main features of which are as follows.—The loan may be issued in 6 per cent. Coupon and Registered Bonds irredeemable for 20 years and payable thereafter at the pleasure of the Government; or it may be issued in Treasury notes, of denominations not less than $50, the same to bear interest at the rate of 7 3-10 per cent., payable in three years, and convertible at any time (but in sums of not less than $500), into the six per cent. bonds aforesaid. The bill also provides for the issue of treasury notes of less denomination than $50, but not lower than $5, payable either on demand or in one year. Those on demand carry no interest, and are payable at the assistant treasury offices in Boston, New York, Philadelphia, Cincinnati, and St. Louis, and are receivable in the payment of government dues. The bond of this class—that is, of a denomination less than $50, payable in one year, bear an interest of 3.65 per cent., and are payable at the offices of the Assistant Treasury in Boston, New York, and Philadelphia, and may be converted (in sums of not less than $100), into bonds bearing 7 3-10 per cent. interest—the amount of bonds of a denomination not less than $50 not to exceed in the whole $50,000,000.

A supplemental bill in effect repeals the subtreasury act of 1846. The repealing clause is as follows:

"The Secretary of the Treasury to deposit any of the moneys obtained on any of the loans now authorized by law, to the credit of the Treasurer of the United States, in such solvent specie-paying banks as he may select, and the said moneys so deposited may be withdrawn from deposit for deposit with the regularly authorized depositaries, or for the payment of public dues, or paid in redemption of the notes authorized to be issued under this act, payable on demand, as may seem expedient to, or be directed by, the Secretary of the Treasury."

The Government also proposes two other revenue bills—one a direct tax of $20,000,000 appended on all the States as follows:

APPORTIONMENT.

Maine	$420,826	Indiana	$904,875
N. Hampshire	218,406	Illinois	1,146,551
Vermont	211,068	Missouri	761,127
Massachusetts	824,851	Kansas	71,743
Rhode Island	116,963	Arkansas	261,838
Connecticut	308,214	Michigad	501,763
New York	2,603,918	Florida	77,522
New Jersey	450,134	Texas	355 106
Pennsylvania	1,946,719	Iowa	452,088
Delaware	74,681	Wisconsin	519,688
Maryland	436,823	California	254,538
Virginia	937,550	Minnesota	108,524
N. Carolina	576,194	Oregon	35,140
S. Carolina	363,570	New Mexico	62,648
Georgia	584,367	Utah	26,982
Alabama	529,313	Washington	7,755
Mississippi	413,084	Nebraska	19,321
Louisiana	385,886	Nevada	4,592
Ohio	1,567,089	Colorado	22,905
Kentucky	713,695	Dakotah	3,241
Tennessee	669,498	Dist. Colum'a	49,437

The other bill provides for an income tax of 3 per cent. upon all incomes exceeding $800 annually, both of individuals and corporations.

Racine and Mississippi Railroad.

The second year of the operations of this road in the hands of trustees for the first mortgage bondholders ended May 10th, 1861. We have received the report of the General Manager, Superintendent and Secretary, giving a detailed account of the operations of the road during that year. In the balance sheet and relative accounts, and explanatory notes appended to the report, are exhibited the receipts and disbursements, which, in connection with the tabular statements of freight and passengers, show the character of the year's business, the amount of surplus earnings over operating cost, and the application of the money received. The leading particulars regarding the condition of the road, the rolling stock, and the property generally, are also given. The earnings of the road during the year were:

From passengers		$49.087 53
" freight		165,738 26
" mail, rents and telegraph		6,024 25
		$220,850 04
And the expenses were:		
Repairs of road	$21,429 02	
" equipment	11,166 88	
" cars	12,403 70	
" bridges, etc	2,805 78	
Fuel	18,343 16	
Oil and waste	3,261 11	
Damages to persons	12,889 62	
Station service	20,474 83	
Conductors, engine'n, etc.	24,665 68	
Taxes	4,144 22	
All other expenses	20,127 48	
		152,411 48
Net earnings		$68,438 56
Compared with the previous year, the gross earnings show an increase of		$53,934 01
With an increase in expenses of		20.621 34
Making the net gain		$33,312 67

Deducting extraordinary charges to operating

account, such as damages to persons, by accident, depreciation in currency, etc., amounting in the aggregate to $15,546 47, the additional outlay for operating the road over the previous year will be only $5,074 87, and the actual increase in net receipts $18,849 14. The percentage of operating expenses was 69; deducting extraordinary expenses, 61.9—the previous year it was 78.9. The Superintendent in his report, says:

The year shows a very marked improvement in both the amount of business and the net results. The expenses still come to a very heavy per centage of the gross earnings, in consequence of the limited receipts in proportion to each mile of road operated. The passenger business is run all the year round at an expense which would not be perceptibly increased were the number of passengers carried increased ten times. The freight business is also conducted for a large proportion of the year, with a great surplus of power. In these facts we have good assurance of a satisfactory growth of value in the property in the future, as the increase of expenses will be but a nominal per centage of the increased receipts.

Nearly the whole amount of the net receipts of the past year were taken in the three months dating from the 15th August, after harvest, to the middle of November, when navigation closed. After deducting the extraordinary charges before alluded to, the operating account of these months stands as follows:

	Gross receipts.	Operating.	Net receipts.
August, 1860.	$23,790 06	$13,097 97	$10,692 09
Sept., 1860...	42,276 75	15,091 69	27,185 06
Oct., 1860...	38,996 77	13,862 85	25,133 92
Nov., 1860...	20,121 37	12,397 62	7,723 75
	$125,184 95	$54,450 13	$70,734 82
Year 1861..	220,850 04	136,865 01	83,085 03
Remain'g 8 m.	$95,665 09	$82,414 88	$13,350 21

During the four months, August to November inclusive, the operating was only 43.5 per cent. of gross earnings, and for the two months of September and October, operating was reduced to 35.6 per cent. of earnings. In ordinary years the earnings in September and October would have been much increased by westward bound lumber, but owing to the dry weather during the Spring and Summer of 1860, the manufacturers of lumber were unable to get logs to their mills, and our Racine dealers were consequently out of the market as freighters. Our earnings for these two months were therefore made up almost entirely of Eastward bound freight. With a conjunction of a good harvest and a plentiful supply of lumber, the road could be operated for a still smaller per centage of gross earnings during these months. With an independent route to the Mississippi River, our traffic will show less variation in the monthly statements of the per centage of operating to gross earnings, while the increased business we expect from the extension to the River will tell favorably on the annual average.

The road bed has been maintained in good order. The total ballasting for the year has been 10,135 cubic yards. The ties, which on many sections were originally of the poorest description, already show symptoms of speedy decay. Upward of 6,000 ties have been purchased, and 5,000 contracted for. In the Spring of '62, 20,000 more will be required. During the year 1,740 yards of new **T** rail have been laid. The quantity of new rails on hand is sufficient to meet the requirements of the ensuing year. The repairs of bridges have kept pace with the deterioration. Two station houses have been built; others have been altered and repaired. All are now in good order.

The company have 7 passenger, 13 mail and baggage, and 308 freight cars. Miles run by passenger trains, 97,254; by freight trains, 125,218; other trains, 5,755—total 228,627—an increase over the previous year of 34,101 miles. Passengers carried, 66,482; last year, 59,028.

TRUSTEES ACCOUNT, May 10, 1860, to May 10, 1861.

BALANCE.

	Dr.
Advance on net income	$281,071 69
Supplies	29,044 15
" of fuel	14,735 69
" of oil and waste	325 00
Suspense	1,765 99
Open accounts receivable	8,849 42
Cash	3,567 83
	$339,359 77
	Cr.
Farmers' Loan & Trust Co	$314,022 58

Legal expenses	3,941 27
Expense account	224 18
	$350,130 16
	Cr.
By operating account	$68,438 56
Exchange	362 85
Interest and discount	257 06
Balance	281,071 69
	$350,130 16

The office is at Racine, Wisconsin. The officers are:

General Manager—G. A. THOMSON.
Superintendent—MATT. TAYLOR.
Secretary—JAMES C. HILL.

Central Railroad of New Jersey.

The receipts from operations of this road for the six months ending June 30, 1860 and 1861, were as follows:

	1861.	1860.
From passengers, merchandise, mails, etc.	$291,870 30	$280,661 08
From coal	270,624 66	288,175 95
Total	$562,494 96	$568,837 03
Expenses	240,517 32	225,656 06
Net earnings	$321,977 64	$343,480 97

The above shows a decrease in receipts from the transportation of coal of $17,551 29
An increase from passengers, merchandise, etc., of 11,209 22
Making the decrease in gross receipts $6,342 07
With an increase in expenses of 15,161 26
Making the decrease in net receipts $21,503 33

	1861.	1860.
Lackawanna coal tonnage for 6 months	283,717	274,258
Lehigh do. do.	114,449	132,234
Total	398,166	406,492

CONDENSED BALANCE SHEET.

Railroad, 64 miles, (48 being double track)	$4,492,712 93
Land and wharves at Elizabethport	290,791 80
Station houses, shops, etc	131,846 42
Engines and cars	506,121 18
Ferry interest and boats	246,650 00
Property accounts	157,222 73
Cash balances, etc. $221,728 59	
Less accounts payable . 113,459 15	
	108,269 44
Total	$5,931,614 50
Capital stock	$3,630,000 00
Bonds, 1st mortgage $1,400,000	
" 2nd " 600,000	
	2,000,000 00
Interest fund; interest accrued not yet payable	47,833 33
Dividend No. 25, payable July 15th	90,750 00
Renewal fund, balance to credit	92,174 05
Net earnings $321,977 64	
Less interest account $69,620 82	
Less divid'ds. 181,500 00	
	251,120 52
	70,857 12
Total	$5,931,614 50

The net earnings of the six months are thus shown to be $321,977 64, being a decrease of $21,503 33 on those of the corresponding six months of 1860. This is a very favorable result for a time of war and panic. After deducting the balance of the interest account and two quarterly dividends of 2½ per cent. each, there remains a surplus of profits of $70,857 12. This appears in the balance sheet represented as follows:

Grading, masonry, land, etc., at High Bridge	$11,816 14
Bergen Point wharf	3,497 82
New equipment	16,621 18
Increase, in iron, cross ties, materials, etc., on hand	15,277 26
Increase in cash and cash items	23,644 71
Total	$70,857 12

The grading &c., at High Bridge will be charged off at the close of the year.

(From the Journal of the Franklin Institute.)

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations. By M. CEZANNE, Engineer des Ponts et Chaussees. Translated by J. BENNETT.

(Continued from p. 548.)

PART THIED.

Tabular Piers.—The general arrangement of a pier with two cylindrical columns and two square bodies is caused for the Theiss bridge by the necessities of construction, as shown by the drawings; but the choice of materials for the columns, their diameter, their distance apart, their setting up, the height of the separate pieces, the thickness of their sides, the arrangement of the joints, the interior filling, the external defences and modes of execution, are subjects which we propose to describe generally, and in the order specified.

Choice of Materials.—Cast iron was preferred to wrought iron for the cylindrical columns, because they were supposed to be less exposed to heat, and easier managed; still it had its inconveniences: at the bridge of Macon a cast iron column was broken by the shock of a boat; a cold snap in contracting the column upon the interior mass of masonry might cleave the metal. This inconvenience was avoided by forming the part of the column above the summer level in wrought iron segments, riveted to each other by means of exterior angle-irons, so that a broken or rusted segment might be replaced. Wrought iron was adopted for the square bodies, because it was better adapted than cast iron to the square forms and to the connexions with the arches.

Diameter of Tubes.—By increasing the diameter of the columns, the pressure upon the base would be diminished; but the volume of filling would be increased, and the difficulties of manufacture, and especially the sinking of the columns.

An attempt was made to procure at Szegedin the cylindrical drums in one piece, and the diameter of 9.84 ft. was chosen as the greatest made till that time, and because these pieces were to come from Scotland a special provision must be made for their transportation.

With these dimensions, the pressure uniformly

spread upon the base was 104 pounds per square inch under the proof trial.

This pressure was raised to 199 pounds for that of the tubes of the Quarantaine bridge at Lyons, which bore the two middle girders.

The English have sunk columns of a greater diameter than 9.84 ft.

The barrels were formed of segments bolted to each other.

Below 6.56 feet, the work of the minor was difficult for want of space.

Distance apart of the two adjoining Columns.—3.28 feet was the least distance adopted between the two columns of the same pier, after a consultation with the English engineer having a personal experience of tubular foundations, and, during the construction, it was a matter of regret that a greater distance had not been chosen. A displacement of one column has occurred during the operations upon the adjoining one.

The Setting of the Columns.—In the sinking of the columns, regard was had rather to the possible undermining s than to the nature of the soil, whichcontinued the same for a great depth. A mean sinking of 19.68 ft. would have been sufficient; a greater depth was adopted for security, and they were usually stopped at about 65.6 ft. below high water, so that they should not be exposed to a pressure of three atmospheres, beyond which the work was very painful to the men.

Height of Barrels.—The height of a column being determined, it remained to decide upon that of the different barrels.

It was for the interest of the work to increase the height to lessen the number of joints; but the founder and transportation agent insisted upon manageable dimensions; 5.95 ft. was adopted.

These drums weigh 12,100 pounds. They were obliged to appropriate for their transportation between Scotland and Germany a special steamboat, and to establish at the point of their arrival at Harbourg, on the Elbe, some fixtures for their removal.

Thickness of the Cylindrical Sides.—When the cast iron columns are only exposed to vertical pressures, calculation indicates that a slight thickness only is needed for the support of the entire bridge; but the founders refused to cast pieces of a thickness too small for the diameter. For this reason, at the bridge over the Great Pee-Dee in America, the engineer was led to the adoption of 1.96 ins. thickness for tubes of 5.97 feet diameter, answering to a resistance 650 times greater than was required.

For the Theiss bridge, it was admitted to be difficult to make regularly tubes of 9.84 ft. diameter with a less thickness than 1.18 ins.

Moreover, it was admitted from experiments made in England at the Viaduct of Tarascon, that cast iron might be subjected to a permanent transverse load equal to $\frac{1}{4}$th of that of rupture, say 6,285 lbs. per square inch, for the castings required in this case.

The thickness 1.37 ins. was calculated in regard to this maximum, by considering the column as supported at its two ends, loaded upon its head with the weight Y, and acted upon transversely at the height of the springing by the difference X between the horizontal thrusts of the arches which it bore.

The dispositions of the final plan furnished the following data, in the most unfavorable case for the stability of the pier, or that in which one of the two adjacent bays is charged with 5,365 lbs. per running foot, while the other is free.

We have for a single column: Y=367,400 lbs.
X=360,800 "

a, the distance between the point of application of the force X and the head of the column, where the top stringers of the arches are made fast to the column, equal to 18.93 ft.

b, the remainder of the height of the column to the head of the interior piles, equal to 65.37 feet.

		lbs.
R,	the work relative to X per square inch.	5,657
Q,	" " Y " .	728
R+Q	" " compression	6,385
R—Q	" " tension	4,929

The value R — Q is the maximum of efforts of tension produced by the trial loads; it is much less in practice since the usual loads over the road are much below that of the trial proof; because only one track is loaded at a time, and the struttings of the arches and the connexions with the square bodies tend to distribute between the two tubes the reactions of the arches.

In the conditions of the contract the proportions of the castings were not determined, but it was required that bars of prescribed dimensions should be cast at each tapping and subjected to direct experiments.

Experiments were made in this way upon 442 bars in breaking them by a transverse loading,—they had a section of 1.57 ins. by 1.3 ins.; their mean resistance was 30 k. 4 per square millimetre or 43,428 lbs. per square inch.

The maximum was 52,285 lbs.; the minimum, 29,000 lbs., occasioned by a fault in the casting at the point of fracture.

The resistance required by the contract was 37,143 lbs.

Upon the testing of the bridge, the most favorable case for the stability of the piers was chosen by loading each span with 5,365 lbs. per running foot, all the other spans being free, and the following laws were observed.

All the piers deflected at the level of the springing lines in separating from the loaded span.

The two piers next the loaded span as a mean deflected 0.157 in.; the two piers at the distance of one span deflected 0.059 in,; these deflections diminished rapidly with their distance from the loaded span; they were sensible, though they could not be measured from one extremity to the other of the bridge.

The depressions at the summit of the spans, which were but 0.472 in. when all the bridge was loaded, attained 1.18 ins. for the single loaded span, which is explained by the increase of the cord; the two adjacent spans rose from 0.196 to 0.236 in.; the following to .078 in. at most; further on no motion was detected.

The usual locomotive trains were passed over the two tracks with great speed, either side by side, or in opposite directions: this trial did not give any maximum for the deflections of the trusses or that of the piers.

Arrangement of the Joints.—The method of jointage is shown in Pl. I., Fig. 3, where we see the bearing or turned surface upon which the two barrels are brought in contact, the jointing which prevents their sliding, the bands or flanches which receive the one the head, the other the nut, of a bolt, which fastens them, and the ribs or brackets which unite the flanch with the cylindrical part. A tight joint is made by iron filings cement tamped with a graver between the two flanches. The ribs are badly contrived, at least under the flanch, which at the foundry is placed at the upper part of the mould; they form there recesses in which the gas bubbles lodge, thus producing blisters. It would be advisable to suppress the ribs, to increase the thickness of the flanches, and the radius of the roundings of the jointage.

The cement was composed as follows:

Iron filings.....	1,000	parts in weight.
Sal almoniac	10	"
Flowers of sulphur.....	2	"
Water for dissolving the salt.		

This mixture would set in two days during the summer, in eight days during the winter; it was then worked with the file and smoothed, but became impaired in moist air.

For the iron filings cement, was substituted at the bridge of Bordeaux an india-rubber cord let into a groove, simplifying the joint, and economizing in time and manœuvring.

The two adjoining flanches of the Theiss bridge were fastened by 48 bolts, 1.97 ins. diameter, which would bemuch too strong were these columns but to bear the simple weight of the bridge, and these bolts designed but to fasten the joint; whereas, these columns had to resist transverse thrusts, and accordingly it became necessary to fortify the the joints at much as possible. The most exposed, that of the square body with the cast iron capital, was secured with 72 bolts.

Calculation applied to the joints of the circular barrels, gives for the maximum load per square inch of strain of bolt 6,528 lbs., or even 16,025 lbs., according as we suppose the neutral axis to be at the centre of the circular joint, or at the circumference.*

We should reduce the number of bolts to the strict necessity of the case, to simplify the jointage, and to facilitate the tamping of the mortar, and 8, 12, or 16 bolts of 1.18 ins. will generally be sufficient.

(To be continued.)

Stevens' Steam Battery.

The veil of secresy having been removed from this famous structure at Hoboken, we availed ourselves of an opportunity which was afforded us a day or two since, of viewing its massive proportions.

The spectator is impressed at first glance with the magnitude of the work, and the amount already accomplished; for here is an iron steamer which, in point of size, will compare favorably with the largest steam-batteries yet completed in Europe. Some of her principal dimensions are as follows, contrasted with the two most noted English iron-plated steamers:

	Length.	Beam.	Depth.
Stevens Battery.....	420	58	20
Warrior	256.6	55	27.6
Black Prince	380	58	41

The keel of Stevens' Battery was laid in 1854, and the work has been prosecuted under different appropriations by Congress until the expenditure has reached upward of half a million of dollars. The hull is now carried up to the main deck, where the armament will be placed, and all the furnaces and boilers are in their places, with the greater part of the machinery and shafting. The weight of the metal thus brought together exceeds 4,000,000 pounds, the cost per pound ranging from twenty-five to fifty cents.

As may be easily conceived from this general statement, the Battery presents a ponderous aspect, yet it is far from seeming unwieldly. In model and external appearance generally, saving the peculiarity of material, it bears a close resemblance to a fast North river steamer, the bow being exceedingly sharp, and the sides (in the present stage of the work) rising in the usual manner. But in attaching the sheathing of iron plates, the external configuration will be essentially changed. A primary idea in the construction of every part is to present an oblique surface to projectiles, that they may glance off without injury.

The sides, therefore, will look something like the upper section of a pyramid—the furthest projection being sustained by three feet and six inches of solid oak, while the plates recede from this point at an angle of thirty degrees. The armament will be protected in like manner, by ball-proof "loading houses," or casemates. This last feature is an entire novelty, and one in which the inventor took peculiar satisfaction. The "loading-houses" are designed to give effectual protection to the gunners, so that not an individual employed in working the ordnance will be exposed to casualty. They are but four in number, as the armament now proposed will consist of only eight guns—four 15-inch and four 10-inch or 12-inch rifled cannon—the muzzles of every pair sweeping round to their apertures in the adjacent casemate. As the guns are on stationary swivels, no provision is made for recoil, except that cushions of gum are placed behind the trunions. Whether these will prove adequate may admit of doubt, though we are informed that experiments to determine this question proved satisfactory.

On descending through the net work of iron beams and columns which sustain the decks and bind together the whole fabric, the eye is immedi-

* The neutral axis is in reality between these two positions; it may be found by rigorous calculation, but we are let into transcendental equations, whose solution is laborious.

ately attracted by the long range of boilers, ten in number, arranged in juxtaposition on either side, together occupying a space 72 feet in length, nearly amidships. The separating them constitutes the fire room, on which 30 furnaces will open their blazing mouths, apparently threatening those who may be employed there with speedy extinction; but as will be afterwards explained a thorough system of ventilation is provided, through the intervention of appropriate machinery. Beyond this massive accumulation of material are eight driving engines, connected with two propelling shafts, each 190 feet in length, and exerting a power equal to that of 3,600 horses. These engines are arranged with the greatest compactness possible, giving the appearance of more complication than actually exists. The mechanism upon cursory examination, appears to be of skillful workmanship, and being wholly submerged, is supposed to be secure from the fire of any antagonist. Besides these are eight other engines for minor purposes, two of which are in the bow, for blowing the furnaces and ventilating.

The propellers, it should have been remarked above, have a diameter of nineteen feet. None of the work has deteriorated from exposure to the weather, as men are constantly employed in taking all needed precaution.

Now that Congress is deliberating upon the expediency of constructing steam batteries for the navy, the question has a direct bearing upon the completion of the work already so far advanced at Hoboken. This battery cannot be finished at a less cost than $1,312,000, according to the estimates carefully prepared by government officers; yet there is reason to believe that it may prove as efficient as any constructed by European powers. Even if no reference is had to domestic troubles, there is a prevalent impression that our foreign relations are precarious. In case of a rupture with any leading naval power, a floating steam battery of great speed and destructiveness would be an invaluable adjunct to our coast defences.

In some respects Stevens' Battery is likely to prove a match for anything which could be pitted against it. She is all iron, invulnerable in every part, and has the intervening layer of wood, which gives a more rigid and impenetrable basis to the plate; she is also safer than wooden vessels, from the facility with which iron plate compartments are used; and finally, iron gives more stability to the working of the screw.—*N. Y. Journal of Commerce.*

Androscoggin and Kennebec Railroad.

This company was chartered on the 28th of May, 1845. The construction of the road was commenced in July, 1847. The first division from Danville Junction to Winthrop, 20 miles, was opened July 3, 1849; and the second, from Winthrop to Waterville, 35 miles, November 27, 1849. The total length of the road from Danville Junction (Atlantic and St. Lawrence Railroad) to Waterville being 55 miles.

FUNDED DEBT—$1,748,857: described as follows:

One million 6 per cent. loan bonds, $468,600—issued in 1850, '51, '52, '53 and '54, and payable, principal in 10 years, and coupons semi-annually at Waterville or Portland. Balance of original issue exchanged into the $1,100,000 loan.

Six per cent. $1,100,000 loan bonds, $536,100—issued in 1860, and payable principal in 30 years, and coupons semi-annually as above. These bonds were issued for the purpose of taking up the $1,000,000 bonds on maturity and paying off the floating debt.

Stock bonds 6 per cent., $710,000—issued in 1853 and 1856, and payable, principal in 10 years, and interest semi-annually 1st June and 1st Dec., at Waterville or Portland. Convertible into stock on maturity.

Old 1st mortgage bonds, 6 per cent. (payable on call) $29,597. Interest bonds, $4,100; and furniture bonds, $500, due.

FLOATING DEBT, $138,816 95, viz: bills payable and accounts, $130,256 95; stock coupons $6,740; and sundry accounts, payable in stock, $1,820.

On the 30th November, 1856, this company took a lease of the Penobscot and Kennebec Railroad (Waterville to Bangor, 55 miles) for a period of 20 years, agreeing to operate and maintain the same during the continuance of the lease, and to pay to the latter company three-sevenths of the net profits of the joint business.

The two roads conjointly have a length of 110 miles, and an equipment of 13 locomotives, 20 passenger cars, and 228 cars for merchandise, etc.

The operations of the united line for the years ending May 31, 1860 and 1861, was as follows:

EARNINGS.

	1860.	1861.
From passengers	$145,784 88	$151,191 06
" merchandise	140,987 86	151,908 22
" mail, express, etc.	15,458 10	15,406 12
	$302,230 84	$318,505 40

EXPENSES.

	1860.	1861.
Repairs of track	$42,609 08	$52,577 57
" equipment	21,573 26	25,883 59
" buildings, etc.	6,427 10	8,900 02
Train expenses	12,588 00	15,314 28
Station expenses	13,879 99	17,123 50
Fuel	18,454 69	17,678 51
Oil and Waste	3,420 19	3,252 33
General management	6,520 38	7,586 04
Miscellaneous	4,865 62	5,435 71
	$130,378 41	$153,851 54

NET EARNINGS.

	1860.	1861.
And. & Ken. R. R. Co.	$98,201 39	$94,087 92
Pen. & Ken. R. R. Co	73,671 04	70,565 94
	$171,852 43	$164,653 86

Since the execution of the lease, the net income of the joint business has been $717,593, divided as follows:

	Total net income.	Proportion due A. & K. RR.	Proport. due P. &K.RR.
1857 (6 months)	$77,103	$43,933	$33,170
1858	145,894	82,368	63,526
1859	157,090	89,766	67,324
1860	171,852	98,201	73,651
1861	164,654	94,088	70,566

The joint cost, earnings, expenses, etc., since 1857 have been:

	Cost of road.	Gross earnings.	Operating expenses.	Earnings less exp's.
1857	$3,967,063	$332,310	$150,373	$171,937
1858	3,996,331	379,149	133,255	145,894
1859	4,004,394	281,929	124,839	157,090
1860	4,004,394	302,231	130,378	171,852
1861	3,004,394	318,505	153,851	164,654

The assets and liabilities of the company June 1, 1860 and 1861, are as follows:

LIABILITIES.

	1860.	1861.
Bills payable and acc'ts.	$125,977.84	$135,333.11
Over-due bonds:—		
Furniture bonds	500.00	500.00
Bonds of $200,000 and $350,000 loan	29,557.00	29,557.00
Interest bonds	8,300.00	4,100.00
Interest	3,129.00	1,067.94
	$167,463.84	$171,558.05

ASSETS.

Million loan bonds unsold	$15,000.00	$15,000.00
Bills receivable	3,261.87	3,231.62
Accounts	21,088.19	18,729.61
Wood on hand	20,743.09	23,750.93
Materials on hand	11,544.70	11,800.67
P. & K. R. R. stock	21,924.79	21,924.79
Cash	10,945.40	5,613.64
	$104,508.04	$100,051.26

Although the net earnings belonging to this company are $4,113 47 less in 1861, than in 1860, they are still in excess of those of any previous year with the exception of 1856—the increase over 1859 being $4,232 18; over 1858 $8,435 65; and over 1857, $19,570 92. The report says:

Your board, notwithstanding the failure of the road to earn net enough to pay the interest on all its debts, have nevertheless continued to pay all—hoping that they may, by increase of business in the future, be able to carry the floating debt until July, 1868, when $431,800 of the stock bonds become due, and are then convertible into the stock of the company, and the interest payable on them

will cease. The balance of the stock bonds will fall due principally in 1864, when the road will, if the plans of the company are successful, be encumbered by only one mortgage, and that to secure one class of bonds only, to wit: those of the eleven hundred thousand dollar loan, running thirty years.

The office of the company is at Waterville, Maine. The officers are:

President—JOHN WARE.
Treasurer—JOSHUA NYE.
Superintendent—EDWIN NOYES.

Railroad Earnings.

The Macon and Western Railroad June earnings were:

Passengers	$7,627 60
Mail	838 50
Freight	13,730 59
Total	$22,196 99
June, 1860	25,359 96
Decrease	$3,162 97

The receipts of the Grand Trunk Railway of Canada for the week ending July 27th, 1861, were $70,428 78
Corresponding week, 1860 54,471 99
Increase $15,956 79
Tot. traffic from July 1, 1861, to date $244,504 95
Corresponding period, 1860 212,379 63
Increase $32,125 32

The statement of the Illinois Central Railroad for July is as follows:

Land Department.

Acres Construction Lands sold	4,377.43	for	$61,879 62
Acres Interest Fund L'ds sold	396.97	"	7,294 09
Acres Free Lands sold	1,167.16	"	14,909 14
Total sales during the month	5,941.56	for	$84,082 85
To which add Town Lot sales			238 50
Total of all			$84,321 35
Acres land sold since Jan'y 1, 1861	67,878.39	for	$1,046,683 76
Acres sold prev'sly (net sales)	1,260,273.46	for	16,147,983 91
Total	1,328,151.85	for	17,194,667 67

Total cash receipts in July, 1861 $34,786 77
Total receipts since Jan. 1, 1861 362,921 06
Total cash and bonds received to July 31, 1861 4,558,319 08

Traffic Department.

Receipts from Passengers	$49,764 00
" Freight	106,622 45
" Mails	6,358 33
" Rent of road	5,033 33
" Other sources	2,421 95
Total receipts for July, 1861	$170,200 06
Do. do. 1860	193,930 76
Total receipts since Jan'y 1, 1861	$1,606,117 02
Total receipts in corresponding period of 1860	1,366,815 77

Original land grant, 2,595,000 acres; railway, 706 miles of main track, and 93 miles of sidings, 113 engines, 2,456 cars. Funded debt, $15,559,240.

	Traffic.	Working Expenses.	Excess of Traffic.
1856	$2,434,878.59	$1,444,546.19	$990,332.40
1857	2,293,964.57	1,791,231.14	502,733.43
1858	1,976,578.52	1,419,954.80	556,623.72
1859	2,114,448.98	1,489,579.52	624,869.46
1860	2,721,590.94	1,693,403.30	1,028,187.64

The traffic of July, it will be seen, shows a decrease of $23,700 mostly due to the closing of Cairo as a shipping point to the South.

The traffic of the Great Western Railway of Canada for the week ending July 26, 1861, was as follows:

Passenger	$16,475 92
Freight and live stock	12,037 93
Mails and sundries	1,327 07
Total	$29,840 97
Corresponding week of last year	28,688 23
Increase	$1,157 74

The following are the earnings of the Great Western Railway of Canada for the week ending August 2, 1861:

Passengers	$14,738 98
Freight and live stock	11,858 86
Mails and sundries	1,295 45
Total	$27,393 29
Corresponding week of last year	28,625 24
Decrease in 1861	$1,281 95

The earnings of the Michigan Central Railroad for July, 1861, were $123,377 30
July, 1860 128,383 28
Decreaso $5,005 98

United States Census.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 30, 1861.

THE MORTGAGE BONDS ISSUED BY THE Rochester, Lockport and Niagara Falls Railroad Company, dated August 1, 1851, and due August 1, 1861, assumed by this Company under the Consolidation Agreement, will be paid at maturity upon the presentation and surrender of the Bonds at the Bank of Commerce in New York.

JOHN V. L. PRUYN,
31 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 24, 1861.

THE Transfer Books of this Company will be closed at the close of business on Wednesday, the 31st day of July instant, and will be re-opened on the morning of Friday, the twenty-third day of August next.

JOHN V. L. PRUYN,
4t30 Treasurer *pro tem.*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address HENRY RUTTAN,
Coburg, Canada.

SPECIAL NOTICE. Transfer of LETTERS PATENT.

WHEREAS Letters Patent, bearing date Nov. 1st, 1853, were granted by the Government of the United States to George Williston, of Brunswick, County of Cumberland, and State of Maine, for a Machine to straighten and curve Railroad Iron, giving and granting to said George Williston, his heirs, executors and assigns, for the terms of fourteen years from the date of said Letters Patent, the full and exclusive right and liberty of making, using and vending to others to be used, the said Machine, and whereas said George Williston sold and transferred one undivided half of his entire interest in said Letters Patent, to Wm. H. Lunt, of Bowdoinham, County of Lincoln and State of Maine, as will appear by reference to deed, date Nov. 2, 1853, recorded in the Patent Office at Washington, Nov. 9, 1853, and whereas the said George Williston and Wm. H. Lunt, have on this 31st day of May, 1861, sold and transferred their entire interest in said Letters Patent, to Albert Bridges and Joel C. Lane, Merchants in the City of New York, doing business under the name and firm of A. BRIDGES & CO.,—THEREFORE, we, the undersigned, hereby notify and warn all persons, against manufacturing, vending or purchasing said Machines from any person or persons whatever, except from us who have and hold the exclusive right thereto.

New York, Saturday, August 17, 1861.

Concord Railroad.

This company was chartered June 27, 1835. The construction of the road was commenced in 1841. It was opened for public use from Nashua to Manchester, July 1, 1842; to Hooksett, July 26, 1842; and to Concord, Sept. 7, 1842—total length of line, 34.53 miles. The laying of a second track was commenced in 1846, and completed in 1848. In November, 1856, a contract was entered into between this company and the Manchester and Lawrence Railroad Company, to continue for five years from December 1, 1856, whereby the former undertook to operate and maintain the road of the latter, and also the Methuen Branch (extending from the city of Lawrence to the boundary line of New Hampshire, leased to and forming a portion of the line of the Manchester and Lawrence, which lease was transferred to the Concord Company), and to divide the net profits of the entire business in proportion to their respective capitals—that of the Concord Railroad Company being established at $1,500,000; the Manchester and Lawrence, $1,000,000; and the Methuen Branch, $110,000—in all $2,610,000. The length of the Manchester and Lawrence, including the Methuen Branch, is 26.47 miles. The length of the united line is 61 miles.

On the 11th of September, 1858, the Concord Company, with the concurrence of the Manchester and Lawrence Company, took a lease of the Concord and Portsmouth railroad for a period of five years, agreeing to maintain and operate the same, and to pay an annual rent of $15,500, and to expend the further sum of $2,500 annually in permanent repairs.

The receipts of the joint line for the year ending March 31, 1861, was as follows:

From passengers		$175,144 42
" freight		290,376 33
" express, mails, rents & interest		19,880 65
Concord and Portsmouth net receipts		12,081 24
Total gross receipts		$497,482 64
The expenses were:		
Repairs of road	$44,331 25	
" engines	23,583 10	
" cars	30,717 73	
" buildings, bridges, etc.	15,885 72	
Wood	50,345 71	
Oil and waste	4,959 17	
Insurance and taxes	4,421 18	
All other expenses	59,343 54	
		233,587 40
Earnings less expenses		$263,895 24
From which there has been paid—		
Taxes on capital stock	$14,274 67	
Rent of Methuen Branch.	8,800 00	
New passenger depot.	10,000 00	
Manchester and Lawrence Railroad, 2-5ths	92,328 00	
		125,402 67
Net earnings of Concord Railroad		$138,492 57
Two dividends of 4 per cent. each		120,000 00
Leaving a balance of		$18,492 34
Contingent fund as per last report		70,635 12
Received on interest account		648 48
		$89,775 94
From which deduct year's proportion for liquidation of contract with Passumpsic road		6,000 00
Making the present amount of contingent and deteriorating account of the Concord road		$83,775 94

The track, road-bed, engines, cars, depots, etc. have been kept in thorough repair. The woodwork of 24 freight cars has been renewed. A new locomotive and 11 new freight cars, including wheels and axles, have been added. 1,691 rails have been re-rolled, and 5,921 welded anew at the ends and replaced, and 30,000 sleepers have been laid.

The entire tonnage of the Concord, Manchester and Lawrence road, on its own road, and in connection with the upper and lower roads, has been 309,504 tons, equal to 9,930,109 tons barried one mile. The total number of passengers carried in the cars has been 220,918—equal to 5,624,112 passengers carried one mile, or 92,198 over the whole length of the road. Miles run by passenger trains, 152,710; by freight trains, 199,857; by other trains, 10,123—total miles run, 362,690. The report says:

Our present contract with the Manchester and Lawrence Railroad, which expires on the first of December next, has been extended, by a business connection, ensuring substantially the same results with the present contract, and is to continue twenty years. This contract has been submitted to the stockholders of both roads, and has received their approbation. Our other connections remain, for the most part, as before.

The road is every way well equipped, and in order for the prompt and efficient transaction of business. The difficulties of the times have affected us less thus far than we had anticipated, and we feel much confidence in the prosperity of the road for the coming year. Should its business interests be affected injuriously, we believe the income of the road will compare favorably with that of other roads, and with the value realized from other investments.

BALANCE SHEET, April 24, 1861.

	Dr.
Construction	$1,500,000 00
Notes receivable	215 00
Telegraph stock	2,350 00

The operations of 1843, are from Sept. 30, 1842, to April 30, 1843. Of 1852, from May 1, 1851, to March 31, 1852.

The stock on hand in repair shops, March 31, 1861, amounted to $36,541 64; for repairs of road, $19,358 67; wood, $26.698 86; oil and waste, $202 79—total, $78,801 96.

The office of this company is at Concord, N. H. The directors are:

President—N. G. UPHAM.

Directors—N. G. Upham, Isaac Spaulding, Josiah Stickney, Charles H. Peaslee, Uriel Crocker, F. C. Manning, J. S. Kidder.

Treasurer—N. P. LOVERING.

Superintendent—J. A. GILMORE.

Virginia and Tennessee Railroad,

The Virginia (originally "Lynchburg") and Tennessee Railroad Company was chartered on the 24th March, 1848, with a capital of $3,000,000, and authorized to construct a railroad from Lynchburg, through the south-western part of Virginia, to the Tennessee line. The name of the company was changed to that it now bears by an act passed on the 6th March, 1849. By the same act the State was authorized to subscribe to the capital stock in the proportion of 18 shares for every 15 shares subscribed by others. This proportion was altered by a subsequent act, passed on the 20th February, 1851, to three-fifths of the whole capital.

The company was organized on the 19th August, 1848. Construction was begun at Lynchburg on the 16th January, 1850, and the road completed and opened for traffic in September, 1851, to Goode's Station, a distance of 15 miles. On the 30th March, 1852, it was opened to Liberty, 25 miles; on the 4th July to Buford's, 37 miles; on the 25th September to Bonsack's, 47 miles; on the 1st November to Big Lick, 53 miles, and on the 15th December to Salem, 60 miles from Lynchburg.

The cost of the road to this point had consumed the whole available amount of the original capital. To supply further means for the prosecution of the work, an issue of $1,500,000, in 6 per cent. bonds, was determined upon, and by an act passed on the 7th December, 1852, an increase of stock to the same amount was authorized. Of these bonds $1,000,000 was subsequently cancelled, the State having granted to the company a loan of $1,000,000. The remaining bonds were issued to individuals. Chiefly with the proceeds of these securities the road was completed to Big Spring, 73 miles, on the 10th August, 1853, and to Christiansburg, 86 miles from Lynchburg, on the 1st April, 1854.

On the 15th March, 1854, a second mortgage for $500,000 was executed, but of this only $23,500 had been issued when the company resolved to cancel the remainder, and execute a new mortgage for $1,000,000, a sum then considered sufficient to complete and equip the road. The enlarged mortgage bonds were issued on the 1st July following, and made payable, principal and interest, in New York. In June, 1854, the road was opened to Central Depot, 96½ miles from Lynchburg; on the 1st July to Newbern, 104½ miles; on the 23d October to Max Meadow, 124⅓ miles, and on the 14th December to Wytheville, 132½ miles.

In the year 1855 the Salt Works Branch was commenced, and the main line completed a further distance of 22 miles. It was opened to Mount Airy, 145½ miles from Lynchburg, on the 16th October, and to Atkins, 154 miles, on the 10th December.

By an act passed on the 13th March, 1856, the capital stock was increased by $500,000. In the same year an income mortgage was executed, and also a special mortgage on the Salt Works Branch. The new capital was taken by the State in preferred stock, and paid for in 6 per cent. registered State bonds. By the end of the year the road was opened to the State line, having been finished to Marion, 160 miles from Lynchburg, on the 1st April; to Glade Spring, 176 miles, on the 20th June; to Abingdon, 189 miles, on the 13th August, and to Bristol, 204.24 miles, on the 1st October. The Salt Works Branch was completed on the 22d September of the same year, at a cost of $245,552. The whole cost of the road and equipment to the end of this year was about $6,750,000, and has since been increased to $7,180,000.

The main road is 204.24 miles long, and is laid with rail weighing from 56 to 60 pounds to the yard. The branch is 9.42 miles long, and is laid with 50 pound rails. The sum of ascents westward is 5,384 feet, and eastward, 4,194 feet—the whole ascent and descent being 9,558 feet, or on the average 46.8 feet per mile. The maximum grade westward is 68 feet per mile for 48.66 miles, and eastward 60 feet per mile for 46.49 miles. The sum of the straight lines is 110.95 miles, and of the curved lines 93.29 miles, the whole curvature being 179.54 degrees, averaging on the curved part of the road 3.38 degrees to the mile. The maximum radius on the main line is 2,730 feet, and the minimum radius 716 feet. The structures on the road are—bridges 242, culverts 420, and buildings, as depots, stations, shops, etc., 210. Miles unfenced 113.52; switches 41; cross-ties, 2,132 to the mile; chairs (cast iron, weighing 18 pounds,) 540 to the mile; total weight of rail 23,083 tons, laid on 220.36 miles of road, branch and sidings, etc., averaging 104.9 tons to the mile.

SHARE CAPITAL—Authorized $5,000,000 in 50,000 $100 shares.

Subscribed by State		$2,300,000
"	by others	1,204,300
Paid in by State—	plain stock	1,693,725
" "	guarantied	76,800
" "	preferred	500,000
Paid in by others—	plain stock	1,124,848
" "	guarantied	51,200
" "	preferred	4,300

The guarantied and preferred stocks call for 6 per cent. dividends.

FUNDED DEBT—$3,175,000, classified as follows:

State of Virginia 6 per cent. loan, $1,000,000—issued 29th August, 1853, and payable, principal in 31 years and interest semi-annually, 1st January and 1st July, in the city of Richmond. This loan is a first lien on the property, franchises and income of the company. A sinking fund of one per cent. per annum paid in semi-annual instalments is provided for its liquidation which if promptly paid to the State will cancel the loan in 34 years.

1st Mortgage 6 per cent. coupon bonds, $500,000—issued in January, 1853, and payable, principal 31st December, 1872, and coupons semi-annually, 1st January and 1st July in the city of New York. The security for this debt is co-relative with that of the State loan. Sinking fund, one per cent. per annum, in semi-annual instalments.

2d (fractional) *Mortgage 6 per cent. coupon bonds*, $23,500—issued 1st January, 1854, and payable principal 31st December, 1868, and coupons semi-annually 1st January and 1st July in the city of New York. The whole provision under this mortgage was for $500,000; but after the issue of the above amount (which realized only $18,360) the remaining bonds were cancelled and a new mortgage for $1,000,000 executed. Sinking fund one per cent. per annum in semi-annual payments.

2d (enlarged) *Mortgage 6 per cent. coupon bonds*, $1,000,000—issued 1st July, 1854, and payable, principal 30th June, 1884, and coupons semi-annually, 1st January and 1st July, in the city of New York. These bonds have preference immediately after the 2d (fractional) bonds. Realized $716,959. Sinking fund one per cent. per annum in semi-annual instalments.

Salt Works Branch 6 per cent. mortgage bonds, $203,000—issued 1st January, 1855, and payable 1st January, 1858-'59-'60 and '61. Interest 1st January and 1st July. Sinking fund $1 per ton on the export tonnage.

Income Mortgage 6 per cent. bonds, $448,500—issued 1st January, 1856, and payable, principal 31st December, 1865, and interest semi-annually 1st January and 1st July in Lynchburg. Sinking fund—all the net income of the company after paying for current expenses, necessary equipment, and the interest and sinking funds of previous loans and interest on the preferred stock.

FLOATING DEBT—$571,958; in detail as follows:—

American Railroad Journal.

Saturday, August 17, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market the past week has been steady and firm, with considerable improvement in Border State bonds, and in shares of several railroads. The most marked advance in these, has been in Galena and Chicago. The market at the close of the week is buoyant, (owing to the successful termination of the negotiations between the Secretary of the Treasury and the Banks. The proposition of the Banks is substantially as follows: "An immediate issue of Treasury Bonds is to be made, dated Aug. 15, 1861, and bearing interest from that date, at 7.30, to extent of $50,000,000. The Banks of New York, Boston and Philadelphia associated, to take jointly this 50 million at par, with the privilege of taking at par an additional 50 million, Oct. 15, by giving their decision to the Department Oct.1; and also at par 50 million Dec.15, by giving their decision Dec. 1, unless said amount shall have been previously subscribed as a National Loan, it being understood and agreed that no other Government Stocks, Bonds, or Treasury Notes, *except those payable on demand*, shall be negotiated or paid out by the Government until Feb. 1, 1862, should the associates avail of both privileges—or until Dec. 15, 1861, should they avail of the first only—or until Oct. 15, 1861, if they take but the present 50 million—except that the Government may negotiate in Europe, or through subscriptions to the National Loan."

The completion of this negotiation has had a very favorable effect upon the share market, and will go far towards promoting a general revival of business. The expenditures of the Government are on the scale of $1,000,000 a day, and the virtual abrogation of the Sub-Treasury will prevent the specie resources in the Banks from being materially decreased. Money remains as abundant as ever. Gold continues to flow in from all quarters, and the amount is likely to be increased from the foreign demand for the National Loan. The high rate of interest it bears, and the improved condition of our political affairs, will cause the loan to be generally sought for in other countries as well as our own.

The traffic of our railways continues to be good. It now appears probable that there will be a large foreign demand for our grain crops, which are, on the whole, very abundant, exceeding an average harvest. With the diminished imports, the balance of trade is likely to continue in our favor, even with the non-exportation of cotton. But we expect to see the next crop of cotton go to market under the auspices of the United States, though not quite so seasonably, perhaps, as usual.

We give elsewhere, the semi-annual statement of the Grand Trunk Railway of Canada; also the annual statement of the Chicago, Burlington and Quincy Railroad. The latter project is one of the most valuable and successful in the West.

Chicago, Burlington and Quincy Railroad.

The annual meeting of the stockholders of this company was held at the office of the company in Chicago on the 21st of June, at which the report of the directors to the shareholders, also the several statements of the treasurer, General Superintendent, and officers in charge of the different departments, were presented and read, and unanimously accepted. We have been favored with a copy of this report, from which we learn that the income for the fiscal year ending April 30, 1861, being earnings on the 138 miles of road between Junction and Galesburg, owned by the company, and their portion of the earnings on the 30 miles of the Galena and Chicago Union Railroad, between Chicago and Junction, used by this company, has been as follows:

From freight		$1,134,854 53
" passengers		335,363 16
" mails and miscellaneous		39,149 91
		$1,508,866 60
The operating expenses were:		
Train, station and water service	$167,997 80	
Re-rolling iron rails	50,518 90	
Repairs of track	97,153 28	
" bridges	34,641 39	
" buildings, etc	10,467 57	
" engines	92,339 10	
" cars	97,974 09	
Loss and damage	4,419 56	
Fuel consumed	89,836 88	
Oil and waste	18,131 53	
Miscellaneous	26,490 91	
Line expenses	63,626 37	
		752,597 47
Earnings less operating expenses		$756,269 13
Add balance to credit of interest and exchange account, including bonds sold		5,561 41
Add balance to credit of income account, May 1, 1860		733,223 56
Total income		$1,495,054 10
From which deduct interest on bonds	$223,501 45	
Taxes	22,450 36	
Transfer office expenses	600 00	
Rent of Ills. Cent'l depot	40,000 01	
Dividend	232,715 00	
For improvement account	85,412 33	
		604,679 15
Leaving a balance of		$890,374 95
Deduct amount paid for $310,000 sinking fund bonds		279,215 11
And there remains a net surplus to the credit of income account of		$611,159 84

Bills receivable and accounts due as per general statement		$217,446 38
Cash in N. Y., Boston and treasury		189,032 69
Value of materials on hand		100,546 41
Cost of steamboats		28,922 09
		$535,947 57
Bills payable	$213,747 21	
Unclaimed dividends, accounts and pay-rolls	41,354 89	
Due ag'ts and other roads	81,871 79	
		336,973 89
Balance		$198,973 68

The cost of the road and appurtenances, as shown by the treasurer's report has been $7,468,-995 92; including advances and payments for account of connecting roads, the aggregate of construction account has been $10,195,256 89. The capital stock of the company is stated at $4,689,-340; and the funded debt, excluding the bonds cancelled by the sinking fund, $4,814,515 62, as follows:

Chicago and Aurora 1st mortgage 7 per cent. bonds, payable July 1, 1867	$274,000 00
Chicago and Aurora 2d mortgage 7 per cent. bonds, payable Oct. 1, 1869	96,000 00
Central Military Tract 1st mortgage 7 per cent. bonds, payable July 1, '64	320,000 00
Central Military Tract 2d mortgage 8 per cent. bonds, payable May 1, 1868	216,000 00
Central Military Tract, 8 per cent. bonds, payable March 1, 1876	48,000 00
Chicago, Burlington and Quincy consolidated 8 per cent. bonds, payable Jan. 1, 1883	2,360,000 00
C., B. & Q. 2d mortgage 4½ and 4 per cent. bonds, payable July 1, 1890	813,000 00
Scrip issued for Northern Cross 2d mortgage bonds, payable in 32 semi-annual instalments, commencing Jan. 1, 1861, without interest, as per contract of June 4, 1860	687,515 62
	$4,814,515 62

The Treasurer's report also shows that the company has paid for account of construction, and for investments and payments for account of connecting roads, $691,401 27 more than the present amount of capital stock and funded debt, which amount has been paid from the income account. The capital stock has been increased the past year $60,000; and the funded debt, $1,892,515 62, (including $687,515 62 scrip, payable in thirty-two semi-annual instalments, which bear no interest).

The investments and payments for account and purchase of connecting roads, during the year, have been $2,014,971 56.

The cost of the road, as shown by the amounts charged to construction and equipment accounts, has not been increased for the past three years. The expenditures for improvements, which are usually charged to these accounts, have been charged in a separate account, although paid out of the income of the road, in order to show the true cost of the operating department of the road. The charges made to this account have been $191,-902 41, of which $106,490 08 have been previously reported. The amount charged to this account the past year has been for improvements of bridges, culverts and cattle guards $25,229 26; new buildings and fixtures, $17,921 05; on South Branch depot grounds, including new slip and basin, $14,675 32; new freight cars, $21,024 90; joint transfer freight house on Union track, $978.-47; and new steam pile driver, $2,586 33—making a total of $85,412 33.

The receipts from the business of the road the past year shows an increase over the previous year of $293,553 88, or a little over 24 per cent. This increase is entirely upon the freight business, the passenger business varying but little from the previous year. The operative expenses have been 49.88 per cent. of the earnings, which shows an improvement of 5.70 per cent. over the previous year. It is believed that these expenses cannot be materially lessened until the road shall have attained considerable more age and permanency of construction. The report says:

This company has continued to occupy and operate that part of the Peoria and Oquawka Railroad between Galesburg and Burlington, under the contract and lease with that company, this company accounting for the earnings over and above paying the operating expenses of the same.

Moss, Harding & Co., the contractors and lessees also of a part of that road, continued to occupy this part of the road for their trains and business up to October last, which resulted in an active competition for the business, and largely reduced the earnings on and from that road.

At that time, an agreement was entered into between Moss, Harding & Co., for the purpose of putting an end to this competition, which had become ruinous to the interests of all parties. That arrangement was made after full consultation with a majority of our stockholders, in accordance, as is believed, with the interests of this company, as well as that of Moss, Harding & Co. The result has been that these two interests are no longer hostile to each other, and upon the road from Peoria west, fair and remunerative rates can be charged for whatever business there may be to be transacted over that road. The property and the leasehold interest of these gentlemen in the road, have been placed in the hands of a trustee, for the security and safety of both parties to the contract.

Their interest in the road arises from a construction contract to build thirty-six miles of road from Galesburg, east toward Peoria, and equip the road from Peoria west, for business, under which contract they hold the road from Peoria to Burlington, subject to the lease to this company, until their debt is fully paid. The amount due them on their contract, as stated by them, is about $1,-700,000, while it is claimed by the Peoria and Oquawka Railroad Company that there is not more than $1,000,000 justly due them.

Their account, however, as well as that of this company, are now the subjects of investigation in the Circuit Court of the United States in Chicago, in a suit there pending to foreclose the second mortgage, between the trustees thereof on the one side, and the Peoria and Oquawka Railroad Company, Moss, Harding & Co., and this Company, as incumbrances upon the property mortgaged, on the other. These investigations are now drawing to a close, and it will soon be ascertained judicially, what is the amount due each party, as well as the amount of the whole of these incumbrances of all kinds, upon the road from Peoria to Burlington. The rights of all parties having been duly ascertained, it will become an easy matter for those interested to determine the policy which they will adopt. It is to be hoped that the Peoria and Oquawka Company may be able and willing to redeem the mortgaged property, though the amount of money due upon and secured by it, perhaps hardly justifies the hope; that amount being, probably, much more than the value of the road in any aspect in which it may be considered. It is unquestionably for the interest of all parties that their respective rights should be early settled, and it is now believed that they will be passed upon by the Court at no distant day.

In pursuance of the agreement made with Moss, Harding & Co., this company has advanced to them a considerable amount of money, for the repayment or safety of which their claim upon the road, in the hands of a trustee as above stated, stands as security; and while it is believed that this Company is perfectly safe, it has by the arrangement ended a hostile competition, perhaps equally destructive to all interests, and as to the expediency of which, those having the management of the companies' affairs, had do doubt.

An agreement was entered into on the 4th day of June, 1860, between this company, by their duly authorized agent, Hon. Charles H. Warren, and a large majority of the first and second mortgage bondholders of the Northern Cross (now Quincy and Chicago) Railroad Company, by which the difficulties growing out of the original contract and agreement with that company, have been settled.

The agreement referred to, provides that this company shall purchase the bonds of the first mortgage bondholders, parties thereto, by an exchange of a like amount of the mortgage bonds of this company, subject to the prior incumbrance, having thirty years to run, with interest payable semi-annually, at the rate of four and one-half per centum per annum for the first fifteen years, and four per centum per annum for the last fifteen years. Also, that they shall purchase the bonds of the second mortgage bondholders, parties to said agreement, by an exchange of the scrip of the company, payable in equal semi-annual payments, extending over sixteen years, without interest. All the past due unpaid coupons of both classes of bonds are included in the purchase of the bonds, and our own bonds and scrip issued in exchange, are only for an amount equal to the principal of the bonds purchased.

There were $1,200,000 of first mortgage bonds issued by that company; $813,000 of these have been exchanged for a like amount of above-named mortgage bonds issued by this company.

There were $811,000 of the second mortgage bonds of that company outstanding, besides the $189,000, owned by this company at the time the agreement was entered int., $692,000 of which have been exchanged for a like amount of scrip.

In making arrangements for the speedy foreclosure of one or both of the mortgages, it has been found expedient for this company to pay and assume the advances made by the Trustees, in payment of interest on the bonds of that company, and for services and expenses of the Trustees, amounting to about $108,479 97, which will be a first lien upon the income of the road. Also to assume and pay the amount advanced by them for depot grounds and buildings for that company, amounting to about $61,524 50, rents for which are a first charge on the income of the road.

By the agreement made with the Trustees, the bondholders who have not become parties to this agreement for the exchange of their bonds, under the agreement of June 4, before mentioned, have the right to do so any time previous to the 1st of July, 1861.

The equipment of the road consists of 62 locomotives (5 of which are leased to the Grand Trunk Railway Co.); 27 first class, 4 second class, 9 baggage and mail, 794 house freight, 19 way freight and conductors', 125 platform, 61 coal, 47 hand, and 40 gravel cars. The company has also a steam pile driver and car, a steam excavator, and a wrecking car.

The number of miles run by locomotives during the year has been: with passenger trains, 256,-572; with freight trains, 560,807; with miscellaneous trains, 183,157—total miles run 1,000,036, being an increase over the previous year of 134,277.

The whole number of passengers transported between Chicago and Burlington and Chicago and Quincy, was 277,817: of which 139,909 were moved east, and 137,916 west. Number transported one mile, 18,533,583, an increase over the previous year of 633,185. Whole number of through passengers east 13,577; do. west, 13,724.

Number of local passengers east, 126,324; do. west, 124,192. The average distance traveled was 67.36 miles. The average fare psid 2.727 cents.

The whole tonnage moved between Galesburg and Chicago 168 miles, was 465,306; between Chicago and Burlington, 210 miles, 471,900; total tons of freight transported to and from Chicago, 395,156. Tons of freight transported one mile between Chicago and Galesburg, 56,242,246; do. between Galesburg and Burlington, 3,248,646; do. between Galesburg and Quincy, 10,199,336—total tons transported one mile, 69,690,228.

The office of the company is at Chicago, Ills. The directors chosen at the annual meeting, June 21, 1861, are as follows:

President.—JOHN VAN NORTWICK.

Directors.—John Van Nortwick, Chauncy S. Colton, James S. Joy, Erastus Corning, John M. Forbes, John W. Brooks, Henry P. Kidder, Sidney Bartlett, Robert S. Watson, William Boott, Edward L. Baker.

Superintendent—CHARLES G. HAMMOND.

Treasurer—AMOS T. HALL.

Grand Trunk Railway.

The following is the report of the London Directors of the Grand Trunk Railway:—

GRAND TRUNK RAILWAY COMPANY'S OFFICES,
21 OLD BROAD STREET, E. C., LONDON,
12th July, 1861.

SIR:—I am desired by the London Directors of the Grand Trunk Railway Company of Canada to forward you herewith the accounts for the half-year ending 31st Dec., 1860.

I am also desired to state at the same time, that the delay in their receipt here, is attributable to the clerical labor of the Montreal office having been exclusively occupied for many weeks in the preparation of returns for the information of the Government Commissioners appointed to report upon the present system and management of the railway. These gentlemen have completed their labors, and a few copies of their report arrived in England by the last mail; but as it had only just been issued in Canada, time had not been afforded to the executive of the company in the Province to reply to it, or rather such portions of it as require replies, as the London Directors learn it is their intention to do; and therefore it is considered advisable, until these answers be received, to leave that document in abeyance for the present.

It will be observed that in the accounts of the half-year several modifications have been made in the forms previously adopted with reference to the statements of capital and revenue accounts, and also as regards the general balances. These amendments have been carried out chiefly in conformity with recommendations from the company's auditors in Montreal, and the accounts, as now published, were so rendered to the Government Commissioners.

The total receipts for the half-year amounted to £367,847, and the working expenses to £311,163; being about 84½ per cent. of the earnings. The rents payable by the company, as provided for by the Acts, are charged against the balance.

The amount of working expenses is much in excess of what the directors had been led to expect; but a reference to the half-yearly report of the assistant-engineer, which is appended, will show that revenue has, during the past six months, been charged with several heavy items formerly carried to capital, amounting to about £40,000; an expenditure which should rather have come out of a special renewal and—had the company ever been in the position to have opened such an account—than out of the current working expenses of one-half year. Had revenue been relieved of this charge, the expenditure would have then been about 73½ per cent. of the receipts; and this per centage would, there appears to be no doubt, have been again reduced had the company had during the last autumn the means of carrying the freight which was offered, and which, according to Mr. Shanly's reports, would have increased the receipts of the line by £4,000 a week for several weeks. The incomplete and insufficient station accommodation and rolling stock alone prevented this increase of about 25 per cent. to the weekly receipts during the months of October and November; and as the busy season is again fast approaching, the same loss, unless the line is more fully equipped, must again recur.

It will be in the recollection of the proprietors, that at their last meeting in January, at which the traffic reports for the larger portion of the period embraced by the accounts now published were submitted, a select Committee, representing each class of the bondholders as well as the shareholders, was appointed to confer with the directors as regards all the affairs of the company, and that the result of the preliminary deliberations of that committee was the preparation and presentation of a petition to the Canadian Parliament in the month of March last. To that petition, a copy of which was sent to each proprietor, the reply was given by the Government that no relief could be afforded to the company that session. Further deliberations on the part of the Select Committee then became necessary, and interviews between its members and the directors accordingly took place as to the next steps to be taken. In the course of these conferences a communication was addressed to the directors by the Committee, forwarding copies or memorials which had been signed in Liverpool, and other places, on the subject of the re-organization of the executive in Canada, and recommending the removal of the domicile of the company to London. Copies of these documents, but without any remarks from the directors here, were sent to Canada for the information of the Board at Montreal, and almost immediately on their receipt, the whole of the directors, with the exception of Mr. Blackwell, who was absent on sick leave, resigned their seats, so as to afford, as is expressed in their resolution, every facility to the London Board in effecting such a re-organization in the management of the company as the bond and shareholders may deem best calculated to promote the interests of the undertaking.

This intelligence was without loss of time communicated to the Select Committee, and at a further interview recently had it was agreed, both by the directors and by the committee, that the time had now arrived for the appointment of a special commissioner to proceed to Canada to investigate the whole position of the company, and without making any other than necessary changes, to conduct any negotiations which may be required to be carried on with the Government in the adjustment of any plan to be agreed upon, until the permanent re-organization can be effected. The directors have accordingly arranged with Mr. Edward Watkin, general manager of the Manchester, Sheffield and Lincolnshire Railway for their mission, and his appointment meets with the entire concurrence of the Select Committee. He will embark for Canada as soon as practicable.

The great delay which has unavoidably taken place in the publication of the accounts to 31st December of 1860, renders—especially in the presence of the more recent information contained in the report just issued by the Select Committee—any detailed observations on them unnecessary. It will be seen, however, that the balance in favor of revenue was applied towards the part payment of the Atlantic and St. Lrwrence rent, as prescribed by the Acts.

From the last monthly report of the different departments the directors learn that the line is now in good running order, but the effects of last winter's unusual severity had told not only heavily as regards maintenance and repairs, both on the way and on the rolling stock, but also as regards the receipts of the line, the traffic during January and February having been several times interrupted for four and five days in succession.

In respect to the future, the directors have convened a meeting of the bond and shareholders for Friday the 19th inst., to take place at the London Tavern in this city, for the purpose of receiving and considering the second report, and the proposals contained therein, of the Select Committee appointed at the meeting held the 2nd January last, when such arrangements will no doubt be adopted as shall be deemed the best in ths general interests of the undertaking.

I have the honor to be,
Sir,
Your most obedient Servant,
JOHN M. GRANT,
Secretary.

Statement of the TOTAL EXPENDITURE of the Company, and of the Sources whence its Funds have been provided, to Dec. 31, 1860.

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations. By M. Crzanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

PART THIRD.

(Continued from p. 579.)

Interior Filling.—The beton serves to give mass to the columns, and to distribute their weight upon the entire base. Usually it bears the platform directly; in that case, the metallic covering is a sort of coffer dam. At the Theiss bridge, the columns with other duties to fulfil, have their solidity with the beton insured by the following arrangements:—

The square wrought iron body surmounting the cast iron column, and upon which the arches abut, is strengthened within by two strong girders, PP, of double T iron, which connect the two opposite faces, and sustain them against the thrusts of the arches.

Beneath these girders is a brick and cut stone masonry, which crowns the beton and bears the large iron wedges driven forcibly under the girders. This square body receives and transmits to the cast iron column the weight of the superstructure and its loads; and it cannot sink without bearing with it the interior girders, the masonry, and the beton.

The beton being perfectly contained in its metalic envelope, its quality is not a matter of importance.

It is said that a bridge has been constructed in America whose columns are filled with sand. If we go to the expense of beton, it is naturally desirable that it should set; now, some observations seem to prove that the setting of the beton in the tubular columns does not depend solely upon the quality of the beton itself.

When, with a view of rebuilding the column at Macon, which, as we have said before, was broken by a boat, it was found in demolishing it that the beton, quite hard at the upper part, became more and more soft as the bottom was approached. At the Theiss bridge, the lower barrel of a column of the first pier had been broken by the interior piling; after repairing it, it was proposed to fill this and the barrel above it with a mass of Portland cement, in which the head of the piles might rest, so that the foot of the column in case of loss of broken drum, might be none the less firmly established.

After having laid carefully many cubic yards of

cement mortar at the bottom of the column, it was found that the setting was far from being as rapid as that in open air, and if the work was stopped a few hours, the lower parts became filled with water, which could clearly be seen to disengaged from the mortar itself.

This observation and that at Macon induced the belief that one of the conditions of the setting of hydraulic mortars is that they should absorb the water, so as to retain the quantity exacted by the chemical reaction of solidification. This condition is far from being fulfilled in the tubular piers, which are air tight, and it is possible that the most hydraulic betons may never set in them. An attempt was made to avoid this evil by mixing with the beton a certain quantity of fragments of dry bricks; it was thought that these porous materials might drain the mass of its excess of water. This possibly hazardous theory seemed, however, to be confirmed by the following experiment: the first pier of the bridge, founded in detestable earth, occasioned uneasiness from the commencement of the work. The down-stream column was the first constructed; it was loaded with 580,800 lbs. of rails for the trial proof; it sunk 1.53 ins. The up-stream column, whose foot was broken, and where brick was introduced in the beton, was proved in the same manner, and only sunk 0.18 in. This result could not be attributed to the cement mortar, which did not occupy the sixth of the total height of the interrupted masonry.

The beton of the columns is generally commenced with a plugging in cement from two to three feet thick, for the purpose of closing the bottom of the column against the entrance of water occasioned by a momentary stopping of the air-pump, and by a diminution of the pressure. This precaution was not necessary at Szegedin, where it was determined in the execution of the work to sustain the foot of the columns by an interior piling, which by pressing the foundation rendered it perfectly staunch.

This piling is composed for each column of twelve spruce piles driven to a refusal of 5.9 ins. for 10 blows of a 2,200 lbs. ram, falling 19.68 ft. It is admitted that each of these piles may bear about 50 tons each. The whole load to be borne with that of the trial proof was 1,144,000 lbs.

At the general proof of the bridge, the sinking observed upon the piers was from .08 to .12 in. The two columns of the first pier already proved, each sunk .12 inch more. All the columns supported the test weight for twenty-four hours; some during thirty-six hours: frequent observations were made upon them, and it was remarked that after twelve hours of loading the sinking had nearly stopped.

External Defences.—The piers of the Theiss bridge were protected against undermining by a circuit of piles, a mass of beton, and by enrockments, for the purpose of strengthening the foot of the piers, and for diminishing the leverage of the transverse thrusts of the arches.

The breaking up of ice and the drifting boats are kept clear of the pier by a timber ice breaker, presenting to the current an inclined edge strengthened with iron, and spreading towards the pier so as to cover its whole width without resting upon it.

Modes of Execution.—The barrels of the Theiss bridge were cast in Glasgow, and brought in a rough state to Szegedin; they were turned and pierced in the workshop of the bridge.

The lathe was formed of a horizontal platform, upon which was placed the barrel, accurately centered and turning with it. Two tools fixed in a mass of masonry and provided with the means of adjustment, planed the two surfaces at the same time.

From twelve to fifteen hours were required to prepare a tube.

The drilling was done with the usual machinery; two drills, working simultaneously, pierced 96 holes in 30 hours, including the time of fitting up.

It was only after a trial made of two consecutive tubes placed on each other, that they were carried to the scaffolding of the pier.

These scaffolds were composed of five frames, spaced 13.12 feet apart. There was then in the inner gallery of the scaffolds four compartments of 13.12 ft. by 16.4 ft.; two for the columns, and two, one on the up stream, the other on the down-stream side, serving as depots; the side galleries formed by the inclined braces afforded passage to and fro. The service bridge was connected with the up-stream compartment; upon the crown of the scaffold, one or two windlasses were worked upon a car.

These scaffolds had the serious inconvenience of not affording sufficient room around the columns, and of yielding too easily to the inclinations of their guides.

The landing of a column upon the bottom of the river was an interesting operation. There were two processes. When the water was shallow and the scaffolds high, the column was constructed upon a temporary platform placed as low as possible; then, being seized at the head by the windlasses, it was allowed to descend. When the water was deep and the scaffolds failing in height, which was the case at Szegedin, the operation was twofold; a first part of the column was lowered and hung upon long iron hooks, whose heads were raised above the water and fastened to the scaffold. Upon this base, nearly all submerged, was raised the remainder of the column, which was then lowered entire.

A wrought iron cross bar with three branches took hold of the upper flanch of the top barrel through six bolt holes. This was suspended to a wrought iron beam which balanced the action of the two windlasses.

The column weighs 66,000 lbs.; there are eight men at each windlass; each block has 4 sheeves and a fall of 1.97 inches.

The second process consists of fitting a wooden bottom to the lower barrel, and in floating the column; it is well in this case to reserve the means of moderating, and, at need, of stopping, the entrance of the water, so as to have full control of the column during its establishment.

A column weighing 30 tons thus placed upon the bottom of the river, never sinks more than a few centimetres (cent. = 0.39 in.) if the soil is of gravel or compact clay; though in a bottom of sand and mud some of the columns have sunk 3.28 ft.

Before placing the pneumatic fixtures upon the column, care is taken to instal upon the flanches of the upper joint, that separating the first drum from the second, a flooring, a windlass and its chain, some pieces of wood, shovels, picks, &c., and generally all the materials whose dimensions do not admit of being passed through the air chamber; at the same time, the water syphon tube is located by being attached to the different flanches.

Pneumatic Bell.—The pneumatic receiver is a cylindrical drum of rolled iron of the same diameter as the cast iron column, open at the bottom, and closed on top by a flooring or roof. The lower circular edge is provided with an angle-iron pierced with holes corresponding with those of the upper flanch of the column. A strip of india-rubber being placed between the receiver and the column, all that is needed for the joint is, to bolt strongly the flanch and the angle-iron.

The roof of the receiver is traversed by two bodies, M M, nearly cylindrical, of cast iron, in a vertical direction, having about two-thirds of their height within the receiver, and the remainder jutting beyond it.

These two similar and independent cylinders form each an air chamber, which may be closed at the top by a circular valve opening inwards, and turning upon a horizontal hinge; and at the bottom, by a vertical rectangular door, cutting the cylindrical body parallel to its edges, opening round a vertical hinge from the interior of the chamber towards the interior of the column. The door and valve are lined with strips of india-rubber. Different pipes and cocks, D, allow communication between the interior of the air chamber with the exterior of the reservoir or with the atmosphere; these tubes are manœuvred either by men placed under the receiver upon the interior flooring, or by those placed under the air chamber, or by those on the outside.

The remaining apparatus consists of two valve fixtures, to which are applied two air tubes, communicating with the pumps by a safety valve, a metallic manometer (Bourdon's), two other valves affording a rapid escape of the interior pressure, a bend of a syphon, with a cock upon the inside. All these contrivances are fitted to the cylindrical sides of the reservoir, which also supports a series of brackets, upon which are placed the cast iron counterweights.

These counterweights are of cast iron segments, whose form is adapted to the contours and projections of the bell. They are united to each other in pieces of 11,000 lbs. weight. With some modifications in the form of the brackets, the ordinary rails may be used.

The air and syphon tubes are of iron, and have on one side a collar, and on the other a wormed mouth-piece. The collar of the one pipe enters the mouth-piece of the other, and the latter turns independently of the pipe which bears it, so that the joints can be tightened without dismounting the pipe. Some india-rubber joints give a pliability to the system needed to follow the motions of the boats and those of the columns.

(To be continued.)

Journal of Railroad Law.

ORGANIZATION OF RAILROAD COMPANIES UNDER THE GENERAL RAILROAD ACT OF NEW YORK. TWO WAYS ONLY BY WHICH INDIVIDUALS MAY BECOME STOCKHOLDERS.

The case of the Buffalo and New York City Railroad Company *vs.* Owen, decided at a General Term of the New York Supreme Court holds, that there are but two methods in which a person may become a stockholder in a railroad company incorporated under the general railroad act of the State of New York, passed in 1850, viz: by subscribing the articles of association and becoming a member of the corporation, as provided in sections first and second of the statute; or by subscribing to the capital stock, in the book opened by the directors, after the corporation is in existence. No one who has only signed articles of association before the corporation came into being, is a corporator, or a member of the corporation, unless the articles so signed by him have been filed in the office of the Secretary of State, as required by the statute.

The articles of association of the company were prepared, July 11, 1851, pursuant to the general railroad act of 1850, and signed by some 250 persons, promising to take an amount of stock which was sufficient according to the statute. A proper affidavit was annexed to the articles, and those articles were filed in the office of the Secretary of State on the 12th of March, 1852, and the plaintiffs became duly incorporated. Articles exactly like those filed were also used for the purpose of obtaining subscriptions; and the defendant became a subscriber to one of these articles, for two shares, some time prior to the making of the affidavit to the articles which were filed. The articles subscribed by the defendant were never filed in the office of the Secretary of State.

The action was brought to recover the amount of the defendant's subscription. The Court at the trial directed judgment for the defendant, and the plaintiff appealed. The following is the judgment of the General Term:

MARVIN, P. J. The case presents a single question. The proprietors of a railroad prepared articles of association in due form, in which thirteen directors were named; and as a matter of convenience, duplicated those articles for the purpose

of obtaining subscribers. To one set of these articles, a sufficient number of subscribers, and a sufficient amount of stock were obtained to justify the making of the affidavit required by the general railroad act; and such affidavit was made, and the articles and the affidavit were filed, and the plaintiff became duly incorporated. The defendant and some others subscribed a set of articles, which were not filed in the office of the Secretary of State, and to which no affidavit was annexed, prior to the making of the affidavit and filing the articles. * * * * * * * *

By the act of 1850, persons not less than twenty-five in number, may form the company, and for such purposes may make and sign articles of association, in which shall be stated the name of the company, &c., and the names of the thirteen directors. Each subscriber to such articles is to subscribe his name, place of business, and the number of shares of stock he agrees to take in said company. The articles of association may be filed, upon complying with certain provisions of the act, in the office of the Secretary of State, &c., "and therefore, the persons who have so subscribed such articles of association, and all persons who shall become stockholders in such company, shall be a corporation," &c. It is declared that "such articles of association shall not be filed and recorded in the office of the Secretary of State, until at least $1,000 of stock for every mile of railroad proposed to be made is subscribed thereto, and ten per cent. paid therein in good faith," &c.; nor until there is indorsed or annexed thereto an affidavit of certain facts.

Sec. 4, authorizes the directors, when the articles, &c., are filed, to open books of subscription for further stock, in case the whole capital stock has not been subscribed. The defendant was not a subscriber for stock upon any book of subscription opened after the corporation came into being. If he is liable at all, he is so, as one of the persons acting in the formation of the company. He subscribed one set of articles, but those articles were never filed; others, precisely similar, were filed with the required affidavit annexed. Did the defendant become a corporator?

The persons who are authorized to form the company are authorized to make and sign articles of association, and then complying with the provisions of the second section, "such articles of association may be filed in the office of the Secretary of State, who shall endorse them on the day they are filed, and record the same in a book to be provided by him for that purpose; and thereupon the persons who have subscribed such articles of association, and persons who shall become stockholders in such company, shall be a corporation by the name specified in such articles of association." Let us now read the second section. "Such articles of association shall not be filed, &c., until at least $1,000 of stock for every mile of road proposed to be made is *subscribed thereto, &c.*," nor until there is endorsed thereon, or annexed thereto an affidavit of certain facts. It is quite clear that there must be $1,000 of stock per mile, subscribed to the articles of association filed; and it is also entirely clear that those persons who have subscribed stock to the articles filed, became corporators and form a corporation. Are those who have signed articles of association not filed, and before any are filed, and which are copies or duplicates of those filed, excluded as members of the corporation? or, in other words, are they liable to the corporation upon such subscription.* *

As I understand the statute only those who have subscribed the articles of association *that are filed* become corporators and constitute the corporation, and those who subsequently subscribe stock in the books opened by the directors for that purpose. The statute speaks of *such articles* of association, that is, the articles that have been filed, and of the persons who subscribed them being a corporation. The case of *Mason* does not help us a particle, for in that case the articles subscribed by the defendant were filed, and the defendant was clearly a corporator. Justice Wright in *Tibbits'* case, takes notice that it is the *stockholders* from whom the directors are authorized to require payment, and cites § 9 of the act of 1848. I see that by the 7th section of the act of 1850, the directors may require the subscribers to the capital stock to pay the amount subscribed. But I do not think this change in the language is sufficient to effect the question. The defendant was not a subscriber for stock after the company organized. He proposed to be one of the corporation, and unless he became such he is not, in my opinion, liable. He is not liable upon any common law notion of a contract. If liable at all, his liability must be found in the statute. At the time he entered into the engagement no corporation existed. There is a class of cases where an individual entered into a contract with an existing corporation, or with individuals, and in such cases the contract may be governed by common law principles. But in the class of cases arising under special statutes which create the liability, the case must be brought within the statute; and when it is, the common law principles touching *consideration and parties* to the contract at the time it was made, have little to do with the case. The liability is a statutary liability. As I understand the statute in the present case, there are two modes in which a subscriber to stock may become a member of the corporation or a stockholder. One mode is by subscribing the articles of association and becoming a member of the corporation, as provided in section one and two; and the other is by subscribing to the capital stock in the book opened by the directors, after the corporation is in existence. Now if the defendant did not become a member of the corporation—if he was not one of the original corporators—he is not, in my opinion liable. And I am of the opinion that no one who has only signed articles of association before the corporation came into being, is a corporator or a member of the corporation, unless the articles so subscribed by him have been filed as required by the statute. By omitting to file the articles subscribed by the defendant the corporators have rejected him as a proposed member of the corporation, and have no claims upon him.

It is not necessary to inquire whether, had he complained, he had rights which would have been protected. The judgment must be affirmed.

RAILROAD IRON.

THE subscriber is prepared to sell AMERICAN and ENGLISH **RAILROAD IRON, CHAIRS, SPIKES, CARS** and **LOCOMOTIVES,** at the lowest market price, and securities taken in part payment.

B. F. FRENCH,
Cor. Nassau and Cedar Sts., N. Y.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, Aug. 8, 1861.

SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend of Three Per Cent. on the Capital Stock thereof, payable on the Twentieth day of August instant, upon Stock registered at New York, Boston, or Albany, and on the Twentieth day of September next, upon Stock registered at London. Stockholders whose Stock is registered at New York will receive their Dividends at the office of DUNCAN, SHERMAN & CO.; those whose Stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose Stock is registered at Albany, at the ALBANY CITY BANK; those whose Stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The Transfer Books which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Friday, the Twenty-third day of August instant.

JOHN V. L. PRUYN,
33 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 24, 1861.

THE Transfer Books of this Company will be closed at the close of business on Wednesday, the 31st day of July instant, and will be re-opened on the morning of Friday, the twenty-third day of August next.

JOHN V. L. PRUYN,
4t30 Treasurer *pro tem.*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

RAILROAD IRON.
THE RENSSELAER IRON COMPANY,
TROY, N. Y.,

OFFER Rails of their own manufacture deliverable as may be desired by purchasers.

OLD RAILS
received in exchange for new, or for re-manufacturing.

JOHN A. GRISWOLD, Agent,
TROY, N. Y.

New York Agency:
BUSSING, CROCKER & DODGE,
32 Cliff St.

RAILROAD IRON.

THE subscriber is prepared to enter into **Contracts for RAILS** delivered at an English port or at a port in the United States.

JAMES TINKER,
54 Exchange Place,
NEW YORK.

Erie Rails, 57 to 58 lbs. per yard, on hand in NEW YORK and NEW ORLEANS.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States

M. K. JESUP & COMP'Y,
44 Exchange Place.
New York, 1st June, 1859.

RAILROAD IRON.

THE UNDERSIGNED are prepared to contract for the sale of

RAILROAD IRON

on advantageous terms, delivered at ports of England, Wales, or the United States.

MEAD & BELL,
13 Cliff Street, N. Y.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. Contracts negotiated by

E. A. & S. W. HOPKINS,
70 Beaver st., New York.

RAILROAD IRON.

CONTRACTS for RAILS, at a fixed price or on commission, delivered at an English port, or at a port in the United States, will be made by the undersigned,

THEODORE DEHON,
10 Wall st., near Broadway, N. Y.
500 tons T Rails on hand, 54 to 57 lbs. per lineal yard.

RAILROAD IRON AND COMMON BARS.

THE undersigned, sole Agents to Messrs. GUEST & Co., the proprietors of the Dowlais Iron Works, near Cardiff, South Wales, are duly authorized to contract for the sale of their G. L. Railroad Iron, and Common Bars, on most advantageous terms.

R. & J. MAKIN, 70 Broad st.

SPECIAL NOTICE. Transfer of LETTERS PATENT.

WHEREAS Letters Patent, bearing date Nov. 1st, 1853, were granted by the Government of the United States to George Williston, of Brunswick, County of Cumberland, and State of Maine, for a Machine to straighten and curve Railroad Iron, giving and granting to said George Williston, his heirs, executors and assigns, for the terms of fourteen years from the date of said Letters Patent, the full and exclusive right and liberty of making, using and vending to others to be used, the said Machine, and whereas said George Williston sold and transferred one undivided half of his entire interest in said Letters Patent, to Wm. H. Lunt, of Bowdoinham, County of Lincoln and State of Maine, as will appear by reference to deed, date Nov. 2, 1853, recorded in the Patent Office at Washington, Nov. 9, 1853, and whereas the said George Williston and Wm. H. Lunt, have on this 31st day of May, 1861, sold and transferred their entire interest in said Letters Patent, to Albert Bridges and Joel C. Lane, Merchants in the City of New York, doing business under the name and firm of A. BRIDGES & CO.,—THEREFORE, we, the undersigned, hereby notify and warn all persons, against manufacturing, vending or purchasing said Machines from any person or persons whatever, except from us who have and hold the exclusive right thereto.
